Take notice that Wesley West (Applicant), an individual whose address is P. O. Box 1656, Houston 1, Texas, filed an application on November 29, 1954, for a certificate of public convenience and necessity, pursuant to section 7 of the Natural Gas Act, authorizing Applicant to render service as hereinafter described, subject to the jurisdiction of the Commission, all as more fully represented in the application which is on file with the Commission and open for public inspection.

Applicant sells natural gas produced from the Vienna Field, Lavaca County, Texas, to Texas Eastern Transmission Corporation, which transports and sells the gas in interstate commerce.

This matter is one that should be disposed of as promptly as possible under the applicable rules and regulations and to that end:

Take further notice that, pursuant to the authority contained in and subject to the jurisdiction conferred upon the Federal Power Commission by sections 7 and 15 of the Natural Gas Act, and the Commission's rules of practice and procedure, a hearing will be held on June 8, 1955, at 9:30 a. m., e. d. s. t., in a Hearing Room of the Federal Power Commission, 441 G Street NW., Washington, D. C., concerning the matters involved in and the issues presented by such application: *Provided, however,* That the Commission may, after a non-contested hearing, dispose of the proceedings pursuant to the provisions of § 1.30 (c) (1) or (2) of the Commission's rules of practice and procedure.

Protests or petitions to intervene may be filed with the Federal Power Commission, Washington 25, D. C., in accordance with the rules of practice and procedure (18 CFR 1.8 or 1.10) on or before June 1, 1955. Failure of any party to appear at and participate in the hearing shall be construed as waiver of and concurrence in omission herein of the intermediate decision procedure in cases where a request therefor is made.

[Docket Nos. G-4308—G-4310, G-4314—G-4316, G-4328]

COLUMBIAN FUEL CORP. ET AL.

NOTICE OF POSTPONEMENT OF HEARING

MAY 12, 1955.

In the matters of Columbian Fuel Corporation, Docket Nos. G-4308, G-4310; United Carbon Company, Inc. (Maryland), Docket Nos. G-4309 and G-4316; United Producing Company, Inc., Docket Nos. G-4314, G-4328; Coltexo Corporation, Docket No. G-4315.

Upon consideration of the motion, filed May 10, 1955, by Applicants in the above-designated matters for postponement of hearing now scheduled for May 18, 1955;

Notice is hereby given that the hearing now scheduled for May 18, 1955, is hereby postponed to 10:00 a. m., e. d. s. t., September 6, 1955, in the Commission's Hearing Room, 441 G Street NW., Washington, D. C.

[SEAL] LEON M. FUQUAY, *Secretary.*

[F. R. Doc. 55-4070; Filed, May 18, 1955; 8:50 a. m.]

[Docket Nos. G-6026, G-6107, G-6590, G-6909, G-6990, G-7050, G-7409]

CONTINENTAL OIL CO. ET AL.

NOTICE OF APPLICATIONS AND ORDER CONSOLIDATING PROCEEDINGS AND FIXING DATE OF HEARING

In the matters of Continental Oil Company, Docket No. G-6590; Knox Oil Company, Docket No. G-7050; Wyopark Oil Company, Docket No. G-6909; Oxford Oil Company, Docket No. G-6990; Fred M. Manning, Docket No. G-6026; Estate of E. E. Brown, Docket No. G-6107; Fred Goodstein, Docket No. G-7409.

Take notice that on November 30, 1954, Continental Oil Company (Continental) filed an application in Docket No. G-6590 for a certificate of public convenience and necessity, authorizing the sale of natural gas in interstate commerce, subject to the jurisdiction of the Commission, as hereinafter described and as more fully described in the application which is on file with the Commission and open for public inspection.

Continental produces natural gas from the Cloverly-Morrison group of sands in the South Elk Basin Unit Area, Park County, Wyoming, which it sells to Montana Dakota Utilities Company (Montana Dakota). The gas is transported and sold in interstate commerce by Montana Dakota.

Concurrently with its certificate application, Continental filed a petition for a declaratory order, requesting a determination of the Commission's jurisdiction over the sales of natural gas by Continental to Montana Dakota.

Take notice further that similar applications for certificates of public convenience and necessity, authorizing the sale of natural gas in interstate commerce subject to the jurisdiction of the Commission, as hereinafter described and as more fully described in the applications which are on file with the Commission and open for public inspection, were filed by the following Applicants in the dockets and on the dates indicated:

Applicant	Docket No.	Date filed
Knox Oil Co.	G-7050	Nov. 30, 1954
Wyopark Oil Co.	G-6909	Do.
Oxford Oil Co.	G-6990	Do.
Fred M. Manning	G-6026	Nov. 26, 1954
Estate of E. E. Brown	G-6107	Do.
Fred Goodstein	G-7409	Dec. 2, 1954

The above-named Applicants also produce natural gas from the Cloverly-Morrison group of sands in the South Elk Basin Unit Area, Park County, Wyoming, which they sell to Montana Dakota. The gas is transported and sold in interstate commerce by Montana Dakota.

The Commission finds:

(1) It is reasonable in the public interest and in aid of administration of the Natural Gas Act that the certificate proceedings in Docket Nos. G-6590, G-7050, G-6909, G-6990, G-6026, G-6107, and G-7409 be consolidated for the purpose of hearing and that the consolidated proceedings should be set for June 14, 1955.

(2) It is reasonable in the public interest and in aid of administration of the Natural Gas Act that Continental's petition for a declaratory order filed November 30, 1954, in Docket No. G-6590, be set for hearing on June 14, 1955, together with the hearing upon its application for a certificate of public convenience and necessity.

The Commission orders:

(A) Pursuant to the authority contained in and subject to the jurisdiction conferred upon the Federal Power Commission by sections 7, 15, and 16 of the Natural Gas Act and the Commission's general rules and regulations (18 CFR, Chapter I), the proceedings in the above-entitled Docket Nos. G-6590, G-7050, G-6909, G-6990, G-6026, G-6107, and G-7409 and Continental's petition for a declaratory order filed on November 30, 1954, in Docket No. G-6590, are hereby consolidated for purposes of hearing, and, further, such hearing in the consolidated proceedings be set for hearing on June 14, 1955, at 10:00 a. m., e. d. s. t., in a Hearing Room of the Federal Power Commission, 441 G Street NW., Washington, D. C., concerning the matters involved in and the issues presented by the above-entitled proceedings and petition for declaratory order.

(B) Protests or petitions to intervene in the above-entitled proceedings may be filed with the Federal Power Commission, Washington 25, D. C., in accordance with the rules of practice and procedure (18 CFR 1.8 or 1.10) on or before June 3, 1955.

(C) Interested State commission may participate as provided by §§ 1.8 and 1.37 (f) of the Commission's rules of practice and procedure (18 CFR 1.8 or 1.37 (f)).

Adopted: May 11, 1955.

Issued: May 13, 1955.

By the Commission.

SECURITIES AND EXCHANGE COMMISSION

[File No. 1-425]

DEVOE & REYNOLDS CO., INC.

NOTICE OF APPLICATION TO STRIKE FROM LISTING AND REGISTRATION, AND OF OPPORTUNITY FOR HEARING

MAY 13, 1955.

In the matter of Devoe & Reynolds Company, Inc., Class B Common Stock, $1 Par Value; File No. 1-425.

American Stock Exchange has made application, pursuant to section 12 (d) of the Securities Exchange Act of 1934 and Rule X-12D2-1 (b) promulgated thereunder, to strike the above named security from listing and registration thereon.

The reasons alleged in the application for striking this security from listing and registration include the following:

By prospectus dated January 27, 1955, holders of the subject issue were offered the privilege of exchanging each share into 1⅓ shares of Merritt-Chapman & Scott Corporation common stock. The offer finally expired April 15, 1955.

Exclusive of 176,638 shares acquired by the offerer and 37,932 shares in the treasury of the issuer, there remain only 5,387 shares held by 45 stockholders.

In the opinion of its Committee on Securities, the number of shares remaining in public hands has become so reduced as to make inadvisable further dealings therein upon the Exchange.

Upon receipt of a request, on or before May 31, 1955, from any interested person for a hearing in regard to terms to be imposed upon the delisting of this security, the Commission will determine whether to set the matter down for hearing. Such request should state briefly the nature of the interest of the person requesting the hearing and the position he proposes to take at the hearing with respect to imposition of terms. In addition, any interested person may submit his views or any additional facts bearing on this application by means of a letter addressed to the Secretary of the Securities and Exchange Commission, Washington 25, D. C. If no one requests a hearing on this matter, this application will be determined by order of the Commission on the basis of the facts stated in the application and other information contained in the official file of the Commission pertaining to the matter.

By the Commission.

[SEAL] ORVAL L. DUBOIS, *Secretary.*

[F. R. Doc. 55-4061; Filed, May 18, 1955; 8:49 a. m.]

[File No. 7-1676]

UNION ELECTRIC CO. OF MISSOURI

NOTICE OF APPLICATION FOR UNLISTED TRADING PRIVILEGES, AND OF OPPORTUNITY FOR HEARING

At a regular session of the Securities and Exchange Commission, held at its office in the city of Washington, D. C., on the 13th day of May 1955.

The Midwest Stock Exchange pursuant to section 12 (f) (2) of the Securities Exchange Act of 1934 and Rule X-12F-1 thereunder, has made application for unlisted trading privileges in the Common Stock, $10 Par Value, of Union Electric Company of Missouri, a security listed and registered on the New York Stock Exchange.

Rule X-12F-1 provides that the applicant shall furnish a copy of the application to the issuer and to every exchange on which the security is listed or already admitted to unlisted trading privileges. The application is available for public inspection at the Commission's principal office in Washington, D. C.

Notice is hereby given that, upon request of any interested person received prior to May 31, 1955, the Commission will set this matter down for hearing. In addition, any interested person may submit his views or any additional facts bearing on this application by means of a letter addressed to the Secretary of the Securities and Exchange Commission, Washington, D. C. If no one requests a hearing on this matter, this application will be determined by order of the Commission on the basis of the facts stated in the application, and other information contained in the official file of the Commission pertaining to this matter.

By the Commission.

STANDARD GAS AND ELECTRIC CO., ET AL.

ORDER RELEASING JURISDICTION OVER FEE AND EXPENSES FOR LEGAL SERVICES

MAY 13, 1955.

The above-entitled proceedings involve plans filed pursuant to section 11 (e) of the Public Utility Holding Company Act of 1935 ("act") to enable the system of Standard Gas and Electric Company, a registered holding company, to effectuate compliance with section 11 (b) of the act. In each of the proceedings orders have been entered by the Commission reserving jurisdiction with respect to the fees and expenses paid or to be paid by the several companies concerned with these plans for services rendered in connection therewith and related proceedings.

Pursuant to due notice a public hearing was held with respect to an application for an allowance of a fee and reimbursement of expenses filed by the associated law firms of Guggenheimer & Untermyer; Guggenheimer, Untermyer, Goodrich & Amram; and Connolly, Cooch and Bove.

The Commission having considered the entire record and having this day made and filed its Findings and Opinion herein approving a proposed settlement of the aforesaid claim for a fee and expenses:

It is ordered, That the jurisdiction heretofore reserved with respect to the fee and expenses of the aforesaid law firms be, and the same is hereby, released on condition that the payment of $770,000 as a fee and $9,327.52 as expenses over and above the $91,000 heretofore paid by Standard Gas and Electric Company be made by said company only after approval of the proposed settlement by the United States District Court for the District of Delaware has been obtained and an order of enforcement entered and, further, on condition that out of such payment, or otherwise, said firms refund to their clients, Christian A. Johnson and W. Kent Cochran, the sum of $58,729.68.

By the Commission.

[File No. 68-164]

PENNSYLVANIA ELECTRIC CO.

ORDER MAKING EFFECTIVE DECLARATION REGARDING INCREASE IN NUMBER OF AUTHORIZED SHARES OF STOCK

MAY 13, 1955.

Pennsylvania Electric Company ("Penelec"), a direct public utility subsidiary company of Associated Electric Company ("Aelec"), a registered holding company, and an indirect subsidiary company of General Public Utilities Corporation ("GPU"), also a registered holding company, having filed a declaration and amendments thereto pursuant to sections 6 (a) (2), 7, and 12 (e) of the Public Utility Holding Company Act of 1935 ("act"), and Rules U-62 and U-65 promulgated thereunder regarding certain proposed transactions which are summarized as follows:

Penelec proposes to increase its authorized capital stock from $99,000,000, consisting of 370,000 shares of authorized preferred stock of the par value of $100 per share, of which 315,000 shares are presently outstanding, and 3,100,000 shares of authorized common stock of the par value of $20 per share, of which 2,711,750 shares are presently outstanding, to $112,500,000, consisting of 475,000 shares of authorized preferred stock of the par value of $100 per share and 3,250,000 shares of authorized common stock of the par value of $20 per share, without other change in the rights of such two classes of stock.

The proposed transactions will be voted upon at a special meeting of stockholders of Penelec to be held on May 24, 1955. It is stated that the increase of the number of authorized shares of preferred stock requires the consent and approval of the holders of a majority of the outstanding preferred stock and also a favorable vote of the persons holding the larger amount in value of the total capital stock of Penelec, and that Aelec, as the owner of all the common stock of Penelec, has advised Penelec that it proposes to vote in favor of such increase. It is further stated that the increase in the number of shares of authorized common stock requires the consent and approval of Aelec as the only holder of Penelec's outstanding common stock, and that Aelec, as such holder, has advised Penelec that it proposes to vote in favor of such increase.

Penelec has solicited proxies from its preferred stockholders and has filed a declaration pursuant to section 12 (e) of the act and Rule U-62 promulgated thereunder regarding its proposed proxy solicitation material, which declaration the Commission by its order of May 2, 1955 permitted to become effective.

Penelec states that expenses in connection with the proxy solicitation other than ordinary expenses in connection with preparing, assembling and mailing the proxy material, should not be in excess of $1,000, and that no charges will be made by Penelec's counsel and independent auditors at this time, but that their compensation in connection with the subsequent issuance by Penelec of senior securities may include compensation for services rendered in connection with matters covered by the present filing.

Due notice of the filing of said declaration having been given in the manner prescribed in Rule U-23 promulgated under said act, and no hearing having been requested of, or ordered by, the Commission; and the Commission finding that the applicable provisions of the act and the rules promulgated thereunder are satisfied, that the estimated expenses, if they do not exceed the estimates, are not unreasonable, and that the declaration, as amended, should be permitted to become effective forthwith:

It is ordered, Pursuant to Rule U-23 and the applicable provisions of the act, that said declaration, as amended, be, and the same hereby is, permitted to become effective forthwith, subject to the terms and conditions prescribed in Rule U-24 and subject to the further condition that the foregoing transaction shall not be consummated unless and until the requisite vote of stockholders shall have been obtained.

By the Commission.

[FHA Instruction 465.12]

PART 373—FARM HOUSING LOANS

TERMS AND CONDITIONS OF TRANSFERS; REPAYMENT SCHEDULE

Section 373.25 (a), Title 6, Code of Federal Regulations (19 F. R. 6850) is revised to include accrued interest as part of the dept to be assumed and to provide for the repayment of any delinquency within a period of two years. The revision of paragraph (a) is as follows:

§ 373.25 *General terms and conditions of transfers*—(a) *Transferee's repayment schedule.* The Farm Housing debt, including principal and accrued interest, assumed by the transferee will be retired within the remaining period of time provided in the note(s), bond(s), or agreement(s) which were executed by the transferor in connection with his Farm Housing obligation.

(1) The annual installment on Form FHA–97 will be the amount of the annual installment provided by the note(s) of the transferor; however, the first installment, and where necessary the second installment, may be increased by an amount sufficient to pay a delinquency in compliance with subparagraph (2) of this paragraph. The first installment will be payable on the first December 31 following the date of Form FHA–97.

(2) Any delinquency of the transferor's account ordinarily will be collected by the County Supervisor prior to or at the time of the transfer; however, in an exceptional case if it is not possible to transfer the farm to a purchaser who will pay the delinquency on or before the date of the transfer, the transferee may be permitted to remove the delinquency within not more than one year from the first December 31 following the date of Form FHA–97. Normally the delinquency in such a case will be added to the first annual installment shown on Form FHA–97. When it is not possible for the transferee to pay the full amount of the delinquency with his first installment, any balance of the delinquency will be included in the second installment. In such a case, the following will be typed immediately below the second line on the reverse of Form FHA–97, "the second installment shall be in the amount of _____ dollars ($____), payable on or before December 31, 19____;".

(Sec. 510 (g), 62 Stat. 438; 42 U. S. C. 1480 (g). Interprets or applies sec. 510 (c), 63 Stat. 437; 42 U. S. C. 1480 (c))

Dated this 16th day of May 1955.

Chapter IV—Commodity Stabilization Service and Commodity Credit Corporation, Department of Agriculture

PART 464—TOBACCO

SUBPART—1955 TOBACCO LOAN PROGRAM

Statement with respect to the tobacco price support loan program for the 1955–56 marketing year—1955 crop—formulated by the Commodity Credit Corporation and Commodity Stabilization Service (hereinafter referred to, respectively, as "CCC" and "CSS").

Sec.
464.701 Administration.
464.702 Level of loans.
464.703 Availability of price support.
464.704 Deduction from loans.
464.705 Interest rate, recourse, and distribution of net gains.
464.706 Maturity date.
464.707 Eligible producer.
464.708 Eligible tobacco.

AUTHORITY: §§ 464.701 to 464.708 issued under sec. 4, 62 Stat. 1070, as amended; 15 U. S. C. 714b. Interpret or apply sec. 5, 62 Stat. 1072, secs. 101, 401, 63 Stat. 1051, as amended, 1054, sec. 2, 59 Stat. 506; 15 U. S. C. 714c, 7 U. S. C. 1441, 1421, 1312 note.

§ 464.701 *Administration.* (a) This program will be administered by the Tobacco Division, CSS, under the general direction and supervision of the Executive Vice President, CCC. The program will be carried out in the field by producer associations or other responsible organizations (hereinafter referred to as "associations") under contract with CCC, acting for groups of producers. The names of such associations may be obtained from the Tobacco Division, CSS, United States Departmentof Agriculture, Washington 25, D. C.

(b) CCC will make loans to associations which in turn will make advances to eligible producers either directly or through auction warehouses. Loans made to associations will include not only the initial loan value of the tobacco, but also advances for services performed in receiving, packing, storing, and marketing of tobacco pledged for loan. Associations will be authorized to enter into contracts for these services through the usual trade channels.

§ 464.702 *Level of loans.* (a) As required by statute, the level of price support to eligible producers will be 90 percent of the respective parity prices on those types of tobacco for which marketing quotas are in effect, except that fire cured and dark air-cured (including Virginia sun-cured) tobacco will be supported at 75 percent and 66⅔ percent, respectively, of the level for Burley tobacco. There is shown below the percentage of the parity price and the cents-per-pound loan level for each type or kind of tobacco (except Puerto Rican) based on the parity price as of March 31, 1955, which were announced on April 1, 1955, as the minimum loan levels for the 1955 crop. The cents-per-pound loan levels will be computed again as of the beginning of the marketing year, which is July 1, 1955, for flue-cured, and October 1, 1955, for the other kinds of tobacco. Price support will be made available to eligible producers on the 1955 crop of each type or kind of tobacco at the higher of (1) the cents-per-pound level shown below, or (2) the level computed as of the beginning of the marketing year. Schedules of loan rates by grades for each type or kind of tobacco will be announced as supplements to this statement after the parity price as of the beginning of the marketing year is known.

(b) The loan level for Puerto Rican tobacco, type 46, will be determined as of October 1, 1955, the beginning of the marketing year. Price support will not be available on Pennsylvania Seedleaf tobacco, type 41, and Maryland tobacco, type 32, because marketing quotas have been disapproved by producers.

	1955 percent of parity level	1955 minimum loan level
Flue-cured, types 11–14	90	48.3
Burley, type 31	90	46.2
Fire-cured, types 21–23	75 percent of burley rate.	34.6
Dark air-cured, types 35–36	66⅔ percent of burley rate.	30.8
Virginia sun-cured, type 37	66⅔ percent of burley rate.	30.8
Puerto Rican, type 46	(1)	(1)
Cigar filler and binder	90	(38.9)
Ohio filler, types 42–44		24.7
Connecticut broadleaf, type 51.		53.9
Connecticut Havana seed, type 52.		50.8
New York and Pennsylvania Havana seed, type 53.		25.0
Southern Wisconsin, type 54		24.5
Northern Wisconsin, type 55		32.0

[1] The percent of parity and the cents-per-pound loan level for the 1955 crop of Puerto Rican tobacco, type 46, will be announced based on the supply and the parity price as of Oct. 1, 1955.

§ 464.703 *Availability of price support.* Price support to eligible producers will be made available in the following manner:

(a) *Auction market area.* The producer will deliver the tobacco to an auction warehouse in the usual manner. The producer generally will receive the advances from the warehouseman for any tobacco placed under loan by the association at the time the warehouseman settles with the producer for the entire quantity of the producer's tobacco that has been displayed for inspection and offered for sale on any one day's auction market. The warehouseman, in turn, will be reimbursed by the association with funds borrowed from CCC.

(b) *Non-auction market area.* Producers in non-auction market areas will deliver tobacco to central receiving points designated by the appropriate association. The producer will receive the advance directly from the association for any tobacco pledged for loans after the tobacco has been graded by U. S. D. A. inspectors.

(c) *Period of loans.* No advances will be made to producers on tobacco tendered for loan prior to or after the dates set forth below:

	Earliest date	Latest date
Flue-cured	July 1, 1955	Feb. 28, 1956
Burley	Nov. 1, 1955	Apr. 30, 1956
Fire-cured	do	Do.
Dark air-cured	do	Do.
Virginia sun-cured	do	Do.
Puerto Rican	Feb. 1, 1956	Sept. 30, 1956
Cigar filler and binder	Sept. 1, 1955	July 31, 1956

fixed period. The Government may offer the holder a supplemental purchase agreement either on Form FHA–206, "Supplemental Purchase Agreement (Insured Mortgage—Fixed Period)," or on Form FHA–207, "Supplemental Purchase Agreement (Insured Mortgage—Automatic Renewal)," giving him an additional fixed period, determined by the Administrator, after which the holder again will have a one-year option for

§ 464.704 *Deduction from loans.* The associations will be required to bear a portion of the overhead costs in connection with the loan operation. For this purpose, the associations in the auction marketing areas will be authorized to charge the producer a fee of 12 cents per hundred pounds and such other deductions as may be authorized or approved by CCC. Such charges may be collected by a deduction from the advance made to the producer on his tobacco or by arrangements with the auction warehouseman under which he will collect such charges and remit to the association. In the nonauction market areas, the fee will be established at a rate commensurate with the relative cost of the services performed by the association.

§ 464.705 *Interest rate, recourse, and distribution of net gains.* The loans made to the associations will bear interest at the rate of 3½ percent per annum and be nonrecourse both as to principal and interest except in the case of misrepresentation, fraud, or failure to carry out the terms of the loan contract. Tobacco loses its identity as to original ownership through commingling in the packing process and individual producers may not redeem their tobacco once it has been pledged for loan. All proceeds of sales of the loan collateral will be applied to the loan account until the loan is repaid in full. After all of the tobacco of one crop year pledged for loan by an association is marketed and the loan fully repaid, any net gains will be distributed by the association to the producers who placed the tobacco under loan unless other disposition is approved by CCC.

§ 464.706 *Maturity date.* Loans made under the program will mature on demand or on a date specified by CCC.

§ 464.707 *Eligible producer.* (a) An eligible producer is one for whom a "Within Quota" Marketing Card has been issued under the applicable regulations issued by the Secretary of Agriculture with respect to tobacco marketing quotas for the 1955–56 marketing year. (In general, these regulations provide for the issuance of a "Within Quota" Marketing Card where the tobacco acreage harvested for each kind of tobacco produced on the farm is not in excess of the applicable acreage allotment established under the marketing quota program for such farm, except that a "Within Quota" Marketing Card is not issued where the planted acreage of any kind of tobacco exceeds the farm acreage allotment established therefor unless a request for disposition of the excess acreage is filed promptly.)

(b) As Puerto Rican tobacco is not under U. S. marketing quotas, all producers of this type of tobacco are considered eligible producers for the purpose of this program.

§ 464.708 *Eligible tobacco.* Eligible tobacco shall be U. S. and Puerto Rican tobacco (as defined in the Agricultural Adjustment Act of 1938, as amended) of the 1955 crop which (a) has been properly identified in accordance with applicable tobacco Marketing Quota Regulations on a valid memorandum of sale issued from a "Within Quota" Marketing Card, where marketing quotas are in effect; (b) has been delivered to the association by the producer prior to sale to any other person; (c) is in sound and merchantable condition; (d) is of a type for which a loan level is provided in § 464.702; and (e) is free and clear of any and all liens and encumbrances.

Issued this 17th day of May 1955.

[SEAL] WALTER C. BERGER,
Acting Executive Vice President,
Commodity Credit Corporation.

[F. R. Doc. 55-4142; Filed, May 19, 1955; 8:53 a. m.]

TITLE 7—AGRICULTURE

Chapter IV—Federal Crop Insurance Corporation

PART 420—MULTIPLE CROP INSURANCE

SUBPART—REGULATIONS FOR THE 1956 AND SUCCEEDING CROP YEARS

By virtue of the Authority contained in the Federal Crop Insurance Act, as amended, the "Regulations for the 1950 and Succeeding Crop Years", as amended (14 F. R. 5303, 6787, 7827; 15 F. R. 2485, 2622, 3077, 4161, 9033, 9271; 16 F. R. 579, 4300, 4829, 12111, 12765; 17 F. R. 2110, 2385, 3265, 3671, 5082, 5933, 8206, 10537, 11257, 11379; 18 F. R. 151, 440, 3634, 4418, 6282, 6992, 7222, 8080, 8530; 19 F. R. 470, 509, 2287, 3017, 5604, 5983, 8233; 20 F. R. 1913), which shall continue in full force and effect for the 1955 crop year, are hereby amended for the 1956 and succeeding crop years to read as set forth below. The provisions of this subpart shall apply, until amended or superseded, to all continuous multiple crop contracts as they relate to the 1956 and succeeding crop years.

Sec.

420.1 Availability of multiple crop insurance.
420.2 Coverages, premium rates and fixed price.
420.3 Application for insurance.
420.4 Public notice of indemnities paid.
420.5 Creditors.
420.6 Type of loss settlement.
420.7 Riders to the policy.
420.8 The policy.

AUTHORITY: §§ 420.1 to 420.8 issued under secs. 506, 516, 52 Stat. 73, 77, as amended; 7 U. S. C. 1506, 1516. Interpret or apply secs. 507, 508, 509, 52 Stat. 73, 74, 75, as amended; 7 U. S. C. 1507, 1508, 1509.

§ 420.1 *Availability of multiple crop insurance.* (a) Multiple crop insurance may be provided in counties designated annually by the Manager of the Corporation from a list of counties approved by the Board of Directors of the Corporation. A list of the designated counties shall be published annually by appendix to this section.

(b) Insurance will not be provided in a county for any crop year unless the minimum participation requirement established by the Federal Crop Insurance Act, as amended, is met. For the purpose of determining whether the minimum participation requirement is met, an insurance unit shall be counted as one farm, except that the number of insurance units covered under contracts providing for Separate Crop Protection shall be determined in the same manner as if Combined Crop Protection applied (see § 420.6).

§ 420.2 *Coverages, premium rates and fixed price.* The Corporation shall establish coverage(s) and premium rate(s) per acre and the fixed price(s) used to value production, which shall be shown on the county actuarial table on file in the county office and may be revised from year to year.

§ 420.3 *Application for insurance.* Application for insurance on a form prescribed by the Corporation may be made by any person to cover his interest as landlord, owner-operator, tenant or sharecropper in all insurable crops in the county. For any crop year applications shall be submitted to the county office on or before the applicable closing date set forth below which follows the cancellation date for such crop year:

Colorado: December 31.
Kansas: September 30.
Oregon: November 30.
Pennsylvania: Somerset, September 30; others, March 31.
Texas: August 31.
West Virginia: September 30.
Wyoming: December 31.
All other States: March 31.

§ 420.4 *Public notice of indemnities paid.* The Corporation shall provide for the posting annually in each county at the county court house of a list of the indemnities paid in the county.

§ 420.5 *Creditors.* An interest in an insured crop existing by virtue of a lien, mortgage, garnishment, levy, execution, bankruptcy or any involuntary transfer shall not entitle the holder of the interest to any benefit under the contract.

§ 420.6 *Type of insurance protection.* In any county in which multiple crop insurance is offered, insurance may be provided on the basis of (a) Separate Crop Protection under which insurance units shall be determined separately for each insured crop, (b) Combined Crop Protection under which insurance units shall include a combination of all insured crops, or (c) both Separate and Combined Crop Protection, the insured to elect the type to apply. Premium and indemnities shall be determined on the basis of the type of insurance unit applicable. The type(s) of insurance protection offered in a county shall be shown on the county actuarial table on file in the county office.

§ 420.7 *Riders to the policy.* A rider shall be issued for each county in which insurance is offered and shall include (a) a listing of the insurable crops, (b) a designation of the insurance period for each crop, (c) applicable coverage for unharvested acreage, (d) method of valuing production including the method, where applicable, of providing protection against loss of quality, (e) the manner in which losses shall be determined and claims submitted, (f) meaning of insurance unit, (g) the discount date and the cancellation date referred to in the policy, and (h) any other provisions considered necessary or advisable including (1) provisions specifying additional categories of acreage to which insurance shall not attach, (2) special provisions with respect to individual crops, (3) special provisions to cover insurance written on an irrigated basis and (4) additional definitions. The applicable rider shall be made a part of the policy of each insured.

§ 420.8 *The policy.* The provisions of the policy for the 1956 and succeeding crop years are as follows:

Pursuant to the provisions of the application upon which this policy is issued, which application together with this policy and applicable riders shall constitute the contract, and subject to the terms and conditions set forth herein, the Federal Crop Insurance Corporation (herein called the "Corporation") does insure the applicant (herein called the "insured"), subject to the acceptance of his application, against unavoidable loss of production on his insured crops due to drought, flood, hail, wind, frost, freeze, lightning, fire, excessive rain, snow, wildlife, hurricane, tornado, insect infestation, pole burn and plant disease. The contract shall not cover any loss due to the neglect or malfeasance of the insured, any member of his household, his tenants or employees, or failure to follow recognized good farming practices, or to any cause other than those specified above. No term or condition of the contract shall be waived or changed on behalf of the Corporation except in writing by a duly authorized representative of the Corporation.

TERMS AND CONDITIONS

1. *Crops insured.* The crops to be insured shall be those shown as insurable crops on the attached rider.

2. *Insured acreage and interest.* The insured acreage and interest for each crop year shall be that acreage in the county planted to the insurable crops shown on the attached rider in which the insured had an interest at the time of planting and his interest therein at such time as reported by the insured or as determined by the Corporation, whichever the Corporation shall elect: *Provided*, That insurance shall not attach or be considered to have attached on acreage for which a coverage is not shown on the county actuarial table for the crop year or, in counties where a coverage(s) for a crop is established by farming practice(s), on acreage of such crop on which the farming practice followed is one for which a coverage is not established. *Provided further*, That insurance shall not attach or be considered to have attached on acreage on which it is determined by the Corporation that an insured crop is (a) destroyed and it is practical to replant to the same crop and such acreage is not replanted to the same crop, (b) initially planted too late to expect a normal crop to be produced, or (c) of a type or variety not adapted to the area. The Corporation reserves the right to limit the insured acreage of any crop or crops to the allotment or permitted acreage established under any act of Congress including the Agricultural Adjustment Act of 1938, as amended. For the purpose of determining the amount of loss, the insured interest shall not exceed the insured's interest at the time of loss or the beginning of harvest, whichever occurs first.

3. *Responsibility of the insured to report acreage and interest.* (a) Promptly after planting the insurable crops each year the insured shall submit to the county office, on a form prescribed by the Corporation, a report showing all acreage in the county planted to each insured crop in which he has an interest and his interest therein at the time of planting. If both winter and spring crops are insurable in a county, a separate report of acreage planted to winter crops shall be submitted promptly after completion of planting the insured winter crops. If the insured plants any part of his insurable crops for purposes other than that shown on the attached rider, he shall submit with his acreage report a designation of any acreage so planted. Upon approval of the Corporation, the acreage used in computing the premium and total coverage shall not include acreage so designated. If the insured does not have an interest in any insured acreage in the county for any year he shall nevertheless submit a report so indicating. Any acreage report submitted by the insured shall not be subject to change by the insured.

(b) If the insured fails to submit the above-mentioned acreage report(s) within 30 days after planting of the insured crops (winter or spring) is generally completed in the county, the Corporation may elect to determine the insured acreage and interest or to declare the insured acreage to be "zero".

4. *Coverage, premium rate and fixed price.* For each crop year of the contract the coverage(s) and premium rate(s) per acre established for the area in which the insured acreage is located, and the fixed price(s), used to evaluate production, shall be those established by the Corporation for such crop year and shown on the county actuarial table on file in the county office.

5. *Changes in contract.* The Corporation reserves the right to change the insurable crop(s), premium rate(s), coverage(s), fixed price(s), and other terms and provisions of the contract from year to year. Any changes shall be mailed to the insured or placed on file in the county office at least 15 days prior to the cancellation date preceding the crop year for which the changes are to become effective, and such mailing or filing shall constitute notice to the insured. Failure of the insured to cancel the contract as provided in section 12 shall constitute his acceptance of any such changes.

6. *Amount of annual premium.* (a) The annual premium for each insurance unit will be based upon (1) the insured acreage of each insurable crop, (2) the applicable premium rate(s), and (3) the insured interest(s) in the crop at the time of planting, and with respect to any insured acreage shall be earned and payable when the insured crop on such acreage is planted.

(b) Any amount of the premium which is not paid on or before the discount date, which shall be the November 30 of the calender year in which the insured crop(s) is normally harvested, shall be increased by ten percent, which increased amount shall be the premium balance, and thereafter, at the end of each 12 months' period, six percent simple interest shall attach to any amount of the premium balance which is unpaid.

(c) The insured's annual premium for any year may be reduced 25 percent if he has had seven consecutive years of insured crops (immediately preceding the current crop year) without a loss for which an indemnity was paid. Nothing in this paragraph shall create in the insured any right to a reduced premium.

(d) If in any year a premium is earned and totals less than $10.00 the amount shall be increased to $10.00.

(e) Any unpaid amount due the Corporation by the insured may be deducted from any indemnity payable to the insured by the Corporation or from any loan or any payment made to the insured under any act of Congress or program administered by the United States Department of Agriculture.

7. *Notice of loss or substantial damage.* (a) If, during the growing season, an insured crop on any insurance unit is substantially damaged the insured shall give immediate written notice of such damage to the Corporation at the county office.

(b) If an insured loss occurs on any insurance unit the insured shall give prompt written notice to the Corporation at the county office but in no event shall such notice be given later than (1) 15 days after threshing (harvesting in the case of any crop that is not threshed) is completed on the insurance unit, or (2) the latest date for the end of the insurance period for any insured crop on the unit, whichever is earlier.

(c) Any insured acreage which is not to be harvested shall be left intact until the Corporation makes an inspection.

(d) The Corporation may reject any claim for loss if any of the requirements of this section are not met.

8. *Released or damaged acreage.* (a) Any acreage of an insured crop may be released by the Corporation after it is too late to replant to such crop if (1) the Corporation determines that the crop on such acreage is destroyed, or (2) the insured requests a release of acreage which the Corporation determines is not destroyed and agrees to the appraisal by the Corporation of the potential production from such acreage. No insured acreage may be put to another use or planted to a substitute crop until the Corporation releases such acreage. However, in counties where corn or grain sorghum planted for harvest as grain are insured, such crops may be used for silage or fodder without a release by the Corporation if the insured leaves a number of rows considered by the Corporation to be an adequate representative sample for appraising the yield. If an insured crop on insured acreage is damaged but the acreage has not been released by the Corporation, proper measures shall be taken to care for the crop and protect it from further damage.

(b) Where released acreage is not put to another use, or is replanted to the same crop, the release may be disregarded by the Corporation.

(c) There shall be no abandonment of any crop or portion thereof to the Corporation.

9. *Time of loss.* Any loss shall be deemed to have occurred at the end of the insurance period for all insured crops planted on the insurance unit unless all the insured crops on the insurance unit were destroyed earlier in which event the loss shall be deemed to have occurred on the date of such destruction as determined by the Corporation.

10. *Payment of indemnity.* (a) Any indemnity will be payable within thirty days after a claim for loss is approved by the Corporation, but if payment is delayed for any reason, the Corporation shall not be liable for interest or damage on account of such delay.

(b) If the insured dies, is judicially declared incompetent or disappears, any indemnity which is, or becomes, part of his estate shall be paid to the legal representative of the estate. Should no such representative be qualified, the Corporation may pay the indemnity to the person(s) it determines to be beneficially entitled thereto or to any one or more of such persons on behalf of all such persons, or may withhold payment until a legal representative of the estate is qualified. In such cases, and in any other case where an indemnity is claimed by a person(s) other than the original insured or diverse interests appear with respect to any insurance unit, the determination of the Corporation as to the existence or nonexistence of a circumstance in the event of which payment may be made and of the person(s) to whom such payment shall be made shall be final and conclusive. Payment of an indemnity shall constitute a complete discharge of the Corporation's obligations with respect to the loss for which such indemnity is paid.

11. *Avoidance of contract.* The Corporation may void the contract without affecting the insured's liability for premium(s) or waiving any right or remedy including the right to collect any unpaid premium(s) if (a) at any time, either before or after loss, the insured has concealed or misrepresented any material fact or committed any fraud relating to the contract, or (b) the insured fails to give any notice or otherwise fails to comply with the terms of the contract at the time and in the manner prescribed. The Corporation may make such avoidance effective as of the beginning of any crop year with respect to which any act or omission referred to in (a) or (b) above occurred.

12. *Life of contract, cancellation or termination thereof.* (a) Subject to the provisions of this section, the contract shall be in effect for the first crop year specified on the application and shall continue in effect for each succeeding crop year until cancelled by either the insured or the Corporation. Cancellation may be made for any crop year by either party giving written notice to the other party on or before the applicable cancellation date occurring (1) in the same calendar year in which the insurable crops are normally harvested for such crop year for all counties with a cancellation date between January 1 and March 1, or (2) in the calendar year preceding the year in which the insurable crops are normally harvested for such crop year for all other counties: *Provided, however,* That the contract shall terminate as if cancelled by the Corporation prior to such cancellation date (1) if by the March 31 following such cancellation date for all counties with a cancellation date between January 1 and March 1, any amount due the Corporation under this contract remains unpaid, or (2) if by such cancellation date for all other counties any amount due the Corporation under this contract, except the premium due on the crop harvested or to be harvested in the calendar year in which the cancellation date occurs, remains unpaid. Any notice of cancellation by the insured shall be in writing and shall be filed with the county office. The Corporation shall mail any notice of cancellation to the insured's last known address and mailing shall constitute notice to the insured.

(b) If the insured cancels the contract, he shall not be eligible for multiple crop insurance in the county in the next succeeding crop year unless he subsequently applies for insurance on or before the cancellation date for such year.

(c) If the Corporation determines that the county minimum participation requirement established by the Federal Crop Insurance Act, as amended, is not met for any crop year, insurance shall not be in effect for that crop year and the contract shall terminate.

(d) The contract shall terminate upon death or judicial declaration of incompetence of the insured, except that if such death or judicial declaration of incompetence occurs after the beginning of planting of an insurable crop(s) in any crop year but before the end of the insurance period for such year, the contract shall (1) not terminate until the end of such insurance period, and (2) cover any additional insurable crops planted for the insured or his estate for that crop year.

13. *Transfer of interest.* If the insured transfers all or part of his insured interest in an insured crop before the beginning of harvest and the time of loss, the transferee may obtain the benefits of the contract for the current crop year on the interest transferred if within 15 days after the date of transfer he (1) submits to the county office such information concerning the transfer as may be required by the Corporation, and (2) makes arrangements satisfactory to the Corporation for the payment of any unpaid premium on the interest transferred. Upon approval of a transfer of interest by the Corporation, the transferee and transferor shall be jointly and severally liable for any unpaid premium on the interest transferred. Any transfer shall be subject to the conditions of the contract including any collateral assignment made by the transferor, and the Corporation shall not be liable for a greater amount of indemnity in connection with the insured crop(s) then if the transfer had not taken place.

14. *Collateral assignment.* The original insured may assign his right to an indemnity for any year under the contract by executing a form prescribed by the Corporation and upon approval thereof by the Corporation the interest of the assignee will be recognized and the assignee shall have the right to submit the loss notices and forms as required by the contract if the insured neglects or refuses to take such action.

15. *Subrogation.* The insured assigns to the Corporation all rights of recovery against any person(s) for loss or damage to the extent that payment therefor is made by the Corporation, and shall execute all papers required and take such other action as may be necessary to secure such rights.

16. *Other insurance.* If the insured has other insurance, whether valid or not, against (a) more than two of the risks insured against under this contract, or (b) damage by fire during the insurance period, and there is damage from a risk(s) so insured against, the Corporation shall not be liable, unless it otherwise elects, for a greater proportion of any loss under this contract than the coverage under this contract bears to the total of all coverages.

17. *Records and access to farm.* The insured shall keep or cause to be kept, for two years after the time of loss, records of the harvesting, storage, shipment, sale or other disposition of all insured crops produced on each insurance unit covered by the contract, and separate records showing the same information for production on any uninsured acreage of insurable crops in the county in which he has an interest. Any person(s) designated by the Corporation shall have access to such records and the farm(s) for purposes related to the contract.

18. *Forms.* Copies of forms referred to in the contract are available at the county office.

19. *Meaning of terms.* For purposes of the multiple insurance program the terms:

(a) "County" means the area shown on the county actuarial table which may include farms located in a local producing area(s) bordering on the county.

(b) "County actuarial table" means the form(s) and related materials (including the crop insurance maps) which are approved for the crop year by the Corporation and show the fixed price(s), the coverage(s) per acre, and the premium rate(s) per acre applicable in the county.

(c) "County office" means the Corporation's office for the county shown on the application for insurance or such other office as may be specified by the Corporation from time to time.

(d) "Crop year" means the period within which the insured crop(s) is planted and normally harvested, and shall be designated by reference to the calendar year in which the crop(s) is normally harvested.

(e) "Person" means an individual, partnership, association, corporation, estate, or trust or other business enterprise or other legal entity, and wherever applicable, a State, a political subdivision of a State, or any agency thereof.

(f) "Sharecropper" means a person who works a farm in whole or part under the supervision of the operator, with workstock and equipment furnished by a person other than himself, and who is entitled to receive a share of the insured crop(s) produced thereon or of the proceeds therefrom.

(g) "Tenant" means a person (other than a sharecropper) who rents land from another person for a share of the crop(s) or proceeds therefrom produced on such land.

(h) "Substitute crop" means any crop planted on released acreage for harvest in the current crop year, other than an uninsured legume crop; except that soybeans, whether insured or uninsured, shall be considered as a substitute crop.

NOTE: The reporting and record-keeping requirements contained herein have been approved by the Bureau of the Budget in accordance with the Federal Reports Act of 1942.

Adopted by the Board of Directors on May 6, 1955.

[SEAL] C. S. LAIDLAW,
Secretary,
Federal Crop Insurance Corporation.

Approved on May 17, 1955.

TRUE D. MORSE,
Acting Secretary.

Chapter IX—Agricultural Marketing Service (Marketing Agreements and Orders), Department of Agriculture

[957.312 Amdt. 1]

PART 957—IRISH POTATOES GROWN IN CERTAIN DESIGNATED COUNTIES IN IDAHO AND MALHEUR COUNTY, OREGON

LIMITATION OF SHIPMENTS

Findings. Pursuant to Marketing Agreement No. 98 and Order No. 57, as amended (7 CFR Part 957), regulating the handling of Irish potatoes grown in certain designated counties in Idaho and Malheur County, Oregon, effective under the applicable provisions of the Agricultural Marketing Agreement Act of 1937, as amended (48 Stat. 31, as amended; 7 U. S. C. 601 et seq.), and upon the basis of the recommendation and information submitted by the Idaho-Eastern Oregon Potato Committee, established pursuant to said marketing agreement and order, as amended, and upon other available information, it is hereby found that the amendment to the limitation of shipments, as hereinafter provided, will tend to effectuate the declared policy of the act.

It is hereby found that it is impracticable and contrary to the public interest to give preliminary notice, engage in public rule making procedure, and postpone the effective date of this amendment until 30 days after publication in the FEDERAL REGISTER (5 U. S. C. 1001 et seq.) in that (1) the time intervening between the date when information upon which this amendment is based became available and the time when this amendment must become effective in order to effectuate the declared policy of the act is insufficient, (2) shipments of potatoes grown in the production area have been subject to the provisions of the limitation of shipments regulation that became effective June 28, 1954 (§ 957.312; 19 F. R. 3792), pursuant to said marketing agreement and order, as amended, and, unless extended beyond May 31, 1955, will so continue through such date, (3) more orderly marketing in the public interest, than would otherwise prevail, will be promoted by regulating the shipment of potatoes provided by this amendment during the effective time thereof, (4) ample notice will be provided by making the provisions of this amendment effective as soon as practicable upon publication in the FEDERAL REGISTER, (5) compliance with this amendment will not require any special preparation on the part of handlers which cannot be completed by the effective date, (6) information regarding the committee's recommendation has already been made available to producers and handlers in the production area, and (7) this amendment extends the period of regulation from May 31, 1955, through June 30, 1955.

Order, as amended. The provisions of § 957.312 (b) (1) (19 F. R. 3792; June 22, 1954), are hereby amended by deleting therefrom the date "May 31, 1955" and inserting in lieu thereof the date "June 30, 1955."

(Sec. 5, Stat. 753, as amended; 7 U. S. C. 608c)

Done at Washington, D. C., this 17th day of May 1955 to become effective upon publication in the FEDERAL REGISTER.

[SEAL] E. E. CONKLIN,
Acting Director, Fruit and Vegetable Division, Agricultural Marketing Service.

[F. R. Doc. 55-4140; Filed, May 19, 1955; 8:52 a. m.]

TITLE 21—FOOD AND DRUGS

Chapter I—Food and Drug Administration, Department of Health, Education, and Welfare

PART 19—CHEESES; PROCESSED CHEESES; CHEESE FOODS; CHEESE SPREADS; AND RELATED FOODS; DEFINITIONS AND STANDARDS OF IDENTITY

EFFECTIVE DATE OF ORDER

In the matter of amending the definitions and standards of identity for muenster cheese, munster cheese; monterey cheese; pasteurized process cheese food; pasteurized process cheese food with fruits, vegetables, or meats; pasteurized process cheese spread; pasteurized cheese spread; pasteurized process cheese spread with fruits, vegetables, or meats; pasteurized cheese spread with fruits, vegetables, or meats; cold-pack cheese food; and cold-pack cheese food with fruits, vegetables, or meats:

Pursuant to the provisions of the Federal Food, Drug, and Cosmetic Act (sec. 401, 52 Stat. 1046, as amended 68 Stat. 54, 55; 21 U. S. C. 341) and in accordance with authority delegated by the Secretary of Health, Education, and Welfare to the Commissioner of Food and Drugs (20 F. R. 1996), notice is hereby given that no objections were filed to the order published in the FEDERAL REGISTER of April 1, 1955 (20 F. R. 2058), relative to amending the definitions and standards of identity for the foods listed in the first paragraph of this notice. The amendments promulgated by that order will become effective May 31, 1955.

(Sec. 401, 52 Stat. 1046, as amended 68 Stat. 54, 55; 21 U. S. C. 341)

Dated: May 16, 1955.

[SEAL] GEO. P. LARRICK,
Commissioner of Food and Drugs.

[F. R. Doc. 55-4136; Filed, May 19, 1955; 8:51 a. m.]

PART 141b—STREPTOMYCIN (OR DIHYDROSTREPTOMYCIN) AND STREPTOMYCIN- (OR DIHYDROSTREPTOMYCIN-) CONTAINING DRUGS; TESTS AND METHODS OF ASSAY

PART 146b—CERTIFICATION OF STREPTOMYCIN (OR DIHYDROSTREPTOMYCIN) AND STREPTOMYCIN- (OR DIHYDROSTREPTOMYCIN-) CONTAINING DRUGS

MISCELLANEOUS AMENDMENTS

By virtue of the authority vested in the Secretary of Health, Education, and Welfare by the provisions of the Federal Food, Drug, and Cosmetic Act (sec. 507, 59 Stat. 463, as amended by 61 Stat. 11, 63 Stat. 409, 67 Stat. 389; sec. 701, 52 Stat. 1055; 21 U. S. C. 357, 371) and delegated to the Commissioner of Food and Drugs by the Secretary (20 F. R. 1996), the regulations for tests and methods of assay for antibiotic and antibiotic-containing drugs (21 CFR, 1953 Supp., Part 141b; 19 F. R. 935, 1141) and certification of antibiotic and antibiotic-containing drugs (21 CFR, 1953 Supp., Part 146b; 19 F. R. 935, 1141, 6731) are amended as indicated below:

1. Section 141b.124 is amended by changing the headnote to read: "§ 141b.-124 *Streptomycin-hydrochloride solution oral veterinary; streptomycin sulfate solution oral veterinary.*"

2. In § 146b.112 *Streptomycin for inhalation therapy* * * *, paragraph (a) is changed to read as follows:

(a) Streptomycin for inhalation therapy and dihydrostreptomycin for inhalation therapy are streptomycin or dihydrostreptomycin, with or without one or more suitable and harmless diluents. The streptomycin used conforms to the requirements of § 146b.101 (a), except § 146b.101 (a) (2) and (4), and except that if it is packaged with inert gases its moisture content is not more than 0.5 percent. The dihydrostreptomycin used conforms to the requirements of § 146b.-103 (a), except the standards for sterility and pyrogens, and except that if it is packaged with inert gases its moisture content is not more than 0.5 percent. Each other substance used, if its name is recognized in the U. S. P. or N. F., conforms to the standards prescribed therefor by such official compendium.

3. In § 146b.119, the section headnote and the first sentence of paragraph (a) are amended to read as follows:

§ 146b.119 *Streptomycin hydrochloride solution oral veterinary; streptomycin sulfate solution oral veterinary*—(a) *Standards of identity, strength, quality, and purity.* Streptomycin hydrochloride solution oral veterinary and streptomycin sulfate solution oral veterinary are aqueous solutions of streptomycin hydrochloride or streptomycin sulfate, with one or more suitable and harmless preservatives. The drug may also contain one or more suitable and harmless buffer substances and stabilizing agents. * * *

Notice and public procedure are not necessary prerequisites to the promulgation of this order, and I so find, since it was drawn in collaboration with interested members of the affected industry and since it would be against public interest to delay providing for the amendments set forth above.

This order shall become effective upon publication in the FEDERAL REGISTER, since both the public and the affected industry will benefit by the earliest effective date, and I so find.

(Sec. 701, 52 Stat. 1055; 21 U. S. C. 371. Interpret or apply sec. 507, 59 Stat. 463 as amended; 21 U. S. C. 357)

Dated: May 16, 1955.

[SEAL] GEO. P. LARRICK,
Commissioner of Food and Drugs.

TITLE 33—NAVIGATION AND NAVIGABLE WATERS

Chapter II—Corps of Engineers, Department of the Army

PART 203—BRIDGE REGULATIONS

CHRISTINA RIVER, DEL.

Pursuant to the provisions of section 5 of the River and Harbor Act of August 18, 1894 (28 Stat. 362; 33 U. S. C. 499), § 203.235 governing the operations of drawbridges across the Christina River, Delaware, is hereby revised to include special regulations for the Delaware State Highway Department bridge at Newport, Delaware, by the addition of paragraph (g), as follows:

§ 203.235 *Christina River, Del.; bridges.* (a) The owners of or agencies controlling the bridges shall provide the appliances and the personnel necessary for the safe, prompt, and efficient opening of the draws at any time during the day or night for the passage of any vessel or other watercraft which cannot pass under the closed draws.

(b) Except as otherwise provided in paragraph (g) of this section, the bridge tender upon hearing or perceiving the prescribed call signal shall immediately clear the drawspan and open the draw to its full extent for the passage of the vessel or other craft: *Provided,* That the draw of a railroad bridge need not be opened when there is a train in the bridge block approaching the bridge with the intention of crossing, nor within 5 minutes of the known time of passage of a scheduled passenger, mail, or express train; but in no event, except in case of breakdown of the operating machinery, shall the opening of the draw be delayed more than 5 minutes in the case of a highway bridge, nor more than 10 minutes in the case of a railroad bridge.

(c) *Signals*—(1) *Call signal for opening of draw.* Three blasts of a whistle or horn.

(2) *Acknowledging signal*—(i) *When the draw can be opened immediately.* Two blasts of a whistle or horn.

(ii) *When the draw cannot be opened immediately, or when it is open and is to be closed immediately.* One blast of a whistle or horn.

(d) Vehicles, street cars, locomotives, and trains shall not be stopped on the drawspan, nor shall locomotives or trains be stopped in the bridge blocks of railroad bridges in such manner as to delay the operation of the draws, except in case of urgent necessity, nor shall vessels be moored to the bridge fenders or so maneuvered as to unnecessarily hinder or delay the closing of the draw, but all passages over, through, or under the bridges shall be prompt, to avoid delay to either land or water traffic.

(e) The owners of, or agencies controlling, the bridges shall provide and keep in good legible condition two board gages painted white with black figures not less than 6 inches high, to indicate the headroom clearance under the closed span at all stages of the tide. These gages shall be so placed on the ends of the drawspan fenders that they will be plainly visible to the navigators approaching from either direction.

(f) The general regulations contained in paragraphs (a) to (e), inclusive, of this section shall apply to all bridges except as modified by the special regulations contained in paragraph (g) of this section, prescribed where local conditions require to govern the operation of a particular bridge.

(g) *Special regulations for highway bridge at Newport.* (1) The owner of this bridge will not be required to keep a draw tender in constant attendance.

(2) Whenever a vessel unable to pass under the closed bridge desires to pass through the draw, at least 24 hours' advance notice of the time the opening is required shall be given to the authorized representative of the owner of the bridge.

(3) Upon receipt of such advance notice, the authorized representative of the owner of the bridge, in compliance therewith, shall arrange for the prompt opening of the draw at the time specified in the notice for the passage of the vessel.

(4) The owner of the bridge shall keep conspicuously posted on both the upstream and downstream sides thereof, in such manner that it can easily be read at any time, a copy of the regulations in this section together with a notice stating exactly how the representative specified in subparagraph (2) of this paragraph may be reached.

(5) The operating machinery of the draw shall be maintained in a serviceable condition, and the draw shall be opened and closed at intervals frequent enough to make certain that the machinery is in proper order for satisfactory operation.

[Regs., April 19, 1955, 823.01 (Christina River, Del.)-ENGWO] (Sec. 5, 28 Stat. 362; 33 U. S. C. 499)

[SEAL] JOHN A. KLEIN,
Major General, U. S. Army,
The Adjutant General.

[F. R. Doc. 55-4092; Filed, May 19, 1955; 8:45 a. m.]

PART 207—NAVIGATION REGULATIONS

KEY WEST HARBOR, FLORIDA

Pursuant to the provisions of Chapter XIX of the Army Appropriation Act of July 9, 1918 (40 Stat. 892; 33 U. S. C. 3), § 207.173 is hereby prescribed to govern the use and navigation of an area in Key West Harbor, Florida, comprising a dummy mine field to be used in training of naval personnel by the U. S. Naval Station, Key West, Florida, as follows:

§ 207.173 *Key West Harbor, Fla.; dummy mine field, U. S. Naval Station, Key West Florida*—(a) *The area.* The waters of Key West Harbor within a 500-yard square and marked by unlighted can buoys, the coordinates of which are as follows: Buoy No. 1, latitude 24°32'-17", longitude 81°48'07"; Buoy No. 2, latitude 24°32'32", longitude 81°48'07"; Buoy No. 3 latitude 24°32'32", longitude 81°47'50"; Buoy No. 4, latitude 24°32'-17", longitude 81°47'50". The northerly limits of the area are about 450 yards south of Key West Island.

(b) *The regulations.* (1) All craft shall proceed with caution when underway in the area taking particular care to stand well clear of all navigational aids.

(2) All craft underway in this area shall stay well clear of naval craft (LCPR) displaying the Seven flag and be particularly alert to detect and obey all signals from such vessels. The display of the Seven flag is an indication that divers are operating.

(3) Anchoring, grapneling, and fishing, including the use of lobster pots, are prohibited in the area.

(c) The regulations shall be enforced by the Commanding Officer, U. S. Naval School Underwater Swimmers, U. S. Naval Station, Key West, Florida, and such agencies as he may designate.

[Regs., April 25, 1955, 800.2121 (Key West Harbor, Fla.)-ENGWO] (40 Stat. 892; 33 U. S. C. 3)

[SEAL] JOHN A. KLEIN,
Major General, U. S. Army,
The Adjutant General.

TITLE 47—TELECOMMUNICATION

Chapter I—Federal Communications Commission

[Rules Amdt. 8-21]

PART 8—STATIONS ON SHIPBOARD IN THE MARITIME SERVICES

GENERAL EXEMPTION ORDERS ISSUED EXEMPTING SHIPS FROM COMPULSORY RADIO PROVISIONS

In the matter of amendment of Part 8 of the Commission's rules for the purpose of making certain editorial changes therein to include a list of the current general exemptions issued by the Commission.

The Commission having under consideration the desirability of making certain editorial changes in Part 8 of its rules and regulations; and

It appearing that the amendments adopted herein are editorial in nature for the purpose of including in Part 8 of the Commission's rules a listing of the general exemptions issued by the Commission which are currently in force, and, therefore, prior publication of notice of proposed rule making under the provisions of section 4 of the Administrative Procedure Act is unnecessary, and the amendments may become effective immediately; and

It further appearing that the amendments adopted herein are issued pursuant to authority contained in sections 4 (i), 5 (d) (1) and 303 (r) of the Communications Act of 1934, as amended, and section 0.341 (a) of the Commission's Statement of Organization, Delegations of Authority and Other Information;

It is ordered, This 16th day of May 1955, that, effective immediately, Part 8 of the Commission's rules is revised as set forth below.

(Sec. 4, 48 Stat. 1066, as amended; 47 U. S. C. 154. Interprets or applies secs. 5, 303, 66 Stat. 713, 48 Stat. 1082; 47 U. S. C. 155, 303)

Released: May 17, 1955.

FEDERAL COMMUNICATIONS COMMISSION,
[SEAL] MARY JANE MORRIS,
Secretary.

Delete the text of § 8.804 and substitute the following therefor:

§ 8.804 *Appendix IV—General exemption orders issued exempting ships from compulsory radio provisions.*

(a) Order, April 26, 1955, granting exemption, pursuant to section 352 (b) (3) of the Communications Act of 1934, as amended, to:

(1) All United States passenger vessels of a tonnage of less than 100 gross tons, not subject to the radio provisions of the Safety Convention, from the radio provisions of Title III, Part II of the Communications Act of 1934, as amended, for an additional period not to extend beyond May 13, 1956, when navigated on voyages in the open sea in waters lying between:

Hog Island, Virginia and Fire Island Light, New York; or

Hillsboro Light and Triumph Reef Beacon, Florida; or

Naples, Florida and Brownsville, Texas; or

Point Conception, California and Point Descanso or the Coronado Islands, Mexico; or

Salt Point and Point Sur, California;

Provided, That during the course of the voyages the vessels will be navigated not more than 20 nautical miles from the nearest land.

(2) All United States passenger vessels of a tonnage up to and including 15 gross tons, not subject to the radio provisions of the Safety Convention, from the radio provisions of Title III, Part II of the Communications Act of 1934, as amended, for an additional period not to extend beyond May 13, 1956; *Provided,* That during the course of the voyages the vessels will be navigated not more than 20 nautical miles from the nearest land.

(b) These exemptions may be terminated at any time without hearing if, in the Commission's discretion, the need for such action arises.

[F. R. Doc. 55-4132; Filed, May 19, 1955; 8:51 a. m.]

PROPOSED RULE MAKING

DEPARTMENT OF AGRICULTURE

Agricultural Marketing Service

[7 CFR Part 1003]

[Docket No. AO-269]

HANDLING OF DOMESTIC DATES PRODUCED OR PACKED IN LOS ANGELES AND RIVERSIDE COUNTIES OF CALIFORNIA

NOTICE OF RECOMMENDED DECISION AND OPPORTUNITY TO FILE WRITTEN EXCEPTION WITH RESPECT TO PROPOSED MARKETING AGREEMENT AND ORDER

Pursuant to the rules of practice and procedure, as amended, covering proceedings to formulate marketing agreements and orders (7 CFR Part 900; 19 F. R. 57), notice is hereby given of the filing with the Hearing Clerk of this recommended decision of the Deputy Administrator, Agricultural Marketing Service, United States Department of Agriculture, with respect to a proposed marketing agreement and order regulating the handling of domestic dates produced or packed in Los Angeles and Riverside Counties of California. Such marketing agreement and order would be effective pursuant to the provisions of the Agricultural Marketing Agreement Act of 1937, as amended (48 Stat. 31, as amended; 7 U. S. C. 601 et seq.). Interested parties may file exceptions to this recommended decision with the Hearing Clerk, United States Department of Agriculture, Room 112, Administration Building, Washington 25, D. C. Any such exceptions should be filed in quadruplicate and must be received prior to the close of business on May 30, 1955.

Preliminary statement. A public hearing, on the record of which the presently proposed marketing agreement and marketing order (hereinafter called the "order") were formulated, was held at Coachella, California, from March 23 to 24, 1955, both dates inclusive. Such hearing was held pursuant to a notice thereof which was published in the FEDERAL REGISTER (20 F. R. 1363) on March 5, 1955. Said notice contained the draft of a proposed order which had been presented to the Secretary of Agriculture (hereinafter called the "Secretary") by the Date Packers Council of California, the membership of which includes two producer cooperatives and the major packers of dates, with a petition for a hearing thereon. The objective of the order is to bring to the date industry the benefits of the Agricultural Marketing Agreement Act of 1937, as amended (hereinafter called the "act").

Material issues. The material issues presented on the record of the hearing are as follows:

(1) The existence of the right to exercise Federal jurisdiction in this instance, and the extent to which such rights should be exercised;

(2) The need for the proposed regulatory program to effectuate the declared policy and purposes of the act;

(3) The provisions which should be incorporated in the order, such as:

(a) Defining such terms as "Secretary," "act," "person," "area of production," "dates," "crop year," "producer," "handler," "handle," "handler carryover," "trade demand," "marketable dates," "free dates," "restricted dates," "committee," "cooperative handler," and "part and subpart";

(b) Establishing and maintaining an administrative agency, to be known as the Date Administrative Committee, to conduct the program operations, granting powers and prescribing duties for such committee, and providing for its manner of conducting business;

(c) Provision for the formulation and adoption of a marketing policy for each crop year;

(d) Provision for the establishment of minimum standards of quality for whole and pitted dates handled irrespective of whether the season average price to producers for dates is or is not in excess of the parity price; provision for the establishment of additional grade regulation for dates; and provision for the inspection and identification of such dates;

(e) Authorization for the establishment of free and restricted percentages which would operate to limit the volume of dates sold in whole or pitted form;

(f) Provision for the disposition of other than free dates;

(g) Provision for the establishment of regulations applicable to the packaging of dates;

(h) Provision for the filing of reports and the keeping of records by handlers;

(i) Provision for the incurring of expenses by the Date Administrative Committee and the levying of assessments on handlers to cover such expenses; and

(j) Additional terms and conditions as set forth in §§ 1003.77 through 1003.84 and published in the FEDERAL REGISTER (20 F. R. 1363) on March 5, 1955, which are common to marketing agreements and orders, and certain other terms and conditions as set forth in §§ 1003.87 through 1003.89 and also published in said issue of the FEDERAL REGISTER, which are common to marketing agreements only.

Findings and conclusions. The findings and conclusions on the aforementioned material issues, all of which are based on the evidence adduced at the hearing and the record thereof, are as follows:

(1) As will appear in the discussion of the definition of "handler" under (3) (a) below it is intended to regulate under the proposed program the handling of dates, regardless of whether in the current of interstate, or foreign commerce. Dates are sold in practically all areas of the United States and some quantities are exported, primarily to Canada and the Latin American countries. Approximately two-thirds of California date production is sold directly in interstate commerce. Most of the remaining sales are made in the Los Angeles, California, market from which point an undeterminable additional tonnage is subsequently distributed in interstate commerce.

Dates are received and processed by packers without regard to whether they are ultimately to be distributed within or without the area of production. All such dates are co-mingled and processed together. There is no practical way of packing dates so as to distinguish between those which might be sold in the production area and those which are destined for interstate movement. The dates sold in Los Angeles are similar to, and freely competitive with, dates sold

and shipped to interstate and foreign destinations. Consequently the price of dates in Los Angeles markets has a direct and immediate effect on prices in and shipments to markets outside of the production area. Therefore, the handling of dates within the area of production directly burdens, obstructs and affects the handling of dates in interstate or foreign commerce to such an extent as to make necessary the regulation of intra-production area handlings in order to enable effective regulation of the interstate and foreign handling of dates.

(2) Of the total supply of dates available in domestic markets during the past five years, approximately 43 percent were produced in California. The remainder was made up of imports, primarily of pitted dates, from Iraq and Iran.

The commercial production of dates in California is limited to five counties. Approximately 94 percent of the bearing acreage is found in Riverside County where almost 100 percent of the domestic dates sold in channels of commerce are produced. Total bearing acreage has increased from an average of 2,356 acres during 1936–39 to 4,510 acres during 1950–53. During the same period production increased from an average of 3,432 tons to 15,900 tons. The increase in acreage was the result of heavy plantings at the end of World War II. However, total acreage has declined slightly each year since 1951 and there have been few new plantings in recent years.

The out-of-pocket cost of producing dates in California approximates six cents per pound. Prices to date producers have average only 5.75 cents per pound during the past four years. This compares with an average of 5.6 cents per pound received by date producers during the pre-war period, 1935–39. Thus, despite the high level of economic activity in the United States during recent years, date growers have not been recovering their costs of production.

A major factor in the cost of producing dates is the amount of hand-labor involved. Date palms are dioecious. The male and female blossoms are produced on different palms and pollination must be accomplished by manual operation. This involves taking the pollen from the male palm, drying, removing the powder, and tying it to the female palms. In some instances the powder can be blown in by air gun but generally it is a hand operation requiring a considerable amount of tree climbing. Thinning is another major hand operation. Normally two-thirds to three-quarters of the dates set are removed in order that the remaining fruit will develop properly. After the fruit has developed, the practice is to place a bag over the bunches to protect the fruit from rain and birds. In the harvesting operations, since all dates do not mature at the same time, it is generally necessary to pick each bunch two or three times in order to maintain the quality of the crop. With only limited possibilities for mechanization, the cost of producing dates can be expected to remain high in the future. Unless corrective action is taken to improve producer returns, the economic condition of the domestic date industry can be expected to further deteriorate.

One of the major problems in the date industry has been the availability of low-quality dates in domestic markets at low prices. These offerings have had a price-depressing effect on, and have reduced the sales of, good-quality dates. Another problem has been that of the size of the carryover of dates from one crop year into the next. This carryover, which has often in the past been more than is required to meet trade requirements until new crop dates become available, has been sold in direct competition with new crop dates and has been responsible for price weakness in new crop offerings. For example, at the beginning of the 1954 season, the price for whole dates opened at $5.25 per case of 24/1 pound packs. Within a few weeks this price declined to $4.60, or approximately three cents per pound. Testimony at the hearing indicated that this price break was caused by the offering for sale of the large carryover of 1953 crop dates in packers' hands.

The proposed order would tend to alleviate these conditions by prohibiting the sale of low-quality dates in normal outlets and by providing for the setting aside of excessive supplies of whole dates and their diversion into export or date product outlets. It would also serve to spread the burden of the allocation of supplies equitably among all handlers.

As is indicated above, returns to date producers have been low in recent years. During the past four years they have averaged only 26 percent of the effective parity price. One of the expressed primary objectives of Congress in enacting the Agricultural Marketing Agreement Act of 1937, as amended, is that a program of this nature shall regulate the particular commodity with a view to raising the prices to the growers thereof to a level as near the parity level as is practicable and consistent with interests of consumers. The proposed order is designed and intended to accomplish this objective.

(3) (a) The definition of "Secretary" should include not only the Secretary of Agriculture of the United States, the official charged by law with the responsibility for programs of this nature, but also, in order to recognize the fact that it is physically impossible for him to perform personally all functions and duties vested in him by law, any other officer or employee of the United States Department of Agriculture who is or who may hereafter be authorized to act in his stead.

The definition of "act" provides the correct legal citations for the statute pursuant to which orders of this nature are operated and avoids the need for referring to these citations thereafter.

The definition of "person" follows the definition of that term as set forth in the act and will assure that it will have the same meaning as it has in the act.

The "area of production" should include the counties of Riverside and Los Angeles in California. Although there is some production of dates in Arizona, dates produced there are generally sold in local markets in Arizona and do not at the present time affect the marketing of California dates. The failure to control the marketing of these dates will not interfere with the marketing of dates produced in California. As is indicated above, practically all California dates are produced in Riverside County. However, large volumes of dates are processed and sold through handlers located in Los Angeles County although produced elsewhere. Of the minor quantities of commercially acceptable dates produced in other counties of California, practically all are handled either in Riverside or Los Angeles counties. Under these conditions inclusion of these two counties in the area of production will assure that the order will regulate effectively the commercial date production of California. It is concluded that Riverside and Los Angeles counties constitute the smallest regional production area which is practical for coverage by the order, consistently with carrying out the declared policy of the act, and the issuance of several orders applicable to subdivisions of the production area would not effectively carry out the declared policy of the act.

The term "dates" should include the Deglet Noor, Zahidi, and Khadrawy varieties of domestic dates produced or packed in the area of production. These varieties constitute practically all of the dates acquired by the chain store and wholesale trade at the present time. Although the notice of hearing included all varieties within the definition of dates, testimony by the proponents of the order indicated that there was no present intention to regulate in any manner varieties other than Deglet Noor, Zahidi, and Khadrawy. At the hearing the proponents suggested that the term "dates" include only the Deglet Noor and Zahidi varieties but that a provision be added whereby additional varieties could be included upon the recommendation of the committee and with the approval of the Secretary. The testimony indicated that it is not anticipated that regulation of the so-called soft or sugared varieties will be necessary within the next four or five years. In view of this situation and the possibility that Khadrawy dates may need to be regulated, it is concluded that initially the order should be applicable only to Deglet Noor, Zahidi, and Khadrawy varieties, and that the order could be amended at a later date if conditions so change as to make regulation of additional varieties necessary in order to promote the objectives of the act. The representative of the service which will be performing the inspection required under the order testified that the inspectors would have no difficulty in distinguishing these varieties from other varieties of dates.

As stated previously, although all California dates are not produced in the production area defined in the order, practically all are either produced or packed in such area. Dates produced in other counties of California are indistinguishable from those produced in Riverside County. There is no practical way to determine whether a given lot of dates was produced in Riverside County or elsewhere. Therefore, if the dates to

be regulated were limited to those produced in the production area, the way would be open for evasion of the regulation upon the claim of a handler within the area that the particular dates sought to be brought under regulation were produced outside of the production area. Such a situation would make effective control impossible and would tend to result in inequities among handlers. Therefore, it is necessary to include in the definition of dates, all dates produced or packed in the area of production.

The term "crop year" should be defined to mean the twelve-month period beginning August 1 of any year and ending July 31 of the following year. This twelve-month crop year designation is one which is generally recognized and followed in the date industry. Some new crop dates are received by packers during the month of August. Since the marketing policy is to be effective as of the beginning of the crop year, the crop year should begin early enough to cover any dates which might be harvested from the then current crop.

The term "producer" should be defined to mean any person engaged in a proprietary capacity in the production of dates for sale. The primary purpose of this definition is to determine the eligibility of persons for membership as producer members of the committee and to determine the persons eligible to vote for nominees for producer members and alternate members of the committee. This definition would include as producers those growers of dates in other counties in California whose dates are sold to handlers in the counties of Riverside or Los Angeles, since their dates so sold will be regulated the same as dates produced in the two counties last referred to and they should have the same benefits and privileges. Since the order is designed to improve the marketing of dates through commercial channels only those growers who produce dates for sale should be included in the definition.

The term "handler" should mean any person handling dates which have not been inspected and certified for handling in the hands of a previous holder. This definition is necessary in order to identify those persons upon whom the responsibility falls for meeting the requirements of the order, such as the quality and volume regulations and the payment of assessments. A sales agent who disposes of dates which had not previously been inspected and certified for handling should be considered a handler since his operations in that capacity are identical to any other handler's.

Since this definition will also identify those persons who are eligible to serve as handler members and alternate members of the committee, and those who are eligible to vote for nominees for these positions on the committee, the definition should be qualified so as to include, with respect to committee membership and voting under §§ 1003.22 and 1003.24, only those persons who acquired dates directly from producers. It is believed that those who acquired dates directly from producers are more closely associated with grower problems in the date industry and by reason of that fact are in a better position to determine the methods by which the order can operate to improve producer returns. It is not intended that a handler who receives dates from both producers and other handlers will be ineligible for membership on the committee, but in the weighting of such a handler's vote for membership on the committee consideration should be given only to that tonnage which he acquired directly from producers. For this purpose the acquisition of dates from an assembler should be considered as acquiring dates directly from producers.

The term "handle" should include those acts which, when performed by any person not specifically exempted, brings that person within the category of handler and makes him subject to regulation under the order. The term should mean to sell, consign, transport or ship, or in any other way to put dates into the current of commerce. The shipment by a common or contract carrier of dates owned by another person should not be considered to be handling by the carrier because the carrier has no proprietary interest in such dates and merely transports them for hire. It is customary for producers to sell and deliver their dates to packers who have facilities for processing and performing the handling functions. It is intended that the order restrictions will ordinarily be applied to the receiving handler who subsequently places the dates in the channels of commerce since this would facilitate administration of and compliance with the order. The sale or delivery of dates by a producer to a handler within the area of production, therefore, should not be considered as handling. However, the sale or delivery of dates by a producer to a person outside the area of production should be subject to regulation and any producer engaging in such activity should be considered a handler subject to regulation with respect to the dates so handled, the same as any other handler. It is intended that the phrase "current of commerce" shall include movement of dates within the production area, from such area to destinations outside thereof, or from outside points to other destinations.

The term "handler carryover" is used in the order in connection with the committee determination of a marketing policy and in connection with handler reports to the committee. It should include, as of any date, all marketable dates then held by a handler or for his account, whether or not sold, plus the estimated quantity of marketable dates in ungraded or unprocessed lots then held by such handler. It is important that the handler carryover reports include all dates held by a handler whether or not sold, since sold but undelivered tonnages have an important bearing on the total tonnage which can be expected to be shipped in the future. It is not intended that quantities which might be held by wholesalers, chain stores, or retailers be included in the handler carryover reports.

"Trade demand" should be defined to mean that quantity of marketable dates which the trade will acquire from all handlers during the crop year for distribution in the continental United States, Canada, and such other countries as the committee finds will acquire dates at prices reasonably comparable with prices received in the continental United States. This term is used by the committee in establishing its marketing policy and is intended to reflect the volume of dates which it is expected will be shipped in whole or pitted form during the crop year. Since this is the tonnage which will determine, when compared with anticipated supplies, whether a restricted percentage should be established during a particular crop year, consideration should be given to the estimated quantity the committee believes will be absorbed by foreign countries at prices comparable to those in the United States. Canada has traditionally been considered a part of the domestic market and should be considered a normal market for free dates every year. Since the volume controls under the order will be applicable only to whole and pitted dates the estimate of trade demand should also be limited to whole and pitted dates.

"Marketable dates" should be defined to mean, for any crop year, whole or pitted dates which are certified as equal to or higher than the minimum grade permitted to be handled by the regulations imposed under the order. The term "marketable" is one which is in common use in the date industry and the use of the term provides a means of distinguishing those dates from the total supply of dates regardless of quality.

"Free dates" should be those dates which are free to be handled pursuant to any free percentage established by the Secretary in accordance with §§ 1003.44 of the order. They are marketable dates which may be disposed of by handlers without restriction and will form the basis on which assessments will be levied.

"Restricted dates" should be those marketable dates which must be withheld by handlers pursuant to any restricted percentage established by the Secretary in accordance with § 1003.44 of the order.

"Committee" should mean the Date Administrative Committee established pursuant to § 1003.21 of the order. It is defined merely to provide a convenient reference wherever the term is used in the order.

"Cooperative handler" should mean any handler which is a cooperative marketing association of growers organized under the laws of the State of California and includes all cooperative handlers within the date industry.

The term "part" should be defined to mean the order regulating the handling of domestic dates produced or packed in Riverside and Los Angeles counties of California, and all rules, regulations and supplementary orders issued thereunder. The order regulating the handling of domestic dates produced or packed in Riverside and Los Angeles counties of California should be a "subpart", which is a subdivision of such part. The rules, regulations and supplementary orders would also be subparts of that part. The use of such terms having those meanings is in conformance with the requirements

of the Federal Register Division for orders of this nature.

(b) An agency designated as the Date Administrative Committee should be established to administer the order. The committee should be composed of seven members of whom three should represent producers. A membership of seven on the committee is based on giving equitable representation to all segments of the date industry. There would be adequate representation of producers since, in addition to the three producer members, one handler member is from an organization of cooperative producers and another handler member represents persons of combined producer and handler interests. The provision for an odd number of members would preclude a situation where there would be a tie vote on the committee, assuming that all members or their alternates are present and voting at a meeting.

In order that all segments of the date industry shall have adequate representation on the committee, committee membership should be on the basis of specified groups of handlers and producers. The handler membership should be on the following basis: One member to represent producer-handlers, each of whom produced not less than 40 percent of the volume he handled; one member to represent cooperative handlers; and two members to represent handlers not included in the first two groups. Handler membership on this basis should provide each group with representation commensurate with the tonnages presently handled by each such group. In other words, under present conditions, the first and second mentioned groups each handle approximately 25 percent of the total tonnage of dates handled, and third mentioned group accounts for approximately 50 percent of the total handlings. Producer membership on the committee should consist of one member to represent producers who are members of a cooperative marketing association and two members to represent those producers who are not members of a cooperative marketing association. This distribution would tend to reflect adequately producer sentiment since at the present time, approximately one-third of all date producers are members of a cooperative. In order to assure that representation on the committee will continue to be reflective of the relative importance of each group in the industry, provision should be made for realignment of the four handler members and the three producer members on the committee in the event that there are major changes in the quantities handled by the aforementioned handler groups and in the number of producers who market their dates through a cooperative marketing association. Any such realignment should be based on a finding by the Secretary that the membership on the committee does not provide adequate representation for all groups in the industry and that a new basis of representation, as determined by the Secretary, will be more reflective of current marketing conditions. Upon such a finding by the Secretary, nominations and selection of committee members thereafter should be on such new basis. This provision is not intended to permit a change in the total number of handler or producer members on the committee.

Except for the initial members and alternate members, the term of office for committee members should be two years. This would provide for some continuity in committee membership and would permit an election each year without the possibility of having a complete change in membership from one year to the next. A longer term of office would introduce rigidity in the membership and would not permit replacement within a reasonable time of a member who no longer is reflective of the thinking of the group he represents. Moreover, since provision is made for a realignment of committee membership as conditions in the industry change, a longer term of office might unduly delay a desirable shift in committee representation. Committee elections should be held each year but in order to provide continuity of membership, each election should be limited to approximately one-half of the total committee membership. This would be accomplished by having the terms of office for one handler member, one noncooperative producer member, and the cooperative handler member expire on April 15 of even-numbered years and by having the terms of office for the other members expire on April 15 of odd-numbered years. Thus, of the initial members, three would hold office until April 15, 1956, and four would hold office until April 15, 1957. Notwithstanding the above procedure, all members and alternate members should serve until their respective successors have been selected and have qualified in order that there will always be a full seven-man membership on the committee. It is desirable that the terms of office terminate on April 15 of any year so that a newly elected member will have sufficient time to acquaint himself with the duties and responsibilities of the office prior to the beginning of a new crop year.

Nominations for initial members and alternate members of the committee should be submitted to the Secretary not later than the effective date of the order so that the committee can be activated without delay. Although it is expected that the various groups will get together to decide on nominees, provision should be made for initial nominations to be made by any producer or handler. In the event that no nominations are submitted to the Secretary by the effective date of the order, provision should be made for the selection of initial members and alternate members by the Secretary without regard to nominations. This procedure will assure that the committee membership will be filled at the earliest practicable date following the effective date of the order.

A procedure should be adopted whereby successor members and alternate members of the committee can be selected by the various groups. This should be done by means of a nomination meeting for each group to be held by the committee management or by a representative of the Secretary. Some preference was expressed at the hearing that such meetings be held by the committee management. However, in the event it should be impracticable for the management to do this, the meetings should be held by a representative of the Secretary. In order to permit successor members to prepare and to qualify themselves to assume their duties by April 15, the termination date for incumbent members, these nomination meetings should be held not later than March 15 of any crop year. At such meetings each person should be entitled to one vote for each position to be filled from the group in which he is included. Since the purpose of establishing the various groups is to insure representation to all segments of the date industry, no person should be permitted to vote in more than one group and he should be permitted to vote only in that group which has been set up to represent his particular type of activity. For example, a date producer who is not a member of a cooperative marketing association might also be a handler who produced more than 40 percent of the volume he handled. However, he should not be permitted a choice as to whether he will vote for the member to represent the group in paragraph (a) or (e) of § 1003.22. Since his activities place him in group (a) he must cast his vote in that group. To permit a choice under such conditions would tend to defeat the equitable representation for all groups intended to be established on the committee.

In voting by handlers the vote of each handler should be weighted by the tonnage of dates acquired from producers and certified for handling by him through February 28 of the crop year in which the nominations are made. The nominee for each handler member and alternate position should be the person receiving the highest number of votes cast for that particular position by all handlers in the group. It is customary in programs of this nature to weight the votes of handlers by the volumes of the particular commodity which they handle during a specified period reasonably current with the time at which the voting takes place. In the present instance, since the nomination meetings are to be held not later than March 15, it would be appropriate to use for weighting purposes the quantity certified for handling by each handler as of February 28. This is sufficiently late in the crop year to include the bulk of the crop and would be more representative of current conditions than would be the use of certifications during the preceding crop year.

In voting for the cooperative producer member and alternate member positions, the cooperative should be permitted to cast the vote on behalf of its membership. In such an event, the vote should be weighted by the number of producers who are members of the cooperative. Producers who are not members of a cooperative marketing association and cooperative producers in instances where the vote is not cast for all members by the association should have one vote for each position to be filled and every vote should have equal weight. The nominee for each producer member and alternate position should be the person receiving the highest number of votes cast for that particular position by all producers in the group.

Immediately after the completion of the nomination meetings, the committee should report to the Secretary the nominee for each position to be filled together with a certificate of all necessary tonnage data and other information deemed by the committee to be pertinent or which is requested by the Secretary. It should be provided that if nominations for any position are not received by the Secretary within a reasonable time following such meetings, he may select members or alternate members without nomination. However, any such selection should be on the same basis as that prescribed in § 1003.22. Each person selected by the Secretary as a committee member or alternate should, prior to serving on the committee, qualify by filing with the Secretary a written acceptance of his willingness and intention to serve in such capacity. This requirement is necessary so that the Secretary will know whether the selectee will serve and so that appropriate action to fill the position can be taken promptly if the selectee does not qualify. In order to maintain the representation established under § 1003.22, any member or alternate who, at the time of his selection, was a member of or employed by a member of the group which nominated him should, upon ceasing to be such member or employee, become disqualified to serve further and his position on the committee should be deemed vacant. Appropriate provision should be made for the filling of vacancies on the committee and the procedure followed should be that prescribed for the nomination and selection of previous incumbents of the vacant positions. Nominees for any vacant position should be submitted to the Secretary within 30 calendar days after such vacancy occurs.

Alternate members should be provided to act in the place and stead of the members in the event of their absence, removal, resignation, disqualification or death until a successor for such member's unexpired term has been selected and has qualified. Such alternate member should be a representative of the same group as the member for whom he is alternate. When an alternate member is serving as a member, he should have the same authority and privileges as a member. Members of the committee and alternate members, when acting for members, should serve without compensation but should be allowed their necessary expenses as approved by the committee. Experience has shown that date producers and handlers give freely of their time for the benefit of the industry and, therefore, would serve on the committee without compensation. However, they should be reimbursed by the committee for expenses incurred in rendering such service.

The committee should be given those specific powers which are set forth in section 8c (7) (C) of the act. Such powers are necessary to enable an administrative agency of this character to function.

The committee duties as set forth in the order are necessary for the discharge of its responsibilities. These duties are generally similar to those specified for administrative agencies under other programs of this character. It is intended that any activities undertaken by the committee will be confined to those which are reasonably necessary to carry out its responsibilities as prescribed in the order. It should be recognized, however, that these specified duties are not necessarily all inclusive in that it may develop that there are other duties which the committee may need to perform.

The committee should select a chairman from among its members, and such other officers as may be appropriate. Not less than five members, including alternate members acting in the place and stead of members, should constitute a quorum of the committee. This requirement would insure that committee actions would be taken by a more fully representative group than if a quorum consisted of a simple majority of four. No action should be taken by the committee except on a concurring vote of at least five members or alternate members acting in the place and stead of members. These requirements would contribute toward the avoidance of possible domination of the committee by any particular group. The committee should be permitted to vote by mail, telephone (when confirmed in writing) or telegram, upon due notice and full and identical explanation to all members, but one dissenting vote should prevent the adoption of any proposition submitted to vote by these methods. This would enable the board to conduct routine or emergency business with a minimum expenditure of time and funds, but these methods of conducting business should require unanimous vote in the absence of full opportunity for discussion. At all assembled meetings of the committee, all votes should be cast in person. This is desirable because one who is not physically present at a meeting does not have the benefit of full discussion of the matter to be voted upon.

The Agricultural Marketing Agreement Act of 1937, as amended by the Agricultural Act of 1954, permits the authorizing of administrative committees under marketing agreements and orders to establish, or provide for the establishment, of marketing research and development projects designed to assist, improve or promote the marketing, distribution and consumption of the commodity covered by the order. The Date Administrative Committee should be authorized, with the prior approval of the Secretary, to undertake or contract for such research. One of the major problems in the date industry has been the poor keeping quality of packed dates. Under the authority contained in the order, the committee could arrange for study of the possibilities of increasing the shelf-life of dates by means of the use of spoilage inhibitors, materials used in the packaging of dates, and the effects of moisture content. Other fields which might be investigated would include studies of the size and shape of package and analyses of the nutritive value of dates to be used as guides to handlers in directing their promotional activities. It is not intended that committee efforts under this provision would be limited to the activities mentioned above, but that it would have broad discretion in determining the types of research which it believes will be beneficial to the date industry. Committee action under this provision would require the prior approval of the Secretary. The handling of administrative details, including payments of individual items of expense, should be left to the committee. Such general approval authority is necessary in order that the Secretary may remain in a position to exercise the general supervisory authority which is imposed upon him by law.

It is not intended that the proposed authorization, if adopted, would be used to conduct advertising programs for dates, either by radio, television, or through other media, nor is it expected that the funds likely to become available from assessments will be sufficient to enable the committee to conduct large research and development projects directly. However, the authorization would permit the committee to cooperate more effectively in projects conducted by Federal and State agencies, educational institutions, and private research organizations, through contract or other appropriate means.

Inasmuch as there is a need for greater effort and participation of the industry as a whole in the solution of its common problems, and the authority to conduct research can be expected to contribute to more orderly marketing of dates and enhance producer returns, it is concluded that such a provision should be included in the order.

(c) As early as practicable, prior to the beginning of each crop year, the committee should meet to prepare and submit to the Secretary a report of its marketing policy for the ensuing crop year. The purpose of this marketing policy meeting would be to afford the committee an opportunity to meet together and discuss the marketing conditions with which the industry is expected to be faced during the crop year and to consider what action should be taken under the order to facilitiate the marketing of new crop dates. Early determination of a marketing policy would also serve to inform producers and handlers regarding the intentions of the committee for program activity during the year. It is desirable that the policy be established as soon as sufficient information is available to the committee with respect to the probable size and make-up of the coming date crop.

Testimony indicated that a reasonably good indication of the size of the crop could be had during the latter part of June by means of an estimate of the number of bunches of dates that had been pollinated and a determination of the set of the fruit. Any such estimate, of course, would be subject to change as a result of weather conditions which follow. However, flexibility should be provided in the order so that the marketing policy could be modified as crop conditions change.

The marketing policy report to the Secretary should contain recommendations for the regulation of dates during the coming crop year. In order to form a basis for its recommendations, the committee should give consideration to the estimated production of dates, including the estimated production of marketable dates. Under normal conditions, these factors will have the greatest bearing on the policy to be adopted by the committee. They would not only indicate whether excessive supplies could be expected, but also whether the establishment of grade regulations in excess of minimum standards should be made effective for the crop year. A situation might arise wherein the total quantity of dates expected to be produced would indicate that volume regulation is desirable, but where a further examination into the quality of the crop would show that production of marketable dates was not in excess of trade demand.

The committee should also consider the size of the handler carryover as of July 31. Since the dates carried over into the next crop year will form a part of the marketable supply during that year, the extent of the carryover will affect the committee's recommendations with respect to regulation of new crop dates. It is also necessary that the committee estimate the quantity of nonmarketable dates held by handlers as of that date. This information will serve to guide the committee in approving additional outlets for and facilitating early disposal of such dates.

Another major consideration for the committee in establishing its marketing policy would be the estimated trade demand for dates for the crop year. This estimate, when considered along with the indicated total supply of marketable dates, would determine whether the volume regulation provisions of the order should be applied. In order to arrive at this estimated trade demand, the committee should consider the probable volume of dates which will be imported during the crop year since the quantity imported can be expected to have a direct effect on the total quantity of domestic dates which the trade will acquire. General economic conditions in the United States will also directly affect the trade demand. Dates may be considered a luxury item in that they are not normally included among the basic items purchased by consumers. Any curtailment in economic activity and consequent reduction in consumer spendable income can be expected to affect adversely the total demand for dates. Conversely, high levels of economic activity and incomes should provide greater opportunity for increasing date consumption.

Although it is not intended that the committee determine and fix prices for the sale of dates it should, in a general way, consider the probable average level of whole date prices in arriving at an estimate of the tonnage which the trade will acquire during the crop year. One of the requirements of the act is that no volume regulation or quality regulation in excess of the proposed minimum standards shall be operative which would result in producer prices for the commodity regulated above the parity level. Although it is not likely that this factor will be of major concern in the date industry in the foreseeable future, it is important that the committee recognize and consider this limitation.

Since it may not be necessary to regulate the marketing of all varieties of dates in every crop year, or of all varieties on a uniform basis during any crop year, the committee should consider the above factors as they apply to each of the varieties included under the order.

As soon as the committee has agreed upon a marketing policy it should submit to the Secretary a report, including its recommendations with respect to volume and grade controls, and the data upon which such policy was based.

It is desirable that the marketing policy be established prior to the beginning of the crop year, even though estimates upon which such policy is based are subject to change. In the event that marketing conditions change subsequent to the initial marketing policy determination, the committee should modify its policy to reflect current conditions. It is expected that any such policy change would be made early in the crop year and before the fall holiday season.

In order to assure that producers and handlers are informed regarding the policy adopted by the committee, announcement of the marketing policy, or any modification thereof, should be made through newspapers having general circulation in the area of production or through other means reasonably calculated to reach producers and handlers. In addition, copies of all marketing policy reports should be maintained in the office of the committee and made available for examination by producers and handlers.

(d) One of the major problems confronting the date industry has been the availability of low-quality dates in normal markets at prices considerably below those of the standard-quality packs. This has resulted in a disruption of normal markets since buyers generally are hesitant to purchase the better grade dates at the higher prices and then be faced with the price competition afforded by the low-priced, poor-quality dates. It is the intention of the industry to establish minimum standards which would prohibit the marketing of dates below a specified minimum quality. It is hoped by this means to establish a minimum quality below which, due to defects in appearance, texture and flavor, dates are unsatisfactory for human consumption in whole or pitted form. There is, at the present time, an industry proposal before the Department to modify the U. S. Standards for Dates. The proposed modifications provide for a realignment of grades which would be more reflective of present conditions in the date industry. It is intended that initially the minimum standard would be equivalent to the recommended new Grade C of the U. S. Standards for Dates. The practical effect of these changes would be to include in Grade C a portion of those dates which are now included in Grade D. The proposed Grade C represents the line which the industry feels ought to be established below which it is believed consumer reaction to California dates would be adverse.

Since there is no assurance that the proposed modified date standards will be in effect by the time this order becomes effective, the order should provide that the committee may, with the approval of the Secretary, prescribe minimum standards which differ from Grade C of the presently effective U. S. Standards. To aid the Secretary in prescribing such different minimum standards the committee should furnish to the Secretary the data upon which it based its recommendations. Those dates which would not meet the minimum standards established under the order are deemed to be of a quality which, if permitted to be sold to the trade, would have a detrimental effect on the demand for dates. The restrictions on the marketing of such dates, therefore, should continue in effect regardless of whether or not the estimated price to producers during a crop year exceeds the parity price for dates. Notice of the minimum standard regulation should be sent to all handlers of record with the committee in order that they may adjust their operations accordingly.

In addition to the minimum standards which might be established, it might be desirable under certain conditions to establish such other grade regulations which, in the opinion of the committee and the Secretary, would tend to effectuate the declared policy of the act. It is desirable that provision for these additional grade regulations be included in the order because in years of excessive supplies it might be possible to channel off a portion of the supply by means of withholding from market dates which may meet the minimum quality standards established, but the marketing of which would interfere with the sale of higher quality dates. These additional grade regulations should be by varieties since the anticipated grade-out of the crop may be different for each variety. Such additional grade regulation should be put into effect by the Secretary upon the recommendation of the committee or as a result of other information available to the Secretary. Notice, including the effective date, of each such additional regulation should be sent to all handlers of record with the committee. This is necessary in order to enable handlers to adjust their operations to the new regulations with a minimum of interference and to permit them to certify dates which have already been packed under the previous grade regulations. Additional grade regulations may be applied to date products, as well as dates in whole or pitted form.

Prior to the shipment of packed dates, each handler should be required to cause an inspection to be made in order to determine whether or not such dates meet the applicable grade regulations for the crop year. In the case of dates which are sold to another handler for further processing, the shipping handler should be required to cause an inspection to be made. Since the dates so shipped will be subject to outgoing inspection on the part of the receiving handler, it should not be required that such dates meet the applicable grade regulations, but they should meet the minimum grade standards of dates permitted to be handled except for characteristics which are associated with moisture content. This inspection requirement should not be applicable to interhandler transfers of field-run dates within the area of production since such dates would be subject to the inspection and certification requirements before they could be placed in the current of commerce. Where there is an interhandler transfer of packed dates, the buying handler should be subject to the inspection requirement unless such requirements has been met by the selling handler.

Any inspection required to be performed under this order should be performed by inspectors of the United States Department of Agriculture's Processed Products Standardization and Inspection Branch, or such other inspection agency as may be recommended by the committee and approved by the Secretary. The above-named inspection agency has had long experience in the inspection of dates and has indicated that it is capable of performing the inspection required under the order. In some instances, such as the inspection required by a receiving handler of dates shipped out of the area for further processing, inspection by the above-named agency may not be available. It is therefore necessary to provide for the approval of a different inspection agency to perform the required inspection and certification. Any such other agency, of course, should be one adequately equipped to provide the services required. The cost of all such inspections should be borne by the handlers. This would be in line with the present practices in the industry and would not create any hardship for handlers. If such inspection were to be paid for by the committee it would be necessary to increase the rate of assessment, not only to cover the direct inspection costs, but also to provide funds for the machinery which would have to be set up by the committee in order to operate in that manner. Handlers should be required to cause a copy of each inspection certificate to be furnished to the committee in order to enable it to maintain records necessary to check compliance with the order. All dates so inspected should have affixed thereto seals, stamps or other marks, as prescribed by the committee, so that the dates may be identified readily. This identification should be affixed by the handler under the supervision of the committee or its designated inspectors.

(e) If the committee should conclude that the supply and demand for any variety or varieties of marketable dates for any crop year make it advisable to limit the quantity of dates which may be sold in whole or pitted form, it should recommend free and restricted percentages to the Secretary. These percentages should be applied only to marketable dates, since dates below that quality would be prohibited from being shipped in whole or pitted form by reason of the quality restrictions. The free percentage would release a supply for the whole or pitted market and the restricted percentage would determine the volume which must be disposed of in alternate outlets for marketable dates. It is necessary that there be authorization for separate free and restricted percentages for each variety because it may happen that excess supplies of dates of one variety will exist while supplies of other varieties will be less than, or in balance with, trade demand. The committee should submit to the Secretary, along with its recommendation, the information used as a basis for its recommendation for use by him in fixing the free and restricted percentages. The original recommendation of the committee should be submitted to the Secretary at the same time as the marketing policy report so that the volume regulation, if any, can be based on the latest information which will be available and still permit the percentages to become effective near the beginning of the crop year.

Whenever the Secretary should find, on the basis of the committee recommendation or from any other available information, that to designate, for any or all varieties, the percentage of dates handled during any crop year which should be free and restricted would tend to effectuate the declared policy of the act, he should designate such percentages. The sum of the free and restricted percentages for any crop year should equal 100 percent.

The free percentage is intended to be such that its application would result in an adequate quantity which could be sold in whole or pitted form at prices which would tend to effectuate the declared policy of the act. The free portion should not be a quantity so small as to result in a scarcity of dates and excessively high prices nor should it be an excessive quantity which would result in depressed prices.

Dates shipped by a handler in accordance with the provisions of the order should be that handler's quota fixed by the Secretary within the meaning of section 8a (5) of the act. The act provides that any handler wilfully exceeding such quota shall forfeit to the United States a sum equal to three times its current market value. Whenever a restricted percentage has been established for any variety during any crop year, each handler, before or upon shipping dates of that variety, should be required to withhold from shipment a quantity of marketable dates of that variety, or their equivalent in graded dates, having a weight equal to the restricted percentage referable to such shipment. For the purpose of meeting the restricted obligation a handler may withhold graded dates which meet the then applicable requirements for marketable dates except for characteristics associated with moisture. It is desirable that handlers be permitted to withhold in satisfaction of their withholding obligation, graded dates in addition to, or in lieu of, marketable dates. Graded dates can be made marketable by further processing and since the intent of the order is to restrict from marketing a given quantity of marketable dates, the withholding of graded dates in an amount equivalent to the quantity of marketable dates required to be withheld would serve the same purpose as would the withholding of marketable dates.

In order to provide a formula which is readily adaptable to industry operations, the Secretary should announce a withholding percentage. This withholding percentage should be calculated by dividing the restricted percentage by the free percentage. To provide ease in operations such withholding percentage should be rounded to the nearest one-tenth of one percent. The withholding obligation of any handler should be determined by applying the withholding percentage to the weight of dates shipped. Since the pitting of dates results in a weight loss of approximately 10 percent, the withholding obligation on shipments of pitted dates should be calculated by first dividing the weight of pitted dates shipped by 0.90 and then applying the withholding percentage to the adjusted weight of the dates shipped.

The committee should have the authority to defer the fulfilling by a handler of his restricted tonnage obligation for a specified period ending not later than January 31 of the crop year. As a condition, the handler should meet such reasonable requirements as are prescribed by the committee, including, but not limited to, the filing of a performance bond. Deferment of the meeting of such obligation may be desirable because the withholding of appreciable quantities of dates from early season shipments might curtail the movement of dates in normal channels. The peak in date shipments is during the holiday season preceding Christmas. The deferment of withholding restricted dates by handlers would enable them to ship dates freely during this period, thus taking advantage of the active market. Handlers could, at a later date, compute the obligations which had accrued on their respective shipments and physically set aside their restricted dates. This would also enable handlers to market the highest qualities included in their marketable supplies and to set aside for disposition as restricted dates those dates which are in the lower range in terms of quality of their marketable supply. Fulfillment of a handler's restricted obligation should not be deferred beyond January 31 because, by that time the peak of shipments is past and handlers will have the opportunity to satisfy their withholding obligations from later acquisitions. In order to insure, insofar as is practicable, that a handler who is granted such deferment will subsequently satisfy his restricted obligation, the committee should require that he file with it an appropriate written undertaking secured by a performance bond. Since the committee will be in the production area and will be administering the order it is proper that the committee should administer the approving of such bonds. In exercising this function, it should determine what sureties, corporate or private, are satisfactory for acceptance as bondsmen. Since any unaccounted for restricted tonnage would presumably be disposed of as free tonnage, the amount of such a bond should be based upon the then current market value of free dates, as established by the committee, for the variety and quantity for which the deferment is granted. Such bond should run in favor of the

committee and the Secretary so that they can perform their respective duties required in connection with any default. Any sums collected by the committee as the result of default by a handler on his bond should be used by the committee to purchase dates from handlers to the extent of the violated restricted obligation. Dates so purchased should be from the free tonnage supplies of other handlers, since the purpose of the order is to limit the total supply of free dates to the free percentage of the marketable supply. Any expenses incurred by the committee relative to the default should be deducted by it from the funds received. If any funds remain after deducting committee expenses and the cost of purchasing such dates they should be refunded to the defaulting handlers. Since the purchase of such dates and their subsequent disposition into channels for restricted dates would fulfill such handler's obligations under the order, any dates purchased by the committee under this procedure should be turned over to the defaulting handler for disposition in accordance with the requirements of the order. In the event that the committee is unable to purchase a poundage of free dates equal to the defaulted volume, the sums collected by the committee, after deduction for committee expenses, should be distributed among all handlers other than the defaulting handler in proportion to the volume of certified dates handled during the crop year in which the default occurred. The act of the defaulting handler in handling more than his quota would have a detrimental effect on the returns received by nondefaulting handlers on their free dates. It is proper, therefore, that where the violated obligation cannot be filled by the purchase of other dates, the money collected upon default go to the other handlers.

Handlers should be permitted to have their dates inspected and certified for handling or further processing at any time during the crop year. This would enable handlers to obtain inspection and certification on large lots and have them available for subsequent shipment in smaller quantities with a minimum of delay. If this were not permitted, a handler would be required to cause an inspection to be made each time he made a shipment of dates. At the time of such inspection and certification for handling, the dates should be identified and the withholding and assessment obligations on such dates should accrue at that time. Any dates so certified and carried over into the next crop year should not be subject to the assessment and withholding obligations of the new crop year.

All dates withheld in satisfaction of a handler's restricted obligation should be stored by the handler at his own expense and disposed of in accordance with § 1003.55. Such dates should be inspected and identified in order to assure that they will not subsequently be shipped in normal channels as free dates. It was testified that the date industry desires that each handler dispose of his restricted dates into authorized outlets and that the returns therefrom accrue to him. Therefore, it should be the responsibility of handlers to determine the method of storage of dates so withheld.

Upon the recommendation of the committee made prior to January 31 of any crop year, or on the basis of other available information, the Secretary should be authorized to increase the free percentage to conform with such new relation as may be found to exist between trade demand and available supply. Supply and marketing conditions may change significantly between the time of the original establishment of free and restricted percentages and the active marketing season. In the event that subsequent conditions indicate that the free percentage as originally established will not result in there being available in whole and pitted markets a sufficient quantity of dates of any variety, provision should be made in the order to release that quantity of restricted dates which it is found is required to meet the trade demand, and to increase the free percentage, accordingly. However, any committee recommendation for an increase in the free percentage should be made prior to January 31 of the crop year, because by that date sufficient information will be available to enable the committee to estimate the supply and demand for the crop year. It is expected that handlers will not have disposed of appreciable quantities of their restricted dates by that time. An increase in the free percentage late in the crop year, and after handlers had already disposed of substantial tonnages of restricted dates, might result in inequities among the handlers in that those who had refrained from disposing of their restricted dates could benefit fully from the increased free percentage, while those who had disposed of most of their restricted dates could not benefit to the same extent. Since the order contemplates the disposition of restricted dates as soon as practicable after it is known that they will not be needed to supplement the free supply, it is desirable that handlers know that there will be no subsequent change in the free and restricted percentages. It is contemplated that the Secretary will take action on any such recommendation as soon as practicable.

Upon any revision in the free and restricted percentages for any crop year the withholding obligations of each handler with respect to dates handled or certified for handling by him should be recomputed in accordance with such revised percentages. This procedure would tend to assure that the new percentages which are based upon estimated total supplies for the season will result in the availability in normal market channels of the desired quantity of dates. Upon an increase in the free percentage, insofar as is practicable, each handler should be permitted to select, under the supervision and direction of the committee, the particular dates to be removed from dates withheld by him as restricted dates.

Provision should be made whereby the committee, upon the written request of any handler, might assist such handler in obtaining storage facilities for restricted dates withheld by him or in acquiring marketable dates from other handlers to be used in satisfaction of his withholding obligation. This should not be construed as being a mandatory obligation to be assumed by the committee, but the committee should assist handlers in these matters if it is in a position to do so. The situation may arise where a small handler finds himself in a position where he does not have on hand or available to him sufficient quantities of marketable dates to meet his restricted obligation. In that case, upon written request by him to the committee, the committee should inform him of any such dates which it knows are available for sale by other handlers. Similarly, if a handler is unable to obtain storage facilities for his restricted dates, and the committee has knowledge of the availability of such facilities, it should so inform him.

Although it is expected that the marketing policy report and the issuance of regulations by the Secretary for any crop year will be put into effect at the beginning of the crop year the situation might arise where such action has not been taken until after the start of the new crop year. In such an event, the quality and volume regulations and the bonding rates established for any crop year should continue in effect with respect to all dates for which control obligations have not been previously met until regulations and bonding rates are established for the new crop. However, it should be permissible to specify a termination date in any regulation. Upon the establishment by the Secretary of new volume regulations and bonding rates, appropriate adjustments should be made with respect to all handling of dates since the beginning of the new crop year which would result in the application of the new regulations and rates for the entire crop year.

It is contemplated that, in the normal course of operations, dates will be transferred from one handler to another. In order to assure that the committee will have complete control of such dates these transfers should be made only upon notice to and with approval of the committee. If any such transfer occurs wholly within the area of production the withholding and assessment obligations should be placed upon either handler as they may specify. In the event the committee is not notified of any such agreement to assume the above-mentioned obligation the buying handler should be held accountable. Regulation of the handling of dates is intended to assure that no dates are moved into consumptive channels without having previously met the control obligations. It is, therefore, logical that in the absence of an agreement any such obligations should be assumed by the buying handler. In the case of an inter-handler transfer of dates which involves movement of dates into a point outside the area of production, the assessment and withholding obligations should be assumed by the handler within the production area. This would facilitate enforcement of the order by the committee.

Provision should be made for an individual handler to be granted exemption from any or all regulations established under the order on sales of dates to consumers through roadside stands, local date shops, mail order or specialty outlets. Such exemptions, however, should be based on a finding by the committee that the particular type of sale is not likely to interfere materially with the objectives of the order. Any request for such a exemption should be made in writing by the producer or handler seeking the exemption. In order to enable the committee to maintain a record of exempt shipments, they should be reported to the committee in such manner and such form as the committee may specify. To inform producers and handlers of the type of handling which would qualify for exemption, the committee should issue, with the approval of the Secretary, appropriate rules and regulations establishing the bases on which the exemptions may be claimed. It is contemplated that prior to the issuance of such regulation the committee will receive and consider suggestions from interested persons regarding the types of handlings which should be exempt. In order that the committee will have flexibility in operation it is necessary that the final determination with respect to any request for exemption be vested in the committee.

(f) The order should provide for the disposition of all dates other than free dates in order to assure they do not interfere with the marketing of free dates. The types of dates to be withheld fall generally into two categories: (1) those dates which are of standard quality but which are not free dates due to the grade or volume regulations in effect for the crop year and (2) those dates which are of substandard quality or culls. By reason of the differences in the quality of the dates in the above two categories provision for disposition of these dates should result in the sale of the better quality dates for date products for human consumption and of the low quality dates for non-food uses.

Disposition of dates in the category numbered (1) should be limited to exportation in any form to such countries as the committee may approve or for diversion into such forms as rings, chunks, pieces, butter, macerated, paste or other products which the committee determines to be appropriate and which will result in the dates moving into consumption in a form other than that of whole or pitted dates. In approving countries eligible for exportation of whole and pitted dates the committee should give consideration to the countries included in its estimate of trade demand and the possibility of reimportation into the United States of dates so exported. It is not intended that any country which is included in the trade demand estimate will be an eligible country of destination for the exportation of restricted tonnage or standard grade non-marketable dates. In regard to reimportation, the committee should consider the rates of import duties and other factors which would affect the price of dates sought to be reimported. The products listed above for disposition of non-marketable standard grade dates are being produced in significant volume at the present time. These products are being manufactured from dates which are of comparable quality to those included in this category. Provision should be made, however, for the addition of other products which the committee finds to be appropriate.

The disposition of substandard grade dates should be limited to feed, nontable syrup, alcohol, brandy, macerated dates or such other outlets as the committee finds are non-competitive with the outlets for free dates. With the exception of macerated dates, these products are non-food items. Since the date industry is desirous of developing markets for date food products, dates used in the manufacture of such products should meet the minimum quality standards established under the order. The exception, which would permit the use of substandard fruit in the production of macerated dates, is based upon the fact that they have proven satisfactory for such use. It is important that the disposition of cull dates be limited to products not destined for human consumption as food, so that a market may be developed for date products produced from good quality dates.

There was considerable discussion at the hearing regarding the desirability of establishing a fixed date by which all dates withheld from marketing in normal channels under the order must be converted from the whole or pitted form. It is desirable that any such dates be disposed of as soon as practicable following the end of the crop year in which they were produced. Although the use of such dates is restricted under the order, their mere presence could affect adversely the marketing of new crop dates. Several proposals were advanced which would tend to accomplish this objective, among which were (1) the establishment of a fixed date in the order and the requirement that all such dates be converted by such fixed date, (2) the establishment of a fixed date in the order and the requirement that all such dates be either converted or sold under firm contracts to manufacturers of approved products by such fixed date, and (3) the establishment of a fixed period in the order with authority in the committee to determine each crop year a final date for conversion or sale within such fixed period. Although it is recognized that the inclusion of a period and provision for year to year changes in the final date of disposition would provide flexibility in the order, it is concluded that, in this instance, the introduction of flexibility might create more problems than it would solve. In order that dates withheld from market will not burden the market in the new crop year, a fixed date for disposition is desirable. It should be provided that all dates covered by §§ 1003.55 and 1003.56 shall be converted from their whole or pitted form or sold under firm contracts to manufacturers of approved products by September 30 of the subsequent crop year. This will give handlers sufficient time to arrange for the disposition of dates withheld and would not create any serious burden, since the sale of the dates for use in authorized outlets would tend to minimize problems due to lack of processing facilities.

The committee should be permitted to prescribe, with the approval of the Secretary, such rules, regulations and safeguards as are necessary to prevent dates withheld from interfering with the objectives of the order. These regulations might include, but should not be limited to, reports on exportation of dates withheld, a standard contract form which would provide safeguards against reimportation, and provision for indemnity bonds where necessary to assure proper disposition of dates withheld.

(g) There was set forth in the notice of hearing a proposal that the committee should have authority, with the approval of the Secretary, to restrict the types of containers and to require the use of spoilage inhibitors where necessary to promote the declared policy of the act. It was the intention of the proponents that such a provision would result in greater acceptability of dates by consumers generally, thereby increasing consumer demand for dates and improving producer prices. Opposition to this provision was raised by several handlers who held that any such regulation might deprive them of markets they are now enjoying or force them into marketing practices which they felt would cause them injury. Particular concern was expressed with respect to the possible requirement of the use of spoilage inhibitors in the processing of dates. It was held that such a requirement would alienate present consumers of dates of the so-called "natural food" category.

In view of the apprehension expressed by these handlers, the proponents of this provision subsequently withdrew their recommendation that it be included in the order. Since the removal of this provision would not affect the authority of the committee to engage in research in order to promote the distribution and consumption of dates, and since the results of any such research which would indicate that date consumption could be increased by the adoption of new processing or packaging techniques would in all likelihood be adopted voluntarily by most handlers of dates, it is concluded that the provision for packaging regulations should not be proposed for adoption.

(h) Each handler should file with the committee a written report of his carryover of dates as of January 1 and May 15 of any crop year and at such other times as the committee might prescribe. The information contained in these reports would be needed by the committee in its appraisal of the current market situation in determining marketing policy. These reports should be filed by handlers within 15 days following the date for which the information is required. The annual May 15 report, therefore, should be in the hands of the committee by June 1. Since it is expected that the marketing policy meeting will be held sometime in June, a carryover report as of the indicated date would furnish them with the latest information available

and enable them to estimate the probable carryover at the end of the crop year. The report to be submitted as of January 1 would be needed by the committee when it meets to determine whether changes in the free and restricted percentages are justified. The January 1 report, which would be received by the committee not later than January 15 would furnish it with the latest available information as of that time. The committee should also be authorized to require handler carryover reports when necessary so that it might be in a position to review the supply situation at any given time.

In order that the committee be informed as to the movement of dates during the crop year, each handler should report to the committee, upon its request, the quality of dates which he has handled during a crop year. The committee should have the authority to specify the form and the interval of such reports as it deems necessary. In addition to these reports on the handling of free dates, each handler should be required to furnish to the committee reports with respect to the restricted dates withheld by him. Through the use of these reports the committee would be in a position to determine whether or not handlers were withholding sufficient dates to meet their obligations.

Each handler should report to the committee, prior to the date of planned disposition, a notice of intention to dispose of restricted dates. Upon completion of disposition of restricted dates each handler should provide the committee with all pertinent data with respect to such disposition. These reports would permit the committee to check on the proposed outlets for the dates withheld in order to determine whether or not such disposition is in accordance with the order restrictions. The report on final disposition would enable the committee to determine the amount of restricted tonnage remaining in handlers' inventories.

Upon the request of the committee each handler should furnish such other reports and information as may be needed to enable the committee to perform its functions. It is impracticable to anticipate every type of report or kind of information which the committee may need, but it should have the authority to obtain such reports and information needed for that purpose.

By reason of the nature of the reports which a handler would be required to file with the committee and the records he would need to keep, some of the information obtained might be such as would disclose his trade secrets or affect adversely his trade position or business operations if known by a competitor. Therefore, insofar as is reasonably consistent with the necessary use of such information in connection with the administration of the order, each handler should be protected against disclosure of the confidential information furnished by him. This objective would be attained by having the information furnished to one or more employees of the committee charged especially with the responsibility of keeping such information confidential, and disclosing to no person other than the Secretary information which would reveal the circumstances of any individual handler. Nevertheless, such information should be revealed to any extent necessary when a question of compliance with the order is involved. The limitation on disclosure of such information should not be construed as prohibiting in any way the making of reports to the committee and the industry which summarize the information.

Since verification of the reports is necessary to check their correctness, the committee, through its authorized representatives, should have access during reasonable business hours, to any handler's premises wherein dates are held and should be permitted to examine any dates held and any and all records with respect to dates held or disposed of by handlers. Handlers should furnish all necessary labor and equipment to make such examination at no expense to the committee. Handlers should maintain complete records on the handling, withholding, and disposition of dates. Since it is possible that a question might arise with respect to compliance with the order after the crop year in which dates were shipped, the records required to be maintained under the order should be kept by handlers for at least two years after the end of the crop year.

(i) The committee should be authorized to incur such expenses as the Secretary finds are reasonable and likely to be incurred by it during each crop year for the maintenance and functioning of the committee and for such other purposes as the Secretary may, pursuant to the provisions of the order, determine to be appropriate. The committee's recommendation as to expenses for each crop year, together with all data supporting such recommendations, should be filed with the Secretary within a reasonable time after the marketing policy for each crop year is recommended. The committee would have determined its marketing policy for the ensuing crop year and would be in a position to estimate its expenses at that time. This would also enable the Secretary to take action on the committee recommendation near the beginning of the new crop year. Since the proposed order might be made effective before the beginning of the 1955 crop year, any expenses incurred by the committee prior to August 1, 1955, should be paid from funds collected during the crop year beginning August 1, 1955.

Funds to pay expenses of the committee during a crop year should be obtained through the levying of assessments on handlers. The act requires that each marketing order contain provisions requiring handlers to pay pro rata the necessary expenses. The rate of assessment should be fixed by the Secretary at a level which would bring into the committee sufficient funds to cover their expenses. In the event that for any reason the assessment rate fixed for any crop year should prove to be insufficient to cover such expenses, the Secretary should increase the assessment rate to the extent necessary to cover such expenses. In order to prevent inequities among handlers in this respect, any increase in the assessment rate during the crop year should apply to all dates handled during the crop year. For practical administration the assessment obligation should accrue at the time of certification.

In order to provide operating funds for the committee at the earliest practicable date it is desirable that the initial assessment rate be fixed in the order. The proponents of the order have recommended that the initial rate be set at 15 cents per hundredweight. It is believed that the 15 cent rate would provide adequate funds for operation from the effective date hereof until the end of the 1955 crop year. It has been pointed out that the pitting operation is accompanied by a loss of approximately 10 percent in the weight of the dates processed. In order to bring the assessment on pitted dates into relation with the assessment for non-pitted dates the assessment weight for pitted dates should be determined by dividing the shipping weight by 0.90. In order to enable the committee to operate prior to the time of shipment of dates during any crop year the committee should be authorized to accept payments of assessment in advance and to borrow money in an amount not to exceed 10 percent of its budgeted expenses for that crop year. The 10 percent limitation is designed to prevent the committee from assuming the obligations of a large debt.

Each handler should pay to the committee upon demand, with respect to all dates handled or certified for handling by him, his pro rata share of the committee expenses. Each handler's pro rata share of these expenses should be equal to the ratio between the total quantity of dates handled or certified for handling by him, to the total quantity of dates handled or certified for handling by all handlers during each crop year. In this way, payment of assessments would be proportionate to the respective quantities of dates handled or certified for handling by each handler.

It should be provided that any money collected as assessments during the crop year and not expended in connection with that year's operations may be used by the committee in paying its expenses for a period not in excess of the first four months of the next crop year. It should further be provided that within a reasonable time thereafter the committee should credit, or upon demand refund, the aforesaid excess to each handler on the basis of the ratio of the total amount of assessments paid by him to the total amount paid by all handlers.

These provisions for the use of excess funds are necessary because unforeseen delays may be encountered in approval of a budget of expenses and the establishment of an assessment rate for the new crop year. It should be permissible for the committee to use such excess funds from the previous crop year to meet expenses incurred during the first four months of the new crop year. To the extent that these funds are available, the committee would not need to request that handlers make advance payments. It is contemplated that the committee will confine the use of any such excess funds to such period of time as may be necessary in case their use for the full four-month period is not needed.

(j) The provisions of §§ 1003.77 through 1003.84, as hereinafter set forth, are provisions similar to those which are usually included in other marketing agreements and orders now operating. The provisions of §§ 1003.87 through 1003.89, as hereinafter set forth, are also included in other marketing agreements now operating. All these provisions are incidental to and not inconsistent with the act and are necessary to effectuate the other provisions of the recommended marketing agreement and order and to effectuate the declared policy of the act. Testimony at the hearing supports the inclusion of each such provision.

Those provisions which are applicable to both the recommended marketing agreement and order, identified by both section number and heading are as follows: § 1003.77 *Personal liability;* § 1003.78 *Separability;* § 1003.79 *Derogation;* § 1003.80 *Duration of immunities;* § 1003.81 *Agents;* § 1003.82 *Effective time; suspension or termination;* § 1003.83 *Effect of termination or amendment* and § 1003.84 *Amendments.*

Those provisions which are applicable to the recommended marketing agreement only, identified by both section number and heading, are as follows: § 1003.87 *Counterparts;* § 1003.88 *Additional parties* and § 1003.89 *Order with marketing agreement.*

At the conclusion of the hearing the presiding officer set April 8, 1955 as the time by which briefs would have to be filed by interested parties with respect to facts presented in evidence and the conclusions which should be drawn. No such briefs have been filed within the prescribed time.

General findings. Upon the basis of the evidence introduced at such hearing and the record thereof, it is hereby found that:

(1) This marketing agreement and order, and all of the terms and conditions thereof, will tend to effectuate the declared policy of the act;

(2) This marketing agreement and order will regulate the handling of dates produced or packed in Riverside or Los Angeles counties located within the State of California in the same manner as, and is applicable only to the persons in the respective classes of industrial and commercial activities specified in, the proposed marketing agreement and order upon which a hearing has been held;

(3) The marketing agreement and order are limited in their application to the smallest regional production area which is practicable, consistently with carrying out the declared policy of the act and the issuance of several orders applicable to subdivisions of the production area would not carry out the declared policy of the act effectively;

(4) There are no differences in the production and marketing of dates in the production area covered by the marketing agreement and order which would require different terms applicable to different parts of such area; and

(5) The handling of all dates produced or packed in Riverside and Los Angeles counties located within the State of California is either in the current of interstate or foreign commerce, or directly burdens, obstructs, or affects such commerce.

Recommended marketing agreement and order. The following proposed marketing agreement and order[1] are recommended as the detailed means by which the foregoing conclusions may be carried out.

DEFINITIONS

§ 1003.1 *Secretary.* "Secretary" means the Secretary of Agriculture of the United States, or any officer or employee of the Department to whom authority has heretofore been delegated, or to whom authority may hereafter be delegated, to act in his stead.

§ 1003.2 *Act.* "Act" means Public Act No. 10, 73d Congress, as amended and reenacted and amended by the Agricultural Marketing Agreement Act of 1937, as amended (7 U. S. C. 601 et seq.; 68 Stat. 906, 1047).

§ 1003.3 *Person.* "Person" means an individual, partnership, corporation, association, or any other business unit.

§ 1003.4 *Area of production.* "Area of production" means the counties of Riverside and Los Angeles located within the State of California.

§ 1003.5 *Dates.* "Dates" means the Deglet Noor, Zahidi, and Khadrawy varieties of domestic dates produced or packed in the area of production.

§ 1003.6 *Crop year.* "Crop year" means the 12 months from August 1 to the following July 31, both inclusive.

§ 1003.7 *Producer.* "Producer" is synonymous with grower and means any person engaged in a proprietary capacity in the production of dates for sale.

§ 1003.8 *Handler.* "Handler" means any person handling dates which have not been inspected and certified for handling in the hands of a previous holder: *Provided,* That for the purposes of §§ 1003.22 and 1003.24 such person shall qualify as a handler only if he has acquired the dates directly from producers.

§ 1003.9 *Handle.* "Handle" means to sell, consign, transport or ship (except as a common or contract carrier of dates owned by another person) or in any other way to put dates into the current of commerce, except that sales or deliveries by producers to a handler within the area of production shall not be considered as handling.

§ 1003.10 *Handler carry-over.* "Handler carry-over" means, as of any date, all marketable dates then held by a handler or for his account (whether or not sold), plus the estimated quantity of marketable dates in ungraded or unprocessed lots then held by said handler.

§ 1003.11 *Trade demand.* "Trade demand" means the quantity of marketable dates which the trade will acquire from all handlers during the crop year for distribution in the continental United States, Canada, and such other countries as the committee finds will acquire dates at prices reasonably comparable with prices received in the continental United States.

§ 1003.12 *Marketable dates.* "Marketable dates" means, for any crop year, whole or pitted dates which are certified as equal to or higher than the minimum grade permitted to be handled by the regulations imposed by this part.

§ 1003.13 *Free dates.* "Free dates" means those dates which are free to be handled pursuant to any free percentage established by the Secretary in accordance with § 1003.44.

§ 1003.14 *Restricted dates.* "Restricted dates" means those dates which must be withheld by handlers pursuant to any restricted percentage established by the Secretary in accordance with § 1003.44.

§ 1003.15 *Committee.* "Committee" means the Date Administrative Committee established pursuant to § 1003.21.

§ 1003.16 *Cooperative handler.* "Cooperative handler" means any handler which is a cooperative marketing association of growers organized under the laws of the State of California.

§ 1003.17 *Part and subpart.* "Part" means the order regulating the handling of domestic dates produced or packed in Los Angeles and Riverside counties of California, and all rules, regulations, and supplementary orders issued thereunder. The aforesaid order shall be a "subpart" of such part.

DATE ADMINISTRATIVE COMMITTEE

§ 1003.21 *Establishment of Date Administrative Committee.* A Date Administrative Committee consisting of seven members, with an alternate member for each such member, is hereby established to administer the terms and conditions of this part.

§ 1003.22 *Membership representation.* Members and alternates shall be selected by the Secretary from each of the following groups and on the following basis:

(a) One to represent handlers each of whom produced not less than 40 percent of the volume he handled.

(b) One to represent cooperative handlers.

(c) Two to represent handlers not included in paragraph (a) or (b) of this section.

(d) One to represent producers who are members of a cooperative marketing association.

(e) Two to represent producers who are not members of a cooperative marketing association.

The foregoing representation is based on each handler member representing approximately 25 percent of the tonnage handled and each producer member representing approximately one-third of the total number of commercial producers. Whenever the Secretary finds that changes in tonnage handled or producer membership in cooperatives is such as

[1] The provisions identified with an asterisk (*) apply only to the proposed marketing agreement and not to the proposed order.

to warrant a realignment of the four handler members or the three producer members, he shall notify the committee and thereafter nominations and selections of members and alternates shall be on such new basis as the Secretary may determine.

§ 1003.23 *Term of office.* In the groups specified in § 1003.22, one member and his alternate in the groups in paragraphs (c) and (e) and the member and alternate in the group in paragraph (b) shall serve until April 15 of even-numbered years and the others shall serve until April 15 of odd-numbered years but all shall serve, unless disqualified, until their respective successors have been selected and have qualified.

§ 1003.24 *Nominations*—(a) *Initial members.* Nominations for each of the initial members, together with nominations for the initial alternate members, may be submitted to the Secretary by individual, or groups of, producers, producer-handlers, or handlers. Such nominations, if made, shall be received by the Secretary no later than the effective date of this subpart. In the event such nominations are not received as prescribed, the Secretary may select such initial members and alternate members without regard to nominations.

(b) *Successor members.* Each of the groups specified in § 1003.22 may nominate members and alternates for such members at nomination meetings to be held on or before March 15 of each year. At such meetings each person shall be entitled to cast one vote for each position to be filled except that the votes cast in the groups in § 1003.22 (a), (b) and (c) shall be weighted by the tonnage of dates acquired from producers and certified for handling through February 28 of the current crop year. The individual receiving the highest number of votes shall be the nominee. Immediately after the completion of such meetings the committee shall report to the Secretary the nominees for each position together with a certificate of all necessary tonnage data and other information deemed by the committee to be pertinent or which is requested by the Secretary. In the event nominations for any position on the committee are not received within a reasonable time, the Secretary may select members or their alternates without regard to nominations but such selections shall be on the basis prescribed in § 1003.22.

§ 1003.25 *Qualification.* Each person selected as a member or alternate member of the committee shall, prior to serving on the committee, qualify by filing with the Secretary a written acceptance after receiving notice of his selection. Any member or alternate who, at the time of his selection, was a member of or employed by a member of the group which nominated him shall, upon ceasing to be such member or employee, become disqualified to serve further and his position on the committee shall be deemed vacant.

§ 1003.26 *Vacancies.* In the event of any vacancy occasioned by the failure of any person selected as a member or alternate member of the committee to qualify or by the removal, resignation, disqualification, or death of any member or alternate member, a successor for such person's unexpired term shall be nominated within thirty calendar days after such vacancy occurs and selected in the manner, and subject to the conditions, provided in this subpart.

§ 1003.27 *Alternates.* An alternate for a member of the committee shall act in the place and stead of such member during his absence or in the event of his removal, resignation, disqualification, or death, until a successor for such member's unexpired term has been selected and has qualified.

§ 1003.28 *Expenses.* The members of the committee shall serve without compensation but shall be allowed their necessary expenses.

§ 1003.29 *Powers.* The committee shall have the following powers:

(a) To administer the terms and provisions of this subpart.

(b) To make rules and regulations to effectuate the terms and provisions of this subpart.

(c) To receive, investigate, and report to the Secretary complaints of violations of this subpart, and

(d) To recommend to the Secretary amendments to this subpart.

§ 1003.30 *Duties.* The committee shall have, among other things, the following duties:

(a) To act as intermediary between the Secretary and any producer or handler.

(b) To keep minutes, books, and records which will clearly reflect all of its transactions and such minutes, books, and other records shall be subject to examination by the Secretary at any time.

(c) To investigate the growing, handling, and marketing conditions with respect to dates, to assemble data in connection therewith.

(d) To furnish to the Secretary such available information as may be deemed pertinent to the administration of this subpart or as he may request and to give to the Secretary the same notice of meetings of the committee as is given to the members of the committee.

(e) To appoint such employees as it may deem necessary and to determine the salaries, define the duties and where desirable fix the bonds of such employees.

(f) To cause the books of the committee to be audited by a certified public accountant at least once each crop year and at such other times as the committee may deem necessary or the Secretary may request. The report of each such audit shall show among other things the receipt and expenditure of funds pursuant hereto. Two copies of such audit shall be submitted to the Secretary, and

(g) To investigate compliance and to use means available to the committee to prevent violations of this part.

§ 1003.31 *Procedure.* The members of the committee shall select a chairman from their membership and shall select such other officers and adopt such rules for conduct of its business as it may deem advisable. All decisions of the committee shall be by at least five affirmative votes. The presence of five members shall be required to constitute a quorum. The committee may vote by mail, telephone when confirmed in writing, or telegram, upon due notice and full and identical explanation to all members, but one dissenting vote shall prevent the adoption of any proposition presented to voting by this method. At all assembled meetings of the committee all votes shall be cast in person.

RESEARCH AND DEVELOPMENT

§ 1003.33 *Research and development.* The committee, with the approval of the Secretary, may establish or provide for the establishment of marketing research and development projects designed to assist, improve, or promote the marketing, distribution, and consumption of dates. The expense of such projects shall be paid from funds collected pursuant to § 1003.72.

MARKETING POLICY

§ 1003.34 *Development.* As early as practicable, but no later than August 1, the committee shall prepare and submit to the Secretary a report setting forth its marketing policy, including the data on which it is based, for the regulation of dates in the ensuing crop year. In developing the marketing policy the committee shall give consideration to the following factors by varieties:

(a) Its estimate of the total production separated as to marketable and other grades, which will be produced in such crop year;

(b) Its estimate of handler carry-over as of July 31 and of any non-marketable dates held by handlers or users;

(c) Its estimate of the trade demand, taking into consideration imports, economic conditions and the anticipated market price, within the limitations of the act;

(d) Its recommendation with respect to the free and restricted percentages to be fixed; and

(e) Its recommendations as to grade regulations.

§ 1003.35 *Modifications.* In the event the committee subsequently determines that the marketing policy should be modified due to changing supply or demand conditions, it shall formulate and submit to the Secretary its modified marketing policy along with the data which it considered in connection with such modification.

§ 1003.36 *Notice.* The committee shall give notice through newspapers having general circulation in the area of production or by other means of communication to producers and handlers of the contents of each marketing policy report submitted to the Secretary and of each report modifying such marketing policy. Copies of all such reports shall be maintained in the office of the committee where they shall be available for examination by producers and handlers.

GRADE REGULATION

§ 1003.39 *The establishment of minimum standards.* In order to effectuate the declared policy of the act all whole and pitted dates handled under this subpart shall meet the requirements of U. S. Grade C, of the effective United States Standards for Grades of Dates: *Provided,* That the Secretary may, upon recommendation of the committee, prescribe other minimum standards of quality. To aid the Secretary in prescribing such other minimum standards, the committee shall furnish to the Secretary the data upon which it acted in recommending such standards. The provisions hereof relating to minimum standards of quality and to inspection requirements, within the meaning of section 2 (3) of the act, and any other provisions relating to the administration and enforcement thereof shall continue in effect irrespective of whether the season average price to producers for dates is or is not in excess of the parity level specified in section 2 (1) of the act. Notice of the minimum standard regulation shall be sent by the committee to all handlers of record, and thereafter no handler shall handle dates except in accordance with such minimum standards.

§ 1003.40 *Additional grade regulation.* Whenever the committee deems it advisable to establish grade regulations for any variety in addition to those provided by the minimum standards, to govern shipments of dates, it shall recommend to the Secretary controls based on the effective United States Standards for Grades of Dates or any modification thereof. If the Secretary finds upon the basis of such recommendation or other information available to him, that such additional grade regulation would tend to effectuate the declared policy of the act he shall establish such regulations, and notice thereof, showing the effective date, shall be sent by the committee to all handlers of record. Thereafter no handler shall handle dates except in accordance with such grade regulations.

§ 1003.41 *Inspection*—(a) *Packed dates.* Prior to shipment each handler shall, at his own expense, cause an inspection to be made of all dates packed for handling in order to ascertain if such dates meet the grade regulations provided for in this part.

(b) *Dates for further processing.* Prior to shipment each handler shall, at his own expense, cause an inspection and certification to be made that dates handled by him for further processing are equal to the minimum grade standard except for character associated with moisture: *Provided,* That this inspection and certification requirement shall not apply to interhandler transfers of field run dates within the area of production.

(c) *Identification and agency.* All dates shipped shall be identified by seals, stamps, or other means prescribed by the committee and affixed to the containers by the handlers under the supervision of the committee or the designated inspectors. Inspection shall be performed by inspectors of the United States Department of Agriculture's Processed Products Standardization and Inspection Branch or such other inspection agency as may be recommended by the committee and approved by the Secretary. Handlers shall cause a copy of each inspection certificate to be furnished to the committee.

VOLUME REGULATION

§ 1003.44 *Free and restricted percentages.* (a) Whenever the committee finds that the available supply of marketable dates for any crop year exceeds or is likely to exceed the total trade demand therefor, and that limiting the volume to be sold in whole or pitted form of any or all varieties through establishing free and restricted percentages applicable to such supply would tend to effectuate the declared policy of the act, it shall recommend such percentages to the Secretary. If the Secretary finds, upon the basis of the committee's recommendation and supporting data or other information available to him, that the establishment of such percentages would tend to effectuate the declared policy of the act, he shall establish such percentages. The sum of the free and restricted percentages for any crop year shall equal 100 percent.

(b) The dates shipped by any handler in accordance with the provisions hereof shall be determined to be that handler's quota fixed by the Secretary within the meaning of section 8a (5) of the act. The terms of said section prescribe that any person wilfully exceeding such a quota and any other person knowingly participating or aiding in such action shall forfeit to the United States a sum equal to three times the then current market value of such excess.

§ 1003.45 *Withholding restricted dates.* (a) Whenever a regulation has been established for a crop year by the Secretary in accordance with § 1003.44, each handler, before or upon shipping dates, shall have withheld from shipment a quantity of marketable dates, or their equivalent in graded dates, having a weight equal to the restricted percentage referable to such shipment. The weight to be set aside shall be determined by dividing the restricted percentage by the free percentage and applying the resultant withholding percentage, rounded to the nearest one-tenth of one percent, to the weight of dates shipped. The withholding percentage shall be established by the Secretary. The restricted weight of pitted dates shall be determined by dividing the shipping weight by 0.90 and applying the withholding percentage.

(b) Compliance by any handler with the withholding of restricted dates may be deferred to any date not later than January 31 of any crop year, upon request to the committee and when accompanied by a written undertaking that on or prior to such date, he will have fully satisfied his withholding obligation. Such undertaking shall be secured by a bond or bonds to be filed with, and acceptable to, the committee and with a surety or sureties acceptable to the committee, running in favor of the committee and the Secretary in an amount conditioned upon full compliance with such undertaking. The amount shall be determined by multiplying the poundage of the deferred restricted obligation by a bonding rate per pound which would provide funds estimated to be sufficient for the committee to purchase on the open market a volume of dates equivalent to the deferred obligation. Such bonding rate shall be established annually, and modified as necessary, by the committee. Any sums collected through default by a handler on his bond shall be used by the committee to purchase dates to meet the violated restricted obligation, reimburse the committee for expenses relative to the default, and any excess money remaining shall be refunded to the defaulting handler. The dates so purchased by the committee shall be turned over to the defaulting handler for disposition as restricted dates. In the event the committee is unable to purchase a poundage of dates equal to the defaulting volume, the sums collected shall, after reimbursement of committee expenses in connection with the default, be distributed among all handlers other than the defaulting handler in proportion to the volume of certified dates handled during the crop year in which the default occurred.

(c) Dates may be certified for handling or for further processing at any time during a crop year and at the time of certification shall be inspected and identified by appropriate seals, stamps, or tags to be furnished by the committee and to be affixed to the containers by the handler under the direction and supervision of the committee or its designated inspectors at which time the assessment requirements provided in § 1003.72 and the restricted obligation with respect to such dates shall be met. Dates so certified may thereafter be carried over into the new crop year and need not pay the assessment nor meet the requirements of any free or restricted percentages established for such year.

(d) Dates withheld to meet the restricted obligation shall be stored at the expense of the handler, in storage of his own choosing and disposed of in accordance with § 1003.55. All such dates shall be inspected and identified by appropriate seals, stamps, or tags to be furnished by the committee and to be affixed to the containers by the handler under the direction and supervision of the committee or its designated inspectors. All withholding and movement of restricted dates shall be subject to the supervision and accounting control of the committee and reports shall be filed as required by this part.

§ 1003.46 *Revisions of percentages.* The Secretary may, on recommendation of the committee submitted prior to January 31 of the crop year, or on the basis of other information available to him, increase the free percentage to conform with such new relation as may be found to exist between trade demand and available supply. Upon any revision in the free and restricted percentages the control obligation of each handler with respect to dates handled or certified for handling by him for the entire crop year shall be recomputed in accordance with such revised control percentages. The handler shall be permitted to select, insofar as practicable, under the super-

vision and direction of the committee, the particular dates to be removed from any dates withheld.

§ 1003.47 *Assistance to handlers.* The committee, on written request, may assist handlers in obtaining storage for restricted dates, in accounting for their control obligations or in acquiring dates to meet any deficiency in a handler's control obligation.

QUALIFICATIONS TO REGULATION

§ 1003.50 *Application after end of crop year.* Unless otherwise specified the regulations and the bonding rates established for any crop year shall continue in effect with respect to all dates for which control obligations have not been previously met, until regulations and bonding rates are established for the new crop year. Thereupon the withholding obligations for all dates handled or certified for handling during such crop year shall be adjusted to the newly established percentages and a similar adjustment shall be made in any bond or bonds already given for that crop year.

§ 1003.51 *Interhandler transfers.* Transfers of dates may be made from one handler to another upon notice to and permission of the committee. If such transfer is wholly within the area of production, the assessment and withholding obligations shall be placed on the handler agreeing to assume them: *Provided,* That in the absence of the committee receiving notice of a specific agreement on such obigations, the buying handler shall be held accountable. If such transfer is from within the area of production to any point outside thereof, the assessment and withholding obligations shall be met by the handler within the area of production.

§ 1003.52 *Exemption.* The committee may exempt from regulation, upon written request of any producer or handler, the dates he sells to consumers through roadside stands, local date shops, mail order or specialty outlets, if it determines that the particular request is not likely to materially interfere with the objectives of this part. All dates handled pursuant to exemptions under this section shall be reported to the committee in such manner and in such form as the committee may prescribe. The committee shall issue, with the approval of the Secretary, appropriate rules and regulations establishing the bases on which exemptions may be granted.

DISPOSITION OF OTHER THAN FREE DATES

§ 1003.55 *Outlets for restricted or standard.* Restricted dates and any standard grade but non-marketable dates may be disposed of through exportation to such countries as the committee may approve or by diversion in such form as rings, chunks, pieces, butter, macerated, paste, or other products which the committee determines to be appropriate and which will result in the dates moving into consumption in a form other than that of whole or pitted dates.

§ 1003.56 *Outlets for substandard and culls.* Substandard grade dates shall be disposed of in feed, non-table syrup, alcohol, brandy, macerated dates or such other outlets as the committee finds are non-competitive with the outlets for free dates. Disposition of cull dates shall be limited to products not destined for human consumption as food.

§ 1003.57 *Terminal date.* Dates covered by §§ 1003.55 and 1003.56 shall be converted from their whole or pitted form or sold under firm contracts to manufacturers of approved products by September 30 of the subsequent crop year.

§ 1003.58 *Safeguards.* The committee may prescribe, with the approval of the Secretary, such rules, regulations and safeguards as are necessary to prevent dates covered by §§ 1003.55 and 1003.56 from interfering with the objectives of this part.

REPORTS AND RECORDS

§ 1003.61 *Reports of handler carryover.* Each handler shall file with the committee a written report of his carryover of dates as of January 1 and May 15 of any crop year and at such other times as the committee may prescribe. Such reports shall be filed within 15 days of the aforesaid dates.

§ 1003.62 *Reports of dates shipped.* Each handler who ships dates during a crop year shall submit to the committee, in such form and at such intervals as the committee may prescribe, reports showing the net weight of dates shipped by him and such other information pertinent thereto as the committee may specify.

§ 1003.63 *Reports on restricted dates withheld.* Each handler from time to time, on demand of the committee, shall file with it a report of the restricted dates withheld by him in satisfaction of his withholding obligation. Such reports shall show such information as the committee may require and may be in such form as the committee may prescribe.

§ 1003.64 *Reports on disposition of restricted.* Each handler disposing of any quantity of restricted dates held by him shall give the committee the following reports:

(a) Prior to the date of planned disposition, a notice of intention to dispose.

(b) Upon completion of disposition, a notice, including pertinent data, of the completion of disposition.

§ 1003.65 *Other reports.* Upon request of the committee each handler shall furnish to it in such manner and at such times as it prescribes, such other information as will enable the committee to perform its duties and exercise its powers hereunder.

§ 1003.66 *Certification of reports.* All reports submitted to the committee as required in this part shall be certified to the United States Department of Agriculture and to the committee as to the completeness and correctness of the information therein.

§ 1003.67 *Confidential information.* All data or other information constituting a trade secret or disclosing a trade position or business condition shall be received by, and kept in the custody of, one or more designated employees of the committee and information which would reveal the circumstances of a single handler shall be disclosed to no person other than the Secretary.

§ 1003.68 *Verification of reports.* For the purpose of checking and verifying reports made by handlers to it, the committee, through its designated employees, shall have access to handler premises wherein dates are held and, at any time during reasonable business hours, shall be permitted to examine any dates held and any and all records with respect to dates held or disposed of by such handlers. Handlers shall furnish labor necessary to facilitate such examinations at no expense to the committee. All handlers shall maintain complete records on the handling, withholding and disposition of dates. Such records shall be retained by handlers for not less than two years subsequent to the termination of each crop year.

EXPENSES AND ASSESSMENTS

§ 1003.71 *Expenses.* The committee is authorized to incur such expenses as the Secretary may find are reasonable and likely to be incurred by it during each crop year for the maintenance and functioning of the committee and for such other purposes determined to be appropriate. The recommendation of the committee as to total expenses and allocation thereof for each crop year, together with all data supporting such recommendation, shall be submitted to the Secretary within a reasonable time after the marketing policy for each crop year is recommended. Expenses incurred prior to August 1, 1955 shall be paid from funds collected during the crop year beginning August 1, 1955.

§ 1003.72 *Assessments.* The Secretary shall fix rates of assessments for each crop year to be paid by each handler with respect to dates handled or certified for handling. At any time during or after a crop year the Secretary may increase such assessment rates to secure sufficient funds to cover the expenses authorized in § 1003.71. Any such increase shall apply to all dates handled during the crop year. The rate of assessment for the initial crop year is hereby established at fifteen (15) cents per hundredweight. The committee may accept the payments of assessments in advance and may borrow money in any amount not to exceed ten percent of the estimated expenses set forth in its budget for the then crop year. The assessment weight of pitted dates shall be determined by dividing the shipping weight by 0.90.

§ 1003.73 *Requirement for payment.* Each handler shall pay his pro rata share of the expenses which the Secretary finds are reasonable and likely to be incurred during each crop year. Each handler's share of such expenses shall be based on the ratio of the total quantity of dates handled or certified for handling by him to the total quantity of such dates handled or certified for handling by all handlers during each crop year.

§ 1003.74 *Refunds.* Excess funds held by the committee at the conclusion of a crop year may be used to defray expenses for no more than the ensuing four months and thereafter, within a reasonable time, the committee shall credit or, upon demand, refund the aforesaid excess to each handler on the basis of the ratio of the total amount paid by him to the total amount paid by all handlers.

MISCELLANEOUS PROVISIONS

§ 1003.77 *Personal liability.* No member or alternate member of the committee, or any employee or agent thereof, shall be held personally responsible, either individually or jointly with others, in any way whatsoever, to any handler or any other person for errors in judgment, mistakes, or other acts either of commission or omission, as such member, alternate member, agent, or employee, except for acts of dishonesty, willful misconduct or gross negligence.

§ 1003.78 *Separability.* If any provision of this part is declared invalid, or the applicability thereof to any person, circumstance, or thing is held invalid, the validity of the remainder of this part or the applicability of this part to any other person, circumstance, or thing shall not be affected thereby.

§ 1003.79 *Derogation.* Nothing contained in this part is, or shall be construed to be, in derogation or in modification of the rights of the Secretary or of the United States to exercise any powers granted by the act or otherwise, or, in accordance with such powers, to act in the premises whenever such action is deemed advisable.

§ 1003.80 *Duration of immunities.* The benefits, privileges, and immunities conferred upon any person by virtue of this subpart shall cease upon its termination except with respect to acts done under and during its existence.

§ 1003.81 *Agents.* The Secretary may, by a designation in writing, name any person, including any officer or employee of the United States Government, or name any bureau or division of the United States Department of Agriculture, to act as his agent or representative in connection with any of the provisions of this part.

§ 1003.82 *Effective time, suspension, or termination*—(a) *Effective time.* The provisions of this part, as well as any amendments hereto, shall become effective at such time as the Secretary may declare, and shall continue in force until terminated or suspended in one of the ways hereinafter specified in this section.

(b) *Suspension or termination*—(1) *Failure to effectuate policy of act.* The Secretary shall terminate or suspend the operation of any or all of the provisions of this part, whenever he finds that such provisions do not tend to effectuate the declared policy of the act.

(2) *When favored by growers.* The Secretary shall terminate the provisions of this part at the end of any crop year whenever he finds that such termination is favored by a majority of the growers of dates who, during that crop year, have been engaged in the production for market of dates in the area of production: *Provided,* That such majority have, during such period, produced for market more than 50 percent of the volume of such dates produced for market within said area; but such termination shall be effective only if announced on or before June 1 of the then current crop year.

(3) *If enabling legislation is terminated.* The provisions of this part shall, in any event, terminate whenever the provisions of the act authorizing them cease to be in effect.

(c) *Proceedings after termination*—(1) *Designation of trustees.* Upon the termination of the provisions hereof, the members of the committee then functioning shall continue as joint trustees, for the purpose of liquidating the affairs of the committee, of all funds and property then in the possession or under the control of the committee, including claims for any funds unpaid or property not delivered at the time of such termination. Action by said trusteeship shall require the concurrence of a majority of the said trustees.

(2) *Duties of trustees.* Said trustees shall continue in such capacity until discharged by the Secretary; shall, from time to time, account for all receipts and disbursements and deliver all property on hand, together with all books and records of the committee and the joint trustees, to such person as the Secretary may direct; and shall, upon request of the Secretary, execute such assignments or other instruments necessary or appropriate to vest in such persons full title and right to all funds, property, and claims vested in the committee or the joint trustees pursuant hereto.

(3) *Obligations of persons other than committee members and trustees.* Any person to whom funds, property, or claims have been transferred or delivered by the committee or its members, pursuant to this section, shall be subject to the same obligations imposed upon the members of the said committee and upon the said joint trustees.

§ 1003.83 *Effect of termination or amendment.* Unless otherwise expressly provided by the Secretary, the termination hereof or of any regulation issued pursuant to this part, or the issuance of any amendment to either thereof, shall not—

(a) Affect or waive any right, duty, obligation, or liability which shall have arisen or which may thereafter arise in connection with any provision of this part or any regulation issued hereunder, or

(b) Release or extinguish any violation of this part or of any regulation issued hereunder, or

(c) Affect or impair any rights or remedies of the Secretary or of any other person, with respect to any such violation.

§ 1003.84 *Amendments.* Amendments hereto may be proposed, from time to time, by any person or by the committee.

SPECIAL AGREEMENT PROVISIONS

§ 1003.87 *Counterparts.** This agreement may be executed in multiple counterparts and when one counterpart is signed by the Secretary, all such counterparts shall constitute, when taken together, one and the same instrument as if all signatures were contained in one original.

§ 1003.88 *Additional parties.** After the effective date of this agreement, any handler may become a party hereto if a counterpart is executed by him and delivered to the Secretary. This agreement shall take effect as to such new contracting party at the time such counterpart is delivered to the Secretary, and the benefits, privileges, and immunities conferred by this agreement shall then be effective as to such new contracting party.

§ 1003.89 *Order with marketing agreement.** Each signatory handler hereby requests the Secretary to issue, pursuant to the act, an order providing for the regulating of the handling of domestic dates produced or packed in Los Angeles and Riverside Counties of California in the same manner as is provided for in this agreement.

Dated: May 17, 1955.

[SEAL] ROY W. LENNARTSON,
Deputy Administrator.

ANNUAL CHARGES

NOTICE OF DATE OF HEARING

MAY 16, 1955.

In the matter of amendment to Part 11 of Subchapter B of the regulations relating to annual charges prescribed for licensees under the provisions of the Federal Power Act.

Pursuant to application for rehearing filed by South Carolina Public Service Authority, licensee for water-power Project No. 199, and pursuant to section 313 (a) of the Federal Power Act, the Commission by order issued August 30, 1954, granted a rehearing in this matter at such time as may later be found convenient.

Take notice that, pursuant to the authority contained in section 10 (e), 308 and 313 of the Federal Power Act and the Commission's rules of practice and procedure, a hearing will be held on July 19, 1955 at 10:00 a. m., e. d. s. t., in the Commission's Hearing Room, 441 G Street NW., Washington, D. C., concerning the matters involved and the issues presented in the aforesaid application for rehearing and the Commission's order issued August 30, 1954.

[SEAL] LEON M. FUQUAY,
Secretary.

DEPARTMENT OF HEALTH, EDUCATION, AND WELFARE

Food and Drug Administration

[21 CFR Part 120]

TOLERANCES AND EXEMPTIONS FROM TOLERANCES FOR PESTICIDE CHEMICALS IN OR ON RAW AGRICULTURAL COMMODITIES

NOTICE OF FILING OF PETITION FOR ESTABLISHMENT OF TOLERANCES FOR RESIDUES OF CAPTAN

Pursuant to the provisions of the Federal Food, Drug, and Cosmetic Act as amended (sec. 408 (d) (1), 68 Stat. 512; 21 U. S. C. 348 (d) (1)), the following notice is issued:

A petition has been filed by California Spray-Chemical Corporation, Richmond, California, and Stauffer Chemical Company, Chauncey, New York, proposing establishment of tolerances for captan as follows:

Proposed tolerance of 15 parts per million on:

Citrus fruits (grapefruit, lemons, limes, oranges, tangerines).
Pineapples.
Beans (green beans, lima beans, black-eyed peas).
Peas.
Potatoes.

Proposed tolerance of 20 parts per million on:

Apples, pears, quinces.
Grapes.
Strawberries.
Cucumbers, summer squash.
Eggplant, peppers.
Melons (cantaloupes, watermelons).
Pumpkins, winter squash.
Tomatoes.

Proposed tolerance of 25 parts per million on:

Peaches, nectarines, apricots, mangoes.
Plums, prunes.
Celery.
Collards, spinach.
Lettuce.

Proposed tolerance of 40 parts per million on:

Cherries (sweet and sour).

The analytical method proposed in the petition for determining residues of captan is a modification of that published in Analytical Chemistry, Vol. 24, page 1173 (1952).

Dated: May 16, 1955.

[SEAL] GEO. P. LARRICK,
Commissioner of Food and Drugs.

NOTICES

DEPARTMENT OF LABOR

Wage and Hour Division

LEARNER EMPLOYMENT CERTIFICATES

ISSUANCE TO VARIOUS INDUSTRIES

Notice is hereby given that pursuant to section 14 of the Fair Labor Standards Act of 1938, as amended (52 Stat. 1068, as amended; 29 U. S. C. 214) and Part 522 of the regulations issued thereunder (29 CFR Part 522), special certificates authorizing the employment of learners at hourly wage rates lower than the minimum wage rates applicable under section 6 of the act have been issued to the firms listed below. The employment of learners under these certificates is limited to the terms and conditions therein contained and is subject to the provisions of Part 522. The effective and expiration dates, occupations, wage rates, number or proportion of learners and learning periods for certificates issued under general learner regulations (§§ 522.1 to 522.12) are as indicated below; conditions provided in certificates issued under special industry regulations are as established in these regulations.

Apparel Industry Learner Regulations (29 CFR 522.20 to 522.24, as amended April 19, 1955, 20 F. R. 2304).

Dunhill Shirt Co., El Dorado Springs, Mo., effective 5-3-55 to 5-2-56; 10 learners for normal labor turnover purposes (men's shirts).

Dunhill Shirt Co., El Dorado Springs, Mo., effective 5-22-55 to 11-21-55; 10 learners for plant expansion purposes (men's shirts).

East End Fashions, 1008 Union Avenue, Scranton, Pa., effective 5-4-55 to 5-3-56; 5 learners for normal labor turnover purposes (dresses).

Hebson Garment Co., Inc., 25 East G Street, Anniston, Ala., effective 5-9-55 to 5-8-56; 5 learners for normal labor turnover purposes (pajamas and nightgowns).

Hollywood Corset Co., East Main Street, Eastland, Tex., effective 5-19-55 to 5-18-56; 10 learners for normal labor turnover purposes (brassieres).

David Lee Sportswear Co., Inc., Wayne Street and Clay Avenue, West Hazleton, Pa., effective 5-4-55 to 5-3-56; 10 percent of the total number of factory production workers for normal labor turnover purposes (dresses).

Pettibelle, Inc., East Liberty Street, Sumter, S. C., effective 5-3-55 to 5-2-56; 10 percent of the total number of factory production workers for normal labor turnover purposes (children's cotton dresses).

Sharon Manufacturing Co., New Sharon, Iowa, effective 5-4-55 to 5-3-56; 4 learners for normal labor turnover purposes (work clothes and jackets).

Glove Industry Learner Regulations (29 CFR 522.60 to 522.65, as amended April 19, 1955, 20 F. R. 2304).

Indianapolis Glove Co., Inc., Glenwood, Ark., effective 5-11-55 to 5-10-56; 10 learners for normal labor turnover purposes (canton flannel and leather-palm work gloves and all leather work gloves).

Hosiery Industry Learner Regulations (29 CFR 522.40 to 522.43 as amended April 19, 1955, 20 F. R. 2304).

Bland Hosiery Mills, Inc., Bland, Va., effective 5-9-55 to 5-8-56; 5 learners for normal labor turnover purposes (full fashioned).

Renfro Hosiery Mills Co., 304 Willow Street, Mt. Airy, N. C., effective 5-12-55 to 5-11-56; 5 percent of the total number of factory production workers for normal labor turnover purposes (seamless).

Regulations Applicable to the Employment of Learners (29 CFR 522.1 to 522.12, as amended February 28, 1955, 20 F. R. 645).

The following special learner certificate was issued in the Virgin Islands to the company hereinafter named. The effective and expiration dates, the number of learners, the learner occupations, the length of the learning periods and the learner wage rates are indicated, respectively.

V. I. Jewelry Manufacturing Corp., St. Thomas, Virgin Islands, effective 5-3-55 to 11-2-55; 15 learners to be employed in the occupations of stone setting, layout, and soldering; each 160 hours at 30 cents an hour (costume jewelry).

Each certificate has been issued upon the employer's representation that employment of learners at subminimum rates is necessary in order to prevent curtailment of opportunities for employment, and that experienced workers for the learner occupations are not available. The certificates may be canceled in the manner provided in the regulations and as indicated in the certificates. Any person aggrieved by the issuance of any of these certificates may seek a review or reconsideration thereof within fifteen days after publication of this notice in the FEDERAL REGISTER pursuant to the provisions of Part 522.

Signed at Washington, D. C., this 11th day of May 1955.

MILTON BROOKE,
Authorized Representative of the Administrator.

[Docket No. 11388]

HERB'S TAXI

ORDER TO SHOW CAUSE

In the matter of Herbert W. Farrar, d/b as Herb's Taxi, Gardner, Massachusetts, Docket No. 11388; Order To Show Cause Why the License for Taxicab Radio Station KCC 420 should not be revoked.

There being under consideration the matter of certain alleged violations of the Commission's rules in connection with the operation of Taxicab Radio Station, call sign KCC 420, licensed to Herbert W. Farrar, d/b as Herb's Taxi, 32 Connors Street, Gardner, Massachusetts; and

It appearing that notices of violations of the Commission's rules in the operation of the station were given the licensee as follows:

(a) Notice dated January 17, 1955, specifying that said licensee had violated § 16.160 of the Commission's rules by failing to maintain a record of transmitter measurements for the preceding 6 months; and

(b) Notice dated February 10, 1955, specifying that said licensee had violated § 16.159 of the Commission's rules by failing to respond to the above-mentioned Violation Notice, dated January 17, 1955; and

It further appearing that, despite further notices calling attention to the foregoing notice of violations and the failure to reply thereto in accordance with § 16.159 of the Commission's rules, no explanation or other response has been received from the licensee:

It is ordered, This 10th day of May 1955 pursuant to the provisions of section 312 (a) (4) and (c) of the Communications Act of 1934, as amended, that the said Herbert W. Farrar show cause why the aforementioned license should not be revoked and appear and give evidence in respect thereto at a hearing [1] to be held before this Commission at Washington, D. C., on the 18th day of July 1955; and

It is further ordered, That the Secretary send a copy of this Order by Registered Mail—Return Receipt Requested to the said Herbert W. Farrar D/b as Herb's Taxi, 32 Connors Street, Gardner, Massachusetts.

Released: May 11, 1955.

[Change List 93]

CANADIAN BROADCAST STATIONS

LIST OF CHANGES, PROPOSED CHANGES, AND CORRECTIONS IN ASSIGNMENTS

MAY 3, 1955.

Notification under the provisions of part III, section 2, of the North American Regional Broadcasting Agreement.

List of changes, proposed changes, and corrections in assignments of Canadian Broadcast Stations modifying appendix

[1] Section 1.402 of the Commission's rules provides that in order to have the opportunity to appear before the Commission at the time and place specified in an order to show cause, a licensee shall within thirty (30) days from the date of the receipt of a show cause order submit a written statement informing the Commission whether said licensee will appear at the designated hearing and present evidence upon the matters specified, or whether the rights to such a hearing are waived. Waiver of the hearing may be accompanied by a statement setting forth the reasons why the licensee believes that an order of revocation should not be issued. A waiver unaccompanied by such a statement will be deemed to be an admission of the allegations specified in the order to show cause. Failure to respond to a show cause order within the above-mentioned thirty (30) day period, or, having informed the Commission in writing within the above-mentioned thirty (30) day period that the licensee will appear at the hearing and present evidence upon the matter specified and then failing to appear at the hearing, will be deemed to be a waiver of the right to a hearing and an admission of the allegations specified in the order to show cause.

ED HOLLYFIELD ET AL.

NOTICE OF APPLICATION AND DATE OF HEARING

MAY 16, 1955.

Take notice that Ed Hollyfield, Eulalie M. Nobles and Adele McFarlane (Applicants), independent producers with their principal place of business at 305 Armstrong Building, El Dorado, Arkansas, filed, on August 20, 1954, an application for a certificate of public convenience and necessity pursuant to section 7 (c) of the Natural Gas Act, authorizing the proposed acts or operations hereinafter described.

Applicants propose to sell casinghead gas produced by one well located in the Lisbon Field in Claiborne Parish, Louisiana, to United Gas Pipeline Company (United) at an initial base price of 7.5 cents per Mcf under a contract dated August 17, 1954. Annual deliveries are estimated at 73,000 Mcf. United states that the facilities necessary to receive and transport such gas, other than a meter station, were authorized in Docket Nos. G–232, G–549 and G–1869.

Applicants were issued temporary authorization on August 24, 1954, to perform the acts or operations described herein.

This matter is one that should be disposed of as promptly as possible under the applicable rules and regulations and to that end:

Take further notice that, pursuant to the authority contained in and subject to the jurisdiction conferred upon the Federal Power Commission by sections 7 and 15 of the Natural Gas Act, and the Commission's rules of practice and procedure, a hearing will be held on June 7, 1955, at 9:30 a. m., e. d. s. t., in a hearing room of the Federal Power Commission, 441 G Street N. W., Washington, D. C., concerning the matters involved and the issues presented by such applications: *Provided, however,* That the Commission may, after a noncontested hearing, dispose of the proceeding pursuant to the provisions of § 1.30 (c) (1) or (2) of the Commission's rules of practice and procedure. Failure of any party to appear at and participate in the hearing shall be construed as waiver of and concurrence in omission herein of the intermediate decision procedure in cases where a request therefor is made.

Protests or petitions to intervene may be filed with the Federal Power Commission, Washington, D. C., in accordance with the rules of practice and procedure (18 CFR 1.8 or 1.10) on or before the 3d day of June 1955. The application is on file with the Commission for public inspection.

[Docket No. G–8711]

SUNRAY OIL CORP.

NOTICE OF APPLICATION AND DATE OF HEARING

MAY 16, 1955.

Take notice that Sunray Oil Corporation (Applicant), a Delaware corporation whose address is Tulsa, Oklahoma, filed on April 1, 1955, an application for a certificate of public convenience and necessity pursuant to section 7 of the Natural Gas Act, authorizing Applicant to render service as hereinafter described, subject to the jurisdiction of the Commission, all as more fully represented in the application which is on file with the Commission and open for public inspection.

Applicant proposes to sell natural gas to Colorado Interstate Gas Company (Colorado Interstate) at an initial rate of 12.15 cents per Mcf, which gas will be produced from the Keyes Field in Cimarron County, Oklahoma. This gas will be commingled with other gas and resold at markets in other states served by Colorado Interstate's transmission pipeline system.

This matter is one that should be disposed of as promptly as possible under the applicable rules and regulations and to that end:

Take further notice that, pursuant to the authority contained in and subject to the jurisdiction conferred upon the Federal Power Commission by sections 7 and 15 of the Natural Gas Act, and the Commission's rules of practice and procedure, a hearing will be held on June 15, 1955, at 9:30 a. m., e. d. s. t., in a Hearing Room of the Federal Power Commission, 441 G Street NW., Washington, D. C., concerning the matters involved in and the issues presented by such application: *Provided, however,* That the Commission may, after a non-contested hearing, dispose of the proceedings pursuant to the provisions of § 1.30 (c) (1) or (2) of the Commission's rules of practice and procedure.

Protests or petitions to intervene may be filed with the Federal Power Commission, Washington 25, D. C., in accordance with the rules of practice and procedure (18 CFR 1.8 or 1.10) on or before June 10, 1955. Failure of any party to appear at and participate in the hearing shall be construed as waiver of and concurrence in omission herein of the intermediate decision procedure in cases where a request therefor is made.

MIDDLE SOUTH UTILITIES, INC., ET AL.

NOTICE OF FILING OF PETITION TO OPEN RECORD IN PREVIOUS PROCEEDING AND TO HOLD PUBLIC HEARINGS IN RESPECT OF OPENED RECORD AND ON PENDING APPLICATIONS AND DECLARATIONS

MAY 16, 1955.

In the matter of Middle South Utilities, Inc., Arkansas Power & Light Company, Louisiana Power & Light Company, Mississippi Power & Light Company, New Orleans Public Service, Inc., Respondents, File No. 59–100; Electric Power & Light Corporation, File No. 54–139; Louisiana Power & Light Company, Louisiana Gas Service Corporation, File No. 70–3315; Louisiana Power & Light Company, File No. 31–620.

Notice is hereby given that Louisiana Public Service Commission ("Public Service Commission") has filed a petition, supplemental petition, offer of proof, and brief requesting this Commission to open the record in the consolidated proceeding "In the Matter of Middle South Utilities, Inc., et al., File No. 59–100" and "In the Matter of Electric Power & Light Corporation, File No. 54–139" and to hold a public hearing thereon and also in respect of pending applications-declarations of Louisiana Power & Light Company ("Louisiana Power"), a public utility subsidiary of Middle South Utilities, Inc. ("Middle South"), a registered holding company, and a pending application-declaration of Louisiana Gas Service Corporation ("Louisiana Gas"), a subsidiary of Louisiana Power, these applications-declarations having been filed with this Commission on November 10, 1954, and having been described in a Notice of Filing heretofore issued by the

Commission on December 13, 1954 (Holding Company Act Release No. 12740).

I. *Background.* On January 29, 1953, this Commission issued a notice and order directed, *inter alia*, to Middle South and Louisiana Power, concerned with a public hearing, pursuant to section 11 (b) (1) and section 11 (e) of the act (File Nos. 59–100 and 54–139). Among the issues enumerated in that Notice and Order as being the subject matter of the hearing was the following:

> Whether Middle South and Louisiana [Power] should be required to take action to dispose of the gas utility assets and non-utility assets of Louisiana [Power] and, if so, what terms and conditions should be imposed in connection therewith.

A copy of this notice of and order for hearing was served on Public Service Commission by registered mail.

The order convening the hearing directed Respondents to answer the allegations set forth in the notice and order. In their answer, Middle South and Louisiana Power claimed that the gas properties of Louisiana were retainable as a public-utility system additional to the integrated electric utility system of Middle South. Neither the Public Service Commission nor the representative of any other public body or of public security holders appeared at the public hearing with respect to the retainability of the gas properties of Louisiana Power. Briefs and oral argument before this Commission were waived by all parties.

On March 20, 1953, this Commission issued its findings and opinion and order in which it was concluded, among other things, that Louisiana Power and Middle South should divest themselves of all non-electric properties. The Commission stated:

> The general framework of the act as well as its legislative history demonstrates the intention of permitting the retention of additional systems only where such additional system is so small that it could not operate economically under separate management. [Citing Cong. Report on S. 2796, H. R. No. 1903, 74th Cong., 1st Sess. p. 71; 79 Cong. Rec. 14479 (Aug. 24, 1935) and The North American Company v. S. E. C., 327 U. S. 686, 696–697 (1946).] It is clear that the gas properties of Louisiana [Power] are capable of effective and economical operation as a separate entity, and are, in fact, larger than many completely independent systems. We note in this connection that two of Louisiana [Power's] sister companies, Arkansas and Mississippi, have disposed of their gas properties which are now independently operated.
>
> We have previously pointed out that the separation of electric and gas utility systems from common control frequently results in some increase in operating expenses due to the elimination of certain types of savings which common control has permitted. [Citing Engineers Public Service Company, 12 S. E. C. 41 (1942); The Philadelphia Company, Holding Company Act Release No. 8242 (June 1, 1948); The North American Company, 11 S. E. C. 194 (1946).] However, the statutory criterion for retention stated in section 11 (b) (1) (A) of the Act is not whether there is some additional expense. For the loss of economies to be "substantial" they must be "important" in the sense that they are of such magnitude as to cause a serious economic impairment of the system. [Citing General Public Utilities Corporation, Holding Company Act Release No. 10982.] There is no evidence in this case to warrant the conclusion that separation of the gas and electric properties of Louisiana [Power] would cause the serious economic impairment of the gas system or that the gas properties could not operate effectively and efficiently under separate ownership.

The order directed "* * * Middle South and its subsidiary [to] dispose or cause the disposition of their direct or indirect ownership in the non-electric properties owned by * * * Louisiana [Power] * * * in any appropriate manner not in contravention of the applicable provisions of the Act or the Rules and Regulations promulgated thereunder; * * *" (Holding Company Act Release No. 11782.)

Thereafter, pursuant to an application of Louisiana Power, the Commission extended until March 20, 1955, the period of time by which Middle South and Louisiana Power were required to dispose of their interests in the non-electric properties of Louisiana Power.

As hereinbefore stated, on November 10, 1954, Louisiana Power and Louisiana Gas filed a joint application-declaration with this Commission proposing the divestment by Louisiana Power to Louisiana Gas of all the non-electric properties of Louisiana Power and the issuance of common stock and debt securities by Louisiana Gas. In this filing, Louisiana Power also sought an order of this Commission declaring, pursuant to section 3 (a) (4) of the act, that Louisiana Power was only temporarily a holding company, the filing indicating that while no definitive program had at that time been developed in respect of the divestment of the common stock of Louisiana Gas by Louisiana Power it was its intention to effect the divestment within a period of 18 months from the date of acquisition.

This Commission on December 13, 1954, issued its Notice of Filing in respect of this joint application-declaration and notified any interested person that, no later than December 27, 1954, he could request the Commission in writing that a hearing be held on such matter stating the reasons for such request, the nature of his interest and the issues of fact or law raised by the joint filing which he desires to controvert. By telegram dated December 22, 1954, Public Service Commission requested a public hearing in this matter and, in addition thereto, asked that the Commission open the record in the prior proceedings which had resulted in the divestment order of March 20, 1953. Thereafter Public Service Commission filed a petition and supplemental petition containing, among other things, a consent on the part of Louisiana Power to a reopening of the record in the prior proceedings.

II. *Position of Louisiana Public Service Commission.* Generally speaking, Public Service Commission states that all of the physical properties of Louisiana Power, both gas and electric, are located in the State of Louisiana. Public Service Commission further states that it is empowered to regulate and control public-utility companies, including the transfer of the ownership of the assets of such companies (a power asserted by General Order of that Commission adopted and published June 16, 1953), that "Louisiana State policy favors the retention of gas distribution systems by electric utilities," that fourteen of the fifteen Parishes of the State of Louisiana served by Louisiana Power and all of the thirty-one communities served have officially expressed themselves as favoring the retention of the gas properties by Louisiana Power, and that both the gas and electric consumers of Louisiana Power will best be served by the continued operation of both the gas and electric properties by Louisiana Power.

III. *Description of material filed by Louisiana Public Service Commission in support of its position.* All interested persons are referred to the petition, supplemental petition, offer of proof, exhibits attached thereto, and brief of Public Service Commission, which are on file in the office of this Commission. The pertinent portions of these documents may be summarized as follows:

The offer of proof outlines six general matters which Public Service Commission would propose to establish at a public hearing in these proceedings. These six items are concerned primarily with the following considerations: (i) On the basis of a separation study of Louisiana Power for the year 1954 prepared by the members of the staff of Public Service Commission which allegedly "* * * shows that the total additional cost of such separation to Louisiana [Power's] utility customers would be $957,000 of which $684,337 would be additional cost to Louisiana [Power's] electric customers, [and] $272,816 would represent additional cost to the nonelectric customers," the gas system of Louisiana Power cannot be operated as an independent system without the loss of substantial economies; (ii) the electric and gas systems of Louisiana Power are located entirely within the State of Louisiana; (iii) the continued combination of such systems will not impair the advantages of localized management, efficient operation or the effectiveness of regulation; (iv) no law of the State of Louisiana prohibits the joint ownership or operation of gas and electric utility assets; (v) the public interest and the interest of consumers will best be served by the continued joint operation by Louisiana Power of gas and electric utility assets, and (vi) it is the desire of all governmental agencies of the territory served by Louisiana Power (except Jefferson Parish) that the joint operation of these properties by Louisiana Power be continued.

The brief of Public Service Commission submitted in support of the offer of proof outlines five general propositions as follows: (a) Public Service Commission proposes to present facts and arguments not considered by this Commission at the hearing which resulted in its order dated March 20, 1953. These facts and arguments, generally speaking, are concerned with the separation study prepared by the staff of Public Service Commission in respect of the loss of economies hereinbefore referred to; information in respect of the difference in interest rates between mortgage bonds sold by Louisiana Power on October 19, 1954, resulting in a net cost of money

of 3.11 percent per annum and the proposed debt securities of Louisiana Gas with a cost of money of 3.55 percent per annum; a comparison of the seasonal variations in the sales of gas and electric energy purporting to demonstrate that these variations tend to complement each other; a comparison of the operations of Louisiana Power with Arkansas Power & Light Company and Mississippi Power & Light Company, two affiliated companies of Louisiana Power, which pursuant to orders of this Commission have divested themselves of their gas properties, purporting to show an increase in operating expenses per customer for Arkansas Power & Light Company and Mississippi Power & Light Company in 1954 as compared with 1949 exceeding the increase during this same period for Louisiana Power; (b) that the foregoing additional evidence establishes that the requirements of section 11 (b) (1) of the act would permit the retention by Louisiana Power of its non-electric properties; (c) that the legislative history of the act demonstrates that State policy primarily determines whether gas and electric properties should be retained in a general operating company; (d) that the public interest will best be served by the retention of the gas properties by Louisiana Power; and (e) that from an "over all" point of view it would appear that the act has accomplished its purpose with respect to this utility and that further "disintegration" would only prove harmful.

IV. Notice is further given that Middle South and Louisiana Power and any other interested person may file a statement in support of or in opposition to the position of Public Service Commission setting forth in such statement the nature of his interest therein, the allegations in the petition of Public Service Commission which he controverts and the reasons and conclusions in support of his position. This Statement of Position with supporting arguments should be submitted on or before June 13, 1955, at 5:30 p. m., e. d. s. t., and should be addressed: Secretary, Securities and Exchange Commission, Washington 25, D. C. Thereafter, on June 20, 1955, at 10:30 a. m., e. d. s. t., the Commission will hear oral argument thereon.

By the Commission.

[File No. 70–3353]

COLUMBIA GAS SYSTEM, INC., AND CENTRAL KENTUCKY NATURAL GAS CO.

ORDER WITH RESPECT TO PROPOSED ACQUISITION BY SUBSIDIARY OF ASSETS OF NON-AFFILIATE, ASSUMPTION OF LIABILITIES BY SUBSIDIARY, ISSUE AND SALE OF COMMON STOCK BY PARENT AND SUBSIDIARY AND ACQUISITION OF COMMON STOCK OF SUBSIDIARY BY PARENT

MAY 16, 1955.

The Columbia Gas System, Inc. ("Columbia"), a registered holding company, and its wholly-owned public utility subsidiary, Central Kentucky Natural Gas Company ("Central Kentucky"), have filed a joint application-declaration and amendments thereto with this Commission pursuant to sections 6 (b), 7, 9 (a), 10 and 12 (f) of the Public Utility Holding Company Act of 1935 ("act") and Rule U-43 promulgated thereunder regarding the following proposed transactions:

Under the provisions of a Reorganization Agreement and Plan dated February 14, 1955 among Columbia, Central Kentucky and Frankfort Kentucky Natural Gas Company ("Frankfort"), a non-affiliate, all of the assets of Frankfort are to be acquired by Central Kentucky in consideration for shares of capital stock of Columbia and the assumption by Central Kentucky of the liabilities of Frankfort. Central Kentucky will issue additional shares of its common stock to Columbia. Upon the acquisition of the stock of Columbia, Frankfort will distribute the same to its shareholders and liquidate and dissolve.

Specifically, said Reorganization Agreement and Plan provides for the acquisition by Central Kentucky, not later than May 31, 1955, of all of the assets of Frankfort as at the date of closing, which assets, as of December 31, 1954, were recorded almost entirely at original cost in the aggregate amount of $1,069,871.

As part of the consideration, Central Kentucky will assume the current and miscellaneous liabilities of Frankfort, in the estimated amount of $106,012, and the latter's outstanding 3¾ Percent First Mortgage Notes due October 1, 1969, in the principal amount of $528,000. The balance of the consideration will consist of not in excess of 33,050 shares of newly issued common stock of Columbia. It is stated that the number of such shares was determined at arm's-length and is based primarily on the respective book values of the common stocks of Columbia and Frankfort. For each share of its 4,000 shares of stock outstanding Frankfort will receive 8¼ shares of Columbia's stock. This number of shares of Columbia stock (33,000) is subject to increase by such number of shares, not exceeding 50, as may be necessary to enable Frankfort to distribute to each of its stockholders full shares of Columbia's stock. Provision is also made for an adjustment of the number of shares in the event any Frankfort stockholder requests his statutory appraisal rights. The new common stock to be issued by Columbia will be recorded on its books at approximately $13.20 per share, or $435,859 in the aggregate assuming 33,000 shares are issued, which is approximately equal to the average book value of each of the Columbia shares presently outstanding.

Central Kentucky will issue additional shares of its common stock to Columbia in an aggregate par amount equal to the book value of the net assets of Frankfort being acquired. As of December 31, 1954 this would have required 17,435 full shares of $25 par value stock, or an aggregate of $435,875.

The filing states that it is contemplated that Central Kentucky will redeem the assumed First Mortgage Notes as soon as practicable after consummation of the proposed transactions.

Frankfort purchases its entire supply of natural gas from Central Kentucky, at Lexington, Kentucky, transports it through its own pipe lines and distributes it in the Cities of Frankfort, Versailles and Midway and to isolated customers in the Counties of Fayette, Franklin and Woodford, Kentucky. After acquisition of the Frankfort assets, Central Kentucky intends to continue retail service to the market areas now being served by Frankfort.

The Public Service Commission of Kentucky has approved (i) the acquisition by Central Kentucky of the assets of Frankfort; (ii) the issuance and sale by Central Kentucky of its additional common stock to Columbia; and (iii) the assumption by Central Kentucky of the liabilities of Frankfort.

It is stated that the Federal Power Commission ("FPC") has jurisdiction over the acquisition by Central Kentucky of the gas transportation facilities of Frankfort and over the abandonment of wholesale service presently being rendered by Central Kentucky to Frankfort and that an application for authorization of such acquisition and abandonment has been filed with the FPC by Central Kentucky.

It is estimated that fees and expenses to be incurred by Columbia will not exceed $23,350. Included in this amount are legal fees of $17,500, services of Columbia Gas System Service Corporation, $4,000, Federal Original Issue tax $850 and miscellaneous expenses $1,000. Fees and expenses to be incurred by Central Kentucky are estimated not to exceed $4,500, including $1,000 for services of Columbia Gas System Service Corporation, $500 for Federal Original Issue tax and $3,000 for miscellaneous expenses.

Applicants-declarants request that this Commission's order become effective upon issuance.

Due notice of filing of said application-declaration having been given pursuant to the provisions of Rule U-23 promulgated under the act and no hearing having been requested of or ordered by the Commission; the Commission finding that the applicable provisions of the act and the rules thereunder are satisfied; and that said application-declaration, as amended, should be granted and permitted to become effective forthwith:

It is ordered, Pursuant to Rule U-23 and the applicable provisions of the act, that said application-declaration, as amended, be, and the same hereby is, granted and permitted to become effective forthwith, subject to the terms and conditions prescribed in Rule U-24.

By the Commission.

[SEAL] ORVIL L. DUBOIS, *Secretary.*

[File No. 70-3372]

ALABAMA POWER CO.

ORDER AUTHORIZING ISSUANCE AND SALE AT COMPETITIVE BIDDING OF PRINCIPAL AMOUNT OF FIRST MORTAGE BONDS

MAY 16, 1955.

Alabama Power Company ("Company"), a public utility subsidiary of The Southern Company, a registered holding company, has filed with this Commission an application and amendments thereto pursuant to section 6 (b) of the Public Utility Holding Company Act of 1935 ("act") and Rule U-50 promulgated thereunder regarding the following proposed transaction:

The Company proposes to issue and sell, subject to the competitive bidding requirements of Rule U-50, $15,000,000 principal amount of First Mortgage Bonds, __ percent Series due 1985. The interest rate (which shall be a multiple of ⅛ of 1 percent) and the price to be paid to the Company (which shall be not less than 100 percent nor more than 102¾ percent of the principal amount, exclusive of accrued interest to date of delivery) will be determined by competitive bidding. The new bonds will be issued under the Company's Indenture dated as of January 1, 1942, as heretofore supplemented and as to be further supplemented by a Supplemental Indenture dated as of June 1, 1955.

The Company proposes to use the net proceeds from the sale of the new bonds for the construction or acquisition of permanent improvements, extensions and additions to its property and for the payment of short-term bank loans in the amount of $6,000,000 incurred or to be incurred for such purpose. The Company estimates that its total construction expenditures for 1955 will aggregate approximately $35,355,000 and it expects to raise the additional funds required from internal sources and the sale (prior to the end of the year) of additional common stock to its parent company.

The issue and sale of said bonds have been expressly authorized by the Public Service Commission of Alabama, in which State the Company is organized and doing business.

Due notice of the filing of the application having been given in the manner provided in Rule U-23 promulgated under the act, and a hearing not having been requested of or ordered by the Commission; and the Commission finding that the applicable provisions of the act and the Rules thereunder have been satisfied and that no adverse findings are necessary, and deeming it appropriate in the public interest and in the interest of investors and consumers to grant the application, effective forthwith:

It is ordered, Pursuant to Rule U-23 and the applicable provisions of the act, that the application as amended be, and hereby is, granted, effective forthwith, subject to the provisions of Rule U-50 and Rule U-24.

By the Commission.

FEDERAL REGISTER

OF THE UNITED STATES

VOLUME 20 NUMBER 100

Washington, Saturday, May 21, 1955

TITLE 7—AGRICULTURE

Chapter I—Agricultural Marketing Service (Standards, Inspections, Marketing Practices), Department of Agriculture

PART 52—PROCESSED FRUITS, VEGETABLES, AND OTHER PRODUCTS (INSPECTION, CERTIFICATION, AND STANDARDS)

SUBPART—UNITED STATES STANDARDS FOR GRADES OF CANNED KADOTA FIGS

LIQUID MEDIA

Pursuant to the authority contained in the Agricultural Marketing Act of 1946 (60 Stat. 1087 et seq., 7 U. S. C. 1621 et seq.), the Brix measurements and sirup designations for canned Kadota figs set forth below are established for use in the inspection and certification of canned Kadota figs on and after June 15, 1955. Such use will be in connection with the United States Standards for Grades of Canned Kadota Figs, which have been in effect since November 15, 1945. The Brix measurements and sirup designations, which shall become effective on and after June 15, 1955, are as follows:

§ 52.2823 *Recommended designations of liquid media and Brix measurements for canned Kadota figs.* "Cut-out" requirements for liquid media in canned Kadota figs are not incorporated in the grades of the finished product since sirup or any other liquid medium, as such, is not a factor of quality for the purposes of ascertaining the grade of canned Kadota figs. It is recommended that canned Kadota figs have the following "cut-out" Brix measurement for the applicable designation:

Designations	*Brix measurement*
"Extra heavy sirup"	26° or more but not more than 35°.
"Heavy sirup"	21° or more but less than 26°
"Light sirup"	16° or more but less than 21°.
"In water"	Packed in water.

Notice of proposed rule making, public procedure thereon, and the delaying of the making of this document effective later than June 15, 1955, (see section 4 of the Administrative Procedure Act; 5 U. S. C. 1001 et seq.) are impracticable, unnecessary, and contrary to the public interest because: (1) This matter has been discussed with the Kadota fig industry generally, and it has expressed agreement therewith; (2) no preparation for conformity therewith which may not be completed by June 15, 1955, will be needed; and (3) it is very desirable that it be made effective well in advance of the next fig packing season, which will begin in July 1955.

(Sec. 205, 60 Stat. 1090, 7 U. S. C. 1624)

Dated: May 18, 1955.

Chapter VII—Commodity Stabilization Service (Farm Marketing Quotas and Acreage Allotments), Department of Agriculture

[Amdt. 2]

PART 728—WHEAT

SUBPART—MARKETING QUOTAS FOR 1955 CROP

RATE OF PENALTY

The purpose of this amendment is to establish the monetary rate of penalty for any farm marketing excess determined in connection with the 1955 wheat marketing quota program at 45 percent of the May 1, 1955, parity price of wheat as required by Public Law 117, 83d Congress.

Since the only purpose of this amendment is to announce the penalty in dollars and cents calculated in accordance with a mathematical formula prescribed by statute, it is hereby found and determined that compliance with the provisions of the Administrative Procedure Act with respect to notice, public procedure thereon, and effective date is unnecessary, and the amendment herein shall become effective upon the date of its publication in the FEDERAL REGISTER.

Section 728.575 of the 1955 wheat marketing quota regulations is hereby amended to read as follows:

§ 728.575 *Rate of penalty.* The rate of penalty applicable to 1955 crop wheat shall be $1.13 per bushel, which is 45 per centum of the parity price per bushel of

Chapter IX—Agricultural Marketing Service (Marketing Agreements and Orders), Department of Agriculture

[Valencia Orange Reg. 36]

PART 922—VALENCIA ORANGES GROWN IN ARIZONA AND DESIGNATED PART OF CALIFORNIA

LIMITATION OF HANDLING

§ 922.336 *Valencia Orange Regulation 36*—(a) *Findings.* (1) Pursuant to Order No. 22 (19 F. R. 1741), regulating the handling of Valencia oranges grown in Arizona and designated part of California, effective March 31, 1954, under the applicable provisions of the Agricultural Marketing Agreement Act of 1937, as amended (7 U. S. C. 601 et seq.), and upon the basis of the recommendation and information submitted by the Valencia Orange Administrative Committee, established under the said order, and upon other available information, it is hereby found that the limitation of handling of such Valencia oranges, as hereinafter provided, will tend to effectuate the declared policy of the act.

(2) It is hereby further found that it is impracticable and contrary to the public interest to give preliminary notice, engage in public rule-making procedure, and postpone the effective date of this section until 30 days after publication thereof in the FEDERAL REGISTER (60 Stat. 237; 5 U. S. C. 1001 et seq.) because the time intervening between the date when information upon which this section is based became available and the time when this section must become effective in order to effectuate the declared policy of the act is insufficient, and a reasonable time is permitted, under the circumstances, for preparation for such effective time; and good cause exists for making the provisions hereof effective as hereinafter set forth. The Valencia Orange Administrative Committee held an open meeting on May 19, 1955, after giving due notice thereof, to consider supply and market conditions for Valencia oranges and the need for regulation; interested persons were afforded an opportunity to submit information and views at this meeting; the recommendation and supporting information for regulation during the period specified herein was promptly submitted to the Department after such meeting was held; the provisions of this section, including its effective time, are identical with the aforesaid recommendation of the committee, and information concerning such provisions and effective time has been disseminated among handlers of such Valencia oranges; it is necessary, in order to effectuate the declared policy of the act, to make this section effective during the period herein specified; and compliance with this section will not require any special preparation on the part of persons subject thereto which cannot be completed on or before the effective date hereof.

(b) *Order.* (1) The quantity of Valencia oranges grown in Arizona and designated part of California which may be handled during the period beginning at 12:01 a. m., P. s. t., May 22, 1955, and ending at 12:01 a. m., P. s. t., May 29, 1955, is hereby fixed at follows:

(i) District 1: 219,450 boxes;

(ii) District 2: 219,450 boxes;

(iii) District 3: Unlimited movement.

(2) Valencia oranges handled pursuant to the provisions of this section shall be subject to any size restrictions applicable thereto which have heretofore been issued on the handling of such oranges and which are effective during the period specified herein.

(3) As used in this section, "handled," "handler," "boxes," "District 1," "District 2," and "District 3," shall have the same meaning as when used in said order.

(Sec. 5, 49 Stat. 753, as amended; 7 U. S. C. 608c)

Dated: May 20, 1955.

[SEAL] S. R. SMITH,
Director, Fruit and Vegetable Division, Agricultural Marketing Service.

[Lemon Reg. 590]

PART 953—LEMONS GROWN IN CALIFORNIA AND ARIZONA

LIMITATIONS OF SHIPMENTS

§ 953.697 *Lemon Regulation 590*—(a) *Findings.* (1) Pursuant to the marketing agreement, as amended, and Order No. 53, as amended (7 CFR Part 953; 19 F. R. 7175; 20 F. R. 2913), regulating the handling of lemons grown in the State of California or in the State of Arizona, effective under the applicable provisions of the Agricultural Marketing Agreement Act of 1937, as amended (7 U. S. C. 601 et seq.), and upon the basis of the recommendation and information submitted by the Lemon Administrative Committee, established under the said amended marketing agreement and order, and upon other available information, it is hereby found that the limitation of the quantity of such lemons which may be handled, as hereinafter provided, will tend to effectuate the declared policy of the act.

(2) It is hereby further found that it is impracticable and contrary to the public interest to give preliminary notice, engage in public rule-making procedure, and postpone the effective date of this section until 30 days after publication thereof in the FEDERAL REGISTER (60 Stat. 237; 5 U. S. C. 1001 et seq.) because the time intervening between the date when information upon which this section is based became available and the time when this section must become effective in order to effectuate the declared policy of the act is insufficient, and a reasonable time is permitted, under the circumstances, for preparation for such effective time; and good cause exists for making the provisions hereof effective as hereinafter set forth. Shipments of lemons, grown in the State of California or in the State of Arizona, are currently subject to regulation pursuant to said amended marketing agreement and order; the recommendation and supporting information for regulation during the period specified herein was promptly submitted to the Department after an open meeting of the Lemon Administrative Committee on May 18, 1955, such meeting was held, after giving due notice thereof to consider recommendations for regulation, and interested persons were afforded an opportunity to submit their views at this meeting; the provisions of this section including its effective time, are identical with the aforesaid recommendation of the committee, and information concerning such provisions and effective time has been disseminated among handlers of such lemons; it is necessary, in order to effectuate the declared policy of the act, to make this section effective during the period hereinafter specified; and compliance with this section will not require any special preparation on the part of persons subject thereto which cannot be completed by the effective time thereof.

(b) *Order.* (1) The quantity of lemons grown in the State of California or in the State of Arizona which may be handled during the period beginning at 12:01 a. m., P. s. t., May 22, 1955, and ending at 12:01 a. m., P. s. t., May 29, 1955, is hereby fixed as follows:

(i) District 1: Unlimited movement;

(ii) District 2: 550 carloads;

(iii) District 3: Unlimited movement.

(2) As used in this section, "handled," "carloads," "District 1," "District 2," and "District 3" shall have the same meaning as when used in the said amended marketing agreement and order.

(Sec. 5, 49 Stat. 753, as amended; 7 U. S. C. 608c)

Dated: May 19, 1955.

[SEAL] S. R. SMITH,
Director, Fruit and Vegetable Division, Agricultural Marketing Service.

[F. R. Doc. 55–4206; Filed, May 20, 1955; 9:07 a. m.]

PART 969—AVOCADOS GROWN IN SOUTH FLORIDA

QUALITY REGULATIONS

Notice was published in the FEDERAL REGISTER issue of April 21, 1955 (20 F. R. 2666), that the Department was giving consideration to the proposed amendment of the supplementing rules and regulations (7 CFR 969.110 et seq.; Subpart—Rules and Regulations; 19 F. R. 5439) currently in effect pursuant to the marketing agreement and Order No. 69 (7 CFR 969; 19 F. R. 3439), regulating the handling of avocados grown in South Florida, effective under the applicable provisions of the Agricultural Marketing Agreement Act of 1937, as amended (7 U. S. C. 601 et seq.; 68 Stat. 906, 1047).

After consideration of all relevant matters presented, including the proposals set forth in the aforesaid notice which were submitted by the Avocado Administrative Committee (established pursuant to said marketing agreement and order as the agency to administer the provisions thereof), it is hereby found that the amendment, as hereinafter set forth, of the said rules and regulations is in accordance with the provisions of the said marketing agreement and order and will tend to effectuate the declared purposes of the Agricultural Marketing Agreement Act of 1937, as amended. Such amendment is hereby approved; and the said rules and regulations are amended as follows:

§ 969.130 *Quality regulations.* Quality regulations recommended and established pursuant to § 969.50 shall be on the basis of the following specifications or appropriate modifications thereof:

(a) *No. 1 grade.* "No. 1 grade" consists of avacados of similar varietal characteristics which are mature but not overripe, well formed, clean, well colored, well trimmed, and which are free from decay, anthracnose, freezing injury and free from damage caused by bruises, cuts or other skin breaks, pulled stems, russeting or similar discoloration, scars or scab, sunburn, sunscald or sprayburn, cercospora spot, other disease, insects, or mechanical or other means. In order to allow for variations incident to proper grading and handling, not more than a total of 10 percent, by count, of the avocados in any lot may fail to meet the requirements of this grade: *Provided.* That not more than one-half of this amount, or 5 percent, may be affected by anthracnose or decay, including therein not more than 1 percent for decay. (See application of tolerances and size requirements.)

(b) *Combination grade.* Any lot of avocados may be designated "Combination grade" when not less than 60 percent, by count, of the avocados in each container meet the requirements of the No. 1 grade and the remainder meet the requirements of the No. 2 grade. In order to allow for variations incident to proper grading and handling, not more than a total of 10 percent, by count, of the avocados in any lot may fail to meet the requirements of the No. 2 grade: *Provided,* That not more than one-half of this amount, or 5 percent, may be affected by anthracnose or decay, including therein not more than 1 percent for decay. No part of any tolerance shall be allowed to reduce for the lot as a whole the percentage of No. 1 fruit required or specified in the combination, but individual containers may have not more than 10 percent less than the percentage of No. 1 fruit required or specified. (See application of tolerances and size requirements.)

(c) *No. 2 grade.* "No. 2 grade" consists of avocados of similar varietal characteristics which are mature but not overripe, fairly well formed, clean, fairly well colored, well trimmed and which are free from decay, freezing injury and free from serious damage caused by anthracnose, bruises, cuts or other skin breaks, pulled stems, russeting or similar discoloration, scars or scab, sunburn, sunscald or sprayburn, cercospora spot, other disease, insects, or mechanical or other means. In order to allow for variations incident to proper grading and handling, not more than a total of 10 percent, by count, of the avocados in any lot may fail to meet the requirements of this grade: *Provided,* That not more than one-half of this amount, or 5 percent, shall be allowed for serious damage by anthracnose or decay, including therein not more than 1 percent for decay. (See application of tolerances and size requirements.)

(d) *No. 3 grade.* "No. 3 grade" consists of avocados of similar varietal characteristics which are mature but not overripe, which are not badly misshapen, and which are free from decay and free from serious damage caused by anthracnose and from very serious damage caused by freezing injury, bruises, cuts or other skin breaks, pulled stems, russeting or similar discoloration, scars, or scab, sunburn, sunscald or sprayburn, cercospora spot, other disease, insects, dirt, or mechanical or other means. In order to allow for variations incident to proper grading and handling, not more than a total of 10 percent, by count, of the avocados in any lot may fail to meet the requirements of this grade, including therein not more than 2 percent of decay. (See application of tolerances and size requirements.)

(e) *Unclassified.* "Unclassified" consists of avocados which have not been classified in accordance with any of the foregoing grades. The term "unclassified" is not a grade, as used herein, but is provided as a designation to show that no grade has been applied to the lot.

(f) *Size requirements.* (1) The size of avocados may be specified in terms of count, minimum weight or a range in weights. When counts or minimum weights are specified for the avocados in a container, the weight of the smallest fruit shall be not less than 75 percent of the weight of the largest fruit.

(2) In order to allow for variations incident to proper sizing, not more than 5 percent of the avocados in any lot may fail to meet the size requirements: *Provided,* That when the minimum and maximum weights are both specified, an additional 5 percent tolerance shall be allowed for avocados which are larger than the specified maximum weight.

(g) *Application of tolerances.* The contents of individual packages in the lot, based on sample inspection, are subject to the following limitations: *Provided,* That the averages for the entire lot are within the tolerances specified for the grade:

(1) For packages which contain more than 20 avocados and a tolerance of 10 percent or more is provided, individual packages in any lot shall have not more than one and one-half times the tolerance specified. For packages which contain more than 20 avocados and a tolerance of less than 10 percent is provided, individual packages in any lot shall have not more than double the tolerance specified, except that at least one defective and one off-size specimen may be permitted in any package.

(2) For packages which contain 20 avocados or less, individual packages shall have not more than double the tolerance specified, except that at least one defective and one off-size specimen may be permitted in any package.

(h) *Definitions*—(1) *Similar varietal characteristics.* "Similar varietal characteristics" means that the avocados in any container are similar in shape, texture and color of skin and flesh.

(2) *Mature.* "Mature" means that the avocado has reached a stage of growth which will insure a proper completion of the ripening process.

(3) *Overripe.* "Overripe" means that the avocado is dead ripe with flesh soft or discolored and past commercial use.

(4) *Well formed.* "Well formed" means that the avocado has the normal shape characteristic of the variety.

(5) *Clean.* "Clean" means that the avocado is practically free from dirt, staining or other foreign material.

(6) *Well colored.* "Well colored" means that the avocado has the color characteristic of the variety.

(7) *Well trimmed.* "Well trimmed" means that the stem, when present, is cut off fairly smoothly at a point not more than one-fourth inch beyond the shoulder of the avocado.

(8) *Damage.* "Damage" means any defect which materially affects the appearance, or the edible or shipping quality of the individual fruit, or the general appearance of the fruits in the container. Any one of the following defects, or any combination of defects, the seriousness of which exceeds the maximum allowed for any one defect, shall be considered as damage:

(i) Cuts or other skin breaks when not healed and penetrating beneath the epidermis or the aggregate area exceeds the area of a rectangle one inch in length and one-eigth inch in width; or when healed and the appearance is materially affected.

(ii) Pulled stems when the exposed stem cavity is excessively deep, or when skin surrounding the stem cavity is more than slightly torn.

(iii) Russeting or similar discoloration when the appearance of the avocado is affected to a greater extent than that of an avocado which has brown surface discoloration aggregating 5 percent of the fruit surface.

(iv) Scars or scab when the appearance of the avocado is affected to a greater extent than that of an avocado which has brown superficial scars aggregating 5 percent of the fruit surface.

(v) Sunburn when the appearance of the avocado is affected to a greater extent than that of an avocado which has yellow colored sunburn aggregating 5 percent of the fruit surface.

(vi) Sunscald or sprayburn when not well healed, or when soft, or when the appearance of the avocado is affected to a greater extent than that of an avocado which has brown superficial scars aggregating 5 percent of the fruit surface.

(9) *Fairly well formed.* "Fairly well formed" means that the avocado may be slightly abnormal in shape but not to the extent that the appearance is seriously affected.

(10) *Fairly well colored.* "Fairly well colored" means that the avocado shows a shade of color which is fairly characteristic of the variety.

(11) *Serious damage.* "Serious damage" means any defect which seriously affects the appearance, or the edible or shipping quality of the individual fruit, or the general appearance of the avocados in the container. Any one of the following defects, or any combination of defects, the seriousness of which exceeds the maximum allowed for any one defect, shall be considered as serious damage:

(i) Anthracnose when any spot exceeds the area of a circle one-fourth inch in diameter, or when more than 3 spots each exceeding the area of a circle three-sixteenths inch in diameter.

(ii) Cuts or other skin breaks when not healed and the aggregate area exceeds the area of a rectangle one inch in length and one-fourth inch in width, or when not healed and penetrating into the flesh of the fruit, or when healed and the appearance is seriously affected.

(iii) Pulled stems when the skin surrounding the exposed stem cavity is torn more than an aggregate area of a circle one-fourth inch in diameter, or when flesh is torn.

(iv) Russeting or similar discoloration when the appearance of the avocado is affected to a greater extent than that of an avocado which has brown surface discoloration aggregating 25 percent of the fruit surface.

(v) Scars or scab when the appearance of the avocado is affected to a greater extent than that of an avocado which has brown superficial scars aggregating 25 percent of the fruit surface.

(vi) Sunburn when the appearance of the avocado is affected to a greater extent than that of an avocado which has yellow colored sunburn aggregating 25 percent of the fruit surface.

(vii) Sunscald or sprayburn when not well healed, or when soft, or when the appearance of the avocado is affected to a greater extent than that of an avocado which has brown superficial scars aggregating 25 percent of the fruit surface.

(12) *Badly misshapen.* "Badly misshapen" means that the avocado is so badly curved, constricted, pointed or otherwise deformed that the appearance is very seriously affected.

(13) *Very serious damage.* "Very serious damage" means any defect which very seriously affects the appearance, or the edible or shipping quality of the avocado. Any one of the following defects, or any combination of defects, the seriousness of which exceeds the maximum allowed for any one defect, shall be considered as very serious damage:

(i) Cuts or other skin breaks when not healed and penetrating into the flesh of the fruit, or any skin break very seriously affecting the appearance, or the edible or shipping quality.

(ii) Pulled stems when the skin surrounding the exposed stem cavity is torn more than an aggregate area of a circle one-half inch in diameter, or when the flesh is torn.

(iii) Russeting or similar discoloration when the appearance of the avocado is affected to a greater extent than that of an avocado which has brown surface discoloration aggregating 50 percent of the fruit surface.

(iv) Scars or scab when the appearance of the avocado is affected to a greater extent than that of an avocado which has brown superficial scars aggregating 50 percent of the fruit surface.

(v) Sunburn when the appearance of the avocado is affected to a greater extent than that of an avocado which has yellow colored sunburn aggregating 50 percent of the fruit surface.

(vi) Sunscald or sprayburn when not well healed, or when soft, or when the appearance of the avocado is affected to a greater extent than that of an avocado which has brown superficial scars aggregating 50 percent of the fruit surface.

(Sec. 5, 49 Stat. 753, as amended, 68 Stat. 906, 1047; 7 U. S. C. 608c)

It is hereby further found that delaying the effective date of this amendment for 30 days after its publication in the FEDERAL REGISTER (see section 4 (c) of the Administrative Procedure Act; 5 U. S. C. 1001 et seq.) is unnecessary since (1) the provisions of said amendment do not impose any restrictions on any person; (2) such amendment is preliminary to the issuance of quality regulations, pursuant to the said marketing agreement and order, for the marketing season beginning about June 1, 1955, and is for the purpose of facilitating the specification of such quality regulations; and (3) handlers have been notified of the adoption, and recommendation to the Secretary, by the said committee of the aforesaid amendment and were afforded opportunity to submit data, views, and arguments with respect thereto.

(48 Stat. 31, as amended; 7 U. S. C. 601 et seq.; 68 Stat. 906, 1047)

Issued this 18th day of May 1955, to be effective upon publication in the FEDERAL REGISTER.

[SEAL] ROY W. LENNARTSON,
Deputy Administrator.

[F. R. Doc. 55-4159; Filed, May 20, 1955; 8:48 a. m.]

TITLE 14—CIVIL AVIATION

Chapter I—Civil Aeronautics Board

[Reg. No. SR-404A]

PART 20—PILOT CERTIFICATE

SPECIAL CIVIL AIR REGULATION; ISSUANCE OF STUDENT GLIDER PILOT CERTIFICATES TO PERSONS THIRTEEN YEARS OF AGE RECEIVING INSTRUCTION AT THE MISSISSIPPI STATE COLLEGE GLIDER CLUB

Adopted by the Civil Aeronautics Board at its office in Washington, D. C., on the 18th day of May 1955.

Mississippi State College, by letter of Mr. August Raspet, Head of the Aerophysics Department, has requested an extension of currently effective Special Civil Air Regulation No. SR-404 which permits the issuance of student glider pilot certificates to persons thirteen years of age who are to receive glider training at the Mississippi State College Glider Club. This regulation became effective May 19, 1954, and terminates May 18, 1955.

The Mississippi State College Glider Club, an organized extra curricular activity at Mississippi State College, has a definite glider training syllabus, a glider instructor who has a commercial glider rating, and a single place glider for training. All students are trained under the personal supervision of the instructor and complete records are kept of all flights.

As part of their training program, the club has been investigating the potential of glider training as a means of indoctrinating young persons into the medium of flight. In order to carry out this project the club requested the authority granted by SR-404, since it was considered desirable that high school students, many of whom are thirteen years of age, be able to participate. The Board concurred, and in adopting SR-404 indicated that the knowledge gained through such a program would be beneficial in the future revision of Civil Air Regulations.

During the period that SR-404 has been in effect, only one student thirteen years of age received glider training under the program conducted by the Mississippi State College Glider Club. This is not a sufficient sampling to be of use to the Board. However, Mr. Raspet has requested that SR-404 be extended for the reason that he foresees an increase in the enrollment of thirteen-year-old students in the Spring of 1955. The Board believes that, if such an increase in enrollment does occur, the knowledge gained through such a program will be of value in formulating Board policy concerning the airman requirements of the Civil Air Regulations. The Board, therefore, finds that it is in the public interest to extend the provisions of SR-404. Notice of this extension was published in the FEDERAL REGISTER on May 4, 1955, at 20 F. R. 2988.

Interested persons have been afforded an opportunity to participate in the making of this regulation, and due consideration has been given to all relevant matter presented. Since this regulation imposes no additional burden on any person, it may be made effective without prior notice.

In consideration of the foregoing, the Civil Aeronautics Board hereby makes and promulgates the following Special Civil Air Regulation, effective May 19, 1955:

Contrary provisions of the Civil Air Regulations notwithstanding, the Administrator may issue or authorize the issuance of a student glider pilot certificate to a person of thirteen years of age who is to receive glider training at the Mississippi State College Glider Club: *Provided,* (1) That the training shall be conducted under the personal supervision of a holder of a commercial glider rating or flight instructor rating for gliders and (2) That the certificate shall bear the following limitation on its face, "Valid only for receiving glider instruction given by the Mississippi State College Glider Club."

This regulation supersedes Special Civil Air Regulation No. SR-404, and unless sooner superseded or rescinded by the Board, shall terminate on May 18, 1956.

(Sec. 205, 52 Stat. 984; 49 U. S. C. 425. Interprets or applies secs. 601, 602, 52 Stat. 1007, 1008, as amended; 49 U. S. C. 551, 552)

By the Civil Aeronautics Board.

[SEAL] M. C. MULLIGAN,
Secretary.

Subchapter A—Civil Air Regulations

[Supp. 15]

PART 40—SCHEDULED INTERSTATE AIR CARRIER CERTIFICATION AND OPERATION RULES

MISCELLANEOUS AMENDMENTS

The following amendments are made to the interpretations and policies issued by the Administrator relative to Part 40 of the Civil Air Regulations to add new material and correct 14 CFR, 1953 Supp., §§ 40.51-1 and 40.72-1. A new interpretation (§ 40.390-2) permits lower landing minimums to be approved at alternate airports having an ILS or GCA as the only instrument approach aid. The date, November 1, inadvertently

omitted from § 40.51–1 (e) (2) (ii) is added to indicate the calendar period during which 165 pounds may be used as an average adult passenger weight. In § 40.72–1 (a), "figure 1" is changed to read, "diagram 1" to correct an erroneous reference; and the diagram is included.

The following amendments are hereby adopted:

1. Section 40.51–1 (e) (2) (ii) is amended by adding the date "November 1" between the words "period" and "through."

2. Section 40.72–1 (a) is amended by changing the words "Figure 1" to "Diagram 1" and adding the following diagram:

TAKE-OFF AIRPORT LIMITATIONS

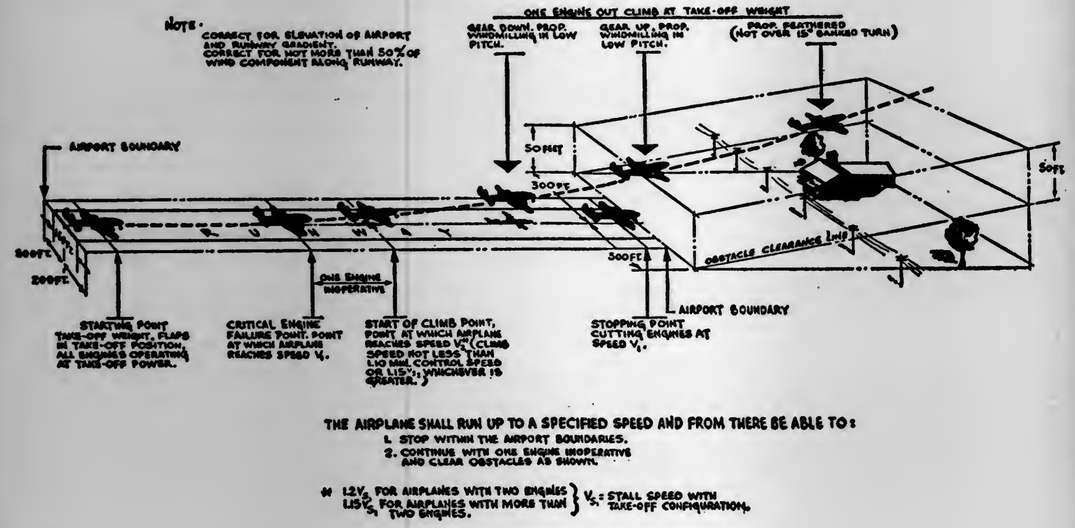

DIAGRAM 1.

3. Section 40.390–2 is added to read as follows:

§ 40.390–2 *Establishment of alternate airport landing minimums at airports where ILS or GCA only available instrument approach aids (CAA interpretations which apply to § 40.390 (a)).* Alternate airport landing minimums as low as 600–2, 700–1½, or 800–1 may be approved at airports where an ILS or GCA is the only instrument approach aid serving such airport: *Provided*, That adequate radio facilities are available to accomplish transition to the ILS or GCA.

(Sec. 205, 52 Stat. 984, 49 U. S. C. 425. Interpret or apply secs. 601, 605, 52 Stat. 1007, 1010, as amended; 49 U. S. C. 551, 554)

This supplement shall become effective June 15, 1955.

[SEAL] S. A. KEMP,
Acting Administrator of Civil Aeronautics.

PART 609—STANDARD INSTRUMENT APPROACH PROCEDURES

PROCEDURE ALTERATIONS

Correction

In F. R. Document 55–2860, appearing in the issue for Thursday, April 14, 1955, at page 2453, make the following change in paragraph 3 (§ 609.11): In column 8, the entry "1,640—4.9" should read "1,650—4.9".

TITLE 20—EMPLOYEES' BENEFITS

Chapter III—Bureau of Old-Age and Survivors Insurance, Social Security Administration, Department of Health, Education, and Welfare

[Regs. 4, Further Amended]

PART 404—FEDERAL OLD-AGE AND SURVIVORS INSURANCE (1950– ——)

MISCELLANEOUS AMENDMENTS

Correction

In Federal Register Document 55–3170, published at page 2649 of the issue for Thursday, April 21, 1955, the following changes should be made in Appendix 2:

1. In column 1, page 2655, the figure in Column II on the line following the line on which appears "27.20" should read "27.30" instead of "37.30".

2. In column 1, page 2656, the figures in Columns II, III, and IV on the line following the line on which appear "55.80", "60.80", and "112.00" should read "55.90", "60.90", and "112.00" instead of "56.80", "61.80", and "117.00", respectively.

3. In column 3, page 2656, the figure in Column I on the line following the line on which appears "$43.69–$43.76" should read "$43.77–$43.89" instead of "$33.77–$43.89."

TITLE 26—INTERNAL REVENUE, 1954

Chapter I—Internal Revenue Service, Department of the Treasury

Subchapter E—Alcohol, Tobacco, and Other Excise Taxes

PART 251—IMPORTATION OF DISTILLED SPIRITS, WINES, AND BEER

On December 4, 1954, a notice of proposed rulemaking with respect to regulations designated as Part 251 of Title 26 (1954) of the Code of Federal Regulations was published in the FEDERAL REGISTER (19 F. R. 8017). The purposes of the proposal were to adopt Regulations 21, 1951 edition (26 CFR (1939) Part 191, 16 F. R. 8530), Importation of Distilled Spirits, Wines, and Fermented Liquors, as amended, and to amend such adopted regulations (a) to implement the provisions of the Internal Revenue Code of 1954, and (b) to implement administrative decisions. No data, views, or arguments relating thereto having been received during the period of 15 days from the date of publication of said notice, the regulations so published are hereby adopted, subject to the changes set forth as below:

PARAGRAPH 1. The preamble is amended as follows:

(A) Paragraph 1 is amended by striking the phrase "as to facts and circumstances arising on and after January 1, 1955," and the comma immediately preceding such phrase.

(B) A new paragraph 3 is added.

PAR. 2. Subpart B is amended as follows:

(A) By striking the phrase "of internal revenue" at the end of § 251.6 and placing a period after the word "Commissioner".

(B) Sections 251.9 through 251.18 are renumbered as §§ 251.10 through 251.19, respectively.

(C) By adding a new § 251.9.

(D) Sections 251.19 through 251.21 are renumbered as §§ 251.21 through 251.23, respectively.

(E) By adding a new § 251.20.

PAR. 3. Subpart D is amended by inserting in § 251.42, immediately following the first sentence, two new sentences.

PAR. 4. The date "April 1, 1955" wherever it appears in §§ 251.40, 251.41, 251.42 and 251.45 was changed by Public Law 18, 84th Congress (69 Stat. 14) and should read "April 1, 1956".

PAR. 5. Subpart E is amended as follows:

(A) By striking in § 251.56, the word "under" in the phrase "under customs regulations", and substituting in lieu thereof the words "in accordance with".

(B) By striking in § 251.57, the word "under" in the phrase "under customs regulations", and substituting in lieu thereof the words "in accordance with".

(C) By striking in § 251.61, the word "or" immediately following the semicolon in paragraph (b), and adding a new paragraph (c), immediately following paragraph (b).

(D) By changing the designation of the last paragraph of § 251.61 from "(c)" to "(d)".

(E) By revising § 251.62.

(F) By revising the last sentence of § 251.68.

(G) By inserting a new § 251.73 immediately following § 251.72.

(H) By redesignating "§ 251.73" as "§ 251.74" and inserting a new phrase "(b) on which no internal revenue tax is required to be paid on or before withdrawal from customs custody;" immediately after the phrase beginning "(a) not for sale" in the first sentence, and redesignating "(b)" and "(c)" as "(c)" and "(d)", respectively.

PAR. 6. Subpart G, consisting of §§ 251.100, 251.101, 251.102, 251.103 and 251.104, is deleted.

PAR. 7. Subpart H is amended as follows:

(A) By redesignating the title to read: "Subpart G—Red Strip Stamps Affixed. Under Customs Supervision".

(B) By revising § 251.110 by striking the words "in a bonded warehouse" at the end of the first sentence, and placing a period after the word "officer"; by striking the phrase "of the district in which the bonded warehouse is located," in the second sentence, which begins "Stamps procured"; and by striking the third sentence which begins "At ports where".

PAR. 8. Subparts I, J, K and L are redesignated as Subparts H, I, J and K, respectively.

PAR. 9. Subpart J, redesignated as Subpart I, is amended as follows:

(A) By revising § 251.132 by striking the ordinal number "5th" in the second sentence, which begins "On or before", and substituting in lieu thereof the ordinal number "tenth".

(B) By revising § 251.135 by striking the ordinal number "fifth" in the sixth sentence, which begins "The monthly transcript", and substituting in lieu thereof the ordinal number "tenth".

(C) By revising § 251.140 by striking the ordinal number "5th" in the third sentence, which begins "If in any case", and substituting in lieu thereof the ordinal number "tenth", and by striking the ordinal number "5th" in the fifth sentence, which begins "Monthly summary reports", and substituting in lieu thereof the ordinal number "tenth".

PAR. 10. Subpart L, redesignated as Subpart K, is amended by revising § 251.160.

[SEAL] T. COLEMAN ANDREWS,
Commissioner of Internal Revenue.
RALPH KELLY,
Commissioner of Customs.

Approved: May 18, 1955.

M. B. FOLSOM,
Acting Secretary of the Treasury.

Preamble. 1. The regulations in this part shall supersede Regulations 21, 1951 Edition (26 CFR (1939) Part 191; 16 F. R. 8530), and Treasury Decisions 5896 (17 F. R. 3641), 6063 (19 F. R. 733), and 6088 (19 F. R. 5055).

2. These regulations shall not affect any act done or any liability or right accruing or accrued, or any suit or proceeding had or commenced before the effective date of these regulations.

3. The regulations in this part shall be effective on the first day of the first month which begins not less than 30 days after the date of publication in the FEDERAL REGISTER.

Subpart A—Scope of Regulations

Sec.
251.1 Imported distilled spirits, wines, and beer.
251.2 Forms prescribed.

Subpart B—Definitions

251.5 Meaning of terms.
251.6 Assistant regional commissioner.
251.7 Beer.
251.8 Bottler.
251.9 Commissioner.
251.10 Container.
251.11 Director, Alcohol and Tobacco Tax Division.
251.12 Distilled spirits.
251.13 District director.
251.14 Importer.
251.15 Including.
251.16 Inclusive language.
251.17 I. R. C.
251.18 Person.
251.19 Red strip stamps.
251.20 Regional Commissioner.
251.21 United States.
251.22 U. S. C.
251.23 Wine.

Subpart C—Special (Occupational) Taxes

251.30 Liquor dealers' special taxes.
251.31 Warehouse receipts covering distilled spirits.

Subpart D—Tax on Imported Distilled Spirits, Wines, Beer, and Imported Perfumes Containing Distilled Spirits

DISTILLED SPIRITS AND PERFUMES

251.40 Distilled spirits.
251.41 Perfumes containing distilled spirits.

WINES

251.42 Wines.

LIQUEURS, CORDIALS, AND OTHER COMPOUNDS AND PREPARATIONS

251.43 Liqueurs, cordials, and similar compounds.
251.44 Other compounds and preparations.

BEER

251.45 Rate of tax.
251.46 Computation of tax.
251.47 Tolerance for containers.

COLLECTION OF INTERNAL REVENUE TAXES

251.48 Imported distilled spirits, wines, and beer.

Subpart E—General Requirements

PERMIT FOR IMPORTATION OF DISTILLED SPIRITS AND WINES

251.55 Federal Alcohol Administration Act permit.

MARKING AND STAMPING OF DISTILLED SPIRITS

251.56 Containers of 1 gallon or less.
251.57 Containers in excess of 1 gallon.

LABELING OF DISTILLED SPIRITS

251.58 Containers of 1 gallon or less.

MARKING AND LABELING OF WINES AND BEER

251.59 Wines.
251.60 Beer.

RED STRIP STAMPS FOR CONTAINERS OF DISTILLED SPIRITS

Sec.
251.61 Containers of distilled spirits to bear red strip stamps.
251.62 Persons authorized to affix red strip stamps.
251.63 Denominations of red strip stamps.
251.64 Requisition, Form 428.
251.65 Statement, Form 1627.
251.66 Approval of requisition.
251.67 Procurement of red strip stamps.
251.68 Overprinting of red strip stamps.
251.69 Manner of affixing red strip stamps.
251.70 Concealing or obscuring red strip stamps.
251.71 Affixing red strip stamp over cup or cap.
251.72 Exportation of imported distilled spirits; red strip stamps.
251.73 Withdrawal without payment of tax; red strip stamps.

EXEMPTIONS

251.74 Exemption from stamping, marking, bottling, and labeling requirements.

Subpart F—Red Strip Stamps To Be Affixed in a Foreign Country

251.80 Conditions.
251.81 Requisition, Form 428.
251.82 Approval of requisition.
251.83 Procurement and overprinting of red strip stamps.
251.84 Marking of cases.
251.85 Endorsement of warehouse and consumption entries.
251.86 Credit of red strip stamps against requisition on arrival of distilled spirits at specified port.
251.87 Credit of red strip stamps against requisition on diversion of spirits to other than specified port.
251.88 Irregularities or discrepancies in shipments.
251.89 Unused red strip stamps.
251.90 Credit for red strip stamps affixed to containers returned to a foreign bottler or exporter.
251.91 Credit for red strip stamps affixed to containers diverted by the imported for exportation.
251.92 Breach of regulations, or failure to use red strip stamps.

Subpart G—Red Strip Stamps Affixed Under Customs Supervision

251.110 Conditions.
251.111 Requisition, Form 428.
251.112 Expense of affixing red strip stamps.
251.113 Marking of cases.

Subpart H—Importation of Distilled Spirits in Bulk

251.120 Persons authorized to receive distilled spirits imported in bulk.
251.121 Containers.
251.122 Red strip stamps.

Subpart I—Importer's Records and Reports

RECORD AND REPORT OF RED STRIP STAMPS

251.130 Monthly record and report, Form 96.
251.131 Monthly record, part I, Form 96.
251.132 Monthly report, parts II and III, Form 96.
251.133 Separate record for each place of business.

RECORD AND REPORT OF IMPORTED DISTILLED SPIRITS

251.134 Record and report, Form 52E.
251.135 Record of warehouse receipts to be kept by importer.
251.136 Place where Form 52F shall be kept.
251.137 Record 52.
251.138 Time of making entries.
251.139 Separate record of serial numbers of cases.
251.140 Reports.

ADDITIONAL REQUIREMENTS

Sec.
251.141 Where importer ships direct to consignee.
251.142 Where importer ships to a consignee on the order of another wholesale liquor dealer.
251.143 Where importer keeps Record 52.
251.144 Forms to be provided by users at own expense.

Subpart J—Reports of Collectors of Customs

251.155 Semiannual reports of collectors of customs.

Subpart K—Disposition of Red Strip Stamps

251.160 Disposition of strip stamps.

AUTHORITY: §§ 251.1 through 251.160 issued under 68A Stat. 917; 26 U. S. C. 7805. Statutory provisions interpreted or applied are cited to text in parentheses.

CROSS REFERENCE: For regulations with respect to distilled spirits, wines, and beer arriving in the United States from Puerto Rico and the Virgin Islands, see Part 250 of this subchapter.

SUBPART A—SCOPE OF REGULATIONS

§ 251.1 *Imported distilled spirits, wines, and beer.* This part, "Importation of Distilled Spirits, Wines and Beer", contains procedural and substantive requirements relative to the importation of distilled spirits, wines, and beer into the United States from foreign countries including special (occupational) and commodity taxes, permits, marking, branding, labeling, and stamping of containers and packages, and records and reports.

NOTE: Distilled spirits, wines, and beer arriving in the United States from Puerto Rico and the Virgin Islands are governed by the provisions of Title 26, Code of Federal Regulations, Part 250.

§ 251.2 *Forms prescribed.* The Director, Alcohol and Tobacco Tax Division, is authorized to prescribe all forms required by this part, including reports, returns, and records. Information called for shall be furnished in accordance with the instructions on the forms or issued in respect thereto.

SUBPART B—DEFINITIONS

§ 251.5 *Meaning of terms.* As used in this part, unless the context otherwise requires, terms shall have the meanings ascribed in this subpart.

§ 251.6 *Assistant regional commissioner.* "Assistant regional commissioner" shall mean the assistant regional commissioner, Alcohol and Tobacco Tax, who is responsible to and functions under the direction and supervision of the regional commissioner.

§ 251.7 *Beer.* "Beer" shall mean all beer, ale, porter, stout and other similar fermented beverages (including sake or similar products) of any name or description containing one-half of 1 percent or more of alcohol by volume, brewed or produced from malt, wholly or in part, or from any substitute therefor.

§ 251.8 *Bottler.* "Bottler" shall mean a distiller, rectifier, and proprietor of an internal revenue bonded warehouse, taxpaid bottling house, taxpaid wine bottling house, industrial alcohol plant, industrial alcohol bonded warehouse, or a class 8 bonded warehouse qualified under the customs laws, and an agency of the United States or any State or political subdivision thereof.

§ 251.9 *Commissioner.* "Commissioner" shall mean the Commissioner of Internal Revenue.

§ 251.10 *Container.* "Container" when used in connection with imported distilled spirits shall mean a liquor bottle or other authorized container of a capacity of one-half pint to 1 gallon, inclusive, conforming to Part 175 of this title, and, in so far as red strip stamp and labeling requirements are concerned, also any container of less than one-half pint. "Container" when used in connection with imported wines or beer shall mean any bottle, cask, or other closed receptacle, irrespective of size or of the material from which made.

§ 251.11 *Director, Alcohol and Tobacco Tax Division.* "Director, Alcohol and Tobacco Tax Division", shall mean the Director, Alcohol and Tobacco Tax Division, Internal Revenue Service, Treasury Department, Washington, D. C.

§ 251.12 *Distilled spirits.* "Distilled spirits" shall mean (a) ethyl alcohol, hydrated oxide of ethyl, and spirits of wine, from whatever source derived or by whatever process produced, and (b) any alcoholic distillate fit for beverage purposes, such as whisky, brandy, gin, rum, liqueurs, cordials and bitters, and all compounds, by whatever name called, containing distilled spirits and fit for beverage purposes, but shall not include wine, as defined in § 251.23, containing 24 per centum or less of alcohol by volume.

§ 251.13 *District director.* "District director" shall mean the district director of internal revenue.

§ 251.14 *Importer.* "Importer" shall mean any person who imports distilled spirits, wines, or beer into the United States.

§ 251.15 *Including.* The term "including" shall not be deemed to exclude things other than those enumerated which are in the same general class.

§ 251.16 *Inclusive language.* Words in the plural form shall include the singular, and vice versa, and words in the masculine gender shall include the feminine, associations, partnerships, and corporations.

§ 251.17 *I. R. C.* "I. R. C." shall mean the Internal Revenue Code of 1954.

§ 251.18 *Person.* "Person" shall mean and include natural persons, associations, partnerships, and corporations.

§ 251.19 *Red strip stamps.* "Red strip stamps" shall mean the stamps prescribed under authority of section 5008 (b), I. R. C.

§ 251.20 *Regional Commissioner.* "Regional Commissioner" shall mean the Regional Commissioner of Internal Revenue in each of the internal revenue regions.

§ 251.21 *United States.* "United States" includes only the States, the Territories of Alaska and Hawaii, and the District of Columbia.

§ 251.22 *U. S. C.* "U. S. C." shall mean the United States Code.

§ 251.23 *Wine.* "Wine" shall mean (a) still wine, including vermouth or other apertif wine, artificial or imitation wines or compounds sold as still wine, champagne or sparkling wine, and artificially carbonated wine, and (b) flavored or sweetened fortified or unfortified wines, by whatever name sold or offered for sale, containing not over 24 percent alcohol by volume.

SUBPART C—SPECIAL (OCCUPATIONAL) TAXES

§ 251.30 *Liquor dealers' special taxes.* Every person engaged in business as an importer within the meaning of the term as defined in § 251.13, who sells, or offers for sale, distilled spirits, wines, or beer, must file Form 11 with the district director of internal revenue and pay special (occupational) taxes as wholesale dealer or retail dealer in liquor, or both, or, if beer only is dealt in, as wholesale beer dealer, or retail beer dealer, or both, in accordance with the law and regulations governing the payment of such special taxes. See Part 194 of this title.

(68A Stat. 618, 620, 621; 26 U. S. C. 5111, 5112, 5121, 5122)

§ 251.31 *Warehouse receipts covering distilled spirits.* Since the sale of warehouse receipts for distilled spirits is equivalent to the sale of distilled spirits, every person engaged in business as an importer of distilled spirits, who sells, or offers for sale, warehouse receipts for distilled spirits stored in customs bonded warehouses, or elsewhere, incurs liability to special tax as a dealer in liquors at the place where the warehouse receipts are sold or offered for sale, and must file return and pay occupational tax as provided in § 251.30.

(68A Stat. 618, 620, 621; 26 U. S. C. 5111, 5112, 5121, 5122)

SUBPART D—TAX ON IMPORTED DISTILLED SPIRITS, WINES, BEER, AND IMPORTED PERFUMES CONTAINING DISTILLED SPIRITS

DISTILLED SPIRITS AND PERFUMES

§ 251.40 *Distilled spirits.* Distilled spirits in customs bonded warehouse or imported into the United States are subject to an internal revenue tax, when withdrawn, at the rate of $10.50 per proof gallon, or wine gallon when below proof, and a proportionate tax at a like rate on all fractional parts of such proof or wine gallon. On and after April 1, 1956, the rate of tax shall be $9 in lieu of $10.50.

(68A Stat. 595; 26 U. S. C. 5001)

§ 251.41 *Perfumes containing distilled spirits.* Imported perfumes containing distilled spirits are subject to an internal revenue tax, when withdrawn, at the rate of $10.50 per wine gallon and a proportionate tax at a like rate on all fractional parts of such wine gallon. On and after April 1, 1956, the rate of tax shall be $9 in lieu of $10.50.

(68A Stat. 595; 26 U. S. C. 5001)

WINES

§ 251.42 *Wines.* All wines, including imitation, substandard or artificial wine, and compounds sold as wine, having not in excess of 24 percent of alcohol by volume, in customs bonded warehouse or imported into the United States are subject to an internal revenue tax at the rates shown below, such taxes to be determined at the time of removal from customs custody for consumption or sale. Tax computed on the basis of a wine gallon (a U. S. wine gallon of liquid measure equivalent to the volume of 231 cubic inches) will be paid proportionately on all fractional parts of a wine gallon. Fractions of less than one-tenth gallon will be converted to the nearest one-tenth gallon, and five-hundredths gallon will be converted to the next one-tenth gallon.

(a) On still wines containing not more than 14 percent of alcohol by volume, 17 cents per wine gallon, except that on and after April 1, 1956, the rate shall be 15 cents per wine gallon;

(b) On still wines containing more than 14 percent and not exceeding 21 percent of alcohol by volume, 67 cents per wine gallon, except that on and after April 1, 1956, the rate shall be 60 cents per wine gallon;

(c) On still wines containing more than 21 percent and not exceeding 24 percent of alcohol by volume, $2.25 per wine gallon, except that on and after April 1, 1956, the rate shall be $2.00 per wine gallon;

(d) On champagne and other sparkling wines, $3.40 per wine gallon, except that on and after April 1, 1956, the rate shall be $3.00 per wine gallon;

(e) On artificially carbonated wines, $2.40 per wine gallon, except that on and after April 1, 1956, the rate shall be $2.00 per wine gallon;

(f) All wines containing more than 24 percent of alcohol by volume shall be classed as distilled spirits and shall be taxed accordingly.

(68A Stat. 609; 26 U. S. C. 5041)

LIQUEURS, CORDIALS, AND OTHER COMPOUNDS AND PREPARATIONS

§ 251.43 *Liqueurs, cordials, and similar compounds.* Liqueurs, cordials, and similar compounds, containing distilled spirits, in customs bonded warehouse or imported into the United States are subject to an internal revenue tax, when withdrawn, at the rates applicable to distilled spirits. Fortified or unfortified wines, containing not over 24 percent alcohol by volume, to which sweetening or flavoring materials, but no distilled spirits, have been added are not classified as liqueurs, cordials, or similar compounds, but are considered to be flavored wines only and are subject to internal revenue tax at the rates applicable to wines.

(68A Stat. 595, 609; 26 U. S. C. 5001, 5041)

§ 251.44 *Other compounds and preparations.* Compounds and preparations, other than those specified in § 251.43 containing distilled spirits, which are fit for beverage purposes, in customs bonded warehouse or imported into the United States are subject to internal revenue tax at the rates applicable to distilled spirits. Compounds and preparations, containing fortified or unfortified wine, but no distilled spirits, which are fit for beverage purposes and which are sold as wine, are subject to internal revenue tax at the rates applicable to wines.

(68A Stat. 595, 609; 26 U. S. C. 5001, 5041)

BEER

§ 251.45 *Rate of tax.* All beer as defined in §251.7, imported into the United States, is subject to an internal revenue tax of $9 for every barrel containing not more than 31 gallons, and at a like rate for any other quantity or for the fractional parts of a barrel authorized and defined by law. On and after April 1, 1956, the tax shall be at the rate of $8 in lieu of $9. The tax on beer shall be determined on sale or removal for consumption or sale and shall be paid by the importer, in accordance with customs requirements.

(68A Stat. 611, 613, 614; 26 U. S. C. 5051, 5055, 5061)

§ 251.46 *Computation of tax.* In estimating and computing such tax, the fractional parts of a barrel shall be halves, thirds, quarters, sixths, and eights; and, except as provided in § 251.47, any fractional part of a barrel, containing less than one-eighth, shall be accounted one-eighth; more than one-eighth, and not more than one-sixth, shall be accounted one-sixth; more than one-sixth, and not more than one-fourth, shall be accounted one-fourth; more than one-fourth, and not more than one-third, shall be accounted one-third; more than one-third, and not more than one-half, shall be accounted one-half; more than one-half, and not more than one barrel, shall be accounted one barrel; and more than one barrel and not more than sixty-three gallons, shall be accounted two barrels, or a hogshead. The tax on any other quantity, as for example, bottled beer, will be computed on the basis of actual quantity at the rate prescribed by law.

(68A Stat. 611; 26 U. S. C. 5051)

§ 251.47 *Tolerance for containers.* The provisions of § 251.46 requiring the accounting of barrels and fractional parts of barrels at the next higher quantity shall not apply where the contents of any wooden barrel containing more than 31 gallons do not exceed 31 gallons by more than one-half gallon, and a proportionate quantity as to fractional wooden containers; nor where the contents of any metal barrel containing more than 31 gallons do not exceed 31 gallons by more than one-quarter gallon, and a proportionate quantity as to fractional metal containers; and no tax shall be collected on any excess which is within the limits of such tolerance.

(68A Stat. 611; 26 U. S. C. 5051)

COLLECTION OF INTERNAL REVENUE TAXES

§ 251.48 *Imported distilled spirits, wines, and beer.* Internal revenue taxes payable on imported distilled spirits, including perfumes containing distilled spirits, and on wines and beer, are col-

lected, accounted for, and deposited as internal revenue collections by collectors of customs in accordance with customs requirements.

SUBPART E—GENERAL REQUIREMENTS

PERMIT FOR IMPORTATION OF DISTILLED SPIRITS, WINES AND BEER

§ 251.55 *Federal Alcohol Administration Act permit.* Under the Federal Alcohol Administration Act and the regulations issued pursuant thereto (Regulations 1, 27 CFR Part 1), any person except an agency of a State or political subdivision thereof, or any officer or employee of any such agency, intending to engage in the business of importing distilled spirits, wines or beer for nonindustrial use is required to procure a permit (Form 1631) therefor.

(49 Stat. 978, as amended; 27 U. S. C. 203)

MARKING AND STAMPING OF DISTILLED SPIRITS

§ 251.56 *Containers of 1 gallon or less.* Imported containers of distilled spirits of 1 gallon or less, and empty containers imported for the bottling of imported distilled spirits of 1 gallon or less, are required to be marked in accordance with customs regulations (19 CFR Parts 11 and 12) and containers of one-half pint to 1 gallon are required to be marked under Part 175 of this subchapter, and stamped in accordance with this part.

§ 251.57 *Containers in excess of 1 gallon.* Imported containers of distilled spirits in excess of 1 gallon are required to be marked and stamped in accordance with customs regulations (19 CFR Parts 11 and 12).

LABELING OF DISTILLED SPIRITS

§ 251.58 *Containers of 1 gallon or less.* Labels on imported containers of distilled spirits, and on containers of imported distilled spirits bottled in customs custody, for sale at retail, are required to be covered by a certificate of label approval (Form 1649) issued pursuant to the Federal Alcohol Administration Act and regulations promulgated thereunder (Regulations 5, 27 CFR Part 5). Containers of imported distilled spirits bottled after taxpayment and withdrawal from customs custody are required to be covered by a certificate of label approval (Form 1649) or a certificate of exemption from label approval (Form 1650) issued pursuant to the Federal Alcohol Administration Act and regulations promulgated thereunder (Regulations 5, 27 CFR Part 5). When distilled spirits are to be labeled under a certificate of exemption from label approval, the labels affixed to containers are required to conform to Part 175 of this subchapter.

MARKING AND LABELING OF WINES AND BEER

§ 251.59 *Wines.* All imported wines containing not less than 7 percent and not more than 24 percent of alcohol by volume are required to be packaged, marked, branded, and labeled in conformity with the Federal Alcohol Administration Act and regulations promulgated thereunder (Regulations 4, 27 CFR Part 4), prior to their removal from customs custody. Containers of imported wine bottled or packaged after taxpayment and withdrawal from customs custody are required to be covered by a certificate of label approval (Form 1649) or a certificate of exemption from label approval (Form 1650) issued pursuant to the Federal Alcohol Administration Act and regulations promulgated thereunder (Regulations 4, 27 CFR Part 4). Imported containers of wine are required also to be marked, branded and labeled in accordance with customs regulations (19 CFR Parts 11 and 12).

§ 251.60 *Beer.* All imported beer is required to be released from customs custody in conformity with the Federal Alcohol Administration Act and regulations thereunder. The attention of all concerned is directed, in this connection, to the provisions of Regulations 7 (27 CFR Part 7) relating to the labeling and advertising of malt beverages, issued under the Federal Alcohol Administration Act. Imported containers of beer are required to be marked and labeled in accordance with customs regulations (19 CFR Parts 11 and 12).

RED STRIP STAMPS FOR CONTAINERS OF DISTILLED SPIRITS

§ 251.61 *Containers of distilled spirits to bear red strip stamps.* The immediate containers of imported distilled spirits are required to bear red strip stamps indicating the payment of all internal revenue taxes thereon, with the following exceptions:

(a) Distilled spirits in bond or in customs custody;

(b) Distilled spirits not intended for sale or for use in the manufacture or production of any article intended for sale;

(c) Distilled spirits on which no internal revenue tax is required to be paid; or

(d) Any regularly established common carrier receiving, transporting, delivering, or holding for transportation or delivery distilled spirits in the ordinary course of its business as a common carrier.

(68A Stat. 602; 26 U. S. C. 5008)

§ 251.62 *Persons authorized to affix red strip stamps.* Red strip stamps shall be affixed to imported containers of distilled spirits as follows: (a) By the bottler or exporter in a foreign country, as prescribed by Subpart F; or (b) by the importer or owner under customs supervision as prescribed by Subpart G. The bottler of distilled spirits imported in bulk shall affix stamps to the containers, as prescribed by Subpart H of this part.

(68A Stat. 602; 26 U. S. C. 5008)

§ 251.63 *Denominations of red strip stamps.* Red strip stamps will be provided in the following denominations only: 1 gallon, ½ gallon, 1 quart, ⅘ quart, ¾ quart, 1 pint, ⅘ pint, ¾ pint, ½ pint, and less than ½ pint. When containers for which standards of fill are not prescribed are of sizes for which no stamps are provided, the person required to affix the stamps shall use those of the denomination next under the actual quantity of spirits in the containers, as, for instance, a stamp of the ½ pint denomination for a container of more than ½ pint and less than ¾ pint, and shall block or strike out the original denomination and write or print on the stamps immediately above the blocked or stricken out denomination the exact quantity of spirits in the containers. Stamps of the denomination of "less than ½ pint" need not be changed to show the exact quantity in the containers.

(68A Stat. 602; 26 U. S. C. 5008)

§ 251.64 *Requisition, Form 428.* Requisition for red strip stamps shall be made by the importer, or his duly authorized agent, or by the subsequent purchaser of the distilled spirits as provided in this section, on Form 428, in triplicate. Where an importer has given a bottler or another agent power of attorney to sign Form 428, the importer's name must be given, followed by the signature of the person authorized and the words "Attorney in Fact." A copy of the power of attorney must be filed with the collector of customs. The local address of the importer, or his agent, must be given on Form 428 before approval by the collector of customs. The importer must present and file (if he has not already done so) with the collector of customs a certified or photostatic copy of his permit issued pursuant to the Federal Alcohol Administration Act and regulations promulgated thereunder at the time he presents his first Form 428 for approval. All Forms 428 shall be submitted to the collector of customs of the district in which the place of business of the importer, or his duly authorized agent, or the subsequent purchaser of the distilled spirits, as the case may be is located.

(68A Stat. 602; 26 U. S. C. 5008)

§ 251.65 *Statement, Form 1627.* The importer, or his duly authorized agent, shall submit with Form 428 for stamps to be sent to a foreign country a sworn statement on Form 1627, that the stamps requisitioned on Form 428 are required to supply existing orders and/or anticipated requirements within 30 days from the date of the requisition and will be used for the quantity of distilled spirits to be imported through the designated port (or other port or ports to be designated subsequently on Form 1627A as provided by §§ 251.86 and 251.87) at which warehouse or consumption entries will be filed. All of the information indicated by the headings of the columns and lines and the instructions printed on the form, shall be entered thereon.

(68A Stat. 602; 26 U. S. C. 5008)

§ 251.66 *Approval of requisition.* The collector of customs will approve Form 428 if he is satisfied that the importer is the holder of an I permit issued pursuant to the Federal Alcohol Administration Act and the regulations promulgated thereunder and that the red strip stamps are required for distilled spirits to be imported, or to be removed from customs custody, as prescribed in this part. The collector of customs will retain Form 1627 and one copy of Form 428 and return the original and remaining copy of Form 428 to the applicant for submission to the proper district director of internal revenue.

(68A Stat. 602; 26 U. S. C. 5008)

§ 251.67 *Procurement of red strip stamps.* Red strip stamps shall be procured by the importer, or his duly authorized agent, or the subsequent purchaser of the distilled spirits, as the case may be, from the district director of internal revenue of the district in which the place of business of such applicant is located. The applicant shall forward to the district director of internal revenue the original and copy of the approved Form 428. The district director of internal revenue may issue the exact number of stamps requisitioned thereon even though it is necessary to use portions of sheets. The district director of internal revenue will enter the serial numbers of the stamps issued and stamp the date of issue on both copies of Form 428. He will retain the original copy and send the remaining copy to the proper assistant regional commissioner.

(68A Stat. 602; 26 U. S. C. 5008)

§ 251.68 *Overprinting of red strip stamps.* The importer, or his duly authorized agent, or the subsequent purchaser of the distilled spirits, as the case may be, shall have indelibly overprinted in plain and legible letters on each of the red strip stamps, at his expense, the name and address of the importer, which shall, for example, be as follows: "John Doe & Co., Baltimore, Md." He shall submit the stamps to the collector of customs, who will verify the overprinting and make an endorsement showing the verification on the retained original Form 1627 submitted with Form 428. The collector of customs will then (a) deliver the stamps to the importer or his duly authorized agent, for transmission to the bottler or exporter abroad, as provided by Subpart F; or (b) deliver them to the importer, or his duly authorized agent, or the subsequent purchaser of the distilled spirits, as the case may be, for affixing to the container under customs supervision, as prescribed by Subparts G and H.

(68A Stat. 602; 26 U. S. C. 5008)

§ 251.69 *Manner of affixing red strip stamps.* The red strip stamps must be securely affixed to the containers with the use of a good adhesive. The adhesive used must be in proper liquid condition. Care must be taken to insure secure adherence of the stamp to the container. The stamp must be affixed in such a manner that it will be broken when the container is first opened, but so placed that a portion of the stamp will remain attached to the opened container.

(68A Stat. 602; 26 U. S. C. 5008)

§ 251.70 *Concealing or obscuring red strip stamps.* No part of the red strip stamp shall be concealed or obscured by any label or other covering, except that a cup may be placed over the opening of the container or the container may be placed in a carton, as provided in this section. Seals made of cellulose or other material which are shrunk or otherwise fitted over the necks of the containers and cover the stamps must be sufficiently transparent to permit the stamps to be plainly seen and the data thereon easily read. No cup or cap may be placed over the opening of a container and cover the stamp, unless such cup or cap is transparent or is so placed on the container that it may be readily removed at any time without injury to the stamp and the arrangement is such that the ends of the stamp will be plainly visible when the cap or cup is in place. Cartons or other coverings of containers of distilled spirits are permitted, if so made that they may be opened and closed without being torn or broken. Sealed cartons or other coverings may not be used unless transparent or unless openings therein permit the data on the stamp and the indicia and penalty clause required by Part 175 of this subchapter on the container to be plainly seen and read.

(68A Stat. 602, 639; 26 U. S. C. 5008, 5214)

§ 251.71 *Affixing red strip stamp over cup or cap.* The red strip stamp may be affixed over a cup or cap placed over the opening of the container, provided the arrangement is such that the stamp will be broken when the cup or cap is unscrewed or removed. Where it is desired to affix the stamp over a removable cup or cap, the cup or cap must be securely screwed or fastened over the opening of the container. The stamp must be securely affixed, with a strong adhesive, to both the cup or cap and the container. Where it is desired to affix the stamp over a cap or seal made of cellulose or other similar adhesive material which is so shrunk or otherwise fitted over the neck of the container as to be unremovable without being destroyed, it will not be necessary for the ends of the stamp to be affixed to the surface of the container, but the cap or seal and stamp must be so affixed that a portion of each will remain attached to the container when it is opened. In any case where there is doubt as to the propriety of the use of any cup or cap, the container and cup or cap should be submitted to the assistant regional commissioner for a determination thereon.

(68A Stat. 602; 26 U. S. C. 5008)

§ 251.72 *Exportation of imported distilled spirits; red strip stamps.* Red strip stamps affixed to imported distilled spirits prior to arrival in the United States, which spirits are diverted by the importer for exportation purposes, shall be effectively destroyed by the exporter, under customs supervision, prior to exportation. Red strip stamps affixed to distilled spirits originating in the United States, evidencing the tax or indicating compliance with the provisions of chapter 51, I. R. C., shall not be removed at or prior to the time of exportation.

(68A Stat. 602; 26 U. S. C. 5008)

§ 251.73 *Withdrawal without payment of tax: red strip stamps.* The provisions of § 251.72, in regard to destruction of strip stamps on bottled spirits exported, shall be applicable to spirits withdrawn from customs custody free of tax for entry into the United States.

(68A Stat. 602; 26 U. S. C. 5008).

EXEMPTIONS

§ 251.74 *Exemption from stamping, marking, bottling, and labeling requirements.* The provisions of this part relating to the affixing of red strip stamps, the indicia requirements of containers prescribed by Part 175 of this subchapter, and the labeling of containers as prescribed by regulations promulgated under the Federal Alcohol Administration Act (Regulations 5, 27 CFR Part 5) are not applicable to imported distilled spirits (a) not for sale or for any other commercial purpose whatever; (b) on which no internal revenue tax is required to be paid on or before withdrawal from customs custody; (c) for use as ship stores; or (d) for personal use. Samples of distilled spirits imported for any purpose are not exempt from the stamping, marking, bottling, and labeling requirements. Exemptions from the requirement that imported distilled spirits, wines and beer be marked to indicate the country of origin are set forth in customs regulations (19 CFR Part 11).

(68A Stat. 602, 639; 26 U. S. C. 5008, 5214)

SUBPART F—RED STRIP STAMPS TO BE AFFIXED IN A FOREIGN COUNTRY

§ 251.80 *Conditions.* Red strip stamps to be affixed to containers of distilled spirits may, in accordance with the procedure prescribed in this subpart, be procured by importers to be affixed to the containers by the bottler or exporter in a foreign country.

(68A Stat. 602; 26 U. S. C. 5008)

§ 251.81 *Requisition, Form 428.* The importer, or his duly authorized agent, shall make requisition on Form 428, in accordance with § 251.64, and submit a sworn statement on Form 1627, as prescribed by § 251.65, for red strip stamps to be sent to the foreign bottler or exporter.

(68A Stat. 602; 26 U. S. C. 5008)

§ 251.82 *Approval of requisition.* The collector of customs will approve Form 428 if he is satisfied that the importer is the holder of an importer's basic permit (Form 1631) issued pursuant to the Federal Alcohol Administration Act and regulations promulgated thereunder (Regulations 1, 27 CFR Part 1) and that the red strip stamps are required for distilled spirits to be imported to supply existing orders and/or anticipated requirements within 30 days from the date of the requisition. He will dispose of Forms 428 and Form 1627 in accordance with § 251.66.

(68A Stat. 602; 26 U. S. C. 5008)

§ 251.83 *Procurement and overprinting of red strip stamps.* The importer, or his duly authorized agent, shall procure the red strip stamps from the district director of internal revenue as provided by § 251.67 and have them overprinted and verified as provided by § 251.68. After verification of the overprinting and the prescribed endorsement on Form 1627, the collector of customs will deliver the stamps to the importer, or his duly authorized agent, for transmission to the bottler or exporter abroad.

(68A Stat. 602; 26 U. S. C. 5008)

§ 251.84 *Marking of cases.* The foreign bottler or exporter will plainly and legibly mark the following legend on each case of containers of distilled spirits to which red strip stamps are attached:

The red strip stamps required by section 5008, I. R. C., are affixed to the containers of distilled spirits in this case, consisting of ----------, bearing stamps of
(Number of containers)
---------- denomination.

(Name of bottler or exporter)

(68A Stat. 602; 26 U. S. C. 5008)

§ 251.85 *Endorsement of warehouse and consumption entries.* Upon arrival of the distilled spirits in this country, warehouse entries and consumption entries shall have endorsed thereon by the importer, or his duly authorized agent, the following legend:

Red strip stamps required by section 5008 I. R. C., were affixed abroad. These stamps were procured by----------
(Name of importer)
requisition Form 428, Importer's No.-------, approved by the Collector of Customs at ---------- on
(Port where Form 428 was approved)

(Date of approval of Form 428)

(68A Stat. 602; 26 U. S. C. 5008)

§ 251.86 *Credit of red strip stamps against requisition on arrival of distilled spirits at specified port.* Where warehouse and consumption entries are filed at the port where the requisition was approved, the collector of customs who approved the requisition will credit the Form 428 described in the endorsement on the entry referred to in § 251.85 with the number and denomination of red strip stamps shown by the usual customs examination to have been attached to the container.

(68A Stat. 602; 26 U. S. C. 5008)

§ 251.87 *Credit of red strip stamps against requisition on diversion of spirits to other than specified port.* In the event of diversion of all or part of the spirits to a port or ports other than the port specified in Form 1627 filed with the Form 428, the importer shall submit a supplemental statement in duplicate on Form 1627A, for each such port. He shall submit them to the collector of customs who approved the Form 428, who will retain the copy and transmit the original to the collector of customs at the designated port. Where a warehouse or consumption entry is filed at a specified port other than the port where the requisition was approved, the collector of customs of the port at which the warehouse or consumption entry is filed will promptly notify, on Form 1627A, the collector of customs who approved the Form 428 of the number and denomination of stamps shown by the usual customs examination to have been attached to the containers. The collector of customs who approved the requisition will credit the Form 428 accordingly. He will stamp on the copy of Form 1627A "Strip stamps credited", and send the copy to the importer who filed the application. Such importer may then take credit for the stamps on Form 96. Such diverted spirits may not be released from customs custody until Form 1627A has been received at the port of diversion or the collector of customs who approved Form 428 has authorized such release.

(68A Stat. 602; 26 U. S. C. 5008)

§ 251.88 *Irregularities or discrepancies in shipments.* In case any irregularities or discrepancies are found, the collector of customs at the port of entry will make demand for redelivery of unexamined packages, and will not release examined or redelivered packages until satisfactory explanation and/or proper corrections have been made.

(68A Stat. 602; 26 U. S. C. 5008)

§ 251.89 *Unused red strip stamps.* Unused red strip stamps returned to the importer by the bottler or exporter abroad, shall be submitted to the collector of customs who approved the original requisition Form 428, for noting such fact on the requisition. After proper notation has been made, the collector of customs will return the stamps to the importer (who will acknowledge receipt), and notify the proper assistant regional commissioner. If subsequently the importer desires to send such stamps to a bottler or exporter abroad, he must submit them with Form 1627 properly modified, in duplicate, to the collector of customs, who will note approval on the copy of Form 1627 and return it with the stamps to the importer. He will retain the original Form 1627. Where the distilled spirits are to be imported through more than one port, Form 1627A shall be submitted by the importer to such collector, for each port of entry, for certification and transmittal of a copy to the collector of customs at each of the ports at which warehouse or consumption entries will be filed. The importer shall make appropriate entries on his monthly report, Form 96, of the receipt and disposition of unused stamps covered by this section.

(68A Stat. 602; 26 U. S. C. 5008)

§ 251.90 *Credit for red strip stamps affixed to containers returned to a foreign bottler or exporter.* When for any reason containers of distilled spirits bearing red strip stamps are returned from customs custody to the foreign bottler or exporter, the importer may be given credit for such stamps, provided he obtains an affidavit from an excise official of the foreign government concerned to the effect that the stamps were removed from the containers and destroyed under his supervision. The importer shall submit such affidavit to the collector of customs who will credit the original requisition accordingly. The importer shall make appropriate entries on his monthly report, Form 96.

(68A Stat. 602; 26 U. S. C. 5008)

§ 251.91 *Credit for red strip stamps affixed to containers diverted by the importer for exportation.* The importer may be given credit for red strip stamps which were affixed to imported distilled spirits diverted by the importer for exportation purposes and which were effectively destroyed by the exporter under customs supervision, provided he obtains an affidavit from the customs officer to the effect that the stamps were removed from the containers and destroyed under his supervision. The importer shall submit such affidavit to the collector of customs who approved the original requisition for proper credit. The importer shall make appropriate entries on his monthly report, Form 96.

(68A Stat. 602; 26 U. S. C. 5008)

§ 251.92 *Breach of regulations, or failure to use red strip stamps.* Any breach of the provisions of this part, or failure to use the red strip stamps for the purpose for which they were procured within a period of six months, or within such additional extension of time as may be granted by the collector of customs, not satisfactorily explained to the collector of customs, will be grounds for denial of approval of further requisitions for stamps.

(68A Stat. 602; 26 U. S. C. 5008)

SUBPART G—RED STRIP STAMPS AFFIXED UNDER CUSTOMS SUPERVISION

§ 251.110 *Conditions.* Distilled spirits in containers imported without having red strip stamps attached may not be released from customs custody until a stamp has been affixed to each container, under the supervision of a customs officer. Stamps procured for such containers but not affixed within 48 hours after entry shall be placed in the custody of the collector of customs until such time as they are to be affixed to containers prior to removal from customs custody.

(68A Stat. 602; 26 U. S. C. 5008)

§ 251.111 *Requisition, Form 428.* Requisition for red strip stamps shall be made by the original importer or his duly authorized agent: *Provided,* That if the importer has gone out of business the requisition shall be made by the person having title to the distilled spirits. The requisition shall be submitted in accordance with § 251.64. Subsequent procedure shall conform to applicable provisions of §§ 251.66, 251.67, and 251.68.

(68A Stat. 602; 26 U. S. C. 5008)

§ 251.112 *Expense of affixing red strip stamps.* Expenses of cartage, storage, repacking, handling, or other labor connected with the opening of cases and affixing of red strip stamps to the containers, shall be borne by the importer, or by the subsequent purchaser of the distilled spirits referred to in § 251.111, as the case may be.

(68A Stat. 602; 26 U. S. C. 5008)

§ 251.113 *Marking of cases.* There shall be indelibly stamped upon each case by the customs officer supervising the affixing of red strip stamps to containers, the following legend:

Port of----------, ----------
(Month)
---------, 19--.
(Day)
This is to certify that on this date the red strip stamps required by Section 5008 I. R. C., were affixed, under my supervision, to the containers of distilled spirits in this case, consisting of ----------, ----------,
(Number of containers)
bearing stamps of ------ denomination.

(Name)

(Official designation)

(68A Stat. 602; 26 U. S. C. 5008)

SUBPART H—IMPORTATION OF DISTILLED SPIRITS IN BULK

§ 251.120 *Persons authorized to receive distilled spirits imported in bulk.* Distilled spirits imported in bulk (i. e., in containers having a capacity in excess of 1 gallon) may be entered into a class 8 customs bonded warehouse for bottling, or may be withdrawn from customs custody only if entered for exportation or if withdrawn by a person to whom it is lawful to sell or otherwise dispose of distilled spirits in bulk pursuant to the Federal Alcohol Administration Act (49 Stat. 985, as amended; 27 U. S. C., 206) and Regulations 3 (27 CFR Part 3). The importation and disposition of distilled spirits imported in bulk shall be reported as prescribed by § 251.134.

(68A Stat. 619, 639, 681; 26 U. S. C. 5114, 5214, 5555)

§ 251.121 *Containers.* Imported distilled spirits may be bottled in either domestic or imported containers conforming to the provisions of Part 175 of this subchapter.

(68A Stat. 639; 26 U. S. C. 5214)

§ 251.122 *Red strip stamps.* Red strip stamps overprinted with the name and address of the original importer as prescribed by § 251.68 or stamps without any overprinting prescribed for domestic use (Part 230 of this subchapter), may be affixed to containers of imported distilled spirits bottled in a class 8 customs bonded warehouse. Stamps without any overprinting prescribed for domestic use (Part 230 of this subchapter) shall be affixed by the bottler to containers of imported distilled spirits bottled after withdrawal from customs custody.

(68A Stat. 602; 26 U. S. C. 5008)

SUBPART I—IMPORTER'S RECORDS AND REPORTS

Record and Report of Red Strip Stamps

§ 251.130 *Monthly record and report, Form 96.* Importers of distilled spirits shall keep records and render reports of red strip stamps on Form 96.

(68A Stat. 602; 26 U. S. C. 5008)

§ 251.131 *Monthly record, part I, Form 96.* Importers shall keep a record of red strip stamps procured and used daily on part I of Form 96. A separate page in single copy is required for each denomination of stamps. Entries shall be made on Form 96 daily, as indicated by the headings of the various columns and lines, and in accordance with the instructions on the form. The record shall be kept in bound form for a period of two years, and during such period shall be available during business hours for inspection by internal revenue officers.

(68A Stat. 612, 619; 26 U. S. C. 5008, 5114)

§ 251.132 *Monthly report, parts II and III, Form 96.* At the close of the month, importers shall prepare parts II and III of Form 96, in triplicate, reporting on part II the red strip stamps procured and used during the month, and on part III the stamps shipped abroad to importer's agents. On or before the tenth day of the succeeding month, one copy shall be forwarded to the assistant regional commissioner, of the region in which the business of the importer is conducted, and one copy to the collector of customs, who approved the importer's requisitions. The remaining copy shall be retained in bound form with the importer's copies of part I, Form 96, for the same month, available for inspection by internal revenue officers.

(68A Stat. 602; 26 U. S. C. 5008)

§ 251.133 *Separate record for each place of business.* Where an importer has more than one place of business, a separate record on part I of Form 96 shall be maintained on the premises of each place of business. A separate monthly report (parts II and III) shall also be rendered for each place of business. Where an agent procures stamps for several importers, the agent shall keep a separate record for each importer on part I of Form 96 of all stamps sent abroad or retained on his premises for the account of the importer. Separate monthly reports (parts II and III) shall be rendered by the agent in the name of each importer, to the assistant regional commissioner of the region in which the stamps are procured.

(68A Stat. 602, 681; 26 U. S. C. 5008, 5555)

Record and Report of Imported Distilled Spirits

§ 251.134 *Record and report, Form 52E.* Every importer who imports and sells distilled spirits in bulk shall keep at the place of business covered by his wholesale liquor dealer special tax stamp, Form 52E, of all distilled spirits, both bulk and bottled, imported and disposed of by him: *Provided,* That, if the importer so desires, he may keep Form 52E for bulk spirits only and Record 52 for bottled spirits only. If only bottled spirits are imported, he shall keep Record 52. The receipt of imported distilled spirits, both bulk and bottled, shall be entered on part 1, of Form 52E or bottled distilled spirits on Record 52, as the case may be, as of the time of making the customs entry. The disposition of such distilled spirits shall be entered on part 2 of Form 52E or Record 52, as the case may be, as of the time of their sale or their taxpayment and withdrawal from customs custody. If the importer enters the distilled spirits into a class 8 customs bonded warehouse for bottling, he shall note such temporary disposition of the distilled spirits in bulk on part 2 of Form 52E and, upon completion of their bottling, enter the bottled distilled spirits on part 1 of Form 52E or Record 52, as the case may be. He shall then report the disposition of the bottled distilled spirits on part 2 of Form 52E or Record 52, as the case may be, at the time of their sale or their taxpayment and withdrawal from customs custody. Wholesale liquor dealers who import or purchase in customs bond distilled spirits for exportation, or who acquire distilled spirits in a foreign country for direct shipment to a foreign customer, are not required to keep Form 52E or Record 52 and need not submit transcripts or monthly summaries thereof as to such operations.

(68A Stat. 618, 619, 681; 26 U. S. C. 5112, 5114, 5555)

§ 251.135 *Record of warehouse receipts to be kept by importer.* Every importer who sells, or offers for sale, distilled spirits by warehouse receipts shall keep a separate record, and render a monthly transcript, of all purchases and sales of warehouse receipts on Form 52F. There need not be entered on Form 52F transactions in warehouse receipts not involving the purchase or sale of distilled spirits, such as the receipt from a warehouseman of warehouse receipts covering the deposit or bottling of spirits in his warehouse or the surrender of warehouse receipts for the bottling of the spirits in bond or their transfer in bond to another warehouse. Entries on Form 52F shall be made as indicated by the headings of the columns and lines on the form and in accordance with the instructions printed thereon or issued in respect thereto, and as required by this part. The provisions of § 251.138 with respect to the time of making entries, and of § 251.144 with respect to forms to be provided by users, are hereby made applicable to Form 52F. The provisions of § 251.139 with respect to a separate record of serial numbers of cases are hereby made applicable to Form 52F with respect to serial numbers of packages and cases purchased or sold by warehouse receipts. The monthly transcript on Form 52F shall be forwarded to the assistant regional commissioner on or before the tenth day of the succeeding month. The importation of distilled spirits, and the disposition of such spirits from customs custody at the time of their sale or withdrawal therefrom, shall continue to be reported on Form 52E or Record 52, as the case may be, in accordance with the provisions of § 251.134. The physical receipt and disposition of distilled spirits at the importer's wholesale liquor dealer premises shall continue to be reported on Record 52 in accordance with the provisions of § 251.137.

(68A Stat. 618, 619, 681; 26 U. S. C. 5112, 5114, 5555)

§ 251.136 *Place where Form 52F shall be kept.* Every importer shall keep Form 52F at the place of business where warehouse receipts are sold or offered for sale.

(68A Stat. 618, 619, 681; 26 U. S. C. 5112, 5114, 5555)

§ 251.137 *Record 52.* Every importer who maintains wholesale liquor dealer premises where bottled distilled spirits are received and stored, shall keep Record 52 of all bottled distilled spirits received and disposed of thereat (including bottled spirits transferred from customs custody) in accordance with Part 194 of this subchapter, in addition to a record on Form 52E or Record 52, as the case may be, as prescribed by § 251.134.

(68A Stat. 618, 619, 681; 26 U. S. C. 5112, 5114, 5555)

§ 251.138 *Time of making entries.* Daily entries shall be made on Record 52 and Form 52E, as indicated by the headings of the various columns, and in accordance with instructions printed thereon, before the close of the business

day next succeeding the day on which the transactions occur. Where the importer defers the making of the entries to the next business day, as authorized in this section, he shall keep a separate record, such as invoices, of the removals of distilled spirits showing the removal data required to be entered on Record 52 and Form 52E, and appropriate memoranda of other transactions required to be entered on such records, for the purpose of making the entries correctly.

(68A Stat. 618, 619, 681; 26 U. S. C. 5112, 5114, 5555)

§ 251.139 *Separate record of serial numbers of cases.* Serial numbers of cases of distilled spirits disposed of need not be entered on Record 52 or Form 52E, provided the respective proprietor keeps in his place of business a separate record, approved by the assistant regional commissioner, showing such serial numbers, with necessary identifying data, including the date of removal and the name and address of the consignee. Such separate record may be kept in book form (including loose-leaf books) or may consist of commercial papers, such as invoices or bills. Such books, invoices, and bills shall be preserved for a period of two years and in such a manner that the required information may be ascertained readily therefrom, and during such period, shall be available during business hours for inspection and the taking of abstracts therefrom by internal revenue officers. Entries shall be made on such separate approved record before the close of the business day next succeeding the day on which the transactions occur. Where the making of the entries is deferred to the next business day, as authorized in this section, appropriate memoranda shall be maintained for the purpose of making the entries correctly. The importer, whose separate record has been approved by the assistant regional commissioner, shall note in the column for reporting serial numbers that, "Serial numbers shown on commercial records per authority, dated -----."

(68A Stat. 618, 619, 681; 26 U. S. C. 5112, 5114, 5555)

§ 251.140 *Reports.* Except as otherwise provided in this section, the importer shall file, daily, full and complete transcripts of Form 52E (parts 1 and 2) or Record 52, as the case may be, on Forms 52E (parts 1 and 2) or 52A and 52B with the assistant regional commissioner, by delivering or mailing them to such officer on the date the transactions entered therein occurred: *Provided,* That in any case in which the assistant regional commissioner shall direct, the transcripts shall be so filed with the supervisor in charge, Alcohol and Tobacco Tax, instead of with the assistant regional commissioner. The transcripts shall bear the following certification signed by the person or officer authorized to sign Form 52E or 338:

I hereby certify that these transcripts consisting of -------- pages, disclose all the transactions which occurred during the period covered thereby, and that each entry is correct.

If in any case the assistant regional commissioner shall so authorize, the transcripts, in lieu of being filed daily, may be filed with him on or before the tenth day of the month succeeding the month in which the transactions in distilled spirits occurred. In such event, transactions will be entered on Form 52E and Record 52 in accordance with the provisions of § 251.138. Monthly summary reports on Form 52E (part 3) and Form 338 (where Record 52 is kept) shall be prepared in duplicate, one copy of which will be retained on file and the original forwarded to the assistant regional commissioner on or before the tenth day of the month succeeding the month in which the transactions in distilled spirits occurred. Records kept on Form 52E and Record 52 shall be preserved for a period of two years, and during such period shall be available during business hours for inspection and the taking of abstracts therefrom by any internal revenue officer.

(68A Stat. 618, 619, 681; 26 U. S. C. 5112, 5114, 5555)

ADDITIONAL REQUIREMENTS

§ 251.141 *Where importer ships direct to consignee.* The importer shall report, on Form 52E, part 2, and when Record 52 is kept, on part 2 and on transcript, Form 52B, the name and address of each consignee, in the column now designated "Name". In the column now designated "Address", there will be reported the name and address of the person, firm or corporation paying (by advancement or reimbursement) either tax, bottling charge, brokerage fee, handling charge, or clearance fee, indicating which are included. The heading of both columns will be amended accordingly.

(68A Stat. 618, 619, 681; 26 U. S. C. 5112, 5114, 5555)

§ 251.142 *Where importer ships to a consignee on the order of another wholesale liquor dealer.* Where the importer ships or delivers distilled spirits to a consignee on the order of another wholesale liquor dealer, detailed records of the transactions shall be kept on Form 52E by the importer making the shipment or delivery, on Record 52 by the wholesale liquor dealer giving the order, and on Record 52 by the consignee if he is a wholesale liquor dealer. For example, assuming that importer (A) ships or delivers the distilled spirits to consignee (C) on the order of wholesale dealer (B), entries will be made on the prescribed forms as follows:

(a) Importer (A) will show in his Form 52E the name and address of wholesale dealer (B) who ordered the distilled spirits, as well as the name and address of consignee (C), the person to whom the distilled spirits are actually shipped or delivered;

(b) Wholesale dealer (B) will show in his Record 52 that the distilled spirits were purchased from importer (A), giving both the name and address of (A), and will at the same time make an entry showing that the distilled spirits were shipped or delivered by (A) to consignee (C) giving the name and address of (C); and

(c) Consignee (C), if a wholesale liquor dealer, will show in his Record 52 that the distilled spirits were purchased from wholesale dealer (B) and received by him from importer (A), giving name and address of both. A copy of Form 52E and transcripts of Record 52 on Forms 52A and 52B, required to be filed with the assistant regional commissioner, will similarly show the details of such transactions.

(68A Stat. 618, 619, 681; 26 U. S. C. 5112, 5114, 5555)

§ 251.143 *Where importer keeps Record 52.* Where the importer keeps Record 52 and is a party to transactions similar to those described in § 251.142, he shall make similar entries of such transactions in Record 52; and the transcripts on Forms 52A and 52B required to be filed with the assistant regional commissioner, will likewise show the details of the transactions.

(68A Stat. 618, 619, 681; 26 U. S. C. 5112, 5114, 5555)

§ 251.144 *Forms to be provided by users at own expense.* Form 52E, Record 52, and Forms 52A, 52B, 52F, and 338 shall be provided by importers at their own expense, but must be in the form prescribed: *Provided,* That with the approval of the Director, Alcohol and Tobacco Tax Division, they may be modified to adapt their use to tabulating or other mechanical equipment: *Provided further,* That where the form is printed in book form, including loose-leaf books, the instructions may be printed on the cover or the fly leaf of the book instead of on the individual form.

(68A Stat. 618, 619, 681; 26 U. S. C. 5112, 5114, 5555)

SUBPART J—REPORTS OF COLLECTORS OF CUSTOMS

§ 251.155 *Semiannual reports of collectors of customs.* Collectors of customs will furnish the assistant regional commissioner as of June 30 and December 31 of each year a consolidated report showing the name of the importer, and the number and denomination of red strip stamps procured on requisitions, Form 428, approved by them, and not credited against such requisitions.

(68A Stat. 602; 26 U. S. C. 5008)

SUBPART K—DISPOSITION OF RED STRIP STAMPS

§ 251.160 *Disposition of strip stamps.* The importer who discontinues or sells his business shall recall from his agents abroad all unused stamps in their custody. He shall submit his entire stock of unused stamps, accompanied by a report, in triplicate, of inventory, by denominations, serial numbers, and quantity, to the collector of customs for crediting of the respective Forms 428. The collector of customs will then destroy the stamps and after such destruction, will note the action taken on all copies of the inventory. He shall retain one copy of the inventory, return one copy to the importer, and forward the original copy to the assistant regional commissioner. The importer will note the disposition of the stamps on Form 96, will mark the report "Final", and submit the report to the assistant regional commissioner within five days of the return and destruction of the stamps.

(68A Stat. 602; 26 U. S. C. 5008)

[F. R. Doc. 55-4164; Filed, May 20, 1955; 8:50 a. m.]

PART 295—REMOVAL OF TOBACCO PRODUCTS AND CIGARETTE PAPERS AND TUBES, WITHOUT PAYMENT OF TAX, FOR USE OF THE UNITED STATES

Preamble. 1. These regulations, 26 CFR Part 295, "Removal of Tobacco Products and Cigarette Papers and Tubes Without Payment of Tax, for Use of the United States," supersede 26 CFR (1939) Part 140, Subpart P, "Tax-Free Shipment of Tobacco, Snuff, Cigars, Cigarettes, and Cigarette Papers and Tubes, for Use of United States," and are promulgated in order to implement the Internal Revenue Code of 1954.

2. These regulations shall not affect any act done, or any liability or right accruing or accrued, or any suit or proceeding had or commenced, before the effective date of these regulations.

Subpart A—Scope of Regulations

Sec.
295.1 Removal of tobacco products and cigarette papers and tubes, without payment of tax, for use of the United States.
295.2 Forms prescribed.

Subpart B—Definitions

295.10 Meaning of terms.
295.11 Assistant regional commissioner.
295.12 Cigar.
295.13 Cigarette.
295.14 Cigarette paper.
295.15 Cigarette papers.
295.16 Cigarette tube.
295.17 Commissioner.
295.18 Director, Alcohol and Tobacco Tax Division.
295.19 Factory.
295.20 Inclusive language.
295.21 I. R. C.
295.22 Manufactured tobacco.
295.23 Manufacturer of cigarette papers and tubes.
295.24 Manufacturer of cigars and cigarettes.
295.25 Manufacturer of tobacco.
295.26 Person.
295.27 Region.
295.28 Regional commissioner.
295.29 Removal or remove.
295.30 Revenue officer.
295.31 Tobacco products.
295.32 U. S. C.

Subpart C—General

295.40 Authority of revenue officers to enter premises.
295.41 Interference with administration.
295.42 Unlawful diversion of tobacco products or cigarette papers or tubes.

Subpart D—Restrictions and Requirements

295.50 Removal restricted.
295.51 Federal requisition.
295.52 Notice of removal.
295.53 Packages, and label or notice.
295.54 Mark.
295.55 Class designation for large cigars.
295.56 Records and reports of removals.
295.57 Removal in bond.
295.58 Certificate of receipt.
295.59 Tax liability.

AUTHORITY: §§ 295.1 to 295.59 issued under 68A Stat. 917; 26 U. S. C. 7805. Statutory provisions interpreted or applied are cited to text in parentheses.

SUBPART A—SCOPE OF REGULATIONS

§ 295.1 *Removal of tobacco products and cigarette papers and tubes, without payment of tax, for use of the United States.* This part contains the regulations governing the removal of manufactured tobacco, cigars, cigarettes, cigarette tubes, and taxable cigarette papers, without payment of tax, for shipment to Federal agencies and institutions for use of the United States.

§ 295.2 *Forms prescribed.* The Director, Alcohol and Tobacco Tax Division, is authorized to prescribe all forms required by this part. Information called for thereon shall be furnished in accordance with the instructions on the forms or issued in respect thereto.

SUBPART B—DEFINITIONS

§ 295.10 *Meaning of terms.* The terms used in this part shall have the meanings ascribed in this subpart, unless the context otherwise indicates.

§ 295.11 *Assistant regional commissioner.* "Assistant regional commissioner" shall mean the Assistant Regional Commissioner, Alcohol and Tobacco Tax, who is responsible to and functions under the direction and supervision of the Regional Commissioner.

§ 295.12 *Cigar.* "Cigar" shall mean any roll of tobacco wrapped in tobacco.

§ 295.13 *Cigarette.* "Cigarette" shall mean any roll of tobacco, wrapped in paper or any substance other than tobacco.

§ 295.14 *Cigarette paper.* "Cigarette paper" shall mean paper, or any other material except tobacco, prepared for use as a cigarette wrapper.

§ 295.15 *Cigarette papers.* "Cigarette papers" shall mean taxable packages, books, or sets, of cigarette paper.

§ 295.16 *Cigarette tube.* "Cigarette tube" shall mean cigarette paper made into a hollow cylinder for use in making cigarettes.

§ 295.17 *Commissioner.* "Commissioner" shall mean the Commissioner of Internal Revenue.

§ 295.18 *Director, Alcohol and Tobacco Tax Division.* "Director, Alcohol and Tobacco Tax Division," shall mean the Director, Alcohol and Tobacco Tax Division, Internal Revenue Service, Treasury Department, Washington, D. C.

§ 295.19 *Factory.* "Factory" shall mean the premises of a manufacturer of tobacco, cigars and cigarettes, or cigarette papers and tubes in which he carries on such business.

§ 295.20 *Inclusive language.* Words in the plural form shall include the singular, and vive versa, and words in the masculine gender shall include the feminine, partnerships, associations, companies, corporations, estates, and trusts.

§ 295.21 *I. R. C.* "I. R. C." shall mean the Internal Revenue Code of 1954.

§ 295.22 *Manufactured tobacco.* "Manufactured tobacco" shall mean all tobacco, other than cigars and cigarettes, prepared, processed, manipulated, or packaged for consumption by smoking or for use in the mouth or nose. Any other tobacco not exempt from tax under Chapter 52, I. R. C., which is sold or delivered to any person contrary to such chapter and regulations thereunder, shall be regarded as manufactured tobacco.

§ 295.23 *Manufacturer of cigarette papers and tubes.* "Manufacturer of cigarette papers and tubes" shall mean every person who makes up cigarette paper into packages, books, or sets, on which tax is imposed, or into tubes, except for his own personal use or consumption or solely for use by him in the manufacture of cigarettes.

§ 295.24 *Manufacturer of cigars and cigarettes.* "Manufacturer of cigars and cigarettes" shall mean every person who produces cigars or cigarettes, except for his own personal consumption.

§ 295.25 *Manufacturer of tobacco.* "Manufacturer of tobacco" shall mean every person who manufactures tobacco by any method of preparing, processing, or manipulating, except for his own personal consumption or use; or who packages any tobacco for consumption by smoking or for use in the mouth or nose; or who sells or delivers any tobacco, not exempt from tax under Chapter 52, I. R. C., to any person, contrary to the provisions of such chapter and regulations thereunder. The term "manufacturer of tobacco" shall not include (a) a farmer or grower of tobacco who sells leaf tobacco of his own growth or raising, or a bona fide association of farmers or growers of tobacco which sells only leaf tobacco grown by farmer or grower members, if the tobacco so sold is in the condition as cured on the farm; or (b) a dealer in tobacco materials who handles tobacco solely for sale, shipment, or delivery, in bulk, to another dealer in such materials or to a manufacturer of tobacco products, or to a foreign country, Puerto Rico, the Virgin Islands, or a possession of the United States.

§ 295.26 *Person.* "Person" shall mean and include an individual, partnership, association, company, corporation, estate, or trust.

§ 295.27 *Region.* "Region" shall mean the area, designated by the Secretary or his delegate, comprising the geographical jurisdiction of a regional commissioner of internal revenue.

§ 295.28 *Regional commissioner.* "Regional commissioner" shall mean the Regional Commissioner of Internal Revenue of an internal revenue region.

§ 295.29 *Removal or remove.* "Removal" or "remove" shall mean removal of tobacco products or cigarette papers or tubes from the factory.

§ 295.30 *Revenue officer.* "Revenue officer" shall mean any officer or employee of the United States acting in connection with any internal revenue law of the United States.

§ 295.31 *Tobacco products.* "Tobacco products" shall mean manufactured tobacco, cigars, and cigarettes.

§ 295.32 *U. S. C.* "U. S. C." shall mean the United States Code.

SUBPART C—GENERAL

§ 295.40 *Authority of revenue officers to enter premises.* Any revenue officer may enter in the daytime any premises where tobacco products or cigarette papers or tubes removed under this part are kept, so far as it may be necessary

for the purpose of examining such articles. When such premises are open at night, any revenue officer may enter them, while so open, in the performance of his official duties. The owner of such premises, or person having the superintendence of the same, who refuses to admit any revenue officer or permit him to examine the articles removed under this part shall be liable to the penalties prescribed by law for the offense.

(68A Stat. 872, 903; 26 U. S. C. 7342, 7606)

§ 295.41 *Interference with administration.* Whoever, corruptly or by force or threats of force, endeavors to hinder or obstruct the administration of this part, or endeavors to intimidate or impede any revenue officer acting in his official capacity, or forcibly rescues or attempts to rescue or causes to be rescued any property, after it has been duly seized for forfeiture to the United States in connection with a violation or intended violation of this part, shall be liable to the penalties prescribed by law.

(68A Stat. 855; 26 U. S. C. 7212)

§ 295.42 *Unlawful diversion of tobacco products or cigarette papers or tubes.* Any person who diverts, for purposes of taxable consumption or use, tobacco products or cigarette papers or tubes removed under this part, without payment of tax, shall be liable for the tax thereon and may also be subject to other penalties prescribed by law for such offense. Such articles, as well as any other property possessed with intent to defraud the United States or intended for use in violating the provisions of this part, are subject to forfeiture to the United States.

(68A Stat. 716, 717, 718; 26 U. S. C. 5751, 5761, 5762, 5763)

SUBPART D—RESTRICTIONS AND REQUIREMENTS

§ 295.50 *Removal restricted.* Tobacco products and cigarette papers and tubes may be removed, without payment of tax, in accordance with this part for shipment only to Federal agencies and institutions for gratuitous distribution (but not for sale) in the United States.

(68A Stat. 708, 900; 26 U. S. C. 5704, 7510)

§ 295.51 *Federal requisition.* Whenever tobacco products or cigarette papers or tubes are purchased by a Federal agency or institution for the use of the United States, and it is proposed to remove such tobacco products or cigarette papers, or tubes without payment of tax, under this part, the agency or institution desiring the articles shall prepare a requisition on Form 7996 for each separate shipment of such articles. Each such requisition shall be assigned a number by the agency or institution preparing the form. The agency or institution shall retain one completed copy of the requisition, which shall be made available for inspection by any revenue officer upon his request, and transmit two such copies to the manufacturer concerned at the time of placing the order. One copy of this requisition shall be retained by the manufacturer at the factory from which the tobacco products or cigarette papers or tubes are removed, as a part of his records, for one year after the close of the year in which such articles are removed, and shall be made available for inspection by any revenue officer upon his request. The manufacturer shall forward one copy of the requisition to the assistant regional commissioner as required by § 295.52.

§ 295.52 *Notice of removal.* For each shipment of tobacco products or cigarette papers or tubes removed, without payment of tax, under this part, the manufacturer shall prepare a notice of such removal on Form 7997. The manufacturer shall enter on each such notice of removal a number in a series beginning with number 1 with respect to the first removal made under this part, and beginning again with number 1 with respect to the first removal made on January 1 of each year thereafter, which number shall be the same on all copies of the respective notice. Immediately after removal of the tobacco products or cigarette papers or tubes, as described on the notice of removal, the manufacturer shall forward a copy of such notice, with a copy of the related requisition, Form 7996, as required by section 295.51, to the assistant regional commissioner for the region in which is located the factory from which the tobacco products or cigarette papers or tubes were removed. One copy of the notice of removal shall be retained by the manufacturer at the factory, as a part of his records, for one year after the close of the year in which the tobacco products or cigarette papers or tubes are removed, and shall be made available for inspection by any revenue officer upon his request.

§ 295.53 *Packages, and label or notice.* All tobacco products and cigarette papers and tubes shall, before removal under this part, be put up by the manufacturer thereof in packages similar to packages of like articles removed for taxable purposes, as required by Parts 270, 275, and 285 of this subchapter. Every such package shall bear a label or notice containing in legible letters the words "Tax-exempt. For Use of U. S. Not to be sold." Such label or notice shall be readily distinguishable from a tax stamp, or a stamp, label, or notice, required on packages of similar articles to evidence tax. The manufacturer may include any additional words, inscription, or legend on such label, or in such notice, when approved by the appropriate assistant regional commissioner.

§ 295.54 *Mark.* Every package of tobacco products and cigarette papers and tubes shall, before removal under this part, identify the manufacturer of such tobacco products and cigarette papers and tubes by having legibly imprinted thereon, or on the label or notice required by § 295.53, either the name and location of the manufacturer, or his permit number.

§ 295.55 *Class designation for large cigars.* Every package of large cigars removed under this part shall have legibly imprinted thereon, or on a label securely affixed thereto, the class designation of such cigars similar to that required by Part 270 of this subchapter with respect to such cigars.

§ 295.56 *Records and reports of removals.* Tobacco products and cigarette papers and tubes removed under this part shall be accounted for in the factory records and reports of the manufacturer thereof as prescribed in the regulations requiring such records and reports (Parts 270, 275, 285 of this subchapter).

§ 295.57 *Removal in bond.* Each removal of tobacco products or cigarette papers or tubes under this part shall be made under the bond filed by the manufacturer thereof to cover the operation of his factory from which the tobacco products or cigarette papers or tubes were removed.

§ 295.58 *Certificate of receipt.* The officer responsible for receiving a shipment of tobacco products or cigarette papers or tubes delivered to an agency or institution under this part shall, upon receipt of the shipment, inspect it in order that he may certify as to the quantity, kind, and class of articles actually received and date of receipt. Such certificate shall be executed on Form 7998. The receiving officer shall retain one completed copy of such certificate, which shall be made available for inspection by any revenue officer upon his request, and he shall transmit two such copies promptly to the manufacturer who shipped the tobacco products or cigarette papers or tubes. The manufacturer shall keep one copy of the certificate, Form 7998, at the factory from which the tobacco products or cigarette papers or tubes were removed, for his records and for inspection by any revenue officer upon his request. The manufacturer shall promptly forward the other completed copy of the Form 7998 to the assistant regional commissioner for the region in which such factory is located, in order that the manufacturer may be relieved of liability to tax on the tobacco products or cigarette papers or tubes actually received by the agency or institution.

§ 295.59 *Tax liability.* Responsibility for the tax on tobacco products or cigarette paper or tubes removed under this part shall rest upon the manufacturer making the removal until proper evidence to remove such liability is furnished by the manufacturer. Where there is a shortage between the quantity or number of tobacco products or cigarette papers or tubes removed, as described on the notice of removal, and that received by the Federal agency or institution to which such tobacco products or cigarette papers or tubes were consigned, as evidenced by the certificate of receipt, Form 7998, executed by the agency or institution, the manufacturer shall be responsible for payment of the tax on such shortage.

Effective date. These regulations shall be effective on the date of publication in the FEDERAL REGISTER.

Because the changes made by these regulations are either of a liberalizing nature or relate merely to form and not substance, it is found that it is unnecessary to issue these regulations with notice and public procedure thereon under section 4 (a) of the Administrative Procedure Act, approved June 11, 1946, or subject to the effective date limitation of section 4 (c) of said act.

[SEAL] T. COLEMAN ANDREWS,
Commissioner of Internal Revenue.

Approved: May 17, 1955.

M. B. FOLSOM,
Acting Secretary of the Treasury.

PROPOSED RULE MAKING

DEPARTMENT OF LABOR

Wage and Hour Division

[29 CFR Parts 701, 705, 713]

PLASTIC PRODUCTS INDUSTRY IN PUERTO RICO

MINIMUM WAGE RATES

On September 14, 1954, pursuant to section 5 of the Fair Labor Standards Act, as amended (hereinafter called the act), the Administrator of the Wage and Hour Division, United States Department of Labor, by Administrative Order No. 440, as amended by Administrative Order No. 442, dated November 1, 1954, appointed Special Industry Committee No. 16-C for Puerto Rico (hereinafter called the Committee) and directed the Committee to investigate conditions in the plastic products industry in Puerto Rico (hereinafter called the industry), and to recommend minimum wage rates for employees engaged in commerce or in the production of goods for commerce in such industry.

For purposes of investigating conditions in and recommending minimum wages for the plastic products industry in Puerto Rico, the Committee included three disinterested persons representing the public, a like number representing employers, and a like number representing employees in the industry, and was composed of residents of Puerto Rico and of the United States outside of Puerto Rico with due regard to the geographical regions in which the industry is carried on.

After investigating economic and competitive conditions in the Industry, as defined in Administrative Order No. 440, the Committee filed with the Administrator a report containing the following recommendations: (1) That the plastic products industry in Puerto Rico should be divided in separable divisions for the purpose of fixing minimum wage rates and that these separable divisions should be entitled and defined as (a) the sprayer and vaporizer division, (b) the wall tile, dinnerware, and phonograph records division, and (c) the general division; and (2) that a minimum wage of 75 cents an hour should be paid in the sprayer and vaporizer division, a minimum wage of 60 cents an hour should be paid in the wall tile, dinnerware, and phonograph records division, and a minimum wage of 53 cents an hour should be paid in the general division, to employees who are engaged in commerce or in the production of goods for commerce.

Pursuant to notice published in the FEDERAL REGISTER on January 8, 1955 (20 F. R. 229) and circulated to all known interested parties, a public hearing upon the Committee's recommendations was held before Hearing Examiner E. West Parkinson, as presiding officer, on February 14, 1955 in Washington, D. C., at which all interested parties were given an opportunity to be heard. After the hearing was closed the record of the hearing was certified to the Administrator by the presiding officer.

Upon reviewing all of the evidence adduced in this proceeding, and giving due consideration to the provisions of the act, particularly sections 5 and 8 thereof, I have concluded that the recommendation of the Committee for division of the plastic products industry in Puerto Rico into separate and distinct divisions to be known as the sprayer and vaporizer division, the wall tile, dinnerware and phonograph records division, and the general division, together with the recommendations of the Committee for a minimum wage rate of 75 cents an hour in the sprayer and vaporizer division, a minimum wage rate of 60 cents an hour in the wall tile, dinnerware and phonograph records division, and a minimum wage rate of 53 cents in the general division, as hereinafter defined, were made in accordance with law, are supported by the evidence adduced at the hearing, and, taking into consideration the same factors as are required to be considered by the Committee, will carry out the purposes of sections 5 and 8 of the act.

I have set forth my decision in a document entitled "Findings and Opinion of the Administrator in the matter of the Recommendations of Special Industry Committee No. 16-C for Puerto Rico for Minimum Wage Rates in the Plastic Products Industry in Puerto Rico", a copy of which may be had upon request addressed to the Wage and Hour Division, United States Department of Labor, Washington 25, D. C.

Accordingly, notice is hereby given pursuant to the Administrative Procedure Act (60 Stat. 237; 5 U. S. C. 1001) and the rules of practice governing this proceeding that (1) I propose to amend 29 CFR, Parts 701 and 705 to the extent that it applies to the Plastic Products Industry in Puerto Rico, as hereinafter defined, and (2) I propose to issue a wage order for the Plastic Products Industry in Puerto Rico to be contained in 29 CFR Part 713, as follows:

PART 713—PLASTIC PRODUCTS INDUSTRY IN PUERTO RICO

Sec.
713.1 Approval of recommendations of industry committee.
713.2 Wage rates.
713.3 Notice of order.
713.4 Definitions of the plastic products industry in Puerto Rico, and divisions thereof.

AUTHORITY: §§ 713.1 to 713.4 issued under sec. 8, 52 Stat. 1054, as amended; 29 U. S. C. 208.

§ 713.1 *Approval of recommendations of industry committee.* The Committee's recommendations are hereby approved.

§ 713.2 *Wage rates.* (a) Wages at a rate of not less than 75 cents an hour shall be paid under section 6 of the Fair Labor Standards Act of 1938, as amended, by every employer to each of his employees in the sprayer and vaporizer division of the plastic products industry in Puerto Rico who is engaged in commerce or in the production of goods for commerce.

(b) Wages at a rate of not less than 60 cents an hour shall be paid under section 6 of the Fair Labor Standards Act of 1938, as amended, by every employer to each of his employees in the wall tile, dinnerware, and phonograph records division of the plastic products industry in Puerto Rico who is engaged in commerce or in the production of goods for commerce.

(c) Wages at a rate of not less than 53 cents an hour shall be paid under section 6 of the Fair Labor Standards Act of 1938, as amended, by every employer to each of his employees in the general division of the plastic products industry in Puerto Rico who is engaged in commerce or in the production of goods for commerce.

§ 713.3 *Notice of order.* Every employer employing any employees so engaged in commerce or in the production of goods for commerce in the plastic products industry in Puerto Rico shall post in a conspicuous place in each department of his establishment where such employees are working such notices of this order as shall be prescribed, from time to time, by the Wage and Hour Division of the United States Department of Labor and shall give such other notices as the Division may prescribe.

§ 713.4 *Definition of the plastic products industry in Puerto Rico, and divisions thereof.* (a) (1) The plastic products industry in Puerto Rico to which this part shall apply is hereby defined as follows: The manufacture of molded or other fabricated plastic products: *Provided, however,* That the definition shall not include (i) the manufacture of primary materials such as sheets, rods, tubes, granules, powders, or liquids, (ii) the sawing, cutting, grinding, polishing, and other processing of synthetic jewels for industrial use, (iii) the manufacture of buttons, buckles, and jewelry (including rosaries), and jewelry findings (including beads), (iv) the manufacture from pliable plastics in sheet form of ornaments and decorations for Christ-

mas and other holidays, party favors and souvenirs, and similar items primarily ornamental or decorative in character; (v) or any activity included in the leather, leather goods, and related products industry; the paper, paper products, printing, publishing and related industries; the shoe manufacturing and allied industries; the textile and textile products industry; the needlework and fabricated textile products industry; the men's and boy's clothing and related products industry; or the corsets, brassieres, and allied garments industry, as defined in the wage orders for these industries in Puerto Rico. This definition supersedes the definition for the decorations and party favors industry with respect to the manufacture of plastic articles other than those made from pliable sheet or film.

(2) The definition contained in subparagraph (1) of this paragraph supersedes the definitions contained in any and all wage orders issued heretofore for other industries in Puerto Rico to the extent that such definitions include products or operations covered by the definition of this industry.

(b) The separable divisions of the industry defined in paragraph (a) (1) of the section, to which this part shall apply are hereby defined as follows:

(1) *Sprayer and vaporizer division.* This division consists of the manufacture of plastic sprayers, vaporizers, and atomizers.

(2) *Wall tile, dinnerware, and phonograph records division.* This division consists of the manufacture of plastic wall tiles, dinnerware, and phonograph records.

(3) *General division.* This division consists of all products and activities included in the plastic products industry as defined in Administrative Order No. 440, except products and activities included in the sprayer and vaporizer division, and the wall tile, dinnerware, and phonograph records division as defined herein.

Within fifteen days from the date of publication of this notice in the FEDERAL REGISTER interested persons may submit written exceptions to the proposed actions described. Exceptions should be submitted in quadruplicate to the Administrator of the Wage and Hour Division, United States Department of Labor, Washington 25, D. C., and should include supporting reasons therefor.

Signed at Washington, D. C., this 17th day of May 1955.

STUART ROTHMAN,
Solicitor of Labor.

NOTICES

DEPARTMENT OF THE INTERIOR

Bureau of Land Management

FLORIDA

NOTICE OF PROPOSED WITHDRAWAL AND RESERVATION OF LANDS

MAY 17, 1955.

The Fish and Wildlife Service, Department of the Interior, has filed an application, Misc. No. 1949862, for the withdrawal of the lands described below, from all forms of appropriation, subject to valid existing rights. The applicant desires the land for Sanibel National Wildlife Refuge.

For a period of 30 days from the date of publication of this notice, persons having cause may present their objections in writing to the undersigned officials of the Bureau of Land Management, Department of the Interior, Washington 25, D. C.

If circumstances warrant it, a public hearing will be held at a convenient time and place, which will be announced.

The determination of the Secretary on the application will be published in the FEDERAL REGISTER. A separate notice will be sent to each interested party of record.

The lands involved in the application are:

TALLAHASSEE MERIDIAN

Correction

In Federal Register Document 55-4043, published on page 3478 of the issue for Wednesday, May 18, 1955, the date "July 22, 1955," appearing in the last paragraph, should read "June 25, 1955."

FEDERAL POWER COMMISSION

[Docket No. G-2460]

NORTHERN NATURAL GAS CO.

NOTICE OF APPLICATION

MAY 17, 1955.

Take notice that on May 2, 1955, Northern Natural Gas Company (Applicant), a Delaware corporation with its principal place of business at Omaha, Nebraska, filed an application to amend the Commission's order of August 27, 1954, issuing a certificate of public convenience and necessity for the construction of certain temporary facilities pertaining to a proposed gas storage reservoir near Redfield, Iowa. Applicant now seeks authority to construct and operate additional facilities for the limited purpose of large-scale testing of the proposed reservoir. It is anticipated that the facilities proposed will inject gas at a rate of at least 200 million cubic feet per day.

The cost of the facilities is estimated to be $4,816,000.

Protests or petitions to intervene may be filed with the Federal Power Commission, Washington 25, D. C., in accordance with the Commission's rules of practice and procedure (18 CFR 1.8 and 1.10) on or before the 3d day of June 1955. The application is on file with the Commission and available for public inspection.

[SEAL] LEON M. FUQUAY,
Secretary.

[F. R. Doc. 55-4145; Filed, May 20, 1955; 8:45 a. m.]

[Docket No. G-4653]

B. J. CROWLEY

NOTICE OF APPLICATION AND DATE OF HEARING

MAY 17, 1955.

Take notice that B. J. Crowley (Applicant), an individual whose address is Box 581, Belpre, Ohio, filed an application on November 1, 1954, for a certificate of public convenience and necessity, pursuant to section 7 of the Natural Gas Act, authorizing Applicant to render service as hereinafter described, subject to the jurisdiction of the Commission, all as more fully represented in the application which is on file with the Commission and open for public inspection.

Applicant sells natural gas produced in Calhoun County, West Virginia, to Manufacturers Light and Heat Company and to Godfrey L. Cabot, Inc., at 20 cents and 12 cents per Mcf, respectively, for transportation in interstate commerce for resale.

Applicant, on March 8, 1955, requested permission to withdraw that portion of its application herein relating to its sale of natural gas to Ohio Fuel Gas Company, stating that such gas is sold and consumed within the State of Ohio and, therefore, is not subject to the jurisdiction of the Commission.

This matter is one that should be disposed of as promptly as possible under the applicable rules and regulations and to that end:

Take further notice that, pursuant to the authority contained in and subject to the jurisdiction conferred upon the Federal Power Commission by sections 7 and 15 of the Natural Gas Act, and the Commission's rules of practice and procedure, a hearing will be held on June 14, 1955, at 9:40 a. m., e. d. s. t., in a Hearing Room of the Federal Power Commission, 441 G Street NW., Washington, D. C., concerning the matters involved in and the issues presented by such application: *Provided, however,* That the Commission may, after a noncontested hearing, dispose of the proceedings pursuant to the provisions of § 1.30 (c) (1) or (2) of the Commission's rules of practice and procedure.

Protests or petitions to intervene may be filed with the Federal Power Commission, Washington 25, D. C., in accordance with the rules of practice and procedure (18 CFR 1.8 or 1.10) on or before June 6, 1955. Failure of any party to appear at and participate in the hearing shall be construed as waiver of and concurrence in omission herein of the intermediate decision procedure in cases where a request therefor is made.

[SEAL] LEON M. FUQUAY,
Secretary.

[F. R. Doc. 55-4146; Filed, May 20, 1955; 8:45 a. m.]

[Docket No. G-5144]

H. S. COLE, JR., ET AL.

NOTICE OF APPLICATION AND DATE OF HEARING

MAY 17, 1955.

Take notice that H. S. Cole, Jr., et al., (Applicant), an individual whose address is 1404 City National Bank Building, Houston 2, Texas, filed an application on November 19, 1954, for a certificate of public convenience and necessity, pursuant to section 7 of the Natural Gas Act, authorizing Applicant to render service as hereinafter described, subject to the jurisdiction of the Commission, all as more fully represented in the application which is on file with the Commission and open for public inspection.

Applicant sells natural gas produced from the South Lewisburg Field, Acadia Parish, Louisiana, to Texas Northern Gas Corporation at 8.9970 cents per Mcf, for transportation in interstate commerce for resale.

This matter is one that should be disposed of as promptly as possible under the applicable rules and regulations and to that end:

Take further notice that, pursuant to the authority contained in and subject to the jurisdiction conferred upon the Federal Power Commission by sections 7 and 15 of the Natural Gas Act, and the Commission's rules of practice and procedure, a hearing will be held on June 14, 1955, at 9:35 a. m., e. d. s. t., in a Hearing Room of the Federal Power Commission, 441 G Street NW., Washington, D. C., concerning the matters involved in and the issues presented by such application: *Provided, however,* That the Commission may, after a noncontested hearing, dispose of the proceedings pursuant to the provisions of § 1.30 (c) (1) or (2) of the Commission's rules of practice and procedure.

Protests or petitions to intervene may be filed with the Federal Power Commission, Washington 25, D. C., in accordance with the rules of practice and procedure (18 CFR 1.8 or 1.10) on or before June 6, 1955. Failure of any party to appear at and participate in the hearing shall be construed as waiver of and concurrence in omission herein of the intermediate decision procedure in cases where a request therefor is made.

[SEAL] LEON M. FUQUAY,
Secretary.

[F. R. Doc. 55-4147; Filed, May 20, 1955; 8:46 a. m.]

[Docket Nos. G-7586, G-8433]

CLINCHFIELD COAL CORP. AND KENTUCKY WEST VIRGINIA GAS CO.

NOTICE OF APPLICATION AND DATE OF HEARING

MAY 17, 1955.

In the matter of Clinchfield Coal Corporation, Docket No. G-7586; Kentucky West Virginia Gas Company, Docket No. G-8433.

Take notice that there have been filed with the Federal Power Commission applications as indicated below:

Applicant	Address	Date filed	Docket No.
Clinchfield Coal Corp.	Dante, Va.	Jan. 18, 1955, and supplemented Mar. 23, 1955.	G-7586
Kentucky West Virginia Gas Co.	Ashland, Ky.	Feb. 2, 1955	G-8433

each for a certificate of public convenience and necessity pursuant to section 7 of the Natural Gas Act, authorizing the respective applicants to construct and operate facilities and render service as hereinafter described, subject to the jurisdiction of the Commission, all as more fully represented in the respective applications which are on file with the Commission and open to public inspection.

Clinchfield Coal Corporation (Clinchfield) proposes to sell up to 12,750 Mcf per day of natural gas produced from acreage it controls in Dickenson, Buchanan and Wise Counties, Virginia, to Kentucky West Virginia Gas Company (Kentucky West Virginia) at $2.50 demand charge and an 18 cent commodity charge. Any surplus gas over and above the 12,750 Mcf per day will be sold to Kentucky West Virginia at a price of 26.22 cents per Mcf.

Clinchfield proposes to build a gathering system and a 16.2 mile 12-inch transmission line from its producing area to a connection with a proposed line of Kentucky West Virginia at the Virginia-Kentucky state line. It estimates the total cost of its facilities at $785,000.

Kentucky West Virginia requests authority to construct and operate 32 miles of 12-inch transmission line extending from the proposed Clinchfield 12-inch line at the Virginia-Kentucky state line to a connection with its existing system near Maytown, Kentucky. In addition, Kentucky West Virginia proposes to build 4 miles of 12-inch line connecting its existing Shelby Creek producing properties in Kentucky to the proposed new 12-inch line in order to provide a new outlet for its Shelby Creek gas and increase the deliverability therefrom.

Kentucky West Virginia will use the gas purchased from Clinchfield and the facilities herein proposed, principally for replacing the shrinkage in volume of gas resulting from the operation of a proposed new hydrocarbon extraction plant to be built and operated by a new subsidiary of Kentucky West Virginia, called the Kentucky Hydrocarbon Company (Hydrocarbon). The extracted liquid hydrocarbons will be sold by Hydrocarbon to Union Carbide and Carbon Company at Institute, West Virginia for use in the manufacture of chemical products useful to the national defense.

The estimated capital cost of the facilities proposed by Kentucky West Virginia is $1,455,000 to be financed by its issuance of not in excess of $1,500,000 of promissory notes to the Mellon National Bank and Trust Company at 3⅜ percent.

Applicants have requested that their respective applications be heard under the shortened procedure provided by § 1.32 (b) (18 CFR 1.32) of the Commission's rules of practice and procedure.

These related matters should be heard on a consolidated record and disposed of as promptly as possible under the applicable rules and regulations and to that end:

Take further notice that, pursuant to the authority contained in and subject to the jurisdiction conferred upon the Federal Power Commission by sections 7 and 15 of the Natural Gas Act, and the Commission's rules of practice and procedure, a hearing will be held on June 9, 1955, at 9:30 a. m., e. d. s. t., in a Hearing Room of the Federal Power Commission, 441 G Street NW., Washington, D. C., concerning the matters involved in and the issues presented by such applications: *Provided, however,* That the Commission may, after a non-contested hearing, dispose of the proceedings pursuant to the provisions of § 1.32 (b) (18 CFR 1.32 (b)) of the Commission's rules of practice and procedure.

Protests or petitions to intervene may be filed with the Federal Power Commission, Washington 25, D. C., in accordance with the rules of practice and procedure (18 CFR 1.7 or 1.10) on or before June 3, 1955. Failure of any party to appear at and participate in the hearing shall be construed as waiver of and concurrence in omission herein of the intermediate decision procedure in cases where a request therefor is made.

[SEAL] LEON M. FUQUAY,
Secretary.

[F. R. Doc. 55-4148; Filed, May 20, 1955; 8:46 a. m.]

[Docket No. G–8789]

COLORADO OIL AND GAS CORP.

NOTICE OF APPLICATION AND DATE OF HEARING

MAY 17, 1955.

Take notice that Colorado Oil and Gas Corporation (Applicant), a Delaware corporation whose address is 10th Floor, Denver Club Building, Denver 2, Colorado, filed an application on April 25, 1955, for a certificate of public convenience and necessity, pursuant to section 7 of the Natural Gas Act, authorizing Applicant to render service as hereinafter described, subject to the jurisdiction of the Commission, all as more fully represented in the application which is on file with the Commission and open for public inspection.

Applicant proposes to sell natural gas produced from the Greenwood Field, Morton and Stanton Counties, Kansas, and in Baca County, Colorado, to Colorado Interstate Gas Company at 15 cents per Mcf, for transportation in interstate commerce for resale.

This matter is one that should be disposed of as promptly as possible under the applicable rules and regulations and to that end:

Take further notice that, pursuant to the authority contained in and subject to the jurisdiction conferred upon the Federal Power Commission by sections 7 and 15 of the Natural Gas Act, and the Commission's rules of practice and procedure, a hearing will be held on June 14, 1955, at 9:30 a. m., e. d. s. t., in a Hearing Room of the Federal Power Commission, 441 G Street NW., Washington, D. C., concerning the matters involved in and the issues presented by such application: *Provided, however,* That the Commission may, after a non-contested hearing, dispose of the proceedings pursuant to the provisions of § 1.30 (c) (1) or (2) of the Commission's rules of practice and procedure.

Protests or petitions to intervene may be filed with the Federal Power Commission, Washington 25, D. C., in accordance with the rules of practice and procedure (18 CFR 1.8 or 1.10) on or before June 6, 1955. Failure of any party to appear at and participate in the hearing shall be construed as waiver of and concurrence in omission herein of the intermediate decision procedure in cases where a request therefor is made.

[F. R. Doc. 55–4149; Filed, May 20, 1955; 8:46 a. m.]

[Docket No. G–8902]

G. H. VAUGHN

ORDER SUSPENDING PROPOSED CHANGES IN RATES

G. H. Vaughn (Applicant), on April 18, 1955, tendered for filing proposed changes in presently effective rate schedules for sales subject to the jurisdiction of the Commission. The proposed changes, which constitute increased rates and charges, are contained in the following designated filing which is proposed to become effective on the date shown:

Description	Purchaser	Rate schedule designation	Effective date [1]
Notice of change, undated...	Louisiana-Nevada Transit Co.	Supplement No. 3 to applicant's FPC gas rate schedule No. 3.	May 19, 1955

[1] The stated effective date is the first day after expiration of the required 30 days' notice, or the effective date proposed by applicant if later.

This proposed increased is but one of a number of other rate increases which have been suspended and which relate to sales of natural gas from the Cotton Valley Field, Webster Parish, Louisiana, to Louisiana-Nevada Transit Company.

The increased rates and charges proposed in the aforesaid filing have not been shown to be justified, and may be unjust, unreasonable, unduly discriminatory, or preferential, or otherwise unlawful.

The Commission finds: It is necessary and proper in the public interest and to aid in the enforcement of the provisions of the Natural Gas Act that the Commission enter upon a hearing concerning the lawfulness of the said proposed changes, and that the above-designated supplement be suspended and the use thereof deferred as hereinafter ordered.

The Commission orders:

(A) Pursuant to the authority contained in sections 4 and 15 of the Natural Gas Act and the Commission's general rules and regulations (18 CFR, Chapter I), a public hearing be held upon a date to be fixed by notice from the Secretary concerning the lawfulness of said proposed changes in rates and charges; and, pending such hearing and decision thereon, the above-designated supplement be and the same hereby is suspended and the use thereof deferred until October 19, 1955, and until such further time as it is made effective in the manner prescribed by the Natural Gas Act.

(B) Interested State commissions may participate as provided by § 1.8 and 1.37 (f) (18 CFR 1.8 and 1.37 (f)) of the Commission's rules of practice and procedure.

Adopted: May 11, 1955.

Issued: May 17, 1955.

By the Commission.

FSA No. 30636: Citrus pomace—Florida to Southwest. Filed by F. C. Kratzmeir, Agent, for interested rail carriers. Rates on citrus pomace, pelletized or compressed, carloads, from specified points in Florida to specified points in Kansas, Louisiana, Missouri, and Oklahoma.

Grounds for relief: Analogous commodity and circuitous routes.

Tariff: Supplement 99 to Agent Kratzmeir's I. C. C. No. 4090 and four other tariffs.

FSA No. 30637: Petroleum and products between points in Texas. Filed by J. F. Brown, Agent, for interested rail carriers. Rates on petroleum and petroleum products, carloads between points in Texas included in schedule named below.

Grounds for relief: Short-line distance formula and circuity.

Tariff: Supplement 42 to Agent Brown's I. C. C. 845.

FSA No. 30638: Commodity rates from and to Ladson, Ga. Filed by J. G. Kerr, Agent, for interested rail carriers. Rates on various commodities, other than coal and coke, carloads, between Ladson, Ga., on the one hand, and points in the United States and Canada, on the other.

Grounds for relief: Additional station.

FSA No. 30639: Commodities—Official territory to the South. Filed jointly by C. W. Boin and O. E. Swenson, Agents, for interested rail carriers. Rates on commodities, various, in carloads, from specified points in official territory to specified points in southern territory.

Grounds for relief: Circuitous routes.

FSA No. 30640: Fertilizer compounds between points in southern territory. Filed by J. G. Kerr, Agent, for interested rail carriers. Rates on fertilizer compounds (manufactured fertilizers) noibn, dry, less-than-carloads, between points in southern territory.

Grounds for relief: Short-line distance formula, truck competition and circuity.

Tariff: Supplement 84 to Agent Spaninger's I. C. C. 1221.

By the Commission.

SECURITIES AND EXCHANGE COMMISSION

[File No. 22–227]

PUBLIC FINANCE SERVICE, INC.

NOTICE OF APPLICATION

MAY 16, 1955.

Notice is hereby given that Public Finance Service, Inc. (applicant) has filed an application under clause (ii) of section 310 (b) (1) of the Trust Indenture Act of 1939 for a finding by the Commission that trusteeship by Girard Trust Corn Exchange Bank, Philadelphia (Girard) successor trustee to National Bank of Germantown and Trust Company, Philadelphia (National) under an indenture dated December 1, 1942 (which indenture was heretofore qualified under the Trust Indenture Act of 1939) and trusteeship by said company under a proposed indenture to be dated as of June 1, 1955 (not to be qualified under the act) is not so likely to involve a material conflict of interest as to make it necessary in the public interest or for the protection of investors to disqualify said trustee from acting as such under the qualified indenture.

The application states:

(1) That applicant now proposes to authorize the issuance of debentures in the aggregate principal amount of not more than $1,000,000 (maturing December 1, 1972), to be known as its 6 percent Cumulative Debentures, 1955 Series, subject to a certain Debenture Agreement to be dated as of June 1, 1955, between the applicant and Girard, limiting the entire principal amount of securities at any time outstanding thereunder to $1,000,000 issuable thereunder and that the new indenture is exempted from qualification under the act by section 304 (a) (9) thereof;

(2) That applicant has outstanding $2,000,000 principal amount of unsecured 20 year 6 percent Cumulative Debentures due December 1, 1962, issued under the indenture dated December 1, 1942, which indenture was qualified under the act;

(3) That the applicant has outstanding an additional issue of $1,000,000 principal amount of unsecured 6 Percent Cumulative Debentures due December 1, 1962 issued under the indenture dated June 1, 1950 as to which the Commission issued an order pursuant to section 310 (b) (1) (ii) of the Trust Indenture Act finding that trusteeship by National under the 1942 indenture and under the 1950 indenture was not so likely to involve a material conflict of interest as to make it necessary in the public interest or for the protection of investors to disqualify National from acting as such under the 1942 indenture and National continued to act as trustee under such indentures until its merger into Girard;

(4) That on September 11, 1953, National, by merger, was acquired by, and became a branch of Girard, a banking corporation organized under the laws of the Commonwealth of Pennsylvania, with its principal place of business in Philadelphia, Pennsylvania, and Girard became successor trustee under both indentures referred to above and has continued to act, and is currently acting, as such successor trustee;

(5) That the 1942 and 1950 indentures are, and the new indenture will be, wholly unsecured and that the provisions of the new indenture will be identical with the provisions of the 1942 indenture except that the new indenture will make appropriate changes in respect to dates and the aggregate principal amount of securities to be outstanding thereunder at any one time, that provisions of the act will be incorporated in the new indenture to the extent that they are considered by applicant to be reasonably applicable to an indenture exempted from the act's provisions and except for other inconsequential and largely formal differences as specified in the application; and

(6) That differences existing between the 1942 and the new indenture are not likely to involve a material conflict of interest in the trusteeship.

For a more detailed statement of the matters of fact and law asserted all persons are referred to said application which is on file in the offices of the Commission at 425 Second Street NW., Washington 25, D. C.

Notice is further given that an order granting the application may be issued by the Commission at any time after May 26, 1955, unless prior thereto a hearing upon the application is ordered by the Commission, as provided in clause (ii) of section 310 (b) (1) of the Trust Indenture Act of 1939. Any interested person may, not later than May 24, 1955 at 5:30 p. m., e. d. s. t., in writing submit to the Commission his views or any additional facts bearing upon this application or the desirability of a hearing thereon. Any such communication or request should be addressed: Secretary, Securities and Exchange Commission, 425 Second Street NW., Washington 25, D. C., and should state briefly the nature of the interest of the person submitting such information or requesting a hearing, the reasons for such request, and the issues of fact or law raised by the application which he desires to controvert.

By the Commission.

[SEAL] ORVAL L. DUBOIS, *Secretary.*

[File No. 54–156]

CENTRAL PUBLIC UTILITY CORP.

MEMORANDUM OPINION AND ORDER APPROVING PAYMENT OF A FEE AND EXPENSES

MAY 17, 1955.

This matter involves a fee claim. On September 5, 1947, we approved an amended plan filed pursuant to section 11 (e) of the Public Utility Holding Company Act of 1935 by Central Public Utility Corporation ("Central Public"), a registered holding company (Holding Company Act Release No. 7691). This plan was concerned primarily with a reorganization of Consolidated Electric and Gas Company ("Consolidated"), then a registered holding company and a direct subsidiary of Central Public, and, among other things, provided for the distribution by Consolidated of the common stock of Atlanta Gas Light Company ("Atlanta") to the public holders of Consolidated's $6 Cumulative Preferred Stock. In our order approving the plan, we reserved jurisdiction with respect to the reasonableness and allocation of fees, expenses and other remuneration in connection with the plan.

On August 25, 1948, we issued our memorandum findings, opinion and order releasing jurisdiction over certain fees and expenses in this matter except for the fees and expenses of the Protective Committee for Consolidated's $6 Cumulative Preferred Stock ("Committee") and its counsel, Central Public Utility Corporation, __ S. E. C. __ (1948), Holding Company Act Release No. 8468. The fees and expenses requested by this

Committee, its counsel and experts aggregate $38,140 and $2,573.91, respectively. At that time we said:

> • • • These fees are very large in relation to the fees sought by the others in the proceeding except for counsel to Central Public whose role was of course of a very different and more comprehensive nature. We have been unable to discern in the record, to date, what, if any, benefits have resulted from the participation of the Committee and its counsel and are not in a position to approve the requested amount or, indeed, any amount, without a further showing. We shall accordingly retain our jurisdiction with respect to their fees and disbursements while releasing it as to the others.

Subsequent to this decision, we had occasion to consider in broad outline our policy with respect to allowances to committees participating in Section 11 (e) reorganization. In New England Power Association, __ S. E. C. __ (1948), Holding Company Act Release No. 8751, we stated:

> If such committees are duly organized and function diligently and in good faith, and not merely for the purposes of obstruction or to obtain compensation, we think they are entitled to compensation out of the estate for their reasonable fees and expenses. It may be that, however faithful and capable their representation, the plan will have been approved without substantial alteration. In such case, if the service rendered was only exploratory or "watchdog" service and did not effect any substantial change in the plan, the fee allowance would of course be quite modest, and the time and effort expended efficiently and in good faith would be the principal criteria. • • • As to protective committees duly organized and efficiently and properly functioning, reasonable fees and expenses will be allowed out of the estate whether or not we can point to any particular provision of the approved plan as directly due to their participation.

The Committee and its counsel thereafter reduced their original request and have agreed to accept the sum of $7,500 as a fee for their services plus expenses. On April 14, 1955, Central Public advised us that it consents to the issuance of an order approving the payment of not more than $7,500 as a fee and $2,573.91 for expenses in full satisfaction of the claim of the Committee, its counsel and experts for services rendered in this proceeding.

We have reconsidered the applicants' claim in the light of the full record and our announced policy in this regard. We believe that applicants' services and the compensation presently requested fall within the intendment of our decision in the New England Power Association case referred to above.

Accordingly, it is ordered, That the payment by Central Public to the Committee and its counsel and experts of $7,500 and $2,573.91 as a fee and expenses, respectively, be, and the same hereby is, approved and the jurisdiction heretofore reserved herein with respect thereto be, and the same hereby is, released.

By the Commission.

[SEAL] ORVAL L. DUBOIS, *Secretary.*

[File No. 54-209]

STANDARD POWER AND LIGHT CORP.

SUPPLEMENTAL ORDER WITH RESPECT TO FEES

MAY 17, 1955.

Wellerstein & Rosier, and Seibert & Riggs, counsel for Standard Power and Light Corporation ("Power"), a registered holding company, having on April 14, 1955 filed applications for approval of fees of $20,000 and $10,500, respectively, for legal services rendered by said firms in the above-entitled proceeding relating to Power's plan, dated January 22, 1953, filed under section 11 (e) of the Public Utility Holding Company Act of 1935 and involving the retirement of Power's then outstanding $7 Preferred stock; and

The Commission having heretofore approved said plan by orders dated May 18, June 3 and June 26, 1953 (Holding Company Act Release Nos. 11921, 11967 and 12024) subject to the condition that only such fees and expenses in connection with said plan and the transactions incident thereto shall be paid by Power as the Commission may approve on appropriate application made to it; and

The Commission having reviewed the record with respect to said applications and being of the opinion that the amounts requested are reasonable and are for necessary services and that an order should be entered approving the payment thereof:

It is ordered, That said applications hereby are approved and the jurisdiction heretofore reserved herein with respect thereto be, and the same hereby is, released.

By the Commission.

[File No. 70-3371]

BROCKTON EDISON CO.

ORDER AUTHORIZING ISSUANCE AND SALE OF BONDS AT COMPETITIVE BIDDING

MAY 17, 1955.

Brockton Edison Company ("Brockton"), a public-utility subsidiary of Eastern Utilities Associates, a registered holding company, has filed an application and amendments thereto with this Commission pursuant to sections 6 (b) and 12 of the Public Utility Holding Company Act of 1935 ("act") and Rules U-42 (b) (2) and U-50 thereunder with respect to the following proposed transactions:

Brockton proposes to issue and sell, pursuant to the competitive bidding requirements of Rule U-50, $6,000,000 principal amount of First Mortgage and Collateral Trust Bonds, __ percent Series, due 1985. The bonds will be issued under an Indenture of First Mortgage and Deed of Trust, dated September 1, 1948, as last supplemented by a Second Supplemental Indenture, dated as of May 1, 1954, and to be further supplemented by a Supplemental Indenture to be dated June 1, 1955.

The interest rate on the bonds (which shall be a multiple of ⅛ of 1 percent) and the price to be paid the company (which shall be not less than the principal amount thereof and not more than 102¾ percent of such principal amount plus accrued interest) will be determined by competitive bidding. The proceeds from the sale of the bonds will be used to retire $4,100,000 principal amount of outstanding First Mortgage and Collateral Trust Bonds, 3⅝ percent Series, due 1983, to prepay without premium short-term promissory notes outstanding in the aggregate principal amount of $1,400,000, and to provide funds for the construction, completion and extension or improvement of Brockton's facilities.

The fees and expenses paid or to be paid by Brockton in connection with the issuance and sale of its mortgage bonds have been estimated by it to be as follows:

Filing fee, SEC	$630.00
Federal issue tax	6,600.00
Printing and engraving	17,700.00
Legal fees and expenses:	
Gaston, Snow, Rice & Boyd:	
Fee	4,500.00
Expenses	100.00
Keith, Reed & Wheatley:	
Fee	900.00
Expenses	
Fee for accounting services, Patterson, Teele & Dennis	1,200.00
Trustee's fee, including counsel fee of $1,750	4,600.00
Qualification of new bonds under Blue Sky Laws	1,500.00
Miscellaneous	1,770.00
Total	39,500.00

Ropes, Gray, Best, Coolidge & Rugg, independent counsel for the underwriters, have requested a fee of $4,000 for their services and have estimated their expenses at $100, such fees and expenses to be paid by the successful bidder.

The Department of Public Utilities of Massachusetts, the State commission of the State in which Brockton is organized and doing business, has authorized the issuance and sale of the bonds.

Brockton has requested that this Commission's order herein become effective forthwith upon issuance.

Due notice having been given of the filing of said application and a hearing not having been requested of or ordered by the Commission; the Commission finding that the applicable provisions of the act and rules promulgated thereunder are satisfied, and deeming it appropriate in the public interest and in the interest of investors and consumers that said application, as amended, be granted effective forthwith:

It is hereby ordered, Pursuant to Rule U-23 and the applicable provisions of the act, that said application, as amended, be, and hereby is, granted effective forthwith, subject to the terms and conditions prescribed in Rules U-24 and U-50.

By the Commission.

[SEAL] ORVAL L. DUBOIS, *Secretary.*

[File No. 812-931]

ADAMS EXPRESS CO. AND AMERICAN INTERNATIONAL CORP.

NOTICE OF FILING OF APPLICATION FOR EXEMPTION OF PURCHASE OF SECURITIES DURING EXISTENCE OF UNDERWRITING SYNDICATE

MAY 17, 1955.

Notice is hereby given that The Adams Express Company ("Adams") and its majority owned subsidiary, American International Corporation ("American"), both registered, closed-end diversified companies, have filed a joint application pursuant to section 10 (f) and 17 (b) of the Investment Company Act of 1940 ("act") for an order of the Commission exempting from the provisions of sections 10 (f) and 17 (a) the proposed purchase by Adams or American or both from certain underwriters, as described below, of 3½ Percent Convertible Subordinate Debentures due May 15, 1975 of W. R. Grace & Co. ("Grace") which is to be publicly offered in the near future.

The application states that Grace proposes to issue and sell $30,000,000 of said debentures and that Adamex Securities Corporation ("Adamex") and Hallgarten & Co. will be among the principal underwriters of the debentures. Adamex, a wholly owned subsidiary of Adams, is primarily engaged in the business of underwriting and distributing securities issued by other persons. It is represented that Maurice Newton, a partner in Hallgarten & Co., is a member of the board of managers (similar to board of directors) of Adams and a member of the board of directors of American.

The application recites that Adams or American or both may determine to purchase some of the debentures to be offered, not to exceed in the case of Adams $300,000 principal amount and in the case of American, not to exceed $200,000 principal amount. It is further represented that such purchase may be made from Adamex or from Hallgarten & Co. or from any other underwriter of the debentures and will be at the public offering price of the debentures. The underwriter or underwriters selling the debentures to Adams or American will receive the same discounts or commissions in connection therewith as in the case of debentures sold to the general public.

It is further represented in the application that the decision by either applicant to purchase any of the debentures will be based upon the opinion of its management that such purchase at the public offering price will constitute a good investment for such applicant.

Section 10 (f) of the act provides, among other things, that no registered investment company shall knowingly purchase or otherwise acquire, during the existence of an underwriting or selling syndicate any securities (except a security of which such company is the issuer) a principal underwriter of which is a person of which a director or member of an advisory board of such registered investment company is an affiliate, unless the Commission by order upon application grants an exemption therefrom.

Section 17 (a) (1) of the act prohibits, among other things, an affiliated person of a registered investment company or an affiliated person of such a person, from selling any securities to such registered investment company, subject to certain exceptions not applicable here, unless the Commission upon application pursuant to section 17 (b) grants an exemption from the provisions of section 17 (a).

Since Adams and American are affiliates of Adamex as defined in the act, and since Newton is an affiliated person as defined in the act, of Hallgarten & Co., the proposed transactions are subject to the provisions of sections 10 (f) and 17 (a).

Notice is further given that any interested person may, not later than May 31, 1955, at 5:30 p. m., submit to the Commission in writing any facts bearing upon the desirability of a hearing on the matter and may request that a hearing be held, such request stating the nature of his interest, the reasons for such request and the issues, if any, of fact or law proposed to be controverted, or he may request that he be notified if the Commission should order a hearing thereon. Any such communication or request should be addressed: Secretary, Securities and Exchange Commission, Washington 25, D. C. At any time after said date, the application may be granted as provided in Rule N-5 of the rules and regulations promulgated under the act.

By the Commission.

[SEAL] ORVAL DUBOIS, *Secretary.*

[F. R. Doc. 55-4152; Filed, May 20, 1955; 8:47 a. m.]

[File No. 70-3382]

MICHIGAN WISCONSIN PIPE LINE CO.

NOTICE OF FILING REGARDING ISSUANCE AND SALE OF BANK LOAN NOTES

MAY 17, 1955.

Notice is hereby given that Michigan Wisconsin Pipe Line Company ("Michigan Wisconsin"), a non-utility subsidiary of American Natural Gas Company ("American Natural"), a registered holding company, has made a filing with this Commission pursuant to the provisions of the Public Utility Holding Company Act of 1935 ("act"). Michigan Wisconsin has designated the third sentence of section 6 (b) of the act as applicable to said filing.

All interested persons are referred to said application which is on file in the offices of the Commission for a statement of the transaction proposed therein, which is summarized as follows:

Michigan Wisconsin proposes to enter into a credit agreement with four banks pursuant to which it would borrow, from time to time on and after July 1, 1955, sums aggregating up to $20,000,000 and to issue its notes maturing July 1, 1956 as evidence of such borrowings. The banks which are to be parties to the credit agreement and their respective commitments thereunder are as follows:

The First National City Bank of New York	$6,000,000
The Hanover Bank, New York	6,000,000
Mellon National Bank & Trust Co., Pittsburgh, Pa	6,000,000
National Bank of Detroit	2,000,000
Total	20,000,000

Said notes will bear interest at the prime interest rate prevailing at The First National City Bank of New York for commercial loans on the date of each borrowing. It is represented that the initial borrowing will be made on July 1, 1955, and that further borrowings may be made from time to time as required.

The proposed credit agreement will provide that the company shall pay as a commitment fee an amount equivalent to one-fourth of one percent per annum on the average daily unused balance of any amount not borrowed under the credit agreement from July 1, 1955, until the entire $20,000,000 shall have been taken down, except that the company may reduce the amount to be borrowed under the credit agreement at any time without penalty.

The proposed credit agreement will provide that the company shall have the right to prepay at any time without penalty, in amounts of $300,000 or multiples thereof, notes issued pursuant to the credit agreement, except that a prepayment premium of one-fourth of one percent will apply in case of prepayment from the proceeds of borrowings from banks other than those participating in the credit agreement.

The proceeds from the proposed note will be applied, to the extent necessary, to the retirement of $12,500,000 of presently outstanding notes due July 1, 1955, and the balance to interim financing of necessary construction pending the development of a permanent financing program for the American Natural system and integration of Michigan Wisconsin's financing proposals with those of said system.

Said application states that no State commission and no Federal regulatory agency, other than this Commission, has jurisdiction over the proposed transactions.

Notice is further given that any interested person may, not later than June 2, 1955, at 5:30 p. m., e. d. s. t., request the Commission in writing that a hearing be held on this matter, stating the nature of his interest, the reason for such request, and the issues of fact or law, if any, raised by the application which he proposes to controvert, or he may request to be advised if a hearing should be held thereon. Any such request should be addressed: Secretary,

Securities and Exchange Commission, Washington 25, D. C. At any time after said date, said application, as filed or as it may hereafter be amended, may be granted pursuant to Rule U-23 of the rules and regulations promulgated under the act, or the transaction may be exempted as provided in Rules U-20 (a) and U-100 thereof.

By the Commission.

[SEAL] ORVAL L. DUBOIS, *Secretary.*

TITLE 7—AGRICULTURE

Chapter VII—Commodity Stabilization Service (Farm Marketing Quotas and Acreage Allotments), Department of Agriculture

PART 728—WHEAT

SUBPART—1955-56 MARKETING YEAR

ADDITIONAL COUNTIES FOR INCREASED DURUM WHEAT (CLASS II) ALLOTMENTS

The amendment herein is issued pursuant to and in accordance with Public Law 8, 84th Congress, for the purpose of adding to the list of counties previously designated for increased farm wheat acreage allotments for the production of Durum Wheat (Class II) the counties of Lewis and Clark, and Golden Valley in the State of Montana. Since Durum Wheat (Class II) producers in these two counties are currently preparing land and making plans for seeding wheat, it is imperative that they be notified of this amendment as soon as possible. Therefore, it is hereby found and determined that compliance with the notice, procedure, and 30-day effective date provisions of section 4 of the Administrative Procedure Act is impracticable and contrary to the public interest, and this amendment shall become effective upon filing of this document with the Director, Division of the Federal Register.

Section 728.529 is amended by adding in paragraph (b) in the list of counties in Montana the language "Lewis and Clark," following the language "Judith Basin," and adding the language "Golden Valley," following the language "Big Stone,".

(Sec. 375, 52 Stat. 66, as amended; 7 U. S. C. 1375. Interprets or applies sec. 334, 52 Stat. 53, as amended, Pub. Law 8, 84th Cong., 7 U. S. C. 1334)

Done at Washington, D. C., this 18th day of May 1955.

Witness my hand and the seal of the Department of Agriculture.

[SEAL] TRUE D. MORSE, *Acting Secretary.*

[Amdt. 3]

PART 728—WHEAT

SUBPART—WHEAT MARKETING QUOTAS FOR THE 1955 CROP

DELIVERY OF THE FARM MARKETING EXCESS TO THE SECRETARY

The purpose of this amendment is to correctly state the name of the advisory committee on foreign relief with which any relief organization must be registered in order to be eligible to receive excess wheat for shipment for relief overseas delivered by producers in satisfaction of penalties.

Since the only purpose of this amendment is to correctly state the name of the advisory committee on foreign relief, it is hereby found and determined that compliance with the provisions of the Administrative Procedure Act with respect to notice, public procedure thereon, and effective date is unnecessary, and the amendment herein shall become effective upon the date of its publication in the FEDERAL REGISTER.

Section 728.583 (b) is amended by striking out in the last sentence thereof "Advisory Committee for Foreign Relief of the State Department" and substituting in lieu thereof "Advisory Committee on Voluntary Foreign Aid of the Foreign Operations Administration."

(Sec. 375, 52 Stat. 66, as amended; 7 U. S. C. 1375. Interprets or applies 55 Stat. 203; 7 U. S. C. 1340)

Done at Washington, D. C., this 18th day of May 1955.

goods. Subpart—*Cutting off competitors' or others' access to customers or market:* § 13.585 *Removing or substituting products;* § 13.587 *Selling competitive product at reduced or below cost price.* Subpart—*Discriminating in price under section 2, Clayton Act, as amended*—Payment for Services or Facilities for Processing or Sale Under 2 (d): § 13.825 *Allowances for services or facilities;* [Discriminating in price, etc.] Furnishing Services or Facilities for Processing, Handling, Etc., Under 2 (e): § 13.830 *Furnishing services or facilities;* § 13.835 *"Demonstrators";* § 13.843 *Promotional enterprises.*[1] I. In or in connection with the sale of shoe polishes and related products or of any other related products, in commerce, as defined in the Clayton Act as amended: (A) Making or contracting to make any payment to or for the benefit of any customer unless a payment is offered to be made or otherwise made available to each of all other competing customers; (B) making or contracting to make, to or for the benefit of competing customers, any payments in amounts which are not determined by a percentage of dollar volume of purchases or by some other measurable basis; (C) making, or contracting to make, to or for the benefit of any customer, any payments in an amount equal to and determined by any percentage of dollar volume of purchases or of any other measurable base unless such a payment, in an amount equal to and determined by the same percentage of dollar volume, or of such other measurable base, as the case may be, is offered to be made or otherwise made available to each of all other competing customers; and (D) making, or contracting to make, to or for the benefit of any customer, any payment, unless such a payment is made available on proportionally equal terms to each of all other competing customers; and II, in or in said connection: (A) Discriminating between or among competing purchasers by furnishing any service or facility to any of them unless a service or facility is offered to be furnished or otherwise accorded to each of all of the others; (B) discriminating between or among competing purchasers by furnishing any service or facility without charge to any of them unless a service or facility is offered to be furnished or otherwise accorded without charge to each of all of the others; (C) discriminating between or among competing purchasers by furnishing them any service or facility in amounts which are not determined by a percentage or dollar volume of purchases or of some other measurable base; (D) discriminating between or among competing purchasers by furnishing any service or facility to any of them in amounts equal to and determined by any percentage of dollar volume of purchases or of any other measurable base unless such service or facility in an amount equal to and determined by the same percentage of dollar volume of purchases or of other measureable base, as the case may be, is offered to be furnished or otherwise made available to each of all of the others; and (E) discriminating between or among competing purchasers by furnishing any service or facility to them upon terms not accorded to all of them on proportionally equal terms; and III, in or in connection with the sale of shoe polishes and related products or of any other related products in commerce, as defined in the Federal Trade Commission Act, as amended: (A) Offering to buy or buying and taking over stocks of shoe polishes and related products sold and distributed by competitors to retail sellers; (B) offering to sell or selling shoe polishes and related products mentioned immediately in "(A)" above to jobbers at prices lower than the prices at which competitors ordinarily offer for sale and sell such products to jobbers; and (C) offering to give and making gifts of cash payments to buyers of its customers without the knowledge of such customers or employers of said buyers; prohibited, it being further provided, that "payment", as used in Part "I" of the order means the payment of anything of value as compensation, or in consideration for any services or facilities furnished by or through any customer of respondent in connection with his handling, offering for sale, or sale of products sold to him by respondent; and that "service or facility", as used in Part "II" of the order means any services or facilities connected with the handling, offering for sale, or sale of respondent's products by purchasers who bought them from respondent; and that "furnishing", as there used, means furnishing, contracting to furnish, or contributing to furnish.

[1] New.

(Sec. 6, 38 Stat. 722; 15 U. S. C. 46. Interpret or apply sec. 5, 38 Stat. 719, as amended, sec. 2, 38 Stat. 730, as amended; 15 U. S. C. 45, 13) [Cease and desist order, Knomark Manufacturing Company, Inc., Brooklyn, N. Y., Docket 6264, April 7, 1955]

This proceeding was heard by Frank Hier, hearing examiner, upon the complaint of the Commission which charged respondent with violating sections 2 (d) and 2 (e) of the Clayton Act as amended by the Robinson-Patman Act, and with violating section 5 of the Federal Trade Commission Act; in connection with the offer and sale of shoe polishes and related products, including those sold under respondent's brand name "Esquire"; upon respondent's answer; and upon a stipulation which was entered into by counsel for the parties, appears of record, and provides for entry of a consent order.

By the terms of said stipulation, respondent admitted all of the jurisdictional allegations set forth in the complaint; stipulated that the record in the matter might be taken as if the Commission had made findings of jurisdictional facts in accordance with such allegations; expressly waived a hearing before a hearing examiner or the Commission, the making of findings of fact or conclusions of law by the hearing examiner or the Commission, the filing of exceptions and oral argument before the Commission and all other and further procedures before the hearing examiner and the Commission to which respondent might be entitled under the Federal Trade Commission Act or the rules of practice of the Commission.

By the terms of said stipulation, respondent also withdrew its answer, theretofore filed by it; agreed that the order to be set forth should have the same force and effect as if made after a full hearing, presentation of evidence, and findings and conclusions thereon; specifically waived any and all right, power, or privilege to challenge or contest the validity of said order; agreed that the stipulation, together with the complaint, should constitute the entire record in the matter; agreed that the complaint therein might be used in construing the terms of said order, which order might be altered, modified, or set aside in the manner provided by the statute for the orders of the Commission; and agreed that the stipulation was subject to approval in accordance with Rules V and XXII of the Commission's rules of practice and that said order should have no force and effect unless and until it became the order of the Commission; and said stipulation further provided that it was made for settlement purposes only and did not constitute an admission by the respondent that it had violated the law as alleged in the complaint.

Thereafter said hearing examiner made his initial decision in which he set forth the foregoing matters, and, on the basis thereof, concluded that the proceeding was in the public interest and in conformity with the action therein contemplated and agreed upon made his cease and desist order.

Thereafter said initial decision, including said order, as announced and decreed by "Decision of the Commission and Order to File Report of Compliance", dated April 7, 1955, became, on that date, pursuant to Rule XXII of the Commission's rules of practice, the decision of the Commission.

Said order to cease and desist is as follows:

It is ordered, That respondent Knomark Manufacturing Company, Inc., a corporation, its officers, employees, agents and representatives, directly or through any corporate or other device, in or in connection with the sale of shoe polishes and related products or of any other related products, in commerce, as "commerce" is defined in the aforesaid Clayton Act as amended, do forthwith cease and desist from:

I. A. Making or contracting to make any payment to or for the benefit of any customer unless a payment is offered to be made or otherwise made available to each of all other competing customers.

B. Making or contracting to make, to or for the benefit of competing custo-

mers, any payments in amounts which are not determined by a percentage of dollar volume of purchases or by some other measurable basis.

C. Making, or contracting to make, to or for the benefit of any customer, any payments in an amount equal to and determined by any percentage of dollar volume of purchases or of any other measurable base unless such a payment, in an amount equal to and determined by the same percentage of dollar volume, or of such other measurable base, as the case may be, is offered to be made or otherwise made available to each of all other competing customers.

D. Making, or contracting to make, to or for the benefit of any customer, any payment, unless such a payment is made available on proportionally equal terms to each of all other competing customers.

As used in Part I of this order, "payment" means the payment of anything of value as compensation, or in consideration for any services or facilities furnished by or through any customer of respondent in connection with his handling, offering for sale or sale of products sold to him by respondent.

II. A. Discriminating between or among competing purchasers by furnishing any service or facility to any of them unless a service or facility is offered to be furnished or otherwise accorded to each of all of the others.

B. Discriminating between or among competing purchasers by furnishing any service or facility without charge to any of them unless a service or facility is offered to be furnished or otherwise accorded without charge to each of all of the others.

C. Discriminating between or among competing purchasers by furnishing them any service or facility in amounts which are not determined by a percentage of dollar volume of purchases or of some other measurable base.

D. Discriminating between or among competing purchasers by furnishing any service or facility to any of them in amounts equal to and determined by any percentage of dollar volume of purchases or of any other measurable base unless such service or facility in an amount equal to and determined by the same percentage of dollar volume of purchases or of such other measurable base, as the case may be, is offered to be furnished or otherwise made available to each of all of the others.

E. Discriminating between or among competing purchasers by furnishing any service or facility to them upon terms not accorded to all of them on proportionally equal terms.

As used in Part II of this order:

1. "Service or facility" means any services or facilities connected with the handling, offering for sale, or sale of respondent's products by purchasers who bought them from respondent.

2. "Furnishing" means furnishing, contracting to furnish, or contributing to furnish.

It is further ordered, That respondent Knomark Manufacturing Company, Inc., a corporation, its officers, employees, agents and representatives, directly or through any corporate or other device, in or in connection with the sale of shoe polishes and related products, or of any other related products in commerce as commerce is defined in the aforesaid Federal Trade Commission Act as amended, do further cease and desist from:

A. Offering to buy or buying and taking over stocks of shoe polishes and related products sold and distributed by competitors to retail sellers.

B. Offering to sell or selling shoe polishes and related products mentioned immediately in "A" above to jobbers at prices lower than the prices at which competitors ordinarily offer for sale and sell such products to jobbers.

C. Offering to give and making gifts of cash payments to buyers of its customers without the knowledge of such customers or employers of said buyers.

By said "Decision of the Commission", etc., report of compliance was required as follows:

It is ordered, That the respondent herein shall, within sixty (60) days after service upon it of this order, file with the Commission a report in writing setting forth in detail the manner and form in which it has complied with the order to cease and desist.

Issued: April 7, 1955.

By the Commission.

[SEAL] ROBERT M. PARRISH,
Secretary.

TITLE 33—NAVIGATION AND NAVIGABLE WATERS

Chapter II—Corps of Engineers, Department of the Army

PART 202—ANCHORAGE REGULATIONS

PART 207—NAVIGATION REGULATIONS

YORK RIVER, VIRGINIA

1. Pursuant to the provisions of section 7 of the River and Harbor Act of March 4, 1915 (38 Stat. 1053; 33 U. S. C. 471), § 202.166 prescribing naval anchorages in the York River, Virginia, is hereby amended revoking the anchorage described in subparagraph (1) of paragraph (a), and revising the title of the section and designation of the remaining anchorage, as follows:

§ 202.166 *York River, Va., naval anchorage*—(a) *The anchorage grounds.* Between Yorktown and the Naval Mine Depot, beginning at latitude 37°15'34", longitude 76°31'25"; thence to latitude 37°15'25", longitude 76°31'39.5"; thence to latitude 37°16'21.5", longitude 76°-32'46"; thence to latitude 37°17'07.5", longitude 76°34'17"; thence to latitude 37°17'55", longitude 76°35'14.5"; thence to latitude 37°18'05", longitude 76°35'01"; thence to latitude 37°17'20", longitude 76°34'07"; thence to latitude 37°16'33.5", longitude 76°32'34", and thence to the point of beginning.

(b) *The regulations.* This anchorage is reserved for the exclusive use of naval vessels and except in cases of emergency, no other vessel shall anchor therein without permission from the local naval authorities, obtained through the Captain of the Port, Norfolk, Virginia. Movement of vessels through the anchorage will not be restricted.

2. Pursuant to the provisions of section 7 of the River and Harbor Act of August 8, 1917 (40 Stat. 266; 33 U. S. C. 1) and Chapter XIX of the Army Appropriation Act of July 9, 1918 (40 Stat. 892; 33 U. S. C. 3), § 207.128 prescribing naval mine service testing areas in the York River, Virginia, is hereby amended adding thereto a naval minesweeping practice area, a naval drill mine field area, and a restricted naval anchorage area, as follows:

§ 207.128 *York River, Va.; naval restricted areas*—(a) *The areas*—(1) *Naval mine service-testing area (prohibited).* A 300-foot square area whose northwesterly side is an extension of the southeasterly side of Pier No. 1, Naval Mine Depot, at approximately latitude 37°15'06", longitude 76°31'38".

(2) *Naval mine service-testing area (restricted).* A rectangular area adjacent to Pier No. 1, Naval Mine Depot, beginning at latitude 37°15'16", longitude 76°31'47"; thence to latitude 37°15'36", longitude 76°31'18"; thence to latitude 37°15'14", longitude 76°30'54", thence to latitude 37°14'56", longitude 76°31'22", and thence to the point of beginning.

(3) *Naval mine-sweeping practice area (restricted).* Between Tue Marshes Light and Yorktown, beginning at latitude 37°14'11"; longitude 76°30'15", thence to latitude 37°13'30", longitude 76°28'00", thence to latitude 37°13'47", longitude 76°25'12", thence to latitude 37°14'07", longitude 76°23'30"; thence to latitude 37°14'52", longitude 76°23'30"; thence to latitude 37°14'23", longitude 76°25'50"; thence to latitude 37°14'24", longitude 76°29'12"; thence to latitude 37°14'41", longitude 76°30'15"; and thence to the point of beginning.

NOTE: All vessels are warned that the Navy periodically conducts mine sweeping operations in this area. Mine sweepers with gear streamed have greatly reduced maneuverability, being unable to make sharp turns, stop, or back down, and have the right of way. All vessels must be alert to take timely action to avoid passing within 500 yards of any mine sweeper with gear streamed. The Commanding Officer, Naval Schools, Mine Warfare, Yorktown, Virginia, will insofar as possible regulate mine sweeping practice operations so as to cause minimum interference and delay to merchant vessels, upon 24 hours' advance notice from the agencies operating such vessels. The notice should give the approximate time of arrival, departure, or transit of such vessels to or from terminals on York River.

(4) *Naval drill mine field area (restricted).* An area within the naval mine sweeping practice are described in subparagraph (3) of this paragraph, beginning at latitude 37°14'23", longitude 76°28'20"; thence to latitude 37°13'52", longitude 76°28'20"; thence to latitude 37°13'52", longitude 76°26'00"; thence to latitude 37°14'00", longitude 76°25'50"; thence to latitude 37°14'23", longitude 76°25'50"; and thence to the point of beginning.

NOTE: Non-explosive drill mines are periodically laid in this area, during periods to be announced in advance in local "Notice to Mariners". Mine cases and recovery floats present a hazard to vessels for a period of 5 days after laying.

(5) *Naval anchorage area (restricted).* Between Tue Marshes Light and Yorktown, beginning at latitude 37°14'57", longitude 76°23'03.5", thence to latitude 37°14'27", longitude 76°23'03"; thence to latitude 37°13'54", longitude 76°25'39"; thence to latitude 37°13'42.5", longitude 76°27'40.5"; thence to latitude 37°14'11", longitude 76°29'11.5"; thence to latitude 37°14'23", longitude 76°29'11.5"; thence to latitude 37°14'22.5", longitude 76°25'43.5"; and thence to the point of beginning.

(b) *The regulations.* (1) All vessels other than naval craft are forbidden to enter the prohibited area described in paragraph (a) (1) of this section.

(2) Anchoring, trawling, dragging, and net fishing are prohibited in the area described in paragraph (a) (2) of this section.

(3) Except in case of emergency, no vessel shall anchor in the area described in paragraph (a) (3) of this section, without the permission of the Commanding Officer, Naval Schools, Mine Warfare, Yorktown, Virginia, and no vessel moving in the area shall pass within 500 yards of any minesweeper with gear streamed.

(4) No structures or obstacles such as fish traps, beacons, buoys, piles, or dolphins shall be placed in the area described in paragraph (a) (3) of this section without prior approval of the Commanding Officer, Naval Schools, Mine Warfare, Yorktown, Virginia.

(5) During periods announced in advance in local "Notice to Mariners", vessels with a draft of 10 feet or more when passing through the area described in paragraph (a) (4) of this section shall be confined to a channel 300 yards wide, the center line of which is marked by range lights located at latitude 37°13'35", longitude 76°29'16", and latitude 37°13'31.5", longitude 76°29'36". Trawling or dragging in the drill mine field area during announced periods is prohibited.

(6) The naval anchorage described in paragraph (a) (5) of this section is reserved for the exclusive use of naval vessels and except in cases of emergency no other vessel shall anchor therein without the permission of the Commanding Officer, Naval Schools, Mine Warfare, Yorktown, Virginia. Whenever the area is being used as a naval anchorage, movement of vessels through the anchorage will not be restricted.

(7) The regulations of this section shall be enforced by the Commanding Officer, Naval Schools, Mine Warfare, Yorktown, Virginia, and such agencies as he may designate.

[Regs., 3 May 1955, 800.212, 800.2121 (York River, Va.)—ENGWO] (38 Stat. 1053, 40 Stat. 266, 892; 33 U. S. C. 1, 3, 471)

[SEAL] JOHN A. KLEIN,
Major General, U. S. Army,
The Adjutant General.

[F. R. Doc. 55-4175; Filed, May 23, 1955; 8:46 a. m.]

TITLE 14—CIVIL AVIATION

Chapter II—Civil Aeronautics Administration, Department of Commerce

[Amdt. 115]

PART 608—RESTRICTED AREAS

GUERNSEY, WYO., TEMPORARY AREA

The restricted area alteration appearing hereinafter has been coordinated with the civil operators involved, the Army, the Navy, and the Air Force, through the Air Coordinating Committee, Airspace Panel, and is adopted to become effective when indicated in order to promote safety of the flying public. Since a military function of the United States is involved, compliance with the notice, procedure, and effective date provisions of section 4 of the Administrative Procedure Act is not required.

Part 608 is amended as follows:

In § 608.58, a Guernsey, Wyoming, temporary area is added to read:

Name and location	Description by geographical coordinates	Designated altitudes	Time of designation	Controlling agency
GUERNSEY (Casper Chart).	Beginning at latitude 42°28'00", longitude 104°50'00"; thence to latitude 42°28'00", longitude 104°50'00"; thence to latitude 42°20'00", longitude 104°44'00"; thence to latitude 42°18'00", longitude 104°44'00"; thence to latitude 42°18'00", longitude 104°50'30"; thence to latitude 42°22'00", longitude 104°53'30"; thence to point of beginning.	16,000 feet mean sea level.	Daily 0800 to 2200 June 13 to June 25, 1955, inclusive.	Wyoming National Guard.

(Sec. 205, 52 Stat. 984, as amended; 49 U. S. C. 425. Interprets or applies sec. 601, 52 Stat. 1007, as amended; 49 U. S. C. 551)

This amendment shall become effective on June 13, 1955.

[SEAL] S. A. KEMP,
Acting Administrator of Civil Aeronautics.

[F. R. Doc. 55-4176; Filed, May 23, 1955; 8:46 a. m.]

TITLE 32—NATIONAL DEFENSE

Chapter V—Department of the Army

Subchapter I—Transport

PART 632—CHARTER AND REDELIVERY OF VESSELS

PART 633—TRANSPORTATION OF INDIVIDUALS

REVOCATION OF SECTIONS

1. In Part 632 the following sections are revoked:

§ 632.14 *General.*
§ 632.15 *Letter of notification.*
§ 632.16 *Prompt redelivery.*
§ 632.17 *Notification of redelivery.*
§ 632.18 *Inventory board.*
§ 632.19 *Board of survey.*

2. In Part 633, the following sections are revoked:

§ 633.1 *Dependents.*
§ 633.2 *Applicants for enlistment, and recruits.*
§ 633.3 *Civilian witness before military courts; not in Government employ.*
§ 633.4 *Enlisted persons, upon retirement.*
§ 633.5 *Enlisted personnel upon discharge or relief or release from active duty.*
§ 633.5a *Cadets discharged from United States Military Academy.*

Chapter XI—National Guard and State Guard, Department of the Army

PART 1101—NATIONAL GUARD REGULATIONS

COMMISSIONED OFFICERS

A new paragraph (e) is added to § 1101.2, as follows:

§ 1101.2 *Appointment.* • • •

(e) *Appointment of individuals drawing disability compensation from the United States.* (1) Applicants for appointment who are drawing disability compensation from the United States Government are eligible for Federal recognization in the National Guard, providing they are otherwise qualified and provided further that they waive, in advance, for the fiscal year, that portion of their disability compensation pay for the days for which they receive Federal pay for services of the federally recognized National Guard.

(2) Each applicant will be advised that it is his responsibility to preclude dual payment to him of compensation from the Veterans Administration and Federal pay for his services in the National Guard for the same period of time, including armory drills, field training and other inactive or active duty for training.

[C2, NGR 20-1, February 18, 1955] (Sec. 118, 39 Stat. 213; 32 U. S. C. 17)

PART 421—GRAINS AND RELATED COMMODITIES

SUBPART—1953-CROP CORN RESEAL LOAN PROGRAM

STORAGE PAYMENT

The regulations issued by the Commodity Credit Corporation and Commodity Stabilization Service, published in 18 F. R. 5359 and 6983 and 19 F. R. 1595, 2712, 5591, and 6809 and containing the specific requirements for the 1953-Crop Corn Reseal Loan Program, are hereby amended as follows:

Section 421.72 (a) (1) (i) is amended to correct a typographical error in the date contained therein so that the amended subparagraph (1) reads as follows:

§ 421.72 *Storage and track-loading payments*—(a) *Storage payment.* • • •

(1) Storage payment for full reseal period: A storage payment computed at the rate of 15 cents per bushel will be made to the producer on the quantity involved if he (i) redeems corn from the loan on or after July 31, 1955, (ii) delivers corn to CCC on or after July 31, 1955, or (iii) delivers corn to CCC prior to July 31, 1955, pursuant to demand by CCC for repayment of the loan solely for the convenience of CCC if the corn was not damaged or otherwise impaired due to negligence on the part of the producer.

Sec. 4, 62 Stat. 1070, as amended; 15 U. S. C. 714b. Interprets or applies sec. 5, 62 Stat. 1072, secs. 101, 401, 63 Stat. 1051; 15 U. S. C. 714c, 7 U. S. C. 1441, 1421)

Issued this 19th day of May 1955.

[SEAL] WALTER C. BERGER,
Acting Executive Vice President,
Commodity Credit Corporation.

[F. R. Doc. 55-4207; Filed, May 23, 1955; 8:52 a. m.]

[1955 C. C. C. Grain Price Support Bulletin 1, Supplement 1, Barley]

PART 421—GRAINS AND RELATED COMMODITIES

SUBPART—1955 CROP BARLEY LOAN AND PURCHASE AGREEMENT PROGRAM

A price support program has been announced for the 1955-crop of barley. The 1955, C. C. C. Grain Price Support Bulletin 1 (20 F. R. 3017), issued by the Commodity Credit Corporation and containing the regulations of a general nature with respect to price support operations for certain grains and other commodities produced in 1955 is supplemented as follows:

Sec.
421.1076 Purpose.
421.1077 Availability of price support.
421.1078 Eligible barley.
421.1079 Warehouse receipts.
421.1080 Determination of quantity.
421.1081 Determination of quality.
421.1082 Maturity of loans.
421.1083 Support rates.
421.1084 Warehouse charges.
421.1085 Settlement.

AUTHORITY: §§ 421.1076 to 421.1085 issued under sec. 4, 62 Stat. 1070, as amended; 15 U. S. C. 714b. Interpret or apply sec. 5, 62 Stat. 1072, secs. 301, 401, 63 Stat. 1053; 15 U. S. C. 714, 7 U. S. C. 1447, 1421.

§ 421.1076 *Purpose.* Sections 421.1076 to 421.1085 state additional specific regulations which, together with the general regulations contained in the 1955 C. C. C. Grain Price Support Bulletin 1 (§§ 421.1001 to 421.1021), apply to loans and purchase agreements under the 1955-Crop Barley Price Support Program.

§ 421.1077 *Availability of price support*—(a) *Method of support.* Price support will be available through farm-storage and warehouse-storage loans and through purchase agreements.

(b) *Area.* Farm-storage and warehouse-storage loans and purchase agreements will be available wherever barley is grown in the continental United States, except that farm-storage loans will not be available in areas where the State committee determines that barley cannot be safely stored on the farm.

(c) *Where to apply.* Application for price support should be made at the office of the county committee which keeps the farm-program records for the farm.

(d) *When to apply.* Loans and purchase agreements will be available from the time of harvest through January 31, 1956, and the applicable documents must be signed by the producer and delivered to the county committee not later than such date. Applicable documents include the Producer's Note and Loan Agreement for warehouse-storage loans, the Producer's Note and Supplemental Loan Agreement and the Commodity Chattel Mortgage for farm-storage loans, and the Purchase Agreement for purchase agreements.

(e) *Eligible producer.* An eligible producer shall be an individual, partnership, association, corporation, estate, trust, or other business enterprise or legal entity, and whenever applicable a State, political subdivision of a State, or any agency thereof, producing barley in 1955, as landowner, landlord, tenant, or sharecropper.

§ 421.1078 *Eligible barley.* At the time the barley is placed under loan or delivered under a purchase agreement, it must meet the following requirements:

(a) The barley must have been produced in the continental United States in 1955 by an eligible producer.

(b) (1) The beneficial interest in the barley must be in the person tendering the barley for loan or for delivery under a purchase agreement, and must always have been in him, or must have been in him and a former producer whom he succeeded before the barley was harvested.

(2) To meet the requirements of succession to a former producer, the rights, responsibilities and interest of the former producer with respect to the farming unit on which the barley was produced shall have been substantially assumed by the person claiming succession. Mere purchase of the crop prior to harvest, without acquisition of any additional interest in the farming unit, shall not constitute succession. The county committee shall determine whether the requirements with respect to succession have been met.

(c) The barley must be of any class grading No. 4 or better (or No. 4 Carlicky or better), except that Class III Western Barley shall have a test weight of not less than 40 pounds per bushel.

(d) Barley grading Tough, Weevily, Stained, Blighted, Bleached, Ergoty or Smutty shall not be eligible, except that barley represented by warehouse receipts grading Tough will be eligible if the warehouseman certifies on the supplemental certificate or on a statement attached to the warehouse receipt that barley grading "Tough" has been processed at the request of the eligible producer, and delivery will be made of eligible barley not grading "Tough," and no lien for processing will be claimed by the warehouseman from Commodity Credit Corporation or any subsequent holder of said warehouse receipt.

(e) If offered as security for a farm-storage loan, the barley must have been stored in the granary at least 30 days prior to its inspection for measurement, sampling, and sealing, unless otherwise approved by the State committee.

§ 421.1079 *Warehouse receipts.* Warehouse receipts representing barley in approved warehouse-storage to be placed under a loan or delivered under a purchase agreement, must meet the following requirements:

(a) Warehouse receipts must be issued in the name of the producer, must be properly endorsed in blank so as to vest title in the holder and must be receipts issued on a warehouse approved by CCC under the Uniform Grain Storage Agreement which indicate that the barley is insured, or must be receipts issued on warehouses operated by Eastern common carriers under tariffs approved by the Interstate Commerce Commission for which custodian agreements are in effect.

(b) (1) Each warehouse receipt or the warehouseman's supplemental certificate (in duplicate), properly identified with the warehouse receipt must show: (i) Gross weight or bushels, (ii) class, (iii) grade (including special grades), (iv) test weight, (v) dockage, and (vi) any other grading factor(s) when such factor(s) and not test weight determine the grade. The warehouse receipt or the supplemental certificate must show whether the barley arrived by rail, truck or barge. In the case of warehouse receipts issued for barley delivered by rail or barge, the grading factors on the warehouse receipts must agree with the inbound inspection certificate for the car or barge when such certificate is issued.

(2) If the warehouseman has processed the barley as provided in § 421.1078 (d), the supplemental certificate must show the numerical grade and the grading factors changed because of the barley being processed. Where the grade and grading factors shown on the supplemental certificate do not agree with the warehouse receipt, the factors shown on the supplemental certificate shall take precedence.

(c) A separate warehouse receipt must be submitted for each grade and class of barley.

(d) The warehouse receipt may be subject to liens for warehouse charges only to the extent indicated in § 421.1084.

(e) Warehouse receipts representing barley which has been shipped by rail or water from a country shipping point to a designated terminal point or shipped by rail or water from a country shipping point and stored in transit to a designated terminal point, must be accompanied by registered freight bills, or by a certificate containing similar information in a form prescribed by the CSS commodity office which shall be signed by the warehouseman and which may be a part of the supplemental certificate.

§ 421.1080 *Determination of quantity.* (a) The quantity of barley placed under farm-storage loan may be determined either by weight or by measurement. The quantity of barley placed under a warehouse-storage loan or delivered under a farm-storage loan or under a purchase agreement shall be determined by weight.

(b) When the quantity is determined by weight, a bushel shall be 48 pounds, of clean barley free of dockage. In determining the quantity of sacked barley by weight, a deduction of ¾ of a pound for each sack shall be made.

(c) When the quantity of barley is determined by measurement, a bushel shall be 1.25 cubic feet of barley testing 48 pounds per bushel. The quantity determined shall be the following percentages of the quantity determined for 48-pound barley:

For barley testing:	Percent
48 pounds or over	100
47 pounds or over, but less than 48 pounds	98
46 pounds or over, but less than 47 pounds	96
45 pounds or over, but less than 46 pounds	94
44 pounds or over, but less than 45 pounds	92
43 pounds or over, but less than 44 pounds	90
42 pounds or over, but less than 43 pounds	88
41 pounds or over, but less than 42 pounds	85
40 pounds or over, but less than 41 pounds	83

(d) The percentage of dockage shall be determined and the weight of such dockage shall be deducted from the gross weight of the barley in determining the net quantity available for loan or purchase.

§ 421.1081 *Determination of quality.* The grade, class, grading factors, and all other quality factors shall be determined in accordance with the methods set forth in the Official Grain Standards of the United States for Barley, whether or not such determinations are made on the basis of an official inspection.

§ 421.1082 *Maturity of loans.* Loans mature on demand but not later than February 29, 1956, in the States of Alabama, Arizona, Arkansas, California, Delaware, Florida, Georgia, Kentucky, Louisiana, Maryland, Mississippi, New Jersey, North Carolina, Pennsylvania, South Carolina, Tennessee, Virginia, and West Virginia, and not later than April 30, 1956, in all other States. The maturity date for a loan shall be the maturity date for the State where the barley is stored.

§ 421.1083 *Support rates.* Basic support rates for barley placed under loan and for barley delivered under purchase agreement are set forth in this section.

(a) *Basic support rates at designated terminal markets.* (1) Basic support rates per bushel for barley of the Classes I, II, and III grading No. 2 or better, and stored in approved warehouses at the terminal markets listed below are as follows:

Terminal markets:	Rate per bushel
Albany, N. Y.	$1.24
Astoria, Oreg.	1.20
Baltimore, Md.	1.24
Chicago, Ill.	1.17
Duluth, Minn.	1.14
Galveston, Tex.	1.21
Houston, Tex.	1.21
Kansas City, Mo.	1.13
Longview, Wash.	1.20
Los Angeles, Calif.	1.19
Memphis, Tenn.	1.17
Milwaukee, Wis.	1.17
Minneapolis, Minn.	1.14
New Orleans, La.	1.21
New York, N. Y.	1.24
Norfolk, Va.	1.24
Oakland, Calif.	1.19
Omaha, Nebr.	1.13
Philadelphia, Pa.	1.24
Portland, Oreg.	1.20
Saint Joseph, Mo.	1.13
Saint Louis, Mo.	1.17
San Francisco, Calif.	1.19
Seattle, Wash.	1.20
Sioux City, Iowa	1.13
Stockton, Calif.	1.19
Superior, Wis.	1.14
Tacoma, Wash.	1.20
Vancouver, Wash.	1.20

(2) Barley eligible for loan or purchase at the support rates shown in the above schedule must have been shipped on a domestic interstate freight rate basis. On any barley shipped at other than the domestic interstate freight rate, the support rate at the designated terminal market shall be reduced by the difference between the rate of the freight paid (plus tax) and the domestic interstate freight rate (plus tax).

(3) The support rates established for designated terminal markets apply to barley which has been shipped by rail or water from a country shipping point to one of the designated terminal markets, as evidenced by paid freight bills duly registered for transit privileges: *Provided,* That in the event the amount of paid-in freight is insufficient to guarantee the minimum proportional domestic interstate freight rate from the terminal market, there shall be deducted from the applicable terminal support rate the difference between the amount of freight actually paid in and the amount required to be paid in to guarantee outbound movement at the minimum proportional domestic interstate freight rate.

(4) When shipped by rail or water and stored at any designated terminal market, barley for which neither registered freight bills nor registered freight certificates are presented to guarantee outbound movement at the minimum proportional domestic interstate freight rate, shall have a support rate equal to the terminal rate minus 7 cents per bushel.

(5) When received by truck and stored at any designated terminal market, the support rate shall be the terminal rate minus 10½ cents per bushel.

(b) *Support rates for barley in approved warehouse-storage at other than designated terminal markets.* (1) The support rate for barley stored in approved warehouses (other than those situated in the designated terminal markets) which is shipped by rail or water, shall be determined by deducting from the appropriate designated terminal market rate an amount equal to the transit balance, if any (plus tax) of the through freight rate from point of origin for such barley to such terminal market: *Provided,* That on any barley shipped at other than the domestic interstate freight rate, the support rate shall be further reduced by the difference between the rate of the freight paid (plus tax) and the domestic interstate freight rate (plus tax) from the point of origin of such barley to the point of storage: *And provided further,* That in the case of barley stored at any railroad transit point, taking a penalty by reason of out-of-line movement, or for any other reason, to the appropriate designated market, there shall be added to such transit balance an amount equal to any out-of-line costs or other costs incurred in storing barley in such position.

(2) The warehouse receipts must be accompanied by the original paid freight bills or certificates of the warehouseman and other required documents as set forth in § 421.1079.

(c) *Basic county support rates.* (1) The following basic county support rates per bushel are established for barley of the Classes I, II, and III grading No. 2 or better. Farm-storage loans and country warehouse-storage loans, except as otherwise provided in paragraph (b) of this section, will be based on the support rate established for the county in which the barley is stored:

If two or more approved warehouses are located at the same or adjoining towns, villages, or cities having the same domestice interstate freight rate, such towns, villages, or cities shall be deemed to constitute one shipping point, and the same support rate shall apply even though such warehouses are not all located in the same county. Such support rate shall be the highest support rate of the counties involved.

(2) Where the State Committee determines that State or district weed control laws affect the barley crop, the support rate will be 10 cents below the applicable county support rate set forth in the schedule in this paragraph. If upon delivery of the barley to CCC the producer supplies a certificate indicating that the barley complies with the weed control laws, the producer will be credited with the amount of the differential in determining the settlement value.

(d) *Discounts.* The discount for barley which grades No. 3 shall be 3 cents per bushel, and for No. 4, 6 cents per bushel. The support rates for "mixed barley" (Class IV) shall be 2 cents per bushel less than the support rates for barley of the Classes I, II, and III. In addition to any other applicable discounts, a discount of 10 cents per bushel shall be applied to barley grading "Garlicky".

§ 421.1084 *Warehouse charges.* (a) Warehouse receipts and the barley represented thereby stored in approved warehouses operating under the Uniform Grain Storage Agreement may be subject to liens for warehouse handling and storage charges at not to exceed the Uniform Grain Storage Agreement rates from the date the grain is deposited in the warehouse for storage. Where the date of deposit (the date of the warehouse receipt if the date of deposit is not shown) on warehouse receipts representing barley stored in warehouses operating under the Uniform Grain Storage Agreement is on or before February 29, 1956, or April 30, 1956, the applicable date to be determined in accordance with § 421.1082, there shall be deducted in computing the amount of the loan or purchase price the storage charges per bushel as shown in the following table unless written evidence has been submitted with the warehouse receipt that all warehouse charges, except receiving and loading out charges, have been prepaid through February 29, 1956, or April 30, 1956, the applicable date to be determined in accordance with § 421.1082:

Amount of deduction (cents per bushel)	For States having a maturity date not later than April 30, 1956; date of deposit (all dates inclusive)	For States having a maturity date not later than Feb. 29, 1956; date of deposit (all dates inclusive)
15	Prior to May 27, 1955	
14	May 27–June 25, 1955	
13	June 26–July 25, 1955	Prior to May 26, 1955.
12	July 26–Aug. 24, 1955	May 26–June 24, 1955.
11	Aug. 25–Sept. 23, 1955	June 25–July 24, 1955.
10	Sept. 24–Oct. 13, 1955	July 25–Aug. 13, 1955.
9	Oct. 14–Nov. 2, 1955	Aug. 14–Sept. 2, 1955.
8	Nov. 3–Nov. 22, 1955	Sept. 3–Sept. 22, 1955.
7	Nov. 23–Dec. 12, 1955	Sept. 23–Oct. 12, 1955.
6	Dec. 13, 1955–Jan. 1, 1956	Oct. 13–Nov. 1, 1955.
5	Jan. 2–Jan. 21, 1956	Nov. 2–Nov. 21, 1955.
4	Jan. 22–Feb. 10, 1956	Nov. 22–Dec. 11, 1955.
3	Feb. 11–Mar. 1, 1956	Dec. 12–Dec. 31, 1955.
2	Mar. 2–Mar. 21, 1956	Jan. 1–Jan. 20, 1956.
1	Mar. 22–Apr. 30, 1956	Jan. 21–Feb. 29, 1956.

(b) Warehouse receipts and the barley represented thereby stored in approved warehouses operated by Eastern common carriers may be subject to liens for warehouse elevation (receiving and delivering) and storage charges from the date of deposit at rates approved by the Interstate Commerce Commission. There shall be deducted in computing the loan or purchase price, the amount of the approved tariff rate for storage (not including elevation), which will accumulate from the date of deposit through February 29, 1956, or April 30, 1956, whichever date is applicable, to the point of storage as determined in accordance with § 421.1082, unless written evidence is submitted with the warehouse receipt that the storage charges have been prepaid. The county committee shall request the CSS commodity office to determine the amount of such charges. Where the producer presents evidence showing that elevation charges have been prepaid, the amount of the storage charges to be deducted shall be reduced by the amount of the elevation charges prepaid by the producer.

§ 421.1085 *Settlement*—(a) *Settlement value.* (1) In the case of eligible barley delivered to CCC from farm storage under the loan program, settlement shall be made at the applicable support rate determined in accordance with §§ 421.1083 and 421.1018 (e). The support rate shall be for the grade and quality of the total quantity of barley eligible for delivery. If, upon delivery, the barley under farm-storage loan is of a grade and/or quality for which no support rate has been established, the settlement value shall be computed at the support rate established for the grade and/or quality of the barley placed under loan, less the difference, if any, at the time of delivery, between the market price for the grade and/or quality placed under loan and the market price of the barley delivered, as determined by CCC: *Provided, however,* That if such barley is sold by CCC in order to determine its market price, the settlement value shall not be less than such sales price.

(2) In the case of eligible barley delivered to CCC under purchase agreement, settlement shall be made at the applicable support rate determined in accordance with §§ 421.1083 and 421.1018 (e).

(b) *Storage deduction for early delivery.* Whenever farm-stored barley under loan or purchase agreement is delivered to CCC prior to the loan maturity date for the State, a deduction for storage shall be made in accordance with the schedule of deductions for warehouse charges (§ 421.1084) except that no such deduction shall be made if such early delivery is made because the loan is called solely for the convenience of CCC, or if it is determined by CCC at the time of delivery that the barley will be sold rather than stored, or if CCC requires early delivery on an area basis.

(c) *Refund of prepaid handling charges.* In case a warehouseman charges the producer for the receiving or the receiving and loading out charges on barley under loan or purchase agreement, stored in a warehouse under the Uniform Grain Storage Agreement, the producer shall, upon delivery of the barley to CCC, be reimbursed or given credit by the county office for such prepaid charges in an amount not to exceed the charges authorized under the Uniform Grain Storage Agreement, provided the producer furnishes to the county committee written evidence signed by the warehouseman that such charges have been paid.

(d) *Track-loading payment.* A track-loading payment of 3 cents per bushel shall be made to the producer on barley delivered to CCC on track at a country point.

Issued this 18th day of May 1955.

[SEAL] WALTER C. BERGER,
Acting Executive Vice President,
Commodity Credit Corporation.

[F. R. Doc. 55-4171; Filed, May 23, 1955; 8:46 a. m.]

[1955 C. C. C. Grain Price Support Bulletin 1, Supplement 1, Oats]

PART 421—GRAINS AND RELATED COMMODITIES

SUBPART—1955 CROP OATS LOAN AND PURCHASE AGREEMENT PROGRAM

A price support program has been announced for 1955 crop oats. The 1955 C. C. C. Grain Price Support Bulletin 1 (20 F. R. 3017), issued by the Commodity Credit Corporation and containing the regulations of a general nature with respect to price support operations for certain grains and other commodities produced in 1955 is supplemented as follows:

Sec.
421.1276 Purpose.
421.1277 Availability of price support.
421.1278 Eligible oats.
421.1279 Warehouse receipts.
421.1280 Determination of quantity.
421.1281 Determination of quality.
421.1282 Maturity of loans.
421.1283 Support rates.
421.1284 Warehouse charges.
421.1285 Settlement.

AUTHORITY: §§ 421.1276 to 421.1285 issued under sec. 4, 62 Stat. 1070, as amended; 15 U. S. C. 714b. Interpret or apply sec. 5, 62 Stat. 1072, secs. 301, 401, 62 Stat. 1053; 15 U. S. C. 714c; 7 U. S. C. 1447, 1421.

§ 421.1276 *Purpose.* Sections 421.1276 to 421.1285 state additional specific requirements which, together with the general regulations contained in the 1955 C. C. C. Grain Price Support Bulletin 1 (§§ 421.1001 to 421.1021), apply to loans and purchase agreements under the 1955 Crop Oats Price Support Program.

§ 421.1277 *Availability of price support*—(a) *Method of support.* Price support will be available through farm-storage and warehouse-storage loans and through purchase agreements.

(b) *Area.* Farm-storage and warehouse-storage loans and purchase agreements will be available wherever oats are grown in the continental United States, except that farm-storage loans will not be available in areas where the State committee determines that oats cannot be safely stored on the farm.

(c) *Where to apply.* Application for price support should be made at the office of the county committee which keeps the farm-program records for the farm.

(d) *When to apply.* Loans and purchase agreements will be available from the time of harvest through January 31, 1956, and the applicable documents must be signed by the producer and delivered to the county committee not later than such date. Applicable documents include the Producer's Note and Loan Agreement for warehouse-storage loans, the Producer's Note and Supplemental Loan Agreement and the Commodity Chattel Mortgage for farm-storage loans, and the Purchase Agreement for purchase agreements.

(e) *Eligible producer.* An eligible producer shall be an individual, partnership, association, corporation, estate, trust, or other business enterprise, or legal entity, and wherever applicable, a State, political subdivision of a State, or any agency thereof producing oats in 1955 as landowner, landlord, tenant, or sharecropper.

§ 421.1278 *Eligible oats.* At the time the oats are placed under loan or delivered under a purchase agreement, the oats must meet the following requirements:

(a) The oats must have been produced in the continental United States in 1955 by an eligible producer.

(b) (1) The beneficial interest in the oats must be in the eligible producer tendering the oats for loan or for delivery under a purchase agreement and must always have been in him, or must have been in him and a former producer whom he succeeded before the oats were harvested.

(2) To meet the requirements of succession to a former producer, the rights, responsibilities and interest of the former producer with respect to the farming unit on which the oats were produced shall have been substantially assumed by the person claiming succession. Mere purchase of the crop prior to harvest, without acquisition of any additional interest in the farming unit, shall not constitute succession. The county committee shall determine whether the requirements with respect to succession have been met.

(c) The oats must grade No. 3 or better. Feed oats and mixed feed oats will not be eligible.

(d) Oats grading Tough, Weevily, Smutty, Ergoty, Garlicky, Bleached or Thin, or oats otherwise of low quality will not be eligible, except that oats represented by warehouse receipts grading "Tough" will be eligible if the warehouseman certifies on the supplemental certificate or on a statement attached to the warehouse receipt that "Oats grading Tough have been processed at the request of the eligible producer, and delivery will be made of the same country run quality, quantity and grade, not Tough, and no lien for processing will be claimed by the warehouseman from Commodity Credit Corporation or any subsequent holder of the warehouse receipt."

(e) If offered as security for a farm-storage loan, the oats must have been stored in the granary at least 30 days prior to their inspection for measurement, sampling and sealing, unless otherwise approved by the State committee.

§ 421.1279 *Warehouse receipts.* Warehouse receipts representing oats in approved warehouse-storage to be placed under loan or delivered under a purchase agreement, must meet the following requirements:

(a) Warehouse receipts must be issued in the name of the producer, must be properly endorsed in blank so as to vest title in the holder, and must be receipts issued on a warehouse approved by CCC under the Uniform Grain Storage Agreement, which indicate that the oats are insured, or must be receipts issued on warehouses operated by Eastern common carriers under tariffs approved by the Interstate Commerce Commission for which custodian agreements are in effect.

(b) Each warehouse receipt, or the warehouseman's supplemental certificate (in duplicate), properly identified with the warehouse receipts must show: (1) Gross weight or bushels, (2) class, (3) grade, (4) test weight, and (5) any other grading factor(s) when such factor(s) and not test weight determine the grade.

(c) A separate warehouse receipt must be submitted for each grade of oats.

(d) The warehouse receipt may be subject to liens for warehouse charges only to the extent indicated in § 421.1284.

(e) If the warehouseman has processed the oats as provided in § 421.1278 (d), the supplemental certificate must show the numerical grade and the grading factors changed because of the oats being processed. Where the grade and grading factors shown on the supplemental certificate do not agree with the warehouse receipt, the factors shown on the supplemental certificate shall take precedence.

§ 421.1280 *Determination of quantity.* (a) The quantity of oats placed under farm-storage loan may be determined either by weight or by measurement. The quantity of oats placed under a warehouse-storage loan or delivered under a farm-storage loan or under a purchase agreement shall be determined by weight.

(b) When the quantity is determined by weight, a bushel shall be 32 pounds of oats. In determining the quantity of sacked oats by weight, a deduction of three-fourths of a pound for each sack shall be made.

(c) When the quantity of oats is determined by measurement, a bushel shall be 1.25 cubic feet of oats testing 32 pounds per bushel. The quantity so determined shall be adjusted for test weight by applying the applicable percentage as shown in the following table.

For oats testing:	Percent
40 pounds or over	125
39 pounds or over, but less than 40 pounds	121
38 pounds or over, but less than 39 pounds	118
37 pounds or over, but less than 38 pounds	115
36 pounds or over, but less than 37 pounds	112
35 pounds or over, but less than 36 pounds	109
34 pounds or over, but less than 35 pounds	106
33 pounds or over, but less than 34 pounds	103
32 pounds or over, but less than 33 pounds	100
31 pounds or over, but less than 32 pounds	96
30 pounds or over, but less than 31 pounds	93
29 pounds or over, but less than 30 pounds	90
28 pounds or over, but less than 29 pounds	87
27 pounds or over, but less than 28 pounds	84

(d) Since the percentage of dockage is not a grade factor in the case of oats, the quantity of oats will be determined without reference to dockage.

§ 421.1281 *Determination of quality.* The grade, grading factors, and all other quality factors shall be determined in accordance with the methods set forth in the Official Grain Standards of the United States for Oats, whether or not such determinations are made on the basis of an official inspection.

§ 421.1282 *Maturity of loans.* Loans mature on demand but not later than February 29, 1956, on oats stored in the States of Alabama, Arkansas, Delaware, Florida, Georgia, Kentucky, Louisiana, Maryland, Mississippi, New Jersey, North Carolina, Pennsylvania, South Carolina, Tennessee, Virginia and West Virginia, and not later than April 30, 1956, on oats stored in all other States.

§ 421.1283 *Support rates.* (a) Loans will be made, and oats delivered under purchase agreements will be purchased at the support rates set forth in this section. Both farm-storage and warehouse-storage loans will be based on the support rate established for the county in which the oats are produced. Support rates per bushel for oats grading No. 3 or better, are set forth below:

(b) Where the State committee determines that State or district weed control laws affect the oats crop, the support rate will be 10 cents below the applicable county support rate set forth in the schedule in paragraph (a) of this section. If upon delivery of the oats to CCC, the producer supplies a certificate indicating that the oats comply with the weed control laws, the producer will be credited with the amount of the differential in determining the settlement value.

§ 421.1284 *Warehouse charges.* (a) Warehouse receipts and the oats represented thereby stored in approved warehouses operating under the Uniform Grain Storage Agreement may be subject to liens for warehouse handling and storage charges at not to exceed the Uniform Grain Storage Agreement rates from the date the grain is deposited in the warehouse for storage. Where the date of deposit (the date of the warehouse receipt if the date of deposit is not shown) on warehouse receipts representing oats stored in warehouses operating under the Uniform Grain Storage Agreement is on or before February 29, 1956, or April 30, 1956, the applicable date to be determined in accordance with § 421.1282, there shall be deducted in computing the amount of the loan or purchase price the storage charges per bushel as shown in the following table unless written evidence has been submitted with the warehouse receipt that all warehouse charges, except receiving and loading out charges, have been prepaid through February 29, 1956, or April 30, 1956, the applicable date to be determined in accordance with § 421.1282:

Amount of deduction (cents per bushel)	For States having a maturity date not later than April 30, 1956; date of deposit (all dates inclusive)	For States having a maturity date not later than Feb. 29, 1956; date of deposit (all dates inclusive)
11	Prior to May 17, 1955	
10	May 17–June 25, 1955	
9	June 26–Aug. 4, 1955	Prior to June 5, 1955.
8	Aug. 5–Sept. 8, 1955	June 5–July 9, 1955.
7	Sept. 9–Oct. 8, 1955	July 10–Aug. 8, 1955.
6	Oct. 9–Nov. 7, 1955	Aug. 9–Sept. 7, 1955.
5	Nov. 8–Dec. 7, 1955	Sept. 8–Oct. 7, 1955.
4	Dec. 8, 1955–Jan. 6, 1956	Oct. 8–Nov. 6, 1955.
3	Jan. 7–Feb. 5, 1956	Nov. 7–Dec. 6, 1955.
2	Feb. 6–Mar. 6, 1956	Dec. 7, 1955–Jan. 5, 1956.
1	Mar. 7–Apr. 30, 1956	Jan. 6–Feb. 29, 1956.

(b) Warehouse receipts and the oats represented thereby stored in approved warehouses operated by Eastern common carriers may be subject to liens for warehouse elevation (receiving and delivering) and storage charges from the date of deposit at rates approved by the Interstate Commerce Commission. There shall be deducted in computing the loan or purchase price, the amount of the approved tariff rate for storage (not including elevation), which will accumulate from the date of deposit through February 29 or April 30, 1956, whichever date is applicable, to the point of storage as determined in accordance with § 421.1282, unless written evidence is submitted with the warehouse receipt that the storage charges have been prepaid. The county committee shall request the CSS commodity office to determine the amount of such charges. Where the producer presents evidence showing that elevation charges have been prepaid, the amount of the storage charges to be deducted shall be reduced by the amount of the elevation charges prepaid by the producer.

§ 421.1285 *Settlement*—(a) *Settlement value.* (1) In the case of eligible oats delivered to CCC from farm-storage under the loan program, settlement shall be made at the applicable support rate determined in accordance with §§ 421.1283 and 421.1018 (f). The support rate shall be for the grade and quality of the total quantity of oats eligible for delivery. If, upon delivery, the oats under farm-storage loan are of a grade and/or quality for which no support rate has been established, the settlement value shall be computed at the support rate established for the grade and/or quality of the oats placed under loan, less the difference, if any, at the time of delivery, between the market price for the grade and/or quality placed under loan and the market price of the oats delivered, as determined by CCC: *Provided, however,* That if such oats are sold by CCC in order to determine their market price the settlement value shall not be less than such sales price.

(2) In the case of eligible oats delivered to CCC under purchase agreement, settlement shall be made at the applicable support rate determined in accordance with §§ 421.1283 and 421.1018 (f).

(b) *Storage deduction for early delivery.* Whenever farm-stored oats under loan or purchase agreement are delivered to CCC prior to the loan maturity date for the State, a deduction for storage shall be made in accordance with the schedule of deductions for warehouse charges (§ 421.1284) except that no such deduction shall be made if such early delivery is made because the loan is called solely for the convenience of CCC, or if it is determined by CCC at the time of delivery that the oats will be sold rather than stored, or if CCC requires early delivery on an area basis.

(c) *Refund of prepaid handling charges.* In case a warehouseman charges the producer for the receiving or the receiving and loading out charges on oats under loan or purchase agreement stored in a warehouse under the Uniform Grain Storage Agreement, the producer shall, upon delivery of the oats to CCC, be reimbursed or given credit by the county office for such prepaid charges in an amount not to exceed the charges authorized under the Uniform Grain Storage Agreement provided, the producer furnishes to the county committee written evidence signed by the warehouseman that such charges have been paid.

(d) *Track-loading payment.* A track-loading payment of 3 cents per bushel shall be made to the producer on oats delivered to CCC on track at a country point.

Issued this 18th day of May 1955.

[SEAL] WALTER C. BERGER,
Acting Executive Vice President,
Commodity Credit Corporation.

[F. R. Doc. 55-4170; Filed, May 23, 1955; 8:46 a. m.]

[1955 C. C. C. Grain Price Support Bulletin 1, Supplement 1, Rye]

PART 421—GRAINS AND RELATED COMMODITIES

SUBPART—1955 CROP RYE LOAN AND PURCHASE AGREEMENT PROGRAM

A price support program has been announced for the 1955 crop of rye. The 1955 C. C. C. Grain Price Support Bulletin 1 (20 F. R. 3017), issued by the Commodity Credit Corporation and containing regulations of a general nature with respect to price support operations for certain grains and related commodities produced in 1955 is supplemented as follows:

Sec.
421.1376 Purpose.
421.1377 Availability of price support.
421.1378 Eligible rye.
421.1379 Warehouse receipts.
421.1380 Determination of quantity.
421.1381 Determination of quality.
421.1382 Maturity of loans.
421.1383 Support rates.
421.1384 Warehouse charges.
421.1385 Settlement.

AUTHORITY: §§ 421.1376 to 421.1385 issued under sec. 4, 62 Stat. 1070, as amended; 15 U. S. C. 714b. Interpret or apply sec. 5, 62 Stat. 1072, secs. 301, 401, 63 Stat. 1053, 1054, 15 U. S. C. 714c, 7 U. S. C. 1447, 1421.

§ 421.1376 *Purpose.* Sections 421.1376 to 421.1385 state additional specific regulations which, together with the general regulations contained in the 1955 C. C. C.

Grain Price Support Bulletin 1 (§§ 421.1001 to 421.1021) apply to loans and purchase agreements under the 1955-Crop Rye Price Support Program.

§ 421.1377 *Availability of price support*—(a) *Method of support.* Price support will be made available through farm-storage and warehouse-storage loans and through purchase agreements.

(b) *Area.* Farm-storage and warehouse-storage loans and purchase agreements will be available wherever rye is grown in the continental United States, except that farm-storage loans will not be available in areas where the State committee determined that rye cannot be safely stored on the farm.

(c) *Where to apply.* Application for price support should be made at the office of the county committee which keeps the farm-program records for the farm.

(d) *When to apply.* Loans and purchase agreements will be available from the time of harvest through January 31, 1956, and the applicable documents must be signed by the producer and delivered to the county committee not later than such date. Applicable documents include the Producer's Note and Loan Agreement for warehouse-storage loans, the Producer's Note and Supplemental Loan Agreement and the Commodity Chattel Mortgage for farm-storage loans, and the Purchase Agreement for purchase agreements.

(e) *Eligible producer.* An eligible producer shall be an individual, partnership, association, corporation, estate, trust, or other business enterprise or legal entity, and whenever applicable a State, political subdivision of a State, or any agency thereof, producing rye in 1955 as landowner, landlord, tenant, or sharecropper.

§ 421.1378 *Eligible rye.* At the time the rye is placed under loan or delivered under a purchase agreement, it must meet the following requirements:

(a) The rye must have been produced in the continental United States in 1955 by an eligible producer.

(b) (1) The beneficial interest in the rye must be in the eligible producer tendering the rye for loan or for delivery under a purchase agreement, and must always have been in him, or must have been in him and a former producer whom he succeeded before the rye was harvested.

(b) (2) To meet the requirements of succession to a former producer, the rights, responsibilities and interest of the former producer with respect to the farming unit on which the rye was produced shall have been substantially assumed by the person claiming succession. Mere purchase of the crop prior to harvest, without acquisition of any additional interest in the farming unit, shall not constitute succession. The county committee shall determine whether the requirements with respect to succession have been met.

(c) Such rye must be rye grading No. or better, or rye grading No. 3 on the factor of "test weight" only, but otherwise grading No. 2 or better.

(d) The rye must not grade Tough, Light Smutty, Smutty, Light Garlicky, Garlicky, or Weevily, or contain in excess of 1 percent ergot, except that rye represented by warehouse receipts grading Tough will be eligible if the warehouseman certifies on the supplemental certificate or on a statement attached to the warehouse receipt "Rye grading Tough has been processed at the request of the eligible producer, and delivery will be made of the same country-run quality, quantity, and grade not Tough and no lien for processing will be claimed by the warehouseman from Commodity Credit Corporation or any subsequent holder of said warehouse receipt."

(e) If offered as security for a farm-storage loan, the rye must have been stored in the granary at least 30 days prior to its inspection for measurement, sampling, and sealing, unless otherwise approved by the State committee.

§ 421.1379 *Warehouse receipts.* Warehouse receipts, representing rye in approved warehouse storage to be placed under loan or delivered under a purchase agreement, must meet the following requirements of this section:

(a) Warehouse receipts must be issued in the name of the producer, must be properly endorsed in blank so as to vest title in the holder and must be receipts issued on a warehouse approved by CCC under the Uniform Grain Storage Agreement which indicate that the rye is insured, or must be receipts issued on warehouses operated by Eastern common carriers under tariffs approved by the Interstate Commerce Commission for which custodian agreements are in effect.

(b) (1) Each warehouse receipt, or the warehouseman's supplemental certificate (in duplicate), properly identified with the warehouse receipt, must show: (i) Gross weight or bushels, (ii) grade (including special grades), (iii) percentage of ergot for rye containing in excess of 3/10 of 1 percent of ergot, (iv) test weight, (v) dockage, and (vi) any other grading factor(s) when such factor(s) and not test weight determine the grade. The warehouse receipt or supplemental certificate must show whether the rye arrived by rail, truck or barge. In the case of warehouse receipts issued for rye delivered by rail or barge, the grading factors on the warehouse receipt must agree with the inbound inspection certificate for the car or barge when such certificate is issued.

(2) If the warehouseman has processed the rye as provided in § 421.1378 (d), the supplemental certificate must show the numerical grade and the grading factors changed because of the rye being processed. Where the grade and grading factors shown on the supplemental certificate do not agree with the warehouse receipt, the factors shown on the supplemental certificate shall take precedence.

(c) A separate warehouse receipt must be submitted for each grade of rye.

(d) The warehouse receipt may be subject to liens for warehouse charges only to the extent indicated in § 421.1384.

(e) Warehouse receipts representing rye which has been shipped by rail or water from a country shipping point to a designated terminal point or shipped by rail or water from a country shipping point to a storage point and stored in transit to a designated terminal point, must be accompanied by registered freight bills, or by a certificate containing similar information in a form prescribed by the CSS commodity office which shall be signed by the warehouseman and which may be part of the supplemental certificate.

§ 421.1380 *Determination of quantity.* (a) The quantity of rye placed under farm-storage loan may be determined either by weight or by measurement. The quantity of rye placed under a warehouse-storage loan or delivered under a farm-storage loan or under a purchase agreement shall be determined by weight.

(b) When the quantity is determined by weight, a bushel shall be 56 pounds of rye free of dockage. In determining the quantity of sacked rye by weight, a deduction of ¾ of a pound for each sack shall be made.

(c) When the quantity of rye is determined by measurement, a bushel shall be 1.25 cubic feet of rye testing 56 pounds per bushel. The quantity determined shall be the following percentages of the quantity determined for 56-pound rye:

For rye testing:	*Percent*
56 pounds or over	100
55 pounds or over, but less than 56 pounds	98
54 pounds or over, but less than 55 pounds	96
53 pounds or over, but less than 54 pounds	95
52 pounds or over, but less than 53 pounds	92

(d) The percentage of dockage shall be determined and the weight of such dockage shall be deducted from the gross weight of the rye in determining the net quantity available for loan or purchase.

§ 421.1381 *Determination of quality.* (a) The grade, grading factors and all other quality factors shall be determined in accordance with the methods set forth in the Official Grain Standards of the United States for Rye, whether or not such determinations are made on the basis of an official inspection.

(b) The quantity of ergot shall be stated in terms of tenths of one percent and where applicable, the word "Ergoty" shall be added to, and made a part of, the grade designation.

§ 421.1382 *Maturity of loans.* Loans mature on demand but not later than February 29, 1956, in Alabama, Arkansas, Delaware, Florida, Georgia, Kentucky, Louisiana, Maryland, Mississippi, New Jersey, North Carolina, Pennsylvania, South Carolina, Tennessee, Virginia, and West Virginia, and not later than April 30, 1956, in all other States. The maturity date for a loan shall be the maturity date for the State where the rye is stored.

§ 421.1383 *Support rates.* Loans will be made, and rye delivered under purchase agreements will be purchased, at the support rates set forth in this section.

(a) *Basic support rates at designated terminal markets.* (1) Basic support rates per bushel for rye grading No. 2 or better, or grading No. 3 on the basis of test weight only, but otherwise grading No. 2 or better, stored in approved warehouses at the terminal markets listed below are as follows:

Terminal market:	*Rate per bushel*
Omaha, Nebr	$1.37
Sioux City, Iowa	1.37
Duluth, Minn	1.39
Minneapolis, Minn	1.39
Superior, Wis	1.39
Kansas City, Mo	1.40
St. Joseph, Mo	1.40
Chicago, Ill	1.44
Milwaukee, Wis	1.44
Memphis, Tenn	1.45
St. Louis, Mo	1.45
Galveston, Tex	1.48
Houston, Tex	1.48
Astoria, Oreg	1.50
Longview, Wash	1.50
Los Angeles, Calif	1.50
Portland, Oreg	1.50
San Francisco, Calif	1.50
Seattle, Wash	1.50
Tacoma, Wash	1.50
Vancouver, Wash	1.50
Albany, N. Y	1.59
Baltimore, Md	1.59
New York, N. Y	1.59
Norfolk, Va	1.59
Philadelphia, Pa	1.59

(2) Rye eligible for loan or purchase at the support rates shown in the above schedule must have been shipped on a domestic interstate freight rate basis. On any rye shipped at other than the domestic interstate freight rate, the support rate at the designated terminal market shall be reduced by the difference between the rate of freight paid (plus tax) and the domestic interstate freight rate (plus tax).

(3) The support rates established for designated terminal markets will apply to rye which has been shipped by rail or water from a country shipping point to one of the designated terminal markets, as evidenced by paid freight bills duly registered for transit privileges: *Provided*, That in the event the amount of paid in freight is insufficient to guarantee the minimum proportional domestic interstate freight rate from the terminal market, there shall be deducted from the applicable terminal support rate the difference between the amount of freight actually paid in and the amount required to be paid in to guarantee outbound movement at the minimum proportional domestic interstate freight rate.

(4) When shipped by rail or water and stored at any designated terminal market, rye for which neither registered freight bills nor registered freight certificates are presented to guarantee outbound movement at the minimum proportional domestic interstate freight rate shall have a support rate equal to the applicable terminal rate minus 8 cents per bushel.

(5) For rye received by truck and stored at any designated terminal market, the support rate shall be determined by making a deduction from the applicable terminal rate as follows:

Terminal located in:	*Amount of deduction (cents per bushel)*
Area I: Arizona, California, Idaho, Nevada, Oregon, Utah, Washington	12½
Area II: Minnesota, Montana, North Dakota, South Dakota (also Superior, Wis.)	12½
Area III: Colorado, Illinois, Iowa, Kansas, Missouri, Nebraska, Wyoming, Wisconsin (except Superior)	13
Area IV: Arkansas, Connecticut, Delaware, Indiana, Kentucky, Louisiana, Maine, Maryland, Massachusetts, Michigan, New Hampshire, New Jersey, New Mexico, New York, Ohio, Oklahoma, Pennsylvania, Rhode Island, Texas, Vermont, Virginia, West Virginia	14
Area V: Alabama, Florida, Georgia, Mississippi, North Carolina, South Carolina, Tennessee	14

(b) *Support rates for rye in approved warehouse storage at other than designated terminal markets.* (1) The support rate for rye stored in approved warehouses (other than those situated in the designated terminal markets) which is shipped by rail or water, shall be determined by deducting from the appropriate designated terminal market rate an amount equal to the transit balance, if any (plus tax), of the through-freight rate from point of origin for such rye to such terminal market: *Provided*, That on any rye shipped at other than the domestic interstate freight rate the support rate shall be further reduced by the difference between the rate of freight paid (plus tax) and the domestic interstate freight rate (plus tax) from the point of origin of such rye to the point of storage: *And provided further*, That in the case of rye stored at any railroad transit point, taking a penalty by reason of out-of-line movement or for any other reason, to the appropriate designated market, there shall be added to such transit balance an amount equal to any out-of-line costs or other costs incurred in storing rye in such position.

(2) The warehouse receipts must be accompanied by the original paid freight bills or certificates of the warehouseman and other required documents as set forth in § 421.1379.

(c) *Basic county support rates.* The following basic county support rates per bushel are established for rye grading No. 2 or better, or rye grading No. 3 on the factor of test weight only, but otherwise grading No. 2 or better.

Both farm-storage and country warehouse-storage loans, except as otherwise provided in paragraph (b) of this section, will be made at the support rate established for the county in which the rye is stored.

If two or more approved warehouses are located at the same or adjoining towns, villages, or cities having the same domestic interstate freight rate, such towns, villages, or cities shall be deemed to constitute one shipping point, and the same support rate shall apply even though such warehouses are not all located in the same county. Such support rate shall be the highest support rate of the counties involved.

(2) Where the State Committee determines that State or district weed control laws affect the rye crop, the support rate will be 10 cents below the applicable county support rate set forth in the schedule in this paragraph. If, upon delivery of the rye to CCC the producer supplies a certificate indicating that the rye complies with the weed control laws, the producer will be credited with the amount of the differential in determining the settlement value.

(d) *Discount for ergot.* Rye containing more than 3/10 of 1 percent, but not more than 1 percent ergot, shall be discounted 1 cent per bushel for each 1/10 of 1 percent in excess of 3/10 of 1 percent ergot.

§ 421.1384 *Warehouse charges.* (a) Warehouse receipts and the rye represented thereby stored in approved warehouses operating under the Uniform Grain Storage Agreement may be subject to liens for warehouse handling and storage charges not to exceed the Uniform Grain Storage Agreement rates from the date the rye is deposited in the warehouse for storage. Where the date of deposit (the date of the warehouse receipt if the date of deposit is not shown) on warehouse receipts representing rye stored in warehouses operating under the Uniform Grain Storage Agreement is on or before February 29 or April 30, 1956, the applicable date to be determined in accordance with § 421.1382, there shall be deducted in computing the amount of the loan or purchase price the storage charges per bushel as shown in the following table unless written evidence is submitted with the warehouse receipt that all warehouse charges, except receiving and loading out charges have been prepaid through February 29 or April 30, 1956, the applicable maturity date to be determined in accordance with § 421.1382.

[1] Area I—Includes: Arizona, California, Idaho, Nevada, Oregon, Utah, Washington.
[2] Area II—Includes: Minnesota, Montana, North Dakota, South Dakota (also Superior, Wisconsin).
[3] Area III—Includes: Colorado, Illinois, Iowa, Kansas, Missouri, Nebraska, Wyoming, Wisconsin (except Superior).
[4] Area IV—Includes: Arkansas, Connecticut, Delaware, Indiana, Kentucky, Louisiana, Maine, Maryland, Massachusetts, Michigan, New Hampshire, New Jersey, New Mexico, New York, Ohio, Oklahoma, Pennsylvania, Rhode Island, Texas, Vermont, Virginia, West Virginia.
[5] Area V—Includes: Alabama, Florida, Georgia, Mississippi, North Carolina, South Carolina, Tennessee.

(b) Warehouse receipts and the rye represented thereby stored in approved warehouses operated by Eastern common carriers may be subject to liens for warehouse elevation (receiving and delivering) and storage charges from the date of deposit at rates approved by the Interstate Commerce Commission. There shall be deducted in computing the loan or purchase price the amount of the approved tariff rate for storage (not including elevation), which will accumulate from the date of deposit through February 29 or April 30, 1956, whichever date is applicable to the point of storage as determined in accordance with § 421.1382, unless written evidence is submitted with the warehouse receipt that the storage charges have been prepaid. The county committee shall request the CSS commodity office to determine the amount of such charges. Where the producer presents evidence showing that elevation charges have been prepaid, the amount of the storage charges to be deducted shall be reduced by the amount of the elevation charges prepaid by the producer.

§ 421.1385 *Settlement*—(a) *Settlement value.* (1) In the case of eligible rye delivered to CCC from farm-storage under the loan program, settlement shall be made at the applicable support rate determined in accordance with §§ 421.1383 and 421.1018 (e). The support rate shall be for the grade and quality of the total quantity of rye eligible for delivery. If, upon delivery, the rye under farm-storage loan is of a grade and/or quality for which no support rate has been established, the settlement value shall be computed at the support rate established for the grade and/or quality of the rye placed under loan, less the difference, if any, at the time of delivery, between the market price for the grade and/or quality placed under loan and the market price of the rye delivered, as determined by CCC: *Provided, however,* That if such rye is sold by CCC in order to determine its market price the settlement value shall not be less than such sales price.

(2) In the case of eligible rye delivered to CCC under purchase agreement, settlement shall be made at the applicable support rate determined in accordance with § 421.1383 and § 421.1018 (e).

(b) *Storage deduction for early delivery.* Whenever farm-stored rye under loan or purchase agreement is delivered to CCC prior to the loan maturity date for the State, a deduction for storage shall be made in accordance with the schedule of deductions for warehouse charges (§ 421.1384), except that no such deduction shall be made if such early delivery is made because the loan is called solely for the convenience of CCC, or it is determined by CCC at the time of delivery that the rye will be sold rather than stored, or if CCC requires early delivery on an area basis.

(c) *Refund of prepaid handling charges.* In case a warehouseman charges the producer for the receiving or the receiving and loading out charges on rye under loan or purchase agreement, stored in a warehouse under the Uniform Grain Storage Agreement, the producer shall, upon delivery of the rye to CCC, be reimbursed or given credit by the county office for such prepaid charges in an amount not to exceed the charges authorized under the Uniform Grain Storage Agreement provided, the producer furnishes to the county committee written evidence signed by the warehouseman that such charges have been paid.

(d) *Track-loading payment.* A track-loading payment of 3 cents per bushel shall be made to the producer on rye delivered to CCC on track at a country point.

Issued this 18th day of May 1955.

[SEAL] WALTER C. BERGER,
Acting Executive Vice President,
Commodity Credit Corporation.

[F. R. Doc. 55-4168; Filed, May 23, 1955; 8:46 a. m.]

[1955 C. C. C. Grain Price Support Bulletin 1, Supplement 1, Flaxseed]

PART 421—GRAINS AND RELATED COMMODITIES

SUBPART—1955-CROP FLAXSEED LOAN AND PURCHASE AGREEMENT PROGRAM

A price support program has been announced for the 1955 crop of flaxseed. The 1955 C. C. C. Grain Price Support Bulletin 1 (20 F. R. 3017), issued by the Commodity Credit Corporation and containing the regulations of a general nature with respect to price support operations for certain grains and other commodities produced in 1955 is supplemented as follows:

Sec.
421.1476 Purpose.
421.1477 Availability of price support.
421.1478 Eligible flaxseed.
421.1479 Warehouse receipts.
421.1480 Determination of quantity.
421.1481 Determination of quality.
421.1482 Maturity of loans.
421.1483 Support rates.
421.1484 Warehouse charges.
421.1485 Settlement.

AUTHORITY: §§ 421.1476 to 421.1485 issued under sec. 4, 62 Stat. 1070, as amended; 15 U. S. C. 714b. Interpret or apply sec. 5, 62 Stat. 1072; secs. 301, 401, 63 Stat. 1054; 15 U. S. C. 714c, 7 U. S. C. 1447, 1421.

§ 421.1476 *Purpose.* Sections 421.1476 to 421.1485 state additional specific regulations which, together with the general regulations contained in the 1955 C. C. C. Grain Price Support Bulletin 1 (§§ 421.1001 to 421.1021), apply to loans and purchase agreements under the 1955-Crop Flaxseed Price Support Program.

§ 421.1477 *Availability of price support*—(a) *Method of support.* Price support will be made available through farm-storage and warehouse-storage loans and through purchase agreements.

(b) *Area.* Farm-storage and warehouse-storage loans and purchase agreements will be available wherever flaxseed is grown in the continental United States, except in Texas counties designated under the 1955-Texas Flaxseed Purchase Program (§§ 421.1526 to 421.1539). Farm-storage loans will not be available in areas where the State committee determines that flaxseed cannot be safely stored on the farm.

(c) *Where to apply.* Application for price support should be made at the office of the county committee which keeps the farm-program records for the farm.

(d) *When to apply.* Loans and purchase agreements will be available from the time of harvest through October 31, 1955, in Arizona and California, and from the time of harvest through January 31, 1956, in all other States; the applicable documents must be signed by the producer and delivered to the county committee not later than such final dates. Applicable documents include the Producer's Note and Loan Agreement for warehouse-storage loans, the Producer's Note and Supplemental Loan Agreement and the Commodity Chattel Mortgage for farm-storage loans, and the Purchase Agreement for purchase agreements.

(e) *Eligible producer.* An eligible producer shall be an individual, partnership, association, corporation, estate, trust, or other business enterprise, or legal entity, and wherever applicable, a State, political subdivision of a State, or any agency thereof producing flaxseed in 1955 as landowner, landlord, tenant, or sharecropper.

§ 421.1478 *Eligible flaxseed.* At the time the flaxseed is placed under loan or delivered under a purchase agreement, it must meet the following requirements:

(a) The flaxseed must have been produced in the continental United States (excluding the Texas counties designated under the 1955-Texas Flaxseed Purchase Program) in 1955 by an eligible producer.

(b) (1) The beneficial interest in the flaxseed must be in the producer tendering the flaxseed for loan or for delivery under a purchase agreement, and must always have been in him or must have been in him and a former producer whom he succeeded before the flaxseed was harvested.

(2) To meet the requirements of succession to a former producer, the rights, responsibilities and interest of the former producer with respect to the farming unit on which the flaxseed was produced shall have been substantially assumed by the person claiming succession. Mere purchase of the crop prior to harvest, without acquisition of any additional interest in the farming unit, shall not constitute succession. The county committee shall determine whether the requirements with respect to succession have been met.

(c) The flaxseed must grade No. 1 or No. 2.

(d) If offered as security for a farm-storage loan, the flaxseed must have been stored in the bin or granary at least 30 days prior to its inspection, measurement, sampling, and sealing unless otherwise approved by the State committee.

§ 421.1479 *Warehouse receipts.* Warehouse receipts, representing flaxseed in approved warehouse storage to be placed under loan or delivered under a purchase agreement, must meet the requirements below:

(a) Warehouse receipts must be issued in the name of the producer, must be properly endorsed in blank so as to vest title in the holder, and must be receipts issued on a warehouse approved by CCC under the Uniform Grain Storage Agreement which indicate that the flaxseed is insured, or must be issued on warehouses operated by Eastern common carriers under tariffs approved by the Interstate Commerce Commission for which custodian agreements are in effect.

(b) Each warehouse receipt or the be submitted for each grade of flaxseed. warehouseman's supplemental certificate (in duplicate), properly identified with the warehouse receipt, must show: (1) Gross weight or bushels, (2) grade, (3) test weight, (4) dockage, and (5) percentage of damage when such factor, and not test weight, determines the grade. The warehouse receipt or the warehouseman's supplemental certificate must show whether the flaxseed arrived by rail, truck or barge. In the case of flaxseed delivered by rail or barge, the grading factors on the warehouse receipt or warehouseman's supplemental certificate must agree with the inbound inspection certificate for the car or barge if such certificate is issued.

(c) A separate warehouse receipt must be submitted for each grade of flaxseed.

(d) The warehouse receipt may be subject to liens for warehouse charges only to the extent indicated in § 421.1484.

(e) Warehouse receipts representing flaxseed which has been shipped by rail or water from a country shipping point to a designated terminal point, or shipped by rail or water from a country shipping point and stored in transit to a designated terminal point, must be accompanied by registered freight bills, or by a certificate containing similar information in a form prescribed by the CSS commodity office which shall be signed by the warehouseman and which may be part of the supplemental certificate.

§ 421.1480 *Determination of quantity.* (a) The quantity of flaxseed placed under farm-storage loan may be determined either by weight or by measurement. The quantity of flaxseed placed under warehouse-storage loan or delivered under a farm-storage loan or under a purchase agreement shall be determined by weight.

(b) When the quantity is determined by weight, a bushel shall be 56 pounds of flaxseed free of dockage. In determining the quantity of sacked flaxseed by weight, a deduction of ¾ of a pound for each sack shall be made.

(c) When the quantity of flaxseed is determined by measurement, a bushel shall be 1.25 cubic feet of flaxseed testing 56 pounds per bushel. The quantity determined shall be the following percentages of the quantity determined for 56-pound flaxseed:

For flaxseed testing:	Percentage
56 pounds or over	100
55 pounds or over, but less than 56 pounds	98
54 pounds or over, but less than 55 pounds	96
53 pounds or over, but less than 54 pounds	94
52 pounds or over, but less than 53 pounds	92
51 pounds or over, but less than 52 pounds	90
50 pounds or over, but less than 51 pounds	88
49 pounds or over, but less than 50 pounds	85
48 pounds or over, but less than 49 pounds	83
47 pounds or over, but less than 48 pounds	81

(d) The percentage of dockage shall be determined and the weight of such dockage shall be deducted from the gross weight of the flaxseed in determining the net quantity available for loan or purchase.

§ 421.1481 *Determination of quality.* The grade, grading factors, and all other quality factors shall be determined in accordance with the method set forth in the Official Grain Standards of the United States for Flaxseed, whether or not such determinations are made on the basis of an official inspection.

§ 421.1482 *Maturity of loans.* Loans mature on demand but not later than January 31, 1956, on flaxseed stored in Arizona and California, and not later than April 30, 1956, on flaxseed stored in all other States.

§ 421.1483 *Support rates.* Basic support rates for flaxseed placed under loan or delivered under a purchase agreement will be set forth in this section.

(a) *Basic support rates at designated terminal markets.* (1) Basic support rates per bushel for No. 1 flaxseed stored in approved warehouses at terminal markets listed below are as follows:

Terminal market:	Rate per bushel for No. 1
Los Angeles, Calif	$3.44
San Francisco, Calif	3.38
Chicago, Ill	3.19
Duluth, Minneapolis, and St. Paul, Minn	3.19
Superior, Wis	3.19
Fredonia, Kans	2.94
Corpus Christi and Houston, Tex	2.94

(2) Flaxseed eligible for loan or purchase at the support rates shown in the above schedule must have been shipped on a domestic interstate freight rate basis. On any flaxseed shipped at other than the domestic interstate freight rate, the support rate at the designated terminal market shall be reduced by the difference between the rate of the freight paid (plus tax) and the domestic interstate freight rate (plus tax).

(3) The support rates established for the designated terminal markets apply to flaxseed which has been shipped by rail or water from a country shipping point to one of the designated terminal markets, as evidenced by paid freight bills duly registered for transit privileges: *Provided,* That in the event the amount of paid-in freight is insufficient to guarantee the minimum proportional domestic interstate freight rate from the terminal market, there shall be deducted from the applicable terminal support rate the difference between the amount of freight actually paid in and the amount required to be paid in to guarantee outbound movement at the minimum proportional domestic interstate freight rate.

(4) When shipped by rail or water and stored at any designated terminal market, flaxseed for which neither registered freight bills nor registered freight certificates are presented to guarantee outbound movement at the minimum proportional domestic interstate freight rate, shall have a support rate equal to the terminal rate minus 8 cents per bushel.

(5) For flaxseed received by truck and stored at any designated terminal market, the support rate shall be the terminal rate minus 12½ cents per bushel.

(b) *Support rates for flaxseed in approved warehouse-storage at other than designated terminal markets.* (1) The support rate for flaxseed stored in approved warehouses (other than those situated in the designated terminal markets) which is shipped by rail or water, shall be determined by deducting from the appropriate designated terminal market rate an amount equal to the transit balance, if any (plus tax), of the through-freight rate from point of origin for such flaxseed to such terminal market: *Provided,* That on any flaxseed shipped at other than the domestic interstate freight rate, the support rate shall be further reduced by the difference between the rate of the freight paid (plus tax) and the domestic interstate freight rate (plus tax) from the point of origin of such flaxseed to the point of storage: *And provided further,* That in the case of flaxseed stored at any railroad transit point taking a penalty by reason of out-of-line movement to the appropriated designated market, or for any other reason, there shall be added to such transit balance an amount equal to any out-of-line costs or other costs incurred in storing flaxseed in such position.

(2) The warehouse receipts must be accompanied by the original paid freight bills or certificates of the warehouseman and other required documents as set forth in § 421.1479.

(c) *County support rates.* (1) The basic county support rates for No. 1 flaxseed are as follows: (Farm-storage loans and country warehouse-storage loans, except as otherwise provided in paragraph (b) of this section, will be based on the support rate established for the county in which the flaxseed is stored. If two or more approved warehouses are located in the same or adjoining towns, villages, or cities having the same interstate freight rate, such towns, villages, or cities shall be deemed to constitute one shipping point and the same support rate shall apply even though such warehouses are not all located in the same county. Such support rate shall be the highest support rate of the counties involved.)

(2) Where the State committee determines that State or district weed control laws affect the flaxseed crop, the support rate will be 15 cents below the applicable county support rate set forth in the schedule under subparagraph (1) of this paragraph. If upon delivery of the flaxseed to CCC, the producer supplies a certificate indicating that the flaxseed complies with the weed control laws, the producer will be credited with the amount of the differential in determining the settlement value.

(d) *Discount.* The support rate for No. 2 flaxseed shall be 6 cents per bushel less than the support rate for No. 1 flaxseed.

§ 421.1484 *Warehouse charges.* (a) Warehouse receipts and the flaxseed represented thereby stored in approved warehouses operating under the Uniform Grain Storage Agreement may be subject to liens for warehouse handling and storage charges at not to exceed the Uniform Grain Storage Agreement rates from the date the flaxseed is deposited in the warehouse for storage.

(1) In Arizona and California, where the date of deposit (the date of the warehouse receipt if the date of deposit is not shown) on warehouse receipts representing flaxseed stored in warehouses operating under the Uniform Grain Storage Agreement is on or before January 31, 1956, there shall be deducted in computing the loan rate or purchase price the storage charges per bushel as shown in the following table, unless written evidence has been submitted with the warehouse receipt that all warehouse charges except receiving and loading out charges have been prepaid through the maturity date, January 31, 1956.

Date of deposit (all dates inclusive):	Amount of deduction (cents per bushel)
Prior to May 17, 1955	13
May 17–June 5, 1955	12
June 6–June 25, 1955	11
June 26–July 15, 1955	10
July 16–Aug. 4, 1955	9
Aug. 5–Aug. 24, 1955	8
Aug. 25–Sept. 13, 1955	7
Sept. 14–Oct. 3, 1955	6

Dec. 3–Dec. 22, 1955	2
Dec. 23, 1955–Jan. 31, 1956	1

(2) In all other States, where the date of deposit (the date of the warehouse receipt if the date of deposit is not shown) on warehouse receipts representing flaxseed stored in warehouses operating under the Uniform Grain Storage Agreement is on or before April 30, 1956, there shall be deducted in computing the loan or purchase price the storage charges per bushel as shown in the following table, unless written evidence has been submitted with the warehouse receipt that all warehouse charges except receiving and loading out charges have been prepaid through the maturity date, April 30, 1956.

Date of deposit (all dates inclusive):	Amount of deduction (cents per bushel)
Prior to May 27, 1955	16
May 27–June 25, 1955	15
June 26–July 25, 1955	14
July 26–Aug. 14, 1955	13
Aug. 15–Sept. 3, 1955	12
Sept. 4–Sept. 23, 1955	11
Sept. 24–Oct. 13, 1955	10

Date of deposit (all dates inclusive):	Amount of deduction (cents per bushel)
Oct. 14–Nov. 2, 1955	9
Nov. 3–Nov. 22, 1955	8
Nov. 23–Dec. 12, 1955	7
Dec. 13, 1955–Jan. 1, 1956	6
Jan. 2–Jan. 21, 1956	5
Jan. 22–Feb. 10, 1956	4
Feb. 11–Mar. 1, 1956	3
Mar. 2–Mar. 21, 1956	2
Mar. 22–Apr. 30, 1956	1

(b) Warehouse receipts and the flaxseed represented thereby stored in approved warehouses operated by Eastern common carriers may be subject to liens for warehouse elevation (receiving and delivering) and storage charges from the date of deposit at rates approved by the Interstate Commerce Commission. There shall be deducted in computing the loan rate or in computing the purchase price the amount of the approved tariff rate for storage (not including elevation), which will accumulate from the date of deposit through the program maturity date, unless written evidence has been submitted with the warehouse receipt that the storage charges have been prepaid. The county committee shall request the CSS commodity office to determine the amount of such charges. Where the producer presents evidence showing that elevation charges have been prepaid, the amount of the storage charges to be deducted shall be reduced by the amount of the elevation charges prepaid by the producer.

§ 421.1485 *Settlement*—(a) *Settlement value.* (1) In the case of eligible flaxseed delivered to CCC from farm storage under the loan program, settlement shall be made at the applicable support rate determined in accordance with §§ 421.1483 and 421.1018 (e). The support rate shall be for the grade and quality of the total quantity of flaxseed eligible for delivery.

(2) If, upon delivery, the flaxseed under farm-storage loan is of a grade and/or quality for which no support rate has been established, the settlement value shall be computed at the support rate established for the grade and/or quality placed under loan, less the difference, if any, at the time of delivery, between the market price for the grade and/or quality placed under loan and the market price of the flaxseed delivered, as determined by CCC: *Provided, however,* That if such flaxseed is sold by CCC in order to determine its market price, the settlement value shall not be less than such sales price.

(3) In the case of eligible flaxseed delivered to CCC under purchase agreement, settlement shall be made at the applicable support rate determined in accordance with §§ 421.1483 and 421.1018 (e).

(b) *Storage deduction for early delivery.* Whenever farm-stored flaxseed under loan or purchase agreement is delivered to CCC prior to January 31, 1956, in Arizona and California, or prior to April 30, 1956, in all other States, a deduction for storage shall be made in accordance with the schedule of deductions for warehouse charges (§ 421.1484), except that no such deductions shall be made if such early delivery is made because the loan is called solely for the convenience of CCC, or if it is determined by CCC at the time of delivery that the flaxseed will be sold rather than stored, or if CCC requires early delivery on an area basis.

(c) *Refund of prepaid handling charges.* In case a warehouseman charges the producer for the receiving or the receiving and loading out charges on flaxseed under loan or purchase agreement stored in a warehouse under the Uniform Grain Storage Agreement, the producer shall, upon delivery of the flaxseed to CCC, be reimbursed or given credit by the county office for such prepaid charges in an amount not to exceed the charges authorized under the Uniform Grain Storage Agreement, provided, the producer furnishes to the county committee written evidence signed by the warehouseman that such charges have been paid.

(d) *Track-loading payment.* A track-loading payment of 3 cents per bushel will be made to the producer on flaxseed delivered to CCC on track at a country point.

Issued this 18th day of May 1955.

[SEAL] WALTER C. BERGER,
Acting Executive Vice President,
Commodity Credit Corporation.

[F. R. Doc. 55-4169; Filed, May 23, 1955; 8:46 a. m.]

TITLE 38—PENSIONS, BONUSES, AND VETERANS' RELIEF

Chapter I—Veterans Administration

PART 36—SERVICEMEN'S READJUSTMENT ACT OF 1944

SUBPART A—TITLE III; LOAN GUARANTY

MISCELLANEOUS AMENDMENTS

1. Section 36.4380 is revised to read as follows:

§ 36.4380 *Establishment of Loan Guaranty Committee on Waivers and Compromises.* There is established in central office and in each regional office a Loan Guaranty Committee on Waivers and Compromises. The committee will be comprised of three members, one of whom is to be designated as chairman. The regional office committee shall be appointed by and function under the jurisdiction of the regional Manager. The central office committee shall be appointed by the Administrator and function under the jurisdiction of the Deputy Administrator for Veterans Benefits.

2. In § 36.4381, the headnote and paragraph (a) and (d) are amended to read as follows:

§ 36.4381 *Jurisdiction of regional office Loan Guaranty Committee on Waivers and Compromises.* (a) The regional office committee will have original jurisdiction to adjudicate all cases in its area involving an indebtedness by a veteran to the United States of $2,500 or less, resulting from payment of the gratuity, or as the result of a direct loan, or the guaranty or insurance of a loan under Title III of the Servicemen's Readjustment Act of 1944 (Public Law 346, 78th Congress), as amended (section 694, et seq., 38 U. S. C.).

* * * * *

(d) The regional office committee, subject to current Veterans Administration regulation and instructions, shall have jurisdiction to authorize the release of any right, title, claim, lien, or demand, however acquired, against any person obligated on a loan guaranteed, insured, or made by the Veterans Administration pursuant to the provisions of Title III of the Servicemen's Readjustment Act of 1944, as amended.

3. In § 36.4382, paragraphs (a) (3), (c), and (d) are amended to read as follows:

§ 36.4382 *Jurisdiction of central office Loan Guaranty Committee on Waivers and Compromises.* (a) * * *

(3) All cases in which an appeal has been filed from the decision of the regional office Loan Guaranty Committee involving an indebtedness by the veteran to the United States resulting from a direct loan or the guaranty or insurance of a loan—under Title III of the Servicemen's Readjustment Act of 1944, as amended.

* * * * *

(c) The decision of the majority members of the central office committee in any matter within its jurisdiction shall, subject to an administrative appeal, by the Deputy Administrator for Veterans Benefits or the General Counsel, be final and conclusive. However, the committee may review and modify its decision upon the submission of new and material evidence. An administrative appeal must be filed by the Deputy Administrator for Veterans Benefits or the General Counsel within 90 days from the date of the decision of the central office committee.

(d) The central office committee, subject to current Veterans Administration regulations and instructions, shall have jurisdiction to authorize the release of any right, title, claim, lien, or demand, however acquired, against any person obligated on a loan guaranteed, insured, or made by the Veterans Administration pursuant to the provisions of Title III of the Servicemen's Readjustment Act of 1944, as amended.

4. Section 36.4383 is revised to read as follows:

§ 36.4383 *Authority to execute necessary documents.* Each of the employees enumerated in §§ 36.4342 (b) and 36.4520 (b) is authorized upon the advice of the General Counsel or the Chief Attorney of the regional office to execute on behalf of the Administrator of Veterans Affairs releases or other documents necessary to effectuate a decision of the central office or a regional office Loan Guaranty Committee on Waivers and Compromises.

5. In § 36.4384, paragraphs (a), (c), and (d) (4) are amended to read as follows:

§ 36.4384 *Principles to be followed by Loan Guaranty Committee for Waivers and Compromises.* (a) In determining

whether an indebtedness or any part thereof shall be waived, the general equitable principles of section 28, World War Veterans' Act, 1924 (Public Law 242, 68th Congress), as amended (38 U. S. C. 453), as explained in §§ 5.1 through 5.3 of this chapter, will be applied. The indebtedness may be waived in whole or in part: (1) When the veteran was not at fault in the creation of indebtedness which is being considered by the committee, and (2) where recovery of the whole or the part concerned (i) would defeat the purposes of the benefits otherwise authorized under the laws administered by the Veterans Administration, or (ii) would be against equity and good conscience.

* * * * * *

(c) In determining whether recovery in whole or in part from other Veterans Administration benefits would defeat the purpose of benefits otherwise authorized under the laws administered by the Veterans Administration, the real purpose of the benefit is the basic criterion. Thus, while recovery in whole or in part might defeat benefits, it might not defeat the purpose of such benefits. The primary purpose of most of the benefits under the laws administered by the Veterans Administration is to furnish a measure of support, or means of obtaining a support, for veterans and their dependents. (See § 5.3 (d) of this chapter.)

(d) * * *

(4) If the debt, or a part thereof, is due to the fault of the Veterans Administration, the veteran being without fault, it would be inequitable to require payment thereof. (See §§ 5.1 and 5.3 (e) of this chapter.)

* * * * * *

(Sec. 504, 58 Stat. 293, as amended; 38 U. S. C. 694d)

This regulation is effective May 24, 1955.

[SEAL] J. C. PALMER,
Assistant Deputy Administrator.

TITLE 43—PUBLIC LANDS: INTERIOR

Chapter I—Bureau of Land Management, Department of the Interior

Subchapter F—Color of Title and Riparian Claims

[Circular No. 1910]

PART 141—COLOR OF TITLE AND RIPARIAN CLAIMS APPLICABLE TO PARTICULAR STATES

ERRONEOUSLY MEANDERED LANDS, WISCONSIN

Sections 141.19 to 141.24 are completely revised to read as follows:

Sec.
141.19 Statutory authority.
141.20 Qualifications of applicants.
141.21 Applications.
141.22 Publication and protests.
141.23 Price of land; other conditions.

AUTHORITY: §§ 141.19 to 141.23 issued under R. S. 2478; 43 U. S. C. 1201.

§ 141.19 *Statutory authority.* The act of August 24, 1954 (68 Stat. 789) directs the Secretary of the Interior to issue patents for public lands which lie between the meander line of an inland lake or river in Wisconsin as originally surveyed and the meander line of that lake or river as subsequently resurveyed, under certain terms and conditions. The act of February 27, 1925 (43 Stat. 1013; 43 U. S. C. 994), authorized the Secretary of the Interior to sell such public lands under certain other terms and conditions. These acts are cited as "the act of 1954" and "the act of 1925," respectively, in §§ 141.20 to 141.23.

§ 141.20 *Qualifications of applicants.* (a) To qualify under the act of 1954, a person, or his predecessors in interest, (1) must have been issued, prior to January 21, 1953, a patent for lands lying along the meander line as originally determined, and (2) must have held in good faith and in peaceful, adverse possession since the date of issuance of said patent adjoining public lands lying between the original meander line and the resurveyed meander line.

(b) To qualify under the act of 1925, a person must either (1) be the owner in good faith of land, acquired prior to February 27, 1925, shown by the official public land surveys to be bounded in whole or in part by such public lands or (2) be a citizen of the United States who, in good faith under color of title or claiming as a riparian owner, had, prior to February 27, 1925, placed valuable improvements upon or reduced to cultivation any of such public lands.

§ 141.21 *Applications.* (a) Claimants under the act of 1925 have a preferred right of application for a period of 90 days from the date of filing of the plat of survey of lands claimed by them. Applications for public lands under the act of 1954 must be filed within one year after August 24, 1954, or one year from the date of the official plat or resurvey, whichever is later. All applications must be filed in duplicate with the Bureau of Land Management, Washington 25, D. C.

(b) Every application must be accompanied by a filing fee of $10, which is not returnable.

(c) No particular form is required but the applications must be typewritten or in legible handwriting and must contain the following information: [1]

(1) The name and post office address of the applicant.

(2) The legal description and acreage of the public lands claimed or desired.

(3) The legal description of the lands owned by the applicant, if any, adjoining the public lands claimed or desired. If the claim is based on ownership of such adjoining lands, the application must be accompanied by a certificate from the proper county official or by an abstractor, showing the date of acquisition of the lands by the applicant and that the applicant owns the lands in fee simple as of the date of application.

(4) If the applicant is a color-of-title applicant under the act of 1925, a statement whether or not the applicant is a citizen of the United States.

(5) If the application is based on color of title or riparian claim under the act of 1925, a statement fully disclosing the facts of the matter; or if the application is based on peaceful, adverse possession under the act of 1954, a similar statement showing peaceful, adverse possession by the applicant, or his predecessors in interest, since the issuance of the patent to the lands adjoining the claimed lands.

(6) A statement showing the improvements, if any, placed on the public lands applied for including their location, nature, present value, date of installation, and the names of the person or persons who installed them.

(7) A statement showing the cultivation, if any, of the lands applied for, including the nature, location, and dates of such cultivation.

(8) The names and post office addresses of any adverse claimants, settlers, or occupants of the public lands applied for or claimed.

(9) The names and post office addresses of at least two disinterested persons having knowledge of the facts relating to the applicant's claim.

(10) A citation of the act under which the application is made.

§ 141.22 *Publication and protests* (a) The applicant will be required to publish once a week for five consecutive weeks in accordance with § 106.18 of this chapter, at his expense, in a designated newspaper and in a designated form, a notice allowing all persons claiming the land adversely to file with the Bureau of Land Management, Washington 25, D. C., their objections to issuance of patent under the application. A protestant must serve on the applicant a copy of the objections and furnish evidence of such service.

(b) The applicant must file a statement of the publisher, accompanied by a copy of the notice published, showing that publication has been had for the required time.

§ 141.23 *Price of land; other conditions.* (a) Persons entitled to a patent under the act of 1954 must, within 30 days after request therefor, pay, under the same terms and conditions, the same price per acre as was paid for the land included in their original patent.

(b) Persons entitled to a patent under the act of 1925, within 30 days after request therefor, must pay the appraised price of the lands, which price will be the value of the lands as of the date of appraisal, exclusive of any increased value resulting from the development or improvement of the lands for agricultural purposes by the applicant or his predecessors in interest but inclusive of the stumpage value of any timber cut or removed by them.

The record keeping or reporting requirements of this regulation have been approved by the Bureau of the Budget in accordance with the Federal Reports Act of 1952.

DOUGLAS MCKAY,
Secretary of the Interior.

MAY 17, 1955.

TITLE 47—TELECOMMUNICATION

Chapter I—Federal Communications Commission

[FCC 55-580; Rules Amdts. 7-15, 8-22]

PART 7—STATIONS ON LAND IN THE MARITIME SERVICES

PART 8—STATIONS ON SHIPBOARD IN THE MARITIME SERVICES

FREQUENCIES AVAILABLE FOR TELEGRAPHY IN CERTAIN BAND

In the matter of amendment of Parts 7 and 8 of the Commission's rules to make frequencies for telegraphy in the band 2035–2107 kc available to ship and coast stations without restriction.

At a session of the Federal Communications Commission held at its offices in Washington, D. C., on the 18th day of May 1955;

The Commission having under consideration the above-captioned matter; and

It appearing that the Commission's rules presently provide that frequencies in the coast telegraph band 2035–2065 kc and the ship telegraph band 2065–2107 kc are available for assignment to coast and ship stations, respectively, on a "day only" basis, subject to the condition that harmful interference will not be caused to stations which, in the discretion of the Commission, may have priority on the frequency involved; and

It further appearing that these frequency bands have been cleared to permit full time use beginning June 1, 1955, and no harmful interference is expected to be caused to other stations by the full time use of frequencies within the respective bands and, for these reasons, the "day only" and non-interference conditions may now be deleted from the rules; and

It further appearing that since all frequency conflicts with respect to these frequency bands have been resolved, the amendments herein ordered merely bring the rules into conformity with the operational use intended under the frequency assignment plan, and therefore, compliance with the public notice and rule making procedures prescribed by sections 4 (a) and (b) of the Administrative Procedure Act is unnecessary; and

It further appearing that the amendments herein ordered relieve existing restrictions, and, therefore, compliance with section 4 (c) of the Administrative Procedure Act is not required; and

It further appearing that the public interest, convenience and necessity will be served by the amendments herein ordered, the authority for which is contained in sections 303 (c) (f) and (r) of the Communications Act of 1934, as amended;

It is ordered, That, effective June 1, 1955, Parts 7 and 8 of the Commission's rules are amended as set forth below.

(Sec. 4, 48 Stat. 1066, as amended; 47 U. S. C. 154. Interprets or applies sec. 303, 48 Stat. 1082; 47 U. S. C. 303)

Released: May 19, 1955.

FEDERAL COMMUNICATIONS COMMISSION,
[SEAL] MARY JANE MORRIS,
Secretary.

A. Part 7 is amended as follows:

1. Section 7.206 is amended by deleting the text of paragraph (b) (1) and inserting in lieu thereof the word "Reserved".

B. Part 8 is amended as follows:

1. Section 8.323 is amended by deleting the Note at the end thereof.

2. Section 8.324 (e) (1) is amended by deleting table footnote designators 2 and 3 and by deleting table footnotes 2 and 3.

3. Section 8.324 (e) (2) is amended by deleting table footnote designator 1 and by deleting footnote 1.

[F. R. Doc. 55-4198; Filed, May 23, 1955; 8:51 a. m.]

[Docket No. 11240; FCC 55-544]

PART 14—PUBLIC FIXED STATIONS AND STATIONS OF THE MARITIME SERVICES IN ALASKA

REVISION OF PART

In the matter of amendment of Part 14 of the rules to revise the provisions thereof with respect to the allocation and methods of use of radio frequencies by stations in the fixed and maritime services in the Territory of Alaska and with respect to station equipment and operating requirements.

1. The Commission instituted the above captioned proceeding by adoption of a Notice of Proposed Rule Making on December 22, 1954. The Notice provided a period until February 14, 1955, for the submission of written comments.

2. The proposed amendment is directed toward the improvement of point-to-point, ship-shore and ship-to-ship telegraph and telephone radio communication for the public and for industries in the Alaskan area. Certain of its provisions would serve also the purpose of aiding the United States in its implementation of the International Radio Regulations (Atlantic City, 1947) in accordance with the Geneva Agreement (1951).

3. Comments in this proceeding were filed by a group of 47 companies and 3 associations "representing the fishing industry and other commercial radio licensees in Alaska", hereinafter referred to as the Industry Group. Although this group concurred with many provisions of the proposed rules, it also set forth in its comments several proposals for changes in other provisions of these rules in the belief that such revisions would be "in the best interest of the group as a whole." It admitted, however, that it "has limited interest in zones 6 and 7", as these zones were defined in proposed § 14.3. One of the members of this group, the Alaska Steamship Company, filed additional comment in respect to a particular subject not specifically covered in the group comments.

4. Comments were filed also by the Alaska Aeronautics and Communications Commission acting for and in behalf of the Territorial Government of Alaska (hereinafter referred to as the AACC), by the American Telephone and Telegraph Company on behalf of the Bell Telephone Companies, and by the Alaska Communications System (hereinafter referred to as the ACS).

5. Concurrence was expressed with many of the proposed rules. Objections, some in conflict with others, were raised to certain rules with both general and specific changes requested, recommended or suggested. In the following paragraphs, only those provisions of the proposed rules to which objection was stated, or in which revision was indicated as appropriate to a particular purpose, are discussed and reasons are set forth in respect to the Commission's findings and action in disposing of each.

Alaska Zones for Frequency-Assignment Purposes

6. In Appendix I of its Notice of Proposed Rule Making, the Commission stated its belief that in Alaska appropriate geographical separation should be provided between areas of use of closely adjacent frequencies, and that some of the available frequencies could be used more effectively under a geographic zone plan of allocation. Accordingly, it was proposed to establish seven clearly defined zones within the Alaska area for these purposes.

7. The Industry Group recommended that (a) proposed Zones 1 and 2 be combined, (b) the western boundary of proposed Zone 4 and the eastern boundary of proposed Zone 5 be changed to 155 degrees west longitude, and (c) no change be made in the boundaries of proposed Zones 3, 6 and 7. With respect to the consolidation of proposed Zones 1 and 2, the Industry Group points out that Southeastern Alaska is an area of integrated operations, involving in particular widespread fishing and lumbering activities, with many interested parties having operations in both Zones 1 and 2 as originally proposed in this docket. The belief is expressed that "it would be generally highly advantageous" that these activities, in reference to radio communication, "be embraced in a single radio zone." In support of its recommended change in the respective areas of Zones 4 and 5, the Industry Group states that the originally proposed Zone 4 "encompassed too large a territory" and that the new zone areas recommended "would more evenly divide the fishing and other commercial operations into zones containing approximately equal volumes of radio traffic."

8. Comments submitted by the AACC expressed objection to the proposed division of Alaska into zones for frequency assignment purposes, contending that the interference problem in Southeast Alaska would be increased under provisions of the proposed rules, which would

allocate fewer frequencies to this particular area than the number of frequencies provided by the present rules. One of its comments was that "the best we could do on the zoning plan would be to combine SE Alaska into one zone and the two frequency blocks." The AACC stated further, however, that the only geographic division of Alaska for frequency assignment purposes which it would approve would be the separation of Alaska into two parts, the meridian of 141 degrees west longitude being the dividing line.

9. The Commission points out that the zoning plan set forth in the proposed rules was developed after extensive study with the following considerations in mind: (a) certain frequencies could be assigned for use only in certain parts of Alaska; (b) zone assignments were planned and coordinated to reduce, insofar as possible, interference to and from other radio services (both government and non-government) having co-channel or adjacent channel assignments; (c) zone assignments were chosen in such a manner as to reduce the likelihood of interference among non-government stations located in adjacent areas in Alaska; and (d) with respect to the use of frequencies, more effective group coordination should be feasible among licensees in a particular zone or region, many of whom have similar interests in the use of the commonly available zone frequencies, than among the licensees of stations located throughout the entire Alaska area. Although the proposed rules in Part 14 would provide fewer frequencies for a particular zone than the present rules, it would appear that most frequencies available in any given zone should be subject to substantially less interference from other areas. Further, if Alaska were to be divided into two large zones only, as recommended by the AACC, it is apparent that the very purpose of one of the other AACC comments (to establish methods whereby frequency coordination among licensees can be facilitated) would be affected adversely.

10. Upon due consideration of all of the foregoing comments together with the factors originally considered by the Commission, the rules provide for six zones, defined in § 14.3 as finalized. As recommended by the Industry Group, final Zone 1 includes the originally proposed Zones 1 and 2, and final Zones 3 and 4 (originally proposed Zones 4 and 5) are divided on the west and on the east respectively by the meridian of 155 degrees west longitude. Originally proposed Zones 3, 6, and 7 are unchanged but are designated finally as Zones 2, 5, and 6, respectively.

Frequencies Assigned to Particular Zones

11. Because of "the limited usefulness of the lower frequencies" (such as 1646, 1652, 1712, and 2006 kc) "in the mountainous terrain of southeastern Alaska," as well as the stated fact that "past experience on 1708 kc in the Cordova area has demonstrated a very limited value of these lower frequencies," the Industry Group recommended certain changes in assignments of the lower frequencies to particular zones. The Industry Group further recommended modification of the proposed zone allocation plan in respect to certain frequencies between 2100 kc and 2700 kc; the reasons stated were (a) "night interference from CZO, Vancouver, B. C., on 2538 kc" which makes this channel "almost completely unusable" in the Cook Inlet and Kodiak areas and precludes "the possible use of this frequency" in Southeastern Alaska; (b) "there are extensive integrated fishing and canning operations between the Cook Inlet and Cordova areas, which at times include Kodiak area vessels"; (c) "the very strong signals from Station KOU, San Pedro, California, on 2566 kc * * * makes for an intolerable situation * * * especially in Southeastern Alaska"; and (d) to meet the frequency requirements of proposed Zones 4, 5, 6, and 7 (final zones 3, 4, 5, and 6).

12. Revision of the zone boundaries as announced in preceding paragraph 10 obviously necessitates reconsideration of the proposed zone frequency assignments. The reasons given by the Industry Group in support of its specific recommendations appear to be generally sound; such recommendations being made "after considerable deliberation and consideration of the proposed rules" as explained in the comments submitted by that Group. Although the Commission notes the Group's expression of need for assignment of frequencies such as 2006 kc and 2616 kc for use in zones additional to final zone 1, it does not believe that public interest would be served by such assignments where, as a result, harmful interference would be caused to, or received from, stations of the federal government operating on the same or closely adjacent frequencies in the same area. Coordination of the zone frequency plan with certain Government agencies reveals that this is the situation with respect to the recommended non-Government use of 2006 kc and 2616 kc in areas of Alaska outside final Zone 1. Further, the Commission finds no facts set forth in comments submitted by the Industry Group which would justify the latter's recommendation to withdraw 1646 kc from availability for maritime mobile service in final Zone 6, and to withdraw 2118 kc from availability to the fixed service in final Zone 3; both of these actions being reflected by the Group's "Exhibit B" attached to its comments. Accordingly, the Commission is adopting a modified frequency zone plan (final rule §§ 14.204 (a) (3), 14.205 (a) and 14.264 (a)) otherwise as recommended by the Industry Group, including the conditional assignment of 2118 kc for maritime mobile service in addition to its availability for fixed service in final Zones 2 and 4.

Hourly and Seasonal Limitations Imposed Upon the Use of Particular Frequencies

13. Both the Industry Group and the AACC commented unfavorably upon the hourly and seasonal limitations that would be imposed on the use of certain frequencies by the proposed rules. The AACC flatly protested the adoption of any rules that would "impose monthly time-use limitations on any frequencies new or old in the Fixed, Coastal, and ship classifications of service". Apparently its protest is based upon the position that use of the lower frequencies (apparently those in the band 1600 kc to 2000 kc) is not effective in many instances except for the shorter distances, and that more frequencies in the 2000 to 3500 kc band are needed than the number now available or proposed in order "to handle the traffic load which will be generated by industrial developments in the next 5 or 10 years." The AACC points out that "the need for frequencies does not decrease with the closure of the canning industry", (seasonal) and that even though "the traffic volume drops somewhat—the day-to-day frequency requirements are the same." The communication needs of important industries in Alaska, with emphasis on the expanding activities of the pulp and oil industries there, are mentioned in support of this need for additional radio-channels. On the other hand, the AACC states that: "We are far from being overcrowded with radio stations in any one classified group. * * * We know approximately 400 land stations may exist. On this basis, we have one station in every 1400 square miles. Actually, of this number, 20 percent are on a standby basis and roughly 50 percent of the balance are inactive six months of the year."

14. The Industry Group recommended more specifically that "the daily time and annual date limitations imposed upon 2006 kc, 2430 kc, 2450 kc, 2482 kc, 2566 kc, and 2616 kc (by the proposed rules) be liberalized in zones whose limitations apply, so as to read "6 a. m. to 12 p. m. midnight local standard time, April 1 to October 31 annually." In support thereof, this Group explained that "The seasonal preparatory activity (fishing and canning) begins approximately April 1st annually and the fishing and processing season may extend to as late as November 1st." Further, "a minimum of 18 hours daily communication time is an absolute necessity in order to properly coordinate all phases of the fishing and processing operation."

15. The American Telephone and Telegraph Company invited attention to the proposed use of certain frequencies in Alaska which it believed "may impair their usefulness for maritime services in certain parts of the United States * * * with the thought that further consideration may point the way to the clearing of the conflicts." The "conflicts" mentioned would be "harmful interference through shared operation" as proposed between stations in Alaska and those in other areas employing certain designated frequencies, particularly frequencies which have "long range propagation properties." Suggestions were made specifically for modification of the permissible degree of use of 2430 kc in proposed Zone 3 (final Zone 2) and 2482 kc in proposed Zone 4 (final Zone 3) so as to limit the use of these frequencies in these particular Alaskan zones to those "hours when daylight transmission conditions obtain between Alaska and Seattle," or to avoid any use of these frequencies in "the southern Alaska

zones." The A. T. & T. Company was "particularly concerned" regarding the use of these two frequencies in Alaska as proposed, for the reason that the Commission, in its final action in Docket 10444 on February 10, 1954, assigned 2430 kc for use by ship stations transmitting by telephony to public coast stations in the vicinity of Seattle, Washington, and 2482 kc for transmission by telephony to ships from such public coast stations, each on a 24-hour use basis beginning on a date to be designated by the Commission. Although the limitations on the use of 2430 kc and 2482 kc in Alaska suggested by the A. T. & T. Company are intended to avoid mutual interference between Alaskan stations and the ship-shore telephone service to be rendered to and from the Seattle area (existing coast station near Seattle licensed for operation by the Pacific Telephone and Telegraph Company of the Bell System), they conflict directly with the recommendation made by the Industry Group (see preceding paragraph 14) that the proposed time and date limitations in respect to use of 2430 kc and 2482 kc in Alaska, be liberalized because a minimum of 18 hours daily communication time is required by the Alaskan fishing and canning industry. The A. T. & T. Company's comments in this respect conflict also with those submitted by the AACC wherein the latter is opposed to any hourly and seasonal limitations on the use of such frequencies in Alaska. These comments by the AACC, the Industry Group, and the A. T. & T. Company were on file in this docket at the Commission's offices at Washington, D. C., not later than February 14, 1955. Opportunity was provided in this proceeding for the filing of "comments in reply to the original comments" at any time within the 15-day period following February 14, 1955. It is observed that none of these parties filed any comments in reply to any of the foregoing direct comments pertinent to the subjects herein discussed.

16. The A. T. & T. Company also commented upon the possibility of interference during hours of darkness between the proposed use of 2512 kc and 4434.5 kc in the Alaska area, and the existing use of the latter frequency and the frequency 2514 kc for telephony in the maritime mobile service on the Great Lakes. In this respect, it is observed that 2512 kc has been actively used in southeastern Alaska for a considerable period of time and no reports of interference to or from the Great Lakes service on 2514 kc have come to the attention of the Commission. Because of the distances, radio propagation factors, and limited power involved, as well as the seasonal element in the Great Lakes operations, the Commission believes that harmful interference concerning this situation of 2512 kc vs. 2514 kc is improbable. In reference to 4434.5 kc, however, the Commission recognizes the possibility of interference (not necessarily "harmful") during those hours of permissible use of this frequency in the Alaska area (6:00 a. m. to 9:00 p. m. local standard time) when the radio path between Alaska and the Great Lakes area is in darkness (approximately 10:00 p. m. to 1:00 a. m., c. s. t., in mid-spring and mid-fall). In consideration of this possibility, a conditional clause governing the use of this frequency in the Alaska area is included in finalized § 14.264 (k) (1) which is intended to protect the use of this frequency on the Great Lakes from any harmful interference caused by Alaskan stations.

17. The Commission is aware of the particular need for adequate radio communication circuits in the frequency band 2000 kc to 3400 kc both in Alaska and for public ship-shore telephony on the Pacific seaboard. The needs of both regions must be served to an extent that is possible and practicable in utilizing with best effectiveness the limited number of assignable radio channels. For purposes of clarity in respect to this conclusion, the Commission points out that the specific frequencies in this band proposed to be assigned in this docket upon which it proposed to place hourly and seasonal restrictions are of two categories: (a) frequencies already available under Part 14 which are proposed to be shared between the Alaska area and the States; and (b) frequencies which have not as yet been available for use by non-government stations in Alaska.

18. With respect to category (a), the Commission's proposal was made in consideration of the expectation that night-time interference between stations in Alaska and those along the Pacific seaboard of the states would occur at least during certain parts of the sunspot cycle. Hence, utilization of the involved frequencies was proposed in areas of Alaska as far removed from the states as practicable. It seemed probable that because of differences in antenna power and efficiency, the more serious interference is likely to be received by Alaskan stations rather than by those in the States. It appeared that because of the characteristics of the involved services in each area, stations in Alaska would be less affected adversely by hourly and seasonal limitations than stations in the States area. Consequently, certain hourly and seasonal limitations were proposed to be placed on the use of these frequencies in Alaska in order to minimize such interference. In the event interference should become intolerable, technical remedies such as the use of directional antennas or reductions in power may become necessary in each region, either as voluntary action or as the result of possible future regulatory measures.

19. Regarding the frequencies of category (b), in almost every instance certain restrictions must be imposed upon the use of frequencies newly assigned to Part 14 services in Alaska. Such restrictions are necessary because of cochannel or adjacent channel use by existing stations in Alaska, Canada, or the States. In the portion of the radio spectrum between 2000 kc and 3400 kc, it is virtually impossible for the Commission at this time to assign additional frequencies to Part 14 services for use on an unlimited basis without endangering other radio services. The Commission has endeavored to make available the additional frequencies in this band as well as those in other bands with only those limitations imposed which are deemed necessary to avoid mutual harmful interference with stations of the federal government and with certain foreign stations. In the opinion of the Commission, the rather difficult situation in respect to the use in Alaska of frequencies in the band 1600 kc to 3400 kc can be substantially improved by voluntary coordination of use among the licensees themselves and by the use of very high frequencies wherever possible in that area. Nevertheless, the Commission, in coordination with other agencies of the federal government who operate radio stations in Alaska, has given full consideration to all pertinent comments received and has reached the conclusion that the proposed hourly and seasonal restrictions upon the use of certain frequencies in Alaska can and should be somewhat reduced. Accordingly the finalized Part 14 rules contain no restrictions in respect to hourly or seasonal use of the frequencies 2450 kc and 2566 kc in Alaska; and permissible daily and seasonal periods of use of the frequencies 2006 kc, 2430 kc, 2482 kc and 2616 kc in the involved Alaskan zones are increased over those originally proposed in this Docket (§§ 14.205 (a), (d), (k) and 14.264 (a), (d), (n)).

Conditions, Other Than Hourly and Seasonal Restrictions, Which Limit the Use of Certain Frequencies

20. The AACC objected to the proposed sharing between government and non-government stations of the fixed service frequencies designated in proposed § 14.206 (a) for transmission by Alaska-public fixed stations to fixed stations of the ACS. This provision of the proposed rules was based upon a recommendation made by the ACS, primarily to reduce the number of radio-channels on which a watch must be maintained by ACS stations. However, no other U. S. Government agencies have indicated a need for use of these frequencies for transmission to ACS. Therefore, the designation of these frequencies to be shared in use with U. S. Government stations (except for ACS use of 149.6 kc and 1666 kc in communicating with non-government stations) is not incorporated in the finalized rules (§§ 14.204 (a) (1) and 14.206 (a) (1) (2)). In the event that future developments indicate that sharing of certain frequencies in this group with U. S. Government stations would be in the public interest, the matter will then be reconsidered.

21. To assure that frequencies in the band 3000 to 9000 kc to be available for communication between fixed points would not be employed for short distance circuits the proposed rules provided that regularly assigned frequencies in this band would not be authorized [1] for communication over less than specified minimum distances. Since it is quite practicable to utilize for the shorter distances other available frequencies less valuable for long distance communication, the Commission's purpose in this proposal was that of preventing inter-

[1] Except that this limitation was not to apply to the use of 3201 kc and 3261 kc in emergency situations.

ference from local communication on these frequencies to their more appropriate use to cover the longer distances. Comment submitted by the AACC, however, states that "we fail to see the advantages gained by placing the 50 and 100 mile limitations on 3201, 5167.5 (kc)" and recommended that the Commission "assign 3201 (kc) to Fixed and/or Fixed and Coastal services without limitation to all of Alaska." Further consideration of its proposal in this respect leads the Commission to believe that a specific minimum distance prohibition on the use of 3201 kc, and likewise on 3261 kc, may be undesirable in preventing at least the exchange of brief signals between nearby stations when using either of these frequencies primarily for long distance communication. Hence the applicable rules, as finalized, do not include any minimum distance prohibition against the use of these frequencies but instead contain a conditional clause that is construed to place the burden of their judicious use upon the licensees themselves (§§ 14.204 (a) (5), 14.205 (a), (j) and 14.264 (a), (j)). Also with the same purpose in mind, the finalized rules provide that the minimum distance over which communication is to be effected on the fixed service frequency 5167.5 kc, and on the maritime frequencies 4386.2, 4406.9 and 4434.5 kc on a secondary basis between coast stations, shall be 50 miles instead of 100 miles as propoed (§§ 14.204 (a) (7), 14.259 (a) (3) (ii) (A), and 14.264 (k) (2)). In consequence of these modifications of its original proposal, the Commission fully expects the responsible station licensees to utilize these frequencies mostly for long distance communication and to avoid, in so far as is practicable, their use for the shorter distances as set forth in the applicable rules.

22. Comment submitted by the Industry Group referred to existing assignment of the frequency 2538 kc to coast station CZO, Vancouver, British Columbia, and recommended that this matter be investigated with respect to international arrangements. It is pointed out that this seemingly incompatible use of the frequency 2538 kc by both Canadian and Alaskan stations has existed for some time. The existing Region 2 International Frequency List continues the "status quo" in this respect. The Commission is aware of the existing interference conditions reported by the Industry Group and therefore provides for the use of 2538 kc in Alaska as far north as is practicable under the adopted zoning plan. No frequency is available at this time for designation by the Commission as a substitute for 2538 kc in Alaska. Although the interference may continue at certain times, the Commission believes that Alaskan licensees will find it practicable to adapt their operation to the situation so as to obtain some use of this frequency, at least on an intermittent basis or for relatively short distance communication.

23. The Industry Group complained of interference received daily, especially in southeast Alaska, from public coast station KOU, San Pedro, California on the frequency 2566 kc, beginning early each evening. This group recommended that the Commission require the licensee of Station KOU to provide for attenuation of its emission on 2566 kc in a generally north-northwesterly direction during evening hours to reduce this interference. However, any regulatory action looking toward a reduction of the intensity of emission from Station KOU as recommended would be necessarily a separate proceeding not within the purview of this Docket. Nevertheless, the Commission will continue to study the problem and will endeavor to arrive at a possible satisfactory solution.

Fixed Service Frequencies for Communication With ACS Stations

24. In its comments, the AACC included the recommendation that "a more flexible non-Government to Government frequency allocation" be adopted so as to provide "for a minimum 500 miles or more separation of said frequencies at main ACS stations thereby providing a minimum of two or more non-Government to Government net frequencies at any one ACS location." A specific frequency-assignment plan "to illustrate a more flexible and workable non-Government to Government frequency allocation throughout Alaska" was included in the AACC comments. In formulating the frequency assignments proposed for this service as set forth in proposed § 14.206, the Commission necessarily coordinated the specifically designated frequencies and locations with the ACS and other agencies of the Federal government whose radio operations in Alaska were involved from the point of view of possible interference. Frequency assignments of stations in Canada also were considered for the same reason. In so far as the Commission is aware, the plan submitted by the AACC has not been so coordinated. In view of the numerous technical complexities involved in developing the plan set forth in the proposed rules which is mutually acceptable to the Commission, the ACS, and other Federal agencies operating radio stations in Alaska, and because the alternate plan submitted by the AACC is not, as a matter of fact, shown to be clearly more effective than the Commission's proposal, the Commission believes that its originally proposed frequency assignment plan for this purpose as set forth in § 14.206 of the proposed rules should be adopted without change.

Frequencies Available for Both Intership and Public Ship-Shore Communication

25. Comment submitted by the AACC protested the proposed assignment under § 14.259 (a) (2) of the frequency 1622 kc to ship stations under 500 gross tons, and the frequency 2382 kc to ship stations of 500 gross tons or more. This protest apparently has reference to such assignments for ship-to-ship communication since both of these frequencies would be available under § 14.259 (a) (1) of the proposed rules for public ship stations on board any vessels regardless of tonnage, for communication with public coast stations located anywhere in the Alaska area. Conversely, with respect to 2382 kc, the separate comments filed in this proceeding by the Alaska Steamship Company express agreement with the proposed § 14.259 (a) (1) (2) and anticipate the use of this frequency by its public coast stations at Sitka, Cordova, Valdez, Seward and Nome, as well as by its vessels and those of the Coastwise Steamship Company, Standard Oil, "MSTS", and others.

26. Judging from several statements on this subject included in the AACC comments, its protest in effect is apparently directed toward preference for a frequency of the order of 2382 kc instead of 1622 kc for the smaller vessels. Its pertinent comments state in effect that the use of a frequency of the order of 1622 kc by ship stations on board vessels under 50 tons would be "very much against the best practices of good engineering" apparently because of "poor antenna efficiency on small craft" and because "standard transmitters would require extra loading and additional tank capacity." In general, the Commission does not question these engineering factors, but emphasizes the point that the proposed assignment of 1622 kc for ship-to-ship communication in this instance is intended to fulfill an apparent need by hundreds of small boats in Alaskan waters for a reliable short distance communication channel over salt water as free as possible from long distance skywave interference. It is this objective that is sought by the proposed rule (in consideration of the practically total absence at this time of very high frequency installations on these vessels) and not the attainment of the best engineering practice nor a high antenna efficiency. Use of an alternate frequency of the order of 2382 kc by stations on small vessels would not substantially improve the engineering performance, and sky-wave signals would be transmitted more effectively over the longer distances thereby increasing the probability of long distance interference. Ship station licensees who are interested in good engineering practice and high antenna efficiency with respect to stations on small vessels have immediate recourse to the use of frequency-modulation (FM) on very high frequencies such as 156.8 Mc, 156.3 Mc and 157.4 Mc (§§ 14.257, 14.258 (b) and 14.260 (b) of the rules), which efficiently provide very effective circuits for short-distance communication. In effect, the use of 1622 kc for this purpose may be regarded as a permissible expedient pending the eventual installation and use of the very high frequencies. For those ship station licensees who are unable to immediately utilize very high frequencies, the use of 1622 kc, even on small boats, should provide the necessary short distance communication in Alaskan waters regardless of the facts that antenna efficiency would be relatively low and some transmitters may require modification that is believed to be practicable.

27. With reference to the proposed use of 2382 kc for ship-to-ship communication by ships of 500 gross tons or more exclusively, the following relevant factors were considered. Public ship-shore telephone communication utilizing frequencies in the band 2000–3000 kc in the States is established on a national scale and serves most of the principal sea ports, the Great Lakes and the Mississippi River System. A similar service is provided on frequencies within this band by a number of foreign coast stations, and numerous foreign ship stations, some of which communicate with stations in the United States, are equipped for public telephone service in this band. The coast stations normally provide direct connection with the public telephone system on land. Under the governing rules of the Commission the frequencies employed in the States are not shared with the fixed service or any other service within harmful interference range. In Alaska, under existing Part 14 of the rules and by arrangement with the ACS, only one public ship-shore channel in this band is available exclusively for public ship-shore telephony (2134 kc ship-to-shore; 2300, 2312 or 2784 kc shore-to-ship). While the type of public service provided thereon is comparable to that supplied in the States, it appears that a single radiotelephone channel in this band may, in the future, be insufficient to carry all public message traffic without intolerable delays. Judging by the growth of this service in the States, this assumption is believed to be appropriate from a regulatory point of view. Hence, the proposed rules would make available the frequency 2382 kc as an additional channel exclusively for public ship-shore maritime service for any vessel operating in this frequency band in Alaskan waters for communication with public coast stations at any location in the Alaska area. Although ship-to-ship communication for the larger class of ships would at this time be authorized on this frequency under proposed Part 14, it is deemed not improbable that the authority for such communication, if the latter becomes extensive enough to prevent the use of 2382 kc for effective ship-shore public telephone service may, at some future date, have to be withdrawn, and ship-to-ship communication transferred to some other frequency, possibly 1622 kc. It follows that the number of vessels that might then be affected by the loss of intership communication on this 2382 kc channel should be kept to a minimum. The latter objective should be attained to a reasonable degree by confining intership communication on 2382 kc to ships of 500 gross tons and above. At the same time, a fair volume of traffic, both ship-shore and ship-to-ship, may be expected on this frequency in the near future, thus assuring its continued active use in Alaska for the maritime mobile service.

28. It was recommended further by the AACC that the Commission allocate either 2382 kc, 2538 kc, or a similar frequency solely for intership use (presumably for telephony) by ships "under 500 tons" exclusively in Alaskan waters. The Commission necessarily considered this recommendation in relation to other needs and comparable facilities already available in Alaska as well as in other areas. Similar recommendations have been made in other proceedings in reference to U. S. areas outside Alaska. Upon consideration of all relevant factors, the Commission has found it appropriate to provide not more than two primary intership message channels for telephony in the band 2000 kc to 3000 kc in each major geographic region frequented by U. S. ships. These are necessarily made available to all classes of vessels. In the Pacific area, including Alaska, these frequencies are 2638 kc and 2738 kc in accordance with existing rules in Part 8 and international agreement. Proposed Part 14 would, in § 14.258 (a), clearly affirm the fact that these two frequencies are available for intership use in Alaska by all classes of ships, regardless of tonnage. If additional or more effective intership channels are desired, recourse should be made to the use of the available very high frequencies. Consequently, the proposed rules in respect to assignment and use of the frequencies 1622 kc, 2382 kc, 2638 kc and 2738 kc for maritime mobile service are being finalized as proposed (§§ 14.258 (a) and 14.259 (a) (1) (2)).

Use of Government Frequencies by Non-Government Stations

29. Paragraph (a) of proposed rule § 14.207 would permit Alaska-public fixed stations to transmit on a U. S. Government frequency for communication with a Government fixed station in Alaska, subject to prescribed conditions, "when authorized or directed to do so by the government station responsible or by the government department or agency for which the radio-channel is authorized." In consideration of comment on this proposal received from the ACS which requests that certain portions of the text of this paragraph be deleted, because the provisions of this paragraph may conflict with established administrative and executive procedures in authorizing the use of Government frequencies, and in view of the absence of any expressed need for this paragraph, it is deleted from § 14.207 as finalized.

Frequencies Available for Use By Forest Products Industry

30. The Industry Group recommended that "fixed stations and vessels of the forest products industries" in Alaska "be required to use" the frequencies 1676 kc, 1700 kc and 2398 kc "specifically allocated for that industry", so as to eliminate operation on Part 14 frequencies by such stations. Apparently, this recommendation, if adopted, would make the licensees of stations operating in behalf of forest products industries in Alaska ineligible to receive station authorizations under Part 14 of the rules. Any possible regulatory action with respect to prohibiting the use of available Part 14 frequencies by the forest products industry or any other industry in Alaska is not within the purview of this docket. Nevertheless, the Commission recognizes and will study the problem presented by the submission of this recommendation.

Periods of Time During Which Currently Licensed Stations May Temporarily Continue Operation on Frequencies at Variance With Part 14 of the Rules, as Finalized in This Docket

31. Upon the effective date of the finalized Part 14 rules as proposed in this docket, the frequencies on which existing ship, coast, and fixed stations in the Alaska area are currently licensed to operate would fall into four general categories as described herewith:

(a) Frequencies which can continue to be used in accordance with their regularly assigned purpose as set forth in amended Part 14 (example 2134 kc under § 14.260 (a));

(b) Frequencies which can continue to be used under special provisions of amended Part 14 for the purpose for which they are currently licensed (even though such operation, with respect to station location, nature of service, or class of station would be at variance with the regular use of such frequencies as prescribed by amended Part 14) temporarily until not later than a designated date which—

(1) For one group of frequencies would be May 1, 1957 (examples 3201 kc under § 14.263 (a) (4) and 2422 kc under § 14.264 (o)), and

(2) For a different group of frequencies would be September 15, 1955 (examples 2466 kc under § 14.263 (b) (1), 5167.5 kc under § 14.263 (a) (1), and 8070 kc under § 14.263 (b) (2)).

(c) Frequencies which can continue to be used under special provisions of amended Part 14 for the purpose for which they are currently licensed, temporarily until not later than a designated date—after which date they would no longer be authorized for any use or assignment under amended Part 14 (these are 3092.5 kc until June 1, 1955 and 3265 kc until September 15; 1955, §§ 14.204 and 14.263).

(d) One frequency 8070 kc which can continue to be used for fixed service, but for communication with non-government stations instead of U. S. Government stations.

Certain comments were submitted which indicated that it would be appropriate to change the designated limiting dates relative to some of the involved frequencies as described in the following paragraph.

32. Comment submitted by the ACS in reference to frequency group (b) (1) stated that "The retention of frequencies 2466, 2474, and 2632 kc for coast and ship station use until 1 May 1957 will result in a continuance of the interference ACS has noted in the past from shared use of these frequencies, notwithstanding the limitations as set forth in subparagraph (1) (of § 14.263 (b)). ACS feels strongly that these frequencies should be withdrawn from such use at an earlier date preferably by 1 October 1955". The Industry Group's comment in reference apparently to frequency groups (b) and (c) was "It is intended that the presently allocated frequencies be principally used during the 1955 season since it is expected that the effective date of the proposed new rules will be too late to permit the change-over this year." Comments submitted by the AACC, in reference to frequency group (b) (1) were as follows:

> We recommend the immediate adoption of all parts in Docket 11240 relating directly to the following:
>
> The removal of inter-Alaska boat use of all Coastal and Fixed frequencies by June 1, 1955.

The removal of all secondary use of non-Government to Government frequencies by June 1, 1955.

Moving the availability time and implementation of those frequencies effected from May 1, 1957 to September, 1956 because it can be done and would materially benefit all concerned.

Upon due consideration of these comments and related factors involved such as conditions affecting travel and transportation in Alaska, the Commission is finalizing the proposed rules so as to modify appropriately the involved dates as set forth herewith:

(a) With respect to frequency group (b) (1) described in preceding paragraph 31, the limiting date is changed (except for 2466, 2474 and 2632 kc) to January 1, 1957: with provision for continued operation beyond that date (if renewal license application is on file with the Commission not later than such date) until date of receipt of renewed license [2] or until May 1, 1957, whichever date first occurs. (Sections 14.204 (a) (2) (4), 14.205 (1), 14.263 (a) (4), 14.264 (o), 14.208 and 14.266.) In line with this change in date, section 14.152 (b) is finalized with the limiting date for the use of class A–2 emission on frequencies in the bands from 1605 kc to 9000 kc changed from May 1, 1957 to January 1, 1957.

(b) With respect to frequency group (b) (1) described in preceding paragraph 31, the limiting date in reference to the secondary use of 2466, 2474 and 2632 kc under the provisions of § 14.263 (b) (1) is changed to September 15, 1955.

Although the AACC further recommended that use of the frequency 3265 kc of group (c) be not authorized after June 1, 1955, the rules, as adopted, designate the date September 15, 1955, originally proposed by the Commission for deletion of this frequency. Although the number of stations licensed to operate on 3265 kc is relatively small, the Commission believes that a reasonable period of time, until September 15, 1955, should be allowed for these stations to adjust to this change. In the event the use of this frequency can be discontinued at an earlier date the rules will not prevent such appropriate action. While no comments were received in reference to the inadvertent omission of any provision in proposed Part 14 for the continued temporary use of 1622 kc and 2382 kc by ship stations (regardless of vessel tonnage) in Alaskan waters to which one or both of these frequencies may currently be licensed for intership communication, the Commission believes that such stations should be permitted to continue their presently authorized operation on either frequency until September 15, 1955. Final rule § 14.259 (a) (2) is revised accordingly.

Technical Requirements Concerning Radio Transmitters

33. Proposed rule § 14.153 (c) would specifically apply existing § 8.134 (c) (2) of Part 8 of the Commission's Rules to ship stations in the Alaska area. This would mean that all radio transmitters for operation on board ships in Alaskan waters after June 30, 1959, could not be licensed in conformity with this provision of Part 14 for transmission by telephony on any frequency between 2000 and 25000 kc unless such transmitter were capable of operating at not less than the minimum power prescribed in Part 8, or unless the applicant or station licensee desires to use frequencies in the 2000–4000 kc band only, and establishes that the transmitter produces a certain minimum field intensity in this band as prescribed in that part of the rules.

34. In reference to this proposal, the Industry Group stated in its comments that "Extensive successful use is at present being made in Alaska of transmitters of slightly less than 15 watts anode input power to their final amplifiers,[3] especially in the Wrangell, Cook Inlet, and Kodiak area. This small equipment is successfully fulfilling the short distance communication requirements of its users aboard vessels. Accordingly, this Group recommended that the proposed rule "be changed so as to permit [4] the licensing and use of transmitters of a minimum of 10 watts anode input power to the final amplifier."

35. Section 8.134 (c) (2) of Part 8 of the rules as originally proposed in Docket No. 11011 on April 21, 1954, would have applied only to operation on those frequencies authorized for transmission by ship stations to public coast stations. The objective was to minimize the loss of circuit-time on busy ship-shore radiochannels that can occur when the strength of the ship station signals is too low (especially when atmospheric interference is present) for clearly understandable telephone conversation. This is particularly important when the coast station provides direct electrical connection between the ship-shore radio channel and a public service land-wire telephone system. The large majority of public coast stations in the States do provide service of this kind and their ship-shore circuits carry heavy volumes of telephone calls directly between ships and land-line subscribers. As the result of certain supporting comments that were filed in Docket No. 11011, as well as the absence of any objection to the regulatory principle involved, § 8.134 (c) (2) was adopted, with some revision, on September 22, 1954. Among changes made in the proposed rule was the extension of its applicability to frequencies which are authorized for purposes other than ship-shore public telephony, such as ship-to-ship communication. This action was taken primarily because certain submitted comments pointed out, as stated in the Commission's Report, that "the distinction" between ship-shore frequencies and other frequencies used by ship stations for telephony "is more apparent than real in view of the equipment installed aboard most vessels."

36. In Alaska, the situation with respect to telephone communication between ship stations and public coast stations is quite different in that the majority of such coast stations in that territory which are licensed by the Commission do not provide direct connection with any public land-line telephone system. Telephone messages to or from ships which originate at or are destined to points on land other than in the immediate vicinity of the coast station are relayed over point-to-point circuits, mainly radio-telephone or radiotelegraph, the use of which are shared in common by numerous fixed stations in Alaska. Hence any delay or difficulty encountered by reason of relatively low signal-intensity from ship stations does not, under these circumstances, "tie up" telephone land-wire circuits while exchanging prior radio operating signals. Also the problem of receiving from the ship station a signal of "commercial grade" satisfactory for use on the better type of land-lines does not exist in such cases. Further, the average strength of atmospheric interference in the 2000 kc to 5000 kc band in the northern latitudes is somewhat less than that in the States area; hence relatively lower signal strengths can be more effective in the Alaska area than in the States. Therefore, the same widespread need for assuring the use of a minimum power for ship-shore public telephone service that exists in the States is not as yet present in Alaska; also ship-to-ship telephony should be more effective with low power in Alaskan waters than it is in the States. Consequently, the Commission is finalizing §§ 14.153 (c) and 14.258 of proposed Part 14 so as to now apply the minimum power requirement set forth in existing § 8.134 (c) (2) of Part 8 to ship stations in Alaskan waters only when they are communicating with public coast stations providing direct electrical connection with a public land-line telephone system.

37. Additionally in reference to technical requirements concerning transmitting apparatus, comment received from the AACC requested that serious consideration be given its recommendation that the Commission should, apparently by appropriate regulatory action, "Provide a means whereby transmitter frequencies may be measured in the shop when under normal operating conditions and before installation in the field where accurate frequency measuring equipment may be difficult to transport and/or provide." The action thus recommended by the AACC would appear to necessitate either amendment of existing §§ 7.109 and 8.109 of Parts 7 and 8 of the Commission's rules or the adoption of substitute rule provisions to be contained in Part 14. Changes in existing rules to accomplish the objective sought by the AACC were not proposed in this Docket and any action to that effect by the Commission must be preceded by due notice of proposed rule-making. The Commission, however, is cognizant of a possible need to permit the required measurement of transmitter frequencies at places in Alaska more convenient or practicable than the actual radio station locations, and the subject is receiving further study by its engineering staff.

[2] In accordance with the provisions of amended Part 14 as then effective.

[3] Presumably a type that is plate, or plate and screen-grid modulated.

[4] After June 30, 1959, since that is when the requirement would become effective.

Rules Relating to Administrative Procedures

38. Comments of the AACC suggested that documents proposed to be required for Alaskan fixed, coast and ship stations should be limited to current publications which are obtainable directly from the Commission or from the U. S. Government Printing Office, because of difficulty and expense to licensees in obtaining the necessary documents from other sources. The Commission points out that (a) the basic document requirements specified for ship stations in § 14.108 are minimum treaty requirements as set forth in the Atlantic City Radio Regulations, (b) those specified in § 14.107 for coast stations are parallel requirements as set forth in Part 7 of the rules, and (c) those prescribed for fixed stations in § 14.106 are not at variance with the situation desired by the AACC. To somewhat alleviate the problem of cost and procurement, certain of these rule provisions would permit the acceptance of alternative documents that could be voluntarily provided (by licensees or by any interested party in behalf of the licensees) in lieu of the basic documents specified. Accordingly, these sections of the proposed rules are finalized without change.

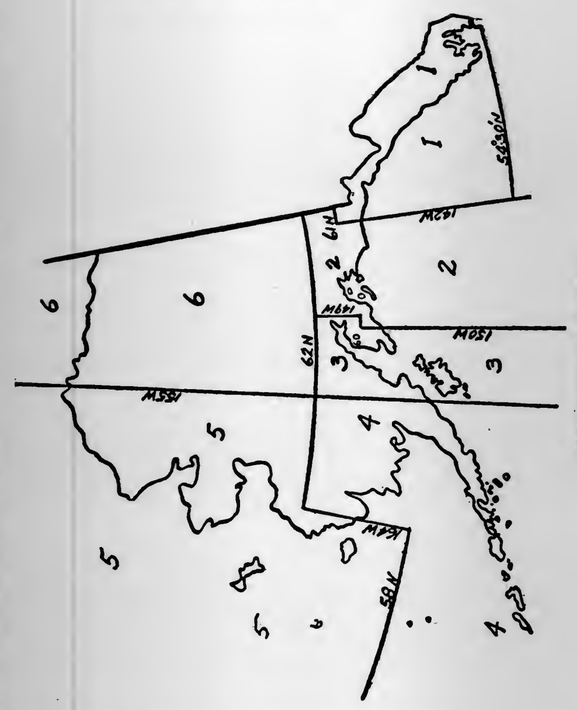
39. The Industry Group recommended that the license for each station in the fixed service in Alaska include all frequencies to be allocated under the rules for use in the fixed service in the zone in which the particular station is located. This group requested also that provision be made for licensing of each ship station for the maritime service frequencies available to ship stations in all zones in which the particular vessel is expected to be operated. A somewhat similar recommendation was made by the AACC. These recommendations concern administrative procedures to which attention is being given; they do not at this time involve the adoption or amendment of Part 14 rules.

40. Certain rule provisions with respect to the processing of license applications and other administrative matters, as well as editorial changes, have been incorporated in the final Part 14 rules. (For examples, see §§ 14.21 (b), 14.22 (b) (c) (d) (e) and 14.61.) Included in these is amendment of proposed § 14.61 so as to provide for a four-year license term. Since the rule provisions mentioned in this paragraph are procedural and editorial in nature, prior publication of Notice of Proposed Rule Making and public procedure thereon under the provisions of sections 4 (a) and (b) of the Administrative Procedure Act is unnecessary.

41. Comment filed by the Industry Group invited attention to the "many ramifications involved" in the proposed Part 14 and that, if adopted, it would "be a radical departure from the present rules governing Alaskan radio matters". In consequence, this Group recommended that "if possible the proposed Part 14 be made effective on a temporary basis at the earliest practicable date, and to be made permanent at a later date, such as May 1, 1957. During this interim period, certain changes, amendments, or deletions may be found desirable and could then be incorporated into the final and permanent Part 14." In reference to this comment, it is not normally the practice of the Commission to adopt "temporary" rules to regulate established radio services since no purpose is served by the "temporary" element. The Commission fully realizes that appropriate amendments to Part 14 as finalized herewith may be necessary in due course as the result of experience to be obtained from the actual operation of stations under its various provisions, and anticipates that no unusual difficulties will arise in processing such future amendments even though the rules herein adopted are not labelled temporary".

TABULATION OF PART 14 FREQUENCY ACTIONS—FREQUENCY ASSIGNMENT ZONE MAP

Frequency	Prior status	Current status	Remarks
Kc 149.6	Fixed stations for radiotelegraph communication among themselves and with ACS fixed stations.	Same as present, except ACS would transmit, as well as receive on this frequency for communication with non-Government fixed stations.	All zones.
1 416	Coast, telegraphy only	Coast, telegraphy only	Do.
1 438	do	do	Do.
1622	Ship; coast; fixed	Ship; coast	All zones. Ship-to-ship use limited to ship stations on board vessels of less than 500 gross tons.
1646	do	Ship; coast; fixed	Zones 1, 4, 6.
1652	Not available under existing Part 14.	do	Zones 2, 5, -.
1660	Ship; coast; fixed	Fixed	Zones 4 and 6.
1666	Assigned to U. S. Government stations only.	Fixed. Station locations in any zone as designated by ACS.	Communication by telegraphy with ACS stations located at Ketchikan and Naknek.
1708	Ship; coast; fixed	Ship; coast; fixed	Zones 3 and 4.
1712	Not available under existing Part 14.	do	Zones 1 and 5. In Zone 1: Not to be used by ship stations west of 138°. In zone 5: Use limited to area north of 62° (to avoid interference with 1708 kc).
2006	do	do	Zone 1: 7 a. m. to 11 p. m.; May 15 to Sept. 15, and 8 a. m. to 9 p. m., local standard time, Apr. 1 to May 14 and Sept. 16 to Oct. 31.
2052.5	Coast, telegraphy A–1 only.[3]	Coast, telegraphy A–1 only.	All zones.
2118	Not available under existing Part 14.	{Fixed / Ship and coast	Do.
2134	Ship stations for communication primarily with ACS coast stations.	Ship stations exclusively for transmission to ACS coast stations.	Zones 2 and 4. All zones. ACS coast stations reply on different frequencies—as designated by ACS. Public correspondence.
2256	Not available under existing Part 14.	Fixed. Station locations in any zone as designated by ACS.	Transmission to ACS stations located at Anchorage and Ketchikan.
2292	Ship; coast vicinity of fixed Circle, Alaska, only.	Delete from Part 14	No present need for this frequency in the vicinity of Circle and its use in other areas of Alaska would result in interference to or from U. S. Government stations.
2382	Ship; coast; fixed	Ship; coast	All zones. Ship-to-ship use limited to ship stations on board vessels of 500 gross tons or more.
2422	do	Ship; coast; fixed	Zones 1 and 3.
2430	do	do	Zones 2, 4, and 5. In Zone 2: 6 a. m. to 11 p. m., local standard time; Apr. 1 to Sept. 30 only. Not to be used for transmission south of 59° (to minimize interference to reception at Seattle).
2450	do	do	Zones 3, 4, and 6.
2466	Fixed—primarily. Ship; coast—secondarily.	Fixed. Station locations in any zone as designated by ACS.	Transmission to ACS at Wrangel, Petersburg, Naknek and Kotzebue. (Existing secondary use by ship and coast stations seriously interferes with primary use by fixed stations.) Additional comparable frequencies in the band 1600–3400 kc are made available for ship and coast stations.
2474	do	do	Transmission to ACS stations located at Sitka, Kodiak, Nome and Barrow. (Existing secondary use by ship and coast stations seriously interferes with primary use by fixed stations.) Additional comparable frequencies in the band 1600–3400 kc are made available for ship and coast stations.
2482	Ship; coast; fixed	Ship; coast; fixed	Zones 3, 4 and 6. In Zone 3: 6 a. m. to 11 p. m., local standard time; Apr. 1 to Sept. 30 only.
2506	Not available under existing Part 14.	do	Zones 5 and 6. On condition of no interference to the service of any coast station transmitting on this frequency in the vicinity of San Francisco or Eureka, Calif.
2512	Ship; coast; fixed	do	Zones 1, 2, 3 and 4.
2538	Ship; coast	do	Zones 2 and 3. Not to be used by ship stations south of 56° (to reduce interference to and from CZO-Vancouver).
2566	Ship; coast; fixed	do	Zones 1, 4 and 5.
2616	Not available under existing Part 14.	do	Zone 1: 7 a. m. to 11 p. m., local time; May 15 to Sept. 15 and 8 a. m. to 9 p. m., local standard time, Apr. 1 to May 14 and Sept. 16 to Oct. 31.
2632	Fixed—primarily. Ship; coast—secondarily.	Fixed. Station locations in any zone as designated by ACS.	Transmission to ACS stations located at Cordova, Fairbanks, Bethel and Unalaska. (Existing secondary use by ship and coast stations seriously interferes with primary use by fixed stations.) Additional comparable frequencies in the band 1600–3400 kc are made available for ship and coast stations.
2694	Not available under existing Part 14.	do	Transmission to ACS stations located at Juneau and Cold Bay.
2776	do	do	Regarded as comparable to 2986 kc recently deleted in Docket No. 10915. For transmission to ACS station located at Ketchikan.
2986	Not available but previously: Fixed—primarily. Ship; coast—secondarily.	Not available under final Part 14.	Previously available primarily for fixed stations for transmission to ACS, and secondarily for coast and ship stations. Deleted recently in Docket No. 10915. The frequency 2776 kc proposed to be assigned is regarded as a comparable frequency for fixed stations. (See above.)



See footnotes at end of table.

TABULATION OF PART 14 FREQUENCY ACTIONS—FREQUENCY ASSIGNMENT ZONE MAP—Continued

Frequency	Prior status	Current status	Remarks
Kc			
3092.5	Ship; coast	Delete from Part 14	Under new international regulations this frequency is not assignable to ship, coast or fixed stations.
3201	Ship; coast; fixed	Fixed	All zones.
3281	Not available under existing Part 14.	Ship; coast; fixed	Zones 1, 4 and 5. This is a comparable frequency to 3263 kc which has been deleted. (See following line for frequency.)
3265	Ship; coast; fixed. Where authorized prior to Mar. 1, 1937.	Delete from Part 14	Use under proposed plan would cause harmful interference.
3357	Not available under existing Part 14.	Fixed. Station locations in any zone as designated by ACS.	Transmission to ACS stations located at Fairbanks and Juneau.
3365	....do	....do	Transmission to ACS station at Unalaska.
4368.2	....do	Ship; coast	All zones. Telephony only; 6 a. m. to 9 p. m., local standard time only.
4408.9	....do	....do	Transmission to ACS stations located at Anchorage and Ketchikan. ACS stations serving Juneau, Ketchikan and Anchorage are cautioned to avoid using this frequency in areas where use by ship and coast stations seriously interferes with primary use by fixed stations.) Under new international regulations, this frequency is not assignable to ship or coast stations. Comparable frequency in the band 4000-5000 kc is made available for ship and coast stations using telephony. Hours of availability increased by three hours and expressed to advantage in local time instead of Pacific standard time.
4434.5	....do	....do	Zones 1, 2 and 3. Telephony only; 6 a. m. to 9 p. m., local standard time only.
			Zones 4, 5 and 6. Telephony only; 6 a. m. to 9 p. m., local standard time only. On condition of no interference to service of any coast station in the Great Lakes area transmitting on this frequency.
5137.5	Fixed—primarily, Ship; coast — secondarily. Hours of use from 6 a. m. to 6 p. m. P. s. t.	Fixed. Station locations in any zone as designated by ACS. Hours of use: 6 a. m. to 9 p. m., local time.	Transmission to ACS stations located at Anchorage and Ketchikan. ACS stations serving Juneau, Ketchikan and Anchorage are cautioned to avoid using this frequency in areas where use by ship and coast stations seriously interferes with primary use by fixed stations.) Under new international regulations, this frequency is not assignable to ship or coast stations. Comparable frequency in the band 4000-5000 kc is made available for ship and coast stations using telephony. Hours of availability increased by three hours and expressed to advantage in local time instead of Pacific standard time.
5167.5	Fixed—primarily. Ship; coast—additionally. Hours of use from 6 a. m. to 6 p. m., P. s. t.	Fixed. Hours of use: 6 a. m. to 9 p. m., local time.	All zones for distances not less than 50 miles. Under new international regulations, this frequency is not assignable to ship or coast stations. Comparable frequency in the band 4000-5000 kc is made available for ship and coast stations using telephony. Hours of availability increased by three hours and expressed to advantage in local time instead of Pacific standard time.
8207.5	Fixed—primarily. Ship; coast—secondarily. Hours of use from 6 a. m. to 6 p. m., P. s. t. except, unlimited in the Aleutian Islands west of 165° west longitude.	Fixed. Station locations in any zone as designated by ACS. Hours of use: 6 a. m. to 9 p. m., local time, except unlimited in zone 4 west of 165° west longitude.	Transmission to ACS stations located at Juneau, Fairbanks and Kodiak. (Existing secondary use by ship and coast stations seriously interfere with primary use by fixed stations.) Under new international regulations this frequency is not assignable to ship or coast stations. Comparable frequency in the band 4000-5000 kc is made available for ship and coast stations using telephony. Hours of availability increased by three hours and expressed to advantage in local time instead of Pacific standard time.
8070	Fixed—primarily, Ship; coast—secondarily. Hours of use from 6 a. m. to 6 p. m., P. s. t. only, except unlimited in the Aleutian Islands west of 165° west longitude.	Fixed—non-Government only. Solely for communication with ACS fixed stations. Hours of use from 6 a. m. to 6 p. m., local time, except in Zone 4 west of 165° west longitude, where hours would be unlimited.	All zones for distances not less than 200 miles. Under new international regulations, this frequency is not assignable to ship or coast stations. (Available information indicates frequency will be used for communication with ACS fixed stations.) Change of specific hours from Pacific standard time to local time should be advantageous.
Mc			
156.3	See Part 8 of Rules	Ship to ship	All zones. General intership. See Part 8 of rules.
156.4	....do	Ship and limited coast stations.	All zones. Business and operation of ships.
156.5	....do	....do	Do.
156.6	....do	....do	All zones. Port operations.
156.7	....do	....do	All zones. Primary use must relate to maritime radiolocation service. Where not required for that service, it is available secondarily for business and operation of ships.
156.8	....do	Calling and safety. Ship-ship and ship-shore	All zones. See Part 8 of rules.

[1] Associated frequencies in this portion of the spectrum for ship stations (telegraphy only) are designated in § 8.321 of this chapter.

[2] Associated frequencies in this portion of the spectrum for ship stations (telegraphy A-1 only) are designated by §§ 8.323 (d) and 8.324 (c) (1) of this chapter.

In view of the foregoing and pursuant to sections 303 (a) (b) (c) (f) (h) (j) and (r) of the Communications Act of 1934, as amended, the Final Acts of the International Telecommunication and Radio Conference, Atlantic City, and the Agreement concluded at the Extraordinary Administrative Radio Conference (Geneva) 1951: *It is ordered,* That, effective June 20, 1955:

1. Part 14 of the Commission's rules is amended as set forth below.

2. The proceedings in Docket No. 11240 are terminated.

Adopted: May 11, 1955.

Released: May 13, 1955.

FEDERAL COMMUNICATIONS COMMISSION,[1]
[SEAL] MARY JANE MORRIS,
Secretary.

[1] Chairman McConnaughey not participating.

Sec.

14.1 Basis and purpose.

Subpart A—Definition of Terms

14.2 General definitions.
14.3 Geographic definitions.
14.4 Definitions in other parts applicable.

Subpart B—Applications

14.21 Authorization required for operation of a radio station.
14.22 Application precedent to authorization.
14.23 One application for fixed and coast station.
14.24 Affirmative showing of need for service.
14.25 Rules in other parts applicable.

Subpart C—Station Authorization

14.61 License period of fixed and coast stations.
14.62 One authorization for fixed and coast stations.
14.63 Dispatch points.
14.64 Discontinuance of operation of a station on land.
14.65 Rules in other parts applicable.

Subpart D—Station and Operating Requirements

14.101 Priority of distress and other signals.
14.102 Practices concerning transmission of public correspondence.
14.103 Hours of service of fixed stations.
14.104 Coast station facilities for 2182 kc.
14.105 Fixed and coast station operating arrangements.
14.106 Documents required for fixed stations.
14.107 Documents required for coast stations.
14.108 Documents required for ship stations.
14.109 Fixed and coast station records.
14.110 Ship station records.
14.111 Coast station communication.
14.112 Coast station working frequency required.
14.113 Suspension of coast station watch.
14.114 Use of developmental fixed stations.
14.115 Rules in other parts applicable.

Subpart E—Standard Technical Requirements

14.151 Authorized frequency tolerance.
14.152 Authorized classes of emission.
14.153 Authorized transmitter power.
14.154 Modulation limiter for fixed and coast stations.
14.155 Rules in other parts applicable.

Subpart F—Assignment and Use of Fixed Service Frequencies

14.201 Cooperative use of frequency assignments.
14.202 Protection of government services.
14.203 Alternate transmission on same radio-channel.
14.204 Frequencies assigned for use in all zones.
14.205 Frequencies assigned for use in particular zones.
14.206 Frequencies for communication with ACS.
14.207 Use of United States Government frequencies.
14.208. Extended interim use of conditional fixed service frequencies.
14.209 Temporary frequencies for treaty implementation.

Subpart G—Assignment and Use of Maritime Service Frequencies

14.251 Cooperative use of frequency assignments.
14.252 Protection of government services.
14.253 Alternate transmission on same radio-channel.
14.254 Frequencies to be used for distress signals.
14.255 Ship station frequencies for use in all zones for telegraphy only.
14.256 Coast station frequencies for use in all zones for telegraphy only.
14.257 Safety frequencies for ship and coast stations in all zones using telephony.
14.258 Frequencies for ship-to-ship communication in all zones by telephony.
14.259 Frequencies for ship-shore and ship-to-ship communication by telegraphy or telephony in all zones.
14.260 Frequencies for ship-shore public telephone service in all zones.
14.261 Frequencies above 156 Mc for business and operational purposes.
14.262 Use of marine utility stations.
14.263 Frequencies for temporary use in all zones.
14.264 Frequencies assigned for use in particular zones.
14.265 Rules in other parts applicable.
14.266 Extended interim use of conditional maritime service frequencies.
14.267 Temporary frequencies for treaty implementation.

AUTHORITY: §§ 14.1 to 14.267 issued under sec. 4, 48 Stat. 1066, as amended; 47 U. S. C. 154. Interpret or apply sec. 303, 48 Stat. 1082, as amended; 47 U. S. C. 303.

§ 14.1 *Basis and purpose.* (a) The basis for the rules following in this part is the Communications Act of 1934, as amended, and applicable treaties and agreements to which the United States is a party. The rules in this part are issued pursuant to the authority contained in the Communications Act of 1934, as amended, which vests authority in the Federal Communications Commission to regulate radio transmissions, to issue licenses for radio stations, and to regulate common carriers of interstate and foreign communication.

(b) The purpose of the rules and regulations in this part is to prescribe the manner in which frequencies may be made available for radio-communication, including public correspondence, in the maritime mobile service for the Territory of Alaska and between fixed points on land within that Territory.

SUBPART A—DEFINITION OF TERMS

§ 14.2 *General definitions*—(a) *Alaska Communications System or ACS.* The telecommunication system within Alaska and between Alaska and other areas which is operated by the United States Army Signal Corps.

(b) *Public correspondence.* Any telecommunication which the offices and stations, by reason of their being at the disposal of the public, must accept for transmission.

(c) *Fixed service.* A service of radio-communication between specified fixed points.

(d) *Fixed station.* A station in the fixed service.

(e) *Alaska-public fixed station.* A fixed station in the Territory of Alaska, which is open to public correspondence and is licensed by the Commission for radio-communication between specified fixed points in Alaska exclusively.

(f) *Developmental fixed station.* A fixed station operated for the express purpose of developing equipment or a technique solely for use only in that portion of the non-government fixed service which has been specifically allocated the authorized frequency (or frequencies) of the developmental fixed station.

(g) *Point of communication.* This term, when applied to an Alaska-public fixed station, means a specified fixed station or specified geographic location with which such station is authorized to communicate.

(h) *Harmful interference.* Any radiation or any induction which endangers the functioning of a radionavigation service or of a safety service, or obstructs or repeatedly interrupts a radio service operating in accordance with applicable laws, treaties, and regulations.

NOTE: Any radio service, the operation of which is directly related, whether permanently or temporarily, to the safety of human life and the safeguarding of property, shall be considered as a safety service.

§ 14.3 *Geographic definitions*—(a) *Alaska area.* For the purpose of frequency assignments to radio services and stations governed by this part, the Alaska Area is defined as follows:

The area bounded by a line extending due west—from the end of the southernmost boundary line between Canada and the mainland of southeastern Alaska—to 131 degrees west longitude, thence due south to 54 degrees and 30 minutes north latitude, thence due west to 142 degrees west longitude, thence due south to 50 degrees north latitude, thence due west to 165 degrees west longitude, thence due south to 47 degrees north latitude, thence due west to the boundary line between Regions 2 and 3 (as this line is established by the Atlantic City Radio Regulations, 1947), thence generally northward along this boundary line to 80 degrees north latitude, thence due east to 135 degrees west longitude, thence due south to 70 degrees north latitude, thence due west to 140 degrees west longitude, thence generally southwest to the northern end of the boundary line between the mainland of northern Alaska and Canada, thence following the boundary line between Alaska and Canada to the southernmost point of this line in southeastern Alaska.

NOTE: Reference hereafter in this part to the "Alaska area" includes all of the "Zones" defined in paragraph (b) of this section.

(b) *Alaska zones.* For the same purpose expressed in paragraph (a) of this

section, the Alaska area is subdivided into six zones, defined as follows:

Zone 1. That portion of the Alaska area east of 142 degrees west longitude and south of 61 degrees north latitude.

Zone 2. That portion of the Alaska area bounded on the east by a line south of 61 degrees north latitude which coincides with 142 degrees west longitude, and by a line north of 61 degrees north latitude which coincides with the boundary line between Alaska and Canada, and by a line coinciding with 61 degrees north latitude which joins those two lines; and bounded on the west by a line south of 62 degrees north latitude which coincides with 149 degrees west longitude, thence running due south to 60 degrees and 30 minutes north latitude, thence due west to 150 degrees west longitude, thence due south to the southern limit of the Alaska area, and bounded on the north by a line coinciding with 62 degrees north latitude.

Zone 3. That portion of the Alaska area bounded on the north by a line which coincides with 62 degrees north latitude and extends eastward from 155 degrees west longitude to 149 degrees west longitude, thence due south to 60 degrees and 30 minutes north latitude, thence due west to 150 degrees west longitude, thence due south to the southern limit of the Alaska area, thence westward to 155 degrees west longitude, thence due north to 62 degrees north latitude.

Zone 4. That portion of the Alaska area west of 155 degrees west longitude which is bounded on the north by a line coinciding with 62 degrees north latitude extending due west to 164 degrees west longitude, thence bounded on the west by a line coinciding with 164 degrees west longitude extending due south to 58 degrees north latitude, thence bounded on the north by a line coinciding with 58 degrees north latitude extending due west to the western boundary of the Alaska area.

Zone 5. That portion of the Alaska area west of 155 degrees west longitude which is not included in Zone 4.

Zone 6. That portion of the Alaska area east of 155 degrees west longitude and north of 62 degrees north latitude.

§ 14.4 *Definitions in other parts applicable.* (a) The definitions set forth in the rules and regulations governing stations in the maritime services (Subpart A of Parts 7 and 8 of this chapter) shall apply to stations of these services in the Alaska area so far as they are consistent with this part.

(b) The definitions set forth in the following sections of Subpart A of Part 7 of this chapter shall apply to stations of the fixed service subject to this part: §§ 7.2 (a) to and including 7.2 (o), 7.2 (q), 7.7 (a) to and including 7.7 (h), 7.7 (j), 7.7 (m), 7.7 (n) and 7.8.

SUBPART B—APPLICATIONS

§ 14.21 *Authorization required for operation of a radio station.* (a) Radio stations in the Alaska area required by the Communications Act to be licensed shall not be operated in the fixed service, in the maritime mobile service, or in the maritime radio-location service (including the maritime navigation service) except under and in accordance with a valid station authorization therefor granted by the Commission. Further, the operation of such apparatus shall be in conformity with the provisions of statute, international treaty or agreement, and the rules of the Commission relative to the licensing of operators.

NOTE: The Commission has exempted certain low power radio devices from its general licensing requirements. The extent of this exemption and related matters are set forth in Part 15 of this chapter, Restricted Radiation Devices. Licensing procedures and exemptions applicable to radio apparatus used for medical purposes, industrial heating, and other miscellaneous purposes not involving radio-communication are set forth in part 18 of this chapter, Industrial, Scientific and Medical Service.

(b) No license shall be issued by the Commission for the operation of any station on land subject to this part for which a permit for construction is required unless such permit has first been granted by the Commission upon written application therefor: *Provided,* That when applications for related construction permit and station license are filed under and in accordance with the provisions of § 7.39 (a) (2) of this chapter, a construction permit and station license for a fixed or coast station subject to this part may be granted at the same time.

§ 14.22 *Application precedent to authorization.* (a) Except as otherwise provided in §§ 7.26 and 7.41 of this chapter in respect to stations on land (including Alaska-public fixed stations), and in §§ 8.26, 8.41, and 8.42 of this chapter in respect to radio stations on board ship, no authorization will be granted for use or operation of any radio station subject to this part, nor for any change in station control, services, or transmitting apparatus, unless formal written application therefor in proper form first is filed with the Commission. Except as otherwise permitted by § 14.23 or by applicable rules in Parts 7 and 8 of this chapter (including such rule sections applicable to Alaska-public fixed stations as are designated in § 14.24), a separate application shall be filed in respect to each station and service subject to this part. Except as otherwise provided in §§ 7.32, 7.36 and 7.41 of this chapter in respect to stations on land (including Alaska-public fixed stations), and in §§ 8.35, 8.41, and 8.42 of this chapter in respect to radio stations on board ship, an application in writing should be filed at least sixty days prior to the earliest date on which it is desired that the requested authorization (or change in authorization) be granted by the Commission in order that action thereon may be taken by that date. Each application shall be specific and complete with regard to the information requested in the application form or otherwise specifically requested by the Commission.

(b) All applications, except those for renewal of station license, for authority to establish or operate stations (other than ship stations) in the Alaska area subject to this part, including correspondence relating thereto, shall be filed in triplicate with the Commission's Engineer in Charge at Seattle, Washington. The provisions of this paragraph shall apply to each application for construction permit, license, or modification of construction permit or license.

(c) All applications for renewal of station license (when continued operation without change is desired) shall be filed direct with the Commission at its offices at Washington 25, D. C.

(d) All applications for authority to operate ship stations, including correspondence relating thereto, shall be filed direct with the Commission at its offices in Washington 25, D. C., or with respect to applications for interim ship station licenses made pursuant to § 8.35 of this chapter, at a Field Engineering Office of the Commission. Unless otherwise specified in a particular case or for a particular form, each application shall be filed in original only. The provisions of this paragraph shall apply to each application for license, modification of license, or renewal of license.

(e) When an application for construction permit for an Alaska-public fixed station or a public coast station is filed by a corporation, a copy of the applicant's articles of incorporation certified by the Secretary of the State or Territory of the place of incorporation, or certified otherwise by an appropriate public official, shall, unless previously filed with the Commission, be submitted with such application.

(f) With reference to the provisions of § 7.25 of this chapter, applications for station authorizations submitted from any location in Alaska may be signed by the attorney for the applicant in case of (1) physical disability of the applicant or (2) absence of the applicant from Alaska.

NOTE: Standard forms are prescribed in applicable rule sections of Parts 7 and 8 of this chapter for use in connection with the majority of applications submitted for Commission consideration under the provisions of this part. These forms may be obtained without cost from the Commission at Washington 25, D. C., or from any of its engineering field offices. With reference to the required signature of applications under oath or affirmation, postmasters in Alaska are authorized by Act of Congress (Public Law 294, 76th Congress, approved August 5, 1939) to administer oaths and affirmations.

§ 14.23 *One application for fixed and coast station.* (a) In addition to the provisions of § 7.40 (a) (3), (4) and (b) of this chapter, one application may be submitted by the same applicant to cover an Alaska-public fixed station and a public coast station at the same location in the Alaska area in the following categories:

(1) Application for construction permit;

(2) Application for license;

(3) Application for modification of construction permit or license when the desired modification will apply similarly to both classes of station;

(4) Application for renewal of license.

(b) The provisions of paragraph (a) of this section shall apply on condition that the respective fixed and coast stations covered by each application are clearly identified therein and all of the required information in respect to each class of station is included therein.

§ 14.24 *Affirmative showing of need for service.* Only one Alaska-public fixed or public coast station will be authorized to serve any area whose point-to-point or ship-shore communication needs can be adequately served by a single radio-communication facility, either government (ACS) or non-government.

§ 14.25 *Rules in other parts applicable.* (a) The rules relating to applications set forth in the rules and regulations governing stations in the maritime services (Subparts B or Parts 7 and 8 of this chapter) shall apply to stations of these services in the Alaska area so far as they are consistent with this part.

(b) So far as they are consistent with this part, the following rule sections contained in Subpart B of Part 7 of this chapter shall apply to stations of the fixed service subject to this part: §§ 7.23, 7.25 to and including 7.37, 7.39 (a), 7.40 (a) (3), (4) and (b), 7.41 to and including 7.45, 7.47, and 7.48.

SUBPART C—STATION AUTHORIZATION

§ 14.61 *License period of fixed, coast and ship stations.* Unless otherwise specified in the license, the normal license period (including renewed licenses) for each Alaska-public fixed station, each coast station in Alaska, and each ship station operated primarily in the Alaska area, shall be four years from the effective date of grant.

NOTE: The license period of the other classes of stations in the maritime services is designated in Subpart C of Parts 7 and 8 of this chapter.

§ 14.62 *One authorization for fixed and coast stations.* (a) Unless otherwise determined by the Commission, one construction permit or one station license may be issued to authorize the construction, or use and operation, respectively, of an Alaska-public fixed station and a public coast station in the Alaska area when—

(1) The licensee or permittee of each class of station is the same;

(2) The location of each class of station is identical;

(3) The conditions which establish and maintain control of each class of station by the permittee or the station licensee are the same.

(b) Whenever a single station authorization is issued in accordance with paragraph (a) of this section, distinction will be shown in each such document as may be necessary in respect to the details of authorization for each service and each class of station except as these may be otherwise established by applicable rules and regulations of the Commission. Unless the station authorization provides otherwise, the same radio transmitting apparatus may be used for both fixed service and maritime mobile service whenever it is capable, by reason of frequency tuning range, technical adjustment, power, frequency stability, emission, etc. of being so used.

§ 14.63 *Dispatch points.* Any dispatch point in connection with an Alaska-public fixed station or a coast station in the Alaska area may be installed and used without obtaining any authorization from the Commission: *Provided,* That information relative to the location of each regularly used dispatch point, which is not located at an authorized control point and is located more than 500 feet from the authorized radio transmitting apparatus, shall be submitted by the station licensee to the Commission for record purposes at the earliest practicable date after such dispatch point is established.

NOTE: The term "dispatch point" is defined in § 7.7 (n) of this chapter.

§ 14.64 *Discontinuance of operation of a station on land.* (a) When the operation of a station on land in the Alaska area subject to this part, or Part 7 of this chapter, is permanently discontinued, the licensee shall, as soon as practicable, notify the Commission's engineer in charge at Anchorage, Alaska.

(b) If the station license covers authorization only for the particular station whose operation has been permanently discontinued, the licensee shall, without undue delay, forward the station license to the Commission's engineer in charge at Seattle, Washington, for cancellation by the Commission at its Washington, D. C., office.

(c) If the station license also covers authorization for a different class of station at the same location whose operation is not being permanently discontinued, the licensee shall, without undue delay, file with the Commission's engineer in charge at Seattle, Washington, a formal application for appropriate modification of license.

(d) With respect to stations on land in the Alaska area, including Alaska-public fixed stations, the provisions of this section shall apply in lieu of § 7.76 of this chapter.

§ 14.65 *Rules in other parts applicable.* (a) The rules relating to station authorizations set forth in the rules and regulations governing stations in the maritime services (Subparts C of Parts 7 and 8 of this chapter) shall, except paragraphs (b) and (c) of § 7.72 and subparagraphs (1) and (2) of § 7.63 (b), apply to stations of these services in the Alaska area so far as they are consistent with this part. Further, with respect to the use of telegraphy on frequencies exclusively within the band 156.25–157.05 Mc, by limited coast stations in the Alaska area, the provisions of §§ 7.351, 7.352, 7.354, and 7.355 of this chapter shall apply to such operation, and the provisions of §§ 7.203, 7.204, and 7.205 shall not apply thereto.

(b) So far as they are consistent with this part, the following rule sections contained in Subpart C of Part 7 of this chapter shall apply to stations of the fixed service subject to this part: §§ 7.61, 7.62, 7.64, 7.66, 7.67, 7.69, 7.70, 7.71 (a), and (b) and 7.73. Section 7.63, except subparagraphs (1) and (2) of paragraph (b), shall apply to stations of the fixed service subject to this part.

SUBPART D—STATION AND OPERATING REQUIREMENTS

§ 14.101 *Priority of distress and other signals.* (a) Stations operating in the fixed service or the maritime mobile service in the Alaska area shall, at all times, give absolute priority to radio communications or signals relating to any ship or aircraft in distress. When any distress signal or communication is anticipated or intercepted by any station, it shall cease all transmission on any frequency or frequencies which may interfere with any station hearing such radio communication or signal of distress except when engaged in answering or aiding the ship or aircraft in distress, and shall assist the vessel or aircraft in distress, so far as possible, by complying with its instructions.

(b) Stations of the maritime mobile service shall observe priority of communications in accordance with the requirements of §§ 7.180, 7.181, 8.176 and 8.177 of this chapter. Alaska public fixed stations, when operating on an assigned frequency which is used also by the maritime mobile service, shall, at all times, give priority on such frequency to distress signals or communications as set forth in paragraph (a) of this section, and to urgent or safety signals, or any communication preceded by one of these signals.

NOTE: The type of signals to which reference is made in § 14.101 are defined in §§ 7.7 (d), (e), (f) and (g) and 8.6 (d), (e), (f) and (g) of this chapter.

§ 14.102 *Practices concerning transmission of public correspondence.* (a) Pending Commission implementation of the tariff filing requirements of section 203 of the Communications Act and Part 61 of this chapter with respect to common carriers in Alaska, any charges made by an Alaskan public fixed station, or any public coast station or public ship station in the Alaska area, for interstate or foreign communication service, should conform to the applicable regulations and tariffs issued by the Alaska Communications System. Information regarding charges of any such station or any changes therein should be furnished promptly to the Tariff Manager of the Alaska Communications System, Seattle, Washington.

(b) Except in event of an emergency concerning the immediate safety of life or property, no Alaska-public fixed station, public ship station, or public coast station in the Alaska area shall transmit any communication in behalf of any person other than the licensee to any other station licensed by the Commission under circumstances wherein such telecommunication can be transmitted effectively by, or to, readily available facilities of the Alaska Communications System which are open to public correspondence and are capable of effectively forwarding (via connecting facilities if and when required) such telecommunication to the designated recipient.

§ 14.103 *Hours of service of fixed stations.* (a) The hours of service of each Alaska-public fixed station shall, within the scope of its normal operations, be such as to adequately meet the requirements of the particular region served by the station and, unless otherwise specified by the Commission for individual stations, shall be determined by the station licensee subject to such applicable conditions and limitations as are imposed by the rules of the Commission.

(b) Each Alaska-public fixed station whose hours of service are not continuous shall not suspend operation before having concluded, when possible within the scope of its normal operations, all

communications of an emergency nature.

(c) The Commission, as public interest, convenience, or necessity requires, may order, at any time, the licensee of an Alaska-public fixed station not authorized for continuous hours of service to increase the hours of service of such station as may, in the discretion of the Commission, be required to provide adequate public service: *Provided,* That such requirement shall not be prescribed without the consent of the station licensee unless, after hearing, the Commission shall determine that such requirement will promote public convenience or interest or will serve public necessity, or the provisions of the Communications Act will be more fully complied with.

NOTE: The hours of service of public coast stations and ship stations are regulated by §§ 7.186 and 8.183 of this chapter.

§ 14.104 *Coast station facilities for 2182 kc.* Each public coast station in the Alaska area licensed to transmit by telephony on any radio-channel within the band 1600 kc to 3500 kc shall be capable of transmitting and receiving (and shall be licensed to transmit) class A3 emission (modulation by voice frequencies) on the radio-channel of which 2182 kc is the authorized carrier frequency, with a transmitter plate input power not less than the maximum plate input power capable of being used for telephony in accordance with Subpart E of this part for transmission by such station on any other radio-channel authorized for maritime mobile service within this band. This requirement shall apply to public coast stations in the Alaska area in lieu of the provisions of § 7.104 (b) (1) of this chapter.

§ 14.105 *Fixed and coast station operating arrangements.* (a) The requirements of § 7.106 (a), (b), (c), (d), and (e) (2) of this chapter, applicable to coast stations and providing for certain operating controls to expedite communication and conserve the use of frequencies, shall apply to Alaska-public fixed stations and coast stations subject to this part: *Provided,* That for these stations the date of required compliance with paragraphs (c) and (d) and (e) (2) of that section shall be not later than May 1, 1957.

(b) The requirements of § 7.106 (e) (1), (f), (g) and (h) of this chapter concerning certain operating controls shall apply to coast stations subject to this part: *Provided,* That the date of required compliance with paragraph (g) (1) of that section shall be not later than May 1, 1957.

(c) The radio equipment of each station subject to this part must be capable of permitting reception of the class or classes of emission on the frequency or frequencies used in accordance with the provisions of this part for the service carried on by the particular station. The technical arrangement of the station apparatus shall be such that the necessary reception of emissions can be readily effected prior to the transmission of any signals or communications by the station.

§ 14.106 *Documents required for fixed stations.* (a) Each Alaska-public fixed station shall be provided with the following documents:

(1) A valid station license, available in accordance with the provisions of § 7.102 (a) and (b) of this chapter;

(2) The necessary operator license or licenses, available in accordance with § 7.155 of this chapter;

(3) The station log as designated in § 14.109;

(4) This part and part 7 of this chapter.

(b) These documents shall be continuously and readily available to the licensed operator on duty during the hours of service of the station.

NOTE: This part will not be required until after September 15, 1955.

§ 14.107 *Documents required for coast stations.* (a) Each public coast station in the Alaska area using telegraphy shall be provided with this part and the documents prescribed in § 7.213 (a) of this chapter: *Provided,* That in public coast stations authorized to use telegraphy on frequencies solely within the band 1605–5000 kc, the following documents may be substituted in lieu of the documents specified by paragraph (a) (4), (5) and (6) of § 7.213 of this chapter:

(1) A complete list of coast stations (including call signs) located in the Alaska area (including coast stations of the ACS), open to public correspondence, and authorized to transmit on frequencies within the band 1605–5000 kc;

(2) A list, as complete as is practicable, of ship stations (including call signs) known to operate regularly in the Alaska area and authorized to transmit on frequencies within the band 1605–5000 kc;

(b) Each limited coast station in the Alaska area authorized to use telegraphy on a frequency or frequencies below 30 Mc shall be provided with this part and the documents prescribed in § 7.213 (b) of this chapter.

(c) Each public coast station in the Alaska area using telephony shall be provided with this part and the documents prescribed in § 7.313 of this chapter: *Provided,* That in Class II public coast stations that provide communication with ocean-going vessels, the documents specified in paragraph (a) (1) and (2) of this section may be substituted in lieu of the international "Alphabetical List of Call Signs" and the international "List of Coast Stations and Ship Stations."

(d) Each limited coast station in the Alaska area using telephony on any authorized frequency, and/or authorized to use telegraphy on frequencies solely above 30 Mc, shall be provided with this part and with the documents prescribed in § 7.369 of this chapter.

(e) The documents prescribed in this section shall be continuously and readily available to the licensed operator on duty during the hours of service of the station.

NOTE: This part will not be required until after September 15, 1955.

§ 14.108 *Documents required for ship stations.* (a) Each ship station in the Alaska area using telegraphy shall be provided with this part and the documents listed in § 8.329 of this chapter; except that in any ship station using telegraphy and located on board a vessel not compulsorily fitted with a radiotelegraph installation while in the Alaska area or while engaged on voyages solely between Alaska and other places on the Pacific seaboard of the continental United States or Canada:

(1) The following documents may be substituted in lieu of those specified in paragraph (a) (4) and (5) of § 8.329 of this chapter if the ship station uses telegraphy on frequencies solely within the band 1605–5000 kc, or solely within the latter band and the band 156.35–156.95 Mc;

(i) A complete list of coast stations (including call signs) which are authorized to transmit on frequencies within the band 1605–5000 kc, which are open to public correspondence, or which maintain watch on 2182 kc or 2091 kc and are located in the Alaska area (including coast stations of ACS) and on the Pacific seaboard of the continental United States and Canada;

(ii) A list, as complete as is practicable, of ship stations (including call signs) known to operate regularly in the Alaska area and/or on voyages between Alaska and other places on the Pacific seaboard of the continental United States or Canada, and authorized to transmit on frequencies within the band 1605–5000 kc;

(2) The documents specified in paragraph (a) (4) and (5) of § 8.329 of this chapter or the substitutes therefor specified in subparagraph (1) of this paragraph need not be provided if the ship station uses telegraphy on frequencies solely within the band 156.35–156.95 Mc.

(b) Each ship station in the Alaska area using telephony only (except telegraphy for calling and operating signals incidental to the use of telephony) shall be provided with this part and the documents set forth in § 8.367 of this chapter: *Provided,* That ship stations on vessels engaged on international voyages solely between Alaska and other places on the Pacific seaboard of the continental United States and Canada (either within or outside inland waters of the United States or Canada) must, if they operate on frequencies within the band 1605–5000 kc, be provided with the documents specified in paragraph (a) (1) (iv) and (v) of § 8.367 of this chapter or in lieu thereof the documents prescribed in subparagraph (1) of paragraph (a) of this section.

(c) The documents prescribed in this section shall be continuously and readily available to the licensed operator on duty during the hours of service of the station.

NOTE: This part will not be required until after September 15, 1955.

§ 14.109 *Fixed and coast station records.* (a) Each Alaska-public fixed station and each public coast station in the Alaska area shall maintain an accurate radiotelegraph and/or radiotelephone log as required for public coast stations by §§ 7.214 (a) and 7.314, respectively, of this chapter: *Provided,* That coast stations, with respect to operation on frequencies within the bands 1605–5000 kc and 156.35–162.05 Mc, and all Alaska-public fixed stations, may express the time of making each log entry in local standard time in the same manner as is permitted by those sections for coast stations which communicate exclusively with vessels on inland waters of the United States.

(b) Each limited coast station in the Alaska area shall maintain an accurate radiotelegraph and/or radiotelephone log as required by §§ 7.214 (b) and 7.370, respectively, of this chapter.

§ 14.110 *Ship station records.* Each ship station in the Alaska area shall maintain an accurate radiotelegraph and/or radiotelephone log as required by §§ 8.330 and 8.711 for telegraphy, and 8.368 for telephony, of this chapter: *Provided,* That with respect to operation on frequencies within the bands 1605–5000 kc and 156.25–157.45 Mc, ship stations in the Alaska area and on board vessels engaged on voyages solely between Alaska and other places on the Pacific seaboard of the continental United States or Canada may express the time of making each log entry in local standard time in the same manner as is permitted by §§ 8.330 (d) and 8.368 of this chapter for ship stations navigated on inland waters of the United States.

§ 14.111 *Coast station communication.* (a) Except as otherwise stated in paragraphs (b) and (c) of this section, the provisions of § 7.302 of this chapter shall apply to public coast stations subject to this part.

(b) In lieu of the provisions set forth in paragraph (a) (3) and (4) of § 7.302 of this chapter, public coast stations in the Alaska area using telephony are authorized to communicate with public ship stations, government ship stations, aeronautical public service stations on board aircraft, and government aircraft stations for the transmission or reception of public correspondence when the mobile station uses telephony on a radio-channel below 5000 kc designated in this part for ship-shore public correspondence by means of telephony and used by the coast station with which it communicates. Under this condition, the mobile station and the coast station transmit alternately on the same radio-channel.

(c) In lieu of the requirement of paragraph (b) (2) (i) of § 7.302 of this chapter, the station with which communication is carried on shall transmit to the coast station on a radio-channel below 5000 kc designated in this part for ship-shore public correspondence by means of telephony and used by the coast station with which it communicates. Under this condition, the fixed station and the coast station transmit alternately on the same radio-channel.

§ 14.112 *Coast station working frequency required.* Coast stations in the Alaska area using telephony shall be regarded as complying with paragraph (c) (1) of § 7.104 of this chapter when the particular coast station is capable also of transmitting and receiving (and is licensed to transmit) class A3 emission (modulation by voice frequencies) on at least one other radio-channel authorized for working with ship stations in the band 1605 to 3500 kc in lieu of the band 2000 to 3500 kc.

§ 14.113 *Suspension of coast station watch.* If, for any reason, a watch on 500 kc or 2182 kc maintained by a coast station, licensed for continuous or definite hours of service, is suspended, impaired, or discontinued during the regular season of operation of that station, notification thereof shall be given at the earliest practicable time by the station licensee to the nearest station or office of the U. S. Coast Guard or the Alaska Communications System that can be contacted via available channels of communication (preferably by wire or radio) and to the Commission's engineer in charge at Anchorage, Alaska. This notification shall include a statement of any estimated time of resumption of such watch if it has been suspended only, and shall state the reason for suspension, impairment, or discontinuance of the watch. When such watch is resumed after being suspended, or when impairment thereof no longer exists, notification of this fact likewise shall be given at the earliest practicable time. The provisions of this section shall apply to coast stations in the Alaska area in lieu of the provisions of §§ 7.74 and 7.75 of this chapter.

§ 14.114 *Use of developmental fixed stations.* (a) Developmental fixed stations subject to this part shall be constructed and used in such manner as to conform with all applicable technical and operating requirements contained in this part, unless deviation therefrom is specifically provided in the station authorization.

NOTE: Such requirements are those applicable to the corresponding established class of station including provisions relating to operator requirements, station records, station documents, assignment of call signs.

(b) Communication with any station of a country other than the United States is prohibited unless specifically authorized by the terms of the station authorization.

(c) The operation of a developmental station is subject to the condition that harmful interference is not caused to the operation of stations licensed in an established service under any part of the Commission's rules.

NOTE: The rules applicable to developmental coast stations and developmental stations on board ship are contained in Subpart M of Part 7 and Subpart Q of Part 8, respectively, of this chapter.

§ 14.115 *Rules in other parts applicable.* (a) The rules relating to station and operating requirements and other rules set forth in the rules and regulations governing stations in the maritime services (Subpart D and Subparts F through P of Part 7 of this chapter, and Subpart D and Subparts F through V of Part 8 of this chapter) shall, except as otherwise specifically provided in this part, apply to stations of these services in the Alaska area so far as they are consistent with this part.

(b) So far as they are consistent with this part, the following rule sections contained in Subparts D, F, G, H, I, M, O and P of Part 7 of this chapter shall apply to stations of the fixed service subject to this part:

7.101	7.155	7.310
7.102 (a) (b)	7.171	7.311
7.107 (a)	7.173	7.501
7.108	7.174	7.502
7.109	7.175	7.503 (a)
7.110	7.179 (e)	7.505
7.111	7.190	7.506
7.115	7.191	7.507
7.116	7.192	7.551
7.151	7.209	7.552
7.152	7.210	7.601
7.154	7.211	7.602

SUBPART E—STANDARD TECHNICAL REQUIREMENTS

§ 14.151 *Authorized frequency tolerance.* (a) Unless the particular station authorization specifically provides otherwise, the frequency tolerance authorized for coast stations and fixed stations subject to this part shall be as prescribed in paragraphs (b) and (c) of this section. This section shall apply to coast stations subject to this part, in lieu of § 7.131 of this chapter except as to coast station operation within any frequency band not designated in this section.

(b) *Authorized frequency tolerances.*

Assigned frequencies	Class of station	Percent tolerance
From 50 to 515 kc	Fixed or coast	0.02
From 1605 to 3400 kc	do	.01
On frequencies within the band from 5000 to 9000 kc.	Fixed	.01
On frequencies within the band from 4000 to 9000 kc.	Coast	.005
From 156.35 to 162.05 Mc	do	.005

NOTE: The authorized frequency tolerances applicable to ship stations are set forth in § 8.131 of this chapter.

(c) Fixed stations which, in exceptional cases are authorized to use plate (anode) input power in excess of the respective value specified below shall, when using such higher power, maintain the respective frequency tolerance designated below:

Class of emission in use	Class of radio frequency amplifier used in last stage of transmitter	Plate (anode) input power in use	Frequency band	Percent tolerance
A0, A1, A2, A2a, A2b	Any class for telegraphy	More than 300 watts	1605–3400 kc	0.005
		More than 750 watts	5000–9000 kc	.003
	Class C; plate, or plate and screen-grid modulated.	More than 300 watts	1605–3400 kc	.005
		More than 750 watts	5000–9000 kc	.003
	Class C; control, screen, or suppressor-grid modulated.	More than 600 watts	1605–3400 kc	.005
		More than 1,500 watts	5000–9000 kc	.003
A2, A2a, A2b, A3, A3a, A3b; also A0 or A1 as produced by the unmodulated carrier or by the keyed unmodulated carrier, respectively.	Class C; cathode modulated	More than 480 watts	1605–3400 kc	.005
		More than 1,200 watts	5000–9000 kc	.003
	Class B; linear	More than 600 watts	1605–3400 kc	.005
		More than 1,500 watts	5000–9000 kc	.003
	Class BC; high efficiency	More than 360 watts	1605–3400 kc	.005
		More than 900 watts	5000–9000 kc	.003
	Other classes; primarily for telephony.	As specified in the station authorization.	1605–3400 kc	.005
			5000–9000 kc	.003

NOTE: For information regarding the classification of emissions and the calculation of the bandwidth, reference should be made to Part 2, and to Subparts E of Parts 7 and 8 of this chapter.

§ 14.153 *Authorized transmitter power.* (a) Each fixed station and each coast station subject to this part, and each ship station when in the Alaska area, may use such antenna power as is necessary to carry on the service for which the station is licensed, on condition that the respective maximum authorized transmitter power as set forth herein shall not be exceeded (subject to the provisions of §§ 7.110 (a) and 8.110 (a) of this chapter and the provisions of paragraph (b) of this section) when transmitting on any frequency, assigned by this part for use by such station, which is within any frequency band set forth herein. The maximum authorized transmitter power for this purpose is designated in column 5 of the following table in relation to the respective controlling elements designated in columns 1, 2, 3 and 4:

1	2	3	4	5
Class of emission in use	Class of radio frequency amplifier used in the last radio stage of transmitter	Frequency band	Class of station	Maximum authorized transmitter power
A0, A1	Any class for telegraphy.	From 50 to 200 kc. From 400 to 515 kc.	Fixed. Coast or ship.	650 watts. 265 watts; with or without modulation.
A0, A1, A2, A2a, A2b	Any class for telegraphy.	From 1605 kc to 9000 kc.	Fixed, coast or ship.	150 watts; with or without modulation. 150 watts when no modulation is present. 300 watts when no modulation is present. 240 watts when no modulation is present. 300 watts when no modulation is present. 180 watts when no modulation is present. As specified in the station authorization.
A2, A2a, A2b, A3, A3a, A3b; also A0 and A1 provided the amplitude of the carrier shall not exceed its effective amplitude as used for telephony with the class of amplifier specified.	Class C—plate, or plate and screen-grid modulated. Class C—control, screen or suppressor-grid modulated. Class C—cathode modulated. Class B—linear.	From 1605 kc to 9000 kc.	Fixed, coast or ship.	
	Class BC—high efficiency.			
	Other classes: primarily for telephony.			
F0, F1, F2, F3	Any class for frequency-modulated transmission.	From 156.25 to 157.45 Mc. From 161.85 to 162.05 Mc.	Ship. Coast. Public. Coast.	100 watts. Limited—100 watts. Public—250 watts. 1,000 watts.

NOTE: As used in this part the terms "last radio stage", "plate (anode) input power", "antenna power", and "authorized transmitter power" are defined in Subparts A of Parts 7 and 8 of this chapter. See §§ 7.8 (gg), (hh), (ii), (kk), and 8.7 (ee), (ff), (gg), and (ii).

(b) The limitations governing the maximum authorized transmitter power set forth in paragraph (a) of this section may be exceeded when necessary:

(1) By a ship or coast station to expedite communication concerning a ship or aircraft in distress;

(2) To enable a ship station using a radio installation required for safety purposes by treaty or statute to satisfy the applicable transmitter power or communication range (distance) stipulated by such treaty or statute; or

(3) To provide effective communication, under exceptional conditions, on an assigned frequency or frequencies within the band 1605 kc to 6000 kc between an Alaska-public fixed station and one or more fixed stations of the Alaska Communications System. Such exceptional power, however, must be specifically requested in each case by the applicant or licensee and, before being used must be specifically authorized by the Commission. Except as may be otherwise determined by the Commission, such authorization will not be granted unless concurred in by the ACS. Each request for such authority must show at least that the local representative of the ACS has been fully informed thereof, and that technical means are available and can be used to reduce the power to not more than that permitted by paragraph (a) of this section when operating on assigned frequencies which would not be covered by such exceptional authorization.

(c) Unless the station license specifically provides otherwise, ship stations in the Alaska area shall, in addition to the provisions of this section, be subject to § 8.134 (c) (2) of this chapter in respect to minimum authorized transmitter power on frequencies between 2000 kc and 25000 kc authorized for telephony, only when transmitted by telephony to a public coast station which is providing a direct electrical connection between the ship-shore radio channel in use and a public land-telephone system.

§ 14.154 *Modulation limiter for fixed and coast stations.* Except for transmitters used solely for developmental stations, each radiotelephone transmitter licensed for use and operation on a frequency or frequencies below 30 Mc in a fixed or coast station subject to this part shall, at the earliest practicable date and in no event later than May 1, 1957, always be used with a device that will automatically prevent modulation in excess of 100 percent. With respect to operation on frequencies below 30 Mc only, this section shall apply to coast stations located in the Alaska area in lieu of § 7.137 (a) of this chapter.

NOTE: For a similar requirement applicable to ship stations, reference is made to § 8.137 (a) of this chapter.

§ 14.155 *Rules in other parts applicable.* (a) The rules relating to standard technical requirements set forth in the rules and regulations governing stations in the maritime services (Subparts E of Parts 7 and 8 of this chapter) shall, except § 7.137 (a), apply to stations of these services in the Alaska area so far as they are consistent with this part.

(b) So far as they are consistent with this part, §§ 7.133 and 7.136 of this chapter shall apply to stations of the fixed service subject to this part.

SUBPART F—ASSIGNMENT AND USE OF FIXED SERVICE FREQUENCIES

§ 14.201 *Cooperative use of frequency assignments.* Unless provided otherwise by this part, or by the particular station authorization, each radio-channel authorized for use by a fixed station subject to this part is available for use on a shared basis only and shall not be construed as available for the exclusive use of any one station or any one station licensee. All station licensees shall cooperate in the use of their respective frequency assignment in order to minimize interference and obtain the most effective use of the authorized radio-channels.

§ 14.202 *Protection of government services.* Notwithstanding other provisions of this part, the assignment and use of any of the frequencies designated in this subpart shall be subject to the express condition that any individual assigned frequency may not be authorized for transmission by a fixed station at any specific location in the Alaska area where its use could cause harmful interference to a United States Government radio service which, in the discretion of the Commission, must be protected from such interference.

§ 14.203 *Alternate transmission on same radio-channel.* Except for communication between licensed fixed stations and fixed stations of the Alaska Communications System as hereinafter specifically designated in this Subpart, all transmission, on each radio-channel assigned by this subpart, by two or more stations engaged in any one exchange of signals or communications with each other, shall take place on only one radio-channel. For this purpose, the stations communicating with each other shall transmit and receive on the same radio-channel: *Provided,* That this requirement is waived in an emergency affecting the safety of life or property when, by reason of interference or limitation of equipment, this method of single-channel communication cannot be used.

§ 14.204 *Frequencies assigned for use in all zones.* (a) Each of the following frequencies in kilocycles is authorized as an assigned frequency for use by Alaska-public fixed stations in accordance with Subpart E of this part. These frequencies are authorized for use by stations located in any zone of the Alaska area, for communication with other licensed Alaska-public fixed stations located in any zone of the Alaska area:

(1) 149.6 for telegraphy only; the use of this frequency by non-government stations shall be shared with government stations of the ACS in accordance with §§ 14.201 and 14.206.

(2) 1622 for telegraphy and/or telephony; available (on a shared basis with maritime mobile service) for fixed service until not later than January 1, 1957, only to fixed stations licensed to transmit on this frequency before the effective date of this section: *Provided,* That after September 15, 1955, at each location where the use of this frequency by a fixed station causes harmful interference to the maritime mobile service, the fixed station shall, except in an emergency involving the immediate safety of life or property, limit its transmissions to such periods of time as will not cause such interference.

(3) 2118 for telegraphy and/or telephony; available on a shared basis with maritime mobile service. The use of this frequency by fixed stations shall be coordinated with ship-to-shore communication on 2134 kc in the Alaska area so as to avoid harmful interference.

(4) 2382 for telegraphy and/or telephony; available (on a shared basis with maritime mobile service) for fixed service until not later than January 1, 1957, only to fixed stations licensed to transmit on this frequency before the effective date of this section: *Provided,* That after September 15, 1955, at each location where the use of this frequency by a fixed station causes harmful interference to the maritime mobile service, the fixed station shall, except in an emergency involving the immediate safety of life or property, limit its transmissions to such periods of time as will not cause such interference.

(5) 3201 for telegraphy and/or telephony; in so far as is practicable, fixed stations shall limit their use of this frequency to communication over distances which cannot be effectively covered by the use of a frequency below 2700 kc or above 70 Mc.

(6) 3265 for telegraphy and/or telephony; available for use where originally authorized prior to March 1, 1937, until not later than September 15, 1955, only to stations licensed to transmit on this frequency before the effective date of this section; and subject to the requirement that its use shall be coordinated with use of the frequency 3261 kc by Alaska-public fixed stations and public coast stations located in zones 1, 4 and 5, so as to avoid harmful interference to the service of those stations.

(7) 5167.5 for telegraphy and/or telephony; to be used exclusively for communication over distances of not less than 50 miles and only during the hours from 6:00 a. m. to 9:00 p. m. local standard time.

(8) 8070 for telegraphy and/or telephony; to be used exclusively for communication over distances of not less than 200 miles and only during the hours from 6:00 a. m. to 6:00 p. m. local standard time, except in zone 4 west of 165 degrees west longitude where the hours of its use shall not be limited.

§ 14.205 *Frequencies assigned for use in particular zones.* (a) Each of the following frequencies in kilocycles is authorized as an assigned frequency for use by Alaska-public fixed stations employing telegraphy and/or telephony in accordance with Subpart E, of this part. These frequencies are authorized for use (on a shared basis—except 1660 kc—with stations of the maritime mobile service) exclusively by stations located in the zone or zones designated herein opposite the respective frequency; for use, subject to the specific conditions and limitations designated herein by identifying reference placed opposite the respective frequency in each column, for communication with other Alaska-public fixed stations. In so far as is practicable, each station, when transmitting on any of these frequencies, shall communicate only with a station or stations located in its own zone or in a contiguous zone.

Zones in which transmission on the particular frequency is authorized subject to the limiting conditions specified by references to following paragraphs of this section:

NOTE: See § 7.8 (hh) of this chapter for definition of plate (anode) input power.

§ 14.152 *Authorized classes of emission.* (a) Unless the particular station authorization specifically provides otherwise, the classes of emission authorized for coast stations and fixed stations subject to this part and ship stations when in the Alaska area shall, with respect solely to frequencies within the following limits assigned in this part for use by such stations, be as set forth in the following paragraphs of this section.

Class of station	Frequency range	Class of emission
Fixed	From 50 to 200 kc and on 1666 kc	A–1, and for brief testing A–0.
	From 1605 to 1800 kc (except 1666 kc)	A–1, and for brief testing A–0; A–2 until Jan. 1, 1957 only.
Do	From 2000 to 2035 kc	
	From 2107 to 3400 kc	
	From 5000 to 9000 kc	
Coast and ship	From 400 to 515 kc	A–1, A–2, A–2a, A–2b, and for brief testing A–0.
	From 1605 to 1800 kc	A–1, and for brief testing A–0; A–2 until Jan. 1, 1957 only.
Do	From 2000 to 2035 kc	
	From 2107 to 3400 kc	
	From 5000 to 9000 kc	
Do	From 2035 to 2107 kc	A–1, and for brief testing A–0.
Do	On 156.4, 156.5, 156.7, and 156.9 Mc	F–1, F–2, and for brief testing F–0.

(c) For stations authorized by this part to use telephony on a frequency or frequencies within the respective frequency ranges designated in this paragraph, the authorized classes of emission for telephony on such frequencies shall be as follows:

Class of station	Frequency range	Class of emission
Fixed	From 1605 to 1800 kc	A–3, A–3b, and for brief testing A–0; also for brief operating signals A–1, A–2, A–2a, A–2b.
	From 2000 to 2035 kc	
	From 2107 to 3400 kc	
	From 5000 to 9000 kc	
Coast and ship	From 1605 to 1800 kc	A–3, A–3b, and for brief testing A–0; also for brief operating signals A–1, A–2, A–2a, A–2b.
	From 2107 to 3400 kc	
	From 4000 to 9000 kc	
Do	From 156.25 to 162.05 Mc	F–3, and for brief operating signals F–1 and F–2; also for brief testing F–0.

(d) As used in paragraphs (b) and (c) of this section, the letter "a" following class "A2" or "A3" emission means the emission of a single side band, with reduced carrier. The letter "b" following class "A2" or "A3" emission means the emission of two independent side bands, with reduced carrier. For radiotelegraph communication, the use of class A2, A2a, or A2b emission is permissible only when the modulated emission is keyed. In telegraph communication, keying only the modulating audio frequency is not authorized except when used in connection with radiotelephone communication solely for transmitting brief operating signals. On assigned frequencies from 1605 kc to 9000 kc, any form of A2 emission for radiotelegraph communication shall not be permissible after May 1, 1957.

(e) Classes of emission not authorized in paragraphs (b) and (c) of this section may be authorized by the Commission in special circumstances, subsequent to a satisfactory showing by the applicant of a need therefor and provided harmful interference will not result from the use thereof. Each application requesting such special authorization shall fully describe the emission desired to be used, shall indicate the emission-bandwidth required for effective operation, and shall state the purpose for which such emission is required.

This section shall, solely in reference to such frequencies as are duly assigned in this part, apply to coast stations subject to this part in lieu of § 7.132 of this chapter and to ship stations in the Alaska area in lieu of § 8.132 of this chapter.

(b) For stations authorized by this part to use telegraphy on a frequency or frequencies within the respective frequency ranges designated in this paragraph the authorized classes of emission for such frequencies shall be as follows:

Zone 1	Zone 2	Zone 3	Zone 4	Zone 5	Zone 6
1646			1646		1646.
	1652			1652	
			1660 (b)		1660 (b).
		1708	1708		
1712				1712 (c)	
2006 (d) (e)					
2422		2422			
	2430 (k) (c)		2430 (e)	2430 (e)	
		2450 (e) (f)	2450 (f)		2450 (f).
		2482 (e) (k) (g)	2482 (e) (g)		2482 (e) (g).
				2506 (h)	2506 (h).
2512	2512	2512	2512		
	2538	2538			
2566 (e)			2566	2566	
2616 (d) (e) (i)					
3261 (j)			3261 (j)	3261 (j)	

(b) Use of the frequency 1660 kc shall be coordinated as necessary with use of the frequency 1666 kc by other fixed stations in the Alaska area so as to avoid harmful interference.

(c) To minimize interference to the service of stations in zone 4 operating on 1708 kc, use of the frequency 1712 kc in zone 5 is authorized only for stations located north of 62 degrees north latitude.

(d) To minimize interference to or from the operation of stations outside the Alaska area or United States Government stations within Alaska, each of the frequencies listed in paragraph (a) of this section, to which this paragraph designator (d) is applied, is authorized for use annually in the respective zone only during the hours from 7:00 a. m. to 11:00 p. m. local standard time from May 15 to September 15 inclusive; and from 8:00 a. m. to 9:00 p. m. local standard time from April 1 to May 14 inclusive and from September 16 to October 31 inclusive.

(e) To provide for the most effective use of assigned frequencies available under this part and to minimize interference to or from the operation of stations outside the Alaska area, each of the frequencies listed in paragraph (a) of this section, to which this paragraph designator (e) is applied is authorized for use in the respective zone for fixed service, exclusively by coast station licensees who operate a public coast station at the same location and on the same frequency for maritime mobile service; and, in order to serve adequately an industry in Alaska, have an established requirement for a radio-communication system of fixed service and maritime mobile service on a radio-channel common to both of these services.

(f) Use of the frequency 2450 kc shall be coordinated as necessary with use of the frequency 2466 kc by other fixed stations in the Alaska area as authorized in § 14.206, so as to avoid harmful interference.

(g) Use of the frequency 2482 kc shall be coordinated as necessary with use of the frequencies 2466 kc and 2474 kc by other fixed stations in the Alaska area as authorized in § 14.206, so as to avoid harmful interference.

(h) Use of the frequency 2506 kc for fixed service in the Alaska area is authorized on condition that harmful interference shall not be caused to the service of any coast station located in the vicinity of San Francisco or Eureka, California, to which this frequency is assigned as a carrier frequency for transmission.

(i) Use of the frequency 2616 kc shall be coordinated as necessary with use of the frequency 2632 kc by other fixed stations in the Alaska area as authorized in § 14.206, so as to avoid harmful interference.

(j) In so far as is practicable, fixed stations shall limit their use of the frequency 3261 kc to communication over distances which cannot be effectively covered by the use of a frequency below 2700 kc or above 70 Mc.

(k) To minimize interference to or from the operation of stations outside the Alaska area, each of the frequencies listed in paragraph (a) of this section, to which this paragraph designator (k) is applied, is authorized for use annually in the respective zone only during the hours from 6:00 a. m. to 11:00 p. m. local standard time, from April 1 to September 30 inclusive.

(l) To provide for continuance of existing fixed service in the Alaska area for a temporary period in which necessary changes in the frequency assignments of certain stations may be effected, any fixed station at any authorized location in Alaska, which, before the effective date of this section, was licensed to transmit on one or more of the frequencies listed in paragraph (a) of this section for communication with any other fixed station in Alaska, may continue to transmit on such frequency or frequencies for the same purpose (without regard to the specific limitations and requirements set forth in paragraphs (a) through (k) of this section) until January 1, 1957. After that date, such station shall operate only in conformity with the provisions of those paragraphs: *Provided*, That after September 15, 1955, at each station location where such operation at variance with any of the provisions of paragraphs (a) through (k) causes harmful interference to the service of a licensed station operating in conformity with those paragraphs, or to any authorized government service, the station which is operating not in conformity with those paragraphs shall, except in an emergency involving the immediate safety of life or property, limit its transmissions to such periods of time as will not cause such interference.

NOTE: The frequencies designated in paragraph (a) of § 14.205 are additionally available (except 1660 kc) for maritime mobile service as provided in Subpart G of this part. This dual allocation is primarily for the purpose of providing a group of frequencies for radio station licensees in the Alaska area whose industrial operations require an integrated system of point-to-point and shipshore communication.

§ 14.206 *Frequencies for communication with ACS.* (a) Each of the following frequencies in kilocycles is authorized as an assigned frequency for use by Alaska-public fixed stations in accordance with Subpart E of this part, for communication with fixed stations of the Alaska Communications System which are located in the Alaska area and are open to public correspondence: *Provided*, That to to assure necessary coordination each Alaska-public fixed station when communicating with a fixed station of the ACS shall transmit only on a frequency listed in this section which is specifically designated for such use by that station in a written notification to the respective station licensee from the ACS in response to a written request therefor received by the ACS from that licensee. Likewise, the periods of time during which the licensed station may transmit on such frequency shall be those which are designated in such notification from the ACS. The particular ACS station(s) with which the licensed station may communicate and the specific ACS frequency or frequencies to be used for transmitting to the licensed station are designated by the ACS in its written notice to the station licensee:

(1) 149.6 for telegraphy only; normally for use at any appropriate location in the Alaska area.

NOTE: The frequency 149.6 kc may be used also for transmission by ACS fixed stations to public fixed stations.

(2) 1666 for telegraphy only; normally for communication with ACS stations located at Ketchikan and Naknek. The use of this frequency shall be coordinated as necessary with use of the frequency 1660 kc by other fixed stations in the Alaska area so as to avoid harmful interference.

NOTE: The frequency 1666 kc may be used also for transmission by ACS fixed stations to public fixed stations.

(3) 2256 for telegraphy and/or telephony; for communication with ACS stations located at Anchorage and Ketchikan.

(4) 2466 for telegraphy and/or telephony; normally for communication with ACS stations located at Wrangell, Petersburg, Naknek and Kotzebue. The use of this frequency shall be coordinated as necessary with use of the frequencies 2450 kc, 2474 kc and 2482 kc by other stations in the Alaska area so as to avoid harmful interference.

(5) 2474 kc for telegraphy and/or telephony; normally for communication with ACS stations located at Sitka, Kodiak, Nome and Barrow. The use of this frequency shall be coordinated as necessary with use of the frequencies 2466 kc and 2482 kc by other stations in the Alaska area so as to avoid harmful interference.

(6) 2632 for telegraphy and/or telephony; normally for communication with ACS stations located at Cordova, Fairbanks, Bethel and Unalaska. The use of this frequency shall be coordinated as necessary with use of the frequency 2616 kc by other stations in the Alaska area so as to avoid harmful interference.

(7) 2694 for telegraphy and/or telephony; for communication with ACS stations located at Juneau and Cold Bay.

(8) 2776 for telegraphy and/or telephony; for communication with ACS station located at Ketchikan.

(9) 3357 for telegraphy and/or telephony; for communication with ACS stations located at Fairbanks and Juneau. The use of this frequency shall be coordinated as necessary with use of the frequency 3365 kc by other fixed stations in the Alaska area so as to avoid harmful interference.

(10) 3365 for telegraphy and/or telephony; for communication with ACS station located at Unalaska. The use of this frequency shall be coordinated as necessary with use of the frequency 3357 kc by other fixed stations in the Alaska area so as to avoid harmful interference.

(11) 5137.5 for telegraphy and/or telephony; normally for communication with ACS stations located at Anchorage and Ketchikan. The use of this frequency shall be limited to the hours from 6:00 a. m. to 9:00 p. m. local standard time.

(12) 5207.5 for telegraphy and/or telephony; normally for communication with ACS stations located at Juneau, Fairbanks and Kodiak. The use of this frequency (except in zone 4 west of 165 degrees west longitude) shall be limited to the hours from 6:00 a. m. to 9:00 p. m. local standard time.

(13) Frequencies shown herein which are designated for transmission to particular ACS stations shall be utilized only for transmission to those stations except with respect to the frequencies 2466, 2474, 2632, 5137.5 and 5207.5 kc. In the case of these five frequencies, the ACS may designate other station locations depending upon operational requirements.

(b) When transmitting to any ACS fixed station on any frequency above 2000 kc authorized in paragraph (a) of this section, each Alaska-public fixed station shall use any class of emission permissible under applicable provisions of § 14.152 which is designated by the ACS; when such designation is not made by the ACS, the station licensee shall select the class of emission to be used in accordance with the provisions of § 14.152. In so far as is practicable when transmitting by means of telegraphy on any of these frequencies above 2000 kc, and subject to designation by the ACS as herein provided, class A1 emission only shall be used; after January 1, 1957, the use of class A2 emission on these frequencies above 2000 kc, under the provisions of § 14.152 is not permissible.

§ 14.207 *Use of United States Government frequencies.* Frequencies assigned to United States Government radio stations are assignable by specific action of the Commission to Alaska-public fixed stations for communication with other licensed stations of this class when such communication is necessary in connection with activities performed in coordination with or in behalf of the Federal Government and where the Commission determines, after consultation with the appropriate government agency or agencies, that such assignment is necessary.

§ 14.208 *Extended interim use of conditional fixed service frequencies.* With respect to each assigned frequency authorized by this subpart to be used by certain fixed stations until not later than January 1, 1957, those stations may, if the respective station licensee has made proper application not later than January 1, 1957 for renewal of the respective fixed station license, continue to transmit on such frequency for fixed service until the date on which the licensee receives the renewed license, or pending Commission action on the respective application until May 1, 1957, whichever date first occurs.

§ 14.209 *Temporary frequencies for treaty implementation.* In addition to the frequencies specifically assigned in this subpart, other frequencies may be authorized temporarily for the purpose of facilitating the implementation of the Agreement concluded at the Extraordinary Administrative Radio Conference, Geneva, 1951.

SUBPART G—ASSIGNMENT AND USE OF MARITIME SERVICE FREQUENCIES

§ 14.251 *Cooperative use of frequency assignments.* Unless provided otherwise by this part, or by the particular station authorization, each radio-channel authorized for use by a ship or coast station subject to this part is available for use on a shared basis only and shall not be construed as available for the exclusive use of any one station or any one station licensee. All station licensees shall cooperate in the use of their respective frequency assignment in order to minimize interference and obtain the most effective use of the authorized radio-channels.

§ 14.252 *Protection of government services.* Notwithstanding other provisions of this part, the assignment and use of any of the frequencies designated in this subpart shall be subject to the express condition that any individual assigned frequency may not be authorized for transmission by a ship or coast station at any specific location in the Alaska area where its use could cause harmful interference to a United States Government radio service which, in the discretion of the Commission, must be protected from such interference.

§ 14.253 *Alternate transmission on same radio-channel.* Except for communication between coast stations of the Alaska Communications System and licensed ship stations as hereinafter specifically designated in this subpart, all transmission, on each radio channel within the frequency-band 1605 kc–2035 kc, 2107 kc–9000 kc, or 156.25 Mc–157.25 Mc assigned by this subpart, by two or more stations engaged in any one exchange of signals or communications with each other, shall take place on only one radio-channel. For this purpose the stations communicating with each other shall transmit and receive on the same radio-channel: *Provided*, That this requirement is waived in an emergency affecting the safety of life or property when, by reason of interference or limitation of equipment, this method of single-channel communication cannot be used.

§ 14.254 *Frequencies to be used for distress signals.* (a) In case of distress in the maritime service, the frequency to be used shall be the international radiotelegraph distress frequency 500 kc with maximum power obtainable; the class of emission to be used if possible shall be A2. Stations which cannot transmit on 500 kc or use A2 emission shall, if possible, use their normal calling frequency and normal class of emission with maximum power obtainable.

(b) The frequency 2182 kc is the international radiotelephone distress frequency for the maritime mobile service. It may be used for this purpose by ship or aircraft stations employing telephony in the band 1605 to 2850 kc when requesting assistance from the maritime services.

(c) No provision of the International Radio Regulations shall prevent a mobile station in distress from using any means available to it for drawing attention, signalling its position, and obtaining help. No provision of this part shall prevent a mobile station in distress from using any frequency assigned by this part for the transmission of distress signals or distress communications in the event it is impossible, impracticable, or ineffective for such station to use the frequency 500 kc or 2182 kc to draw attention, signal its position and obtain help.

NOTE: To determine the detailed procedure to follow in case of distress in the maritime mobile service, refer to Subpart J of Part 8 and § 7.187 of this chapter.

§ 14.255 *Ship station frequencies for use in all zones for telegraphy only.* (a) Each of the following frequencies in kilocycles is authorized as an assigned frequency for use by ship stations in any zone of the Alaska area when transmitting by means of telegraphy, in accordance with Subpart E of this part, for communication with other stations of the maritime mobile service using telegraphy:

500—for calling and distress as provided in §14.254 of this subpart and in Subparts J and N of Part 8 of this chapter.

425, 448, 454, 468, 480—for working as provided in Subpart N of Part 8 of this chapter.

410—for maritime radionavigation service (radio direction-finding) as provided in Subpart P of Part 8 of this chapter. In addition to the transmission of specific signals for direction-finding, this frequency may be used for communication by telegraphy with direction-finding stations in connection with established international operating procedure relative to radiolocation by means of direction-finding.

444—exclusively for communication with United States Government stations; the use of this frequency for any other communication (except distress) is not authorized. The use of this frequency shall not cause harmful interference to the service of any coast station.

(b) (1) The frequency 2091 kc is the Region 2 (including the Alaska area) international calling frequency for ship stations using telegraphy within the band 2065–2107 kc. This frequency shall be used for call, reply and signals preparatory to traffic by all ship stations using telegraphy to establish communication with other ship stations operating in the band 2065–2107 kc or with coast stations using telegraphy and operating

within the band 2035–2065 kc. Additionally in the Alaska area, this frequency may be used as a calling frequency to establish communication with ship or coast stations using telegraphy and operating within the band 1605–2035 kc or 2107–3400 kc. Transmission by ship stations for the purposes herein set forth on any calling frequency within the band 2088.5–2093.5 kc is permissible as a practical operating procedure to minimize interference, in lieu of transmission on the frequency 2091 kc. (These alternative calling frequencies are 2089, 2089.5, 2090, 2090.5, 2091.5, 2092, 2092.5 and 2093 kc.) The use of the frequency 2091 kc or any other calling frequency within the band 2088.5–2093.5 kc by ship stations for purposes other than those set forth herein (except for distress traffic) is not authorized. A ship station, after establishing communication on a calling frequency within this band, shall change to an authorized telegraph working frequency for the transmission of message traffic by means of telegraphy.

(2) Working frequencies within the band 2065–2107 kc designated in Subpart N of Part 8 of this chapter for use by ship stations employing telegraphy are authorized for use as assigned frequencies by ship stations using telegraphy in the Alaska area in accordance with the applicable provisions of Part 8 of this chapter: *Provided*, That the authorized class of emission and the authorized transmitter power shall, with respect to ship stations in the Alaska area, be in conformity with Subpart E of this part.

NOTE: Use of frequencies in the band 2065–2105 kc by ship stations is authorized on a day only basis and subject to the condition that harmful interference will not be caused to stations which, in the discretion of the Commission, may have priority on the frequency used by the station to which interference is caused. The term "day", for this and other purposes, is defined in § 8.2 (l) (1) of this chapter.

(c) Assigned calling and working frequencies below 405 kc and within the band 4000–25000 kc designated in Subpart N of Part 8 of this chapter for use by ship stations employing telegraphy are available for use by ship stations in the Alaska area using telegraphy and operating in accordance with applicable provisions of Part 8 of this chapter, including provisions therein governing the class of emission and the authorized transmitter power.

§ 14.256 *Coast station frequencies for use in all zones for telegraphy only.* Each of the following frequencies in kilocycles is authorized as an assigned frequency for use by public coast stations in all zones of the Alaska area when transmitting by means of telegraphy, in accordance with Subpart E of this part, for communication with ship and aircraft stations, and with other public coast stations using telegraphy in the Alaska area, in accordance with § 7.202 of this chapter:

500—for calling and distress as provided in §§ 7.187, 7.207 (a), 7.208 (b), and 7.212 of this chapter.

416 and 438—for working as provided in Subpart H of Part 7 of this chapter.

2052.5—calling and working frequency for communication with ship stations when such stations are using telegraphy within the band 2065–2107 kc. This frequency is authorized on a day only basis and subject to the condition that harmful interference will not be caused to stations which, in the discretion of the Commission, may have priority on the frequency used by the station to which interference is caused.

NOTE: The term "day" in reference to use of 2052.5 kc, and for other purposes, is defined in § 7.2 (m) of this chapter.

§ 14.257 *Safety frequencies for ship and coast stations in all zones using telephony.* Each of the following frequencies is authorized as an assigned frequency for telephony for use by ship and coast stations in all zones of the Alaska area in accordance with the provisions of Subparts I and J of Part 7 and Subpart O of Part 8 of this chapter: *Provided*, That the authorized class of emission and the authorized transmitter power shall be in conformity with the provisions of Subpart E of this part:

2182—for distress, calling and safety purposes; ship-shore and ship-to-ship;

156.8 Mc—primarily for calling and safety purposes; ship-shore and ship-to-ship;

156.7 Mc—primarily for communication between ship stations and limited coast stations for the exchange of information essential to maritime radiolocation service.

§ 14.258 *Frequencies for ship-to-ship communication in all zones by telephony.* (a) The assigned frequencies 2638 kc and 2738 kc designated in Subpart O of Part 8 of this chapter for ship-to-ship communication by means of telephony are available for use by ship stations on board any class of vessel in all zones of the Alaska area using telephony and operating in accordance with applicable provisions of Part 8 of this chapter: *Provided*, That the authorized class of emission and the authorized transmitter power shall be governed by Subpart E of this part in lieu of the particular provisions of Part 8 of this chapter relative to emission and power authorized for these two frequencies.

NOTE: Except for test purposes, the frequency 2738 kc may not be used or assigned unless certification regarding attenuation of emission on the related second harmonic frequency (5476 kc) has been submitted to the Commission's office at Washington, D. C., as required by applicable provisions of Part 8 of this chapter.

(b) The assigned frequency 156.3 Mc designated in Subpart O of Part 8 of this chapter for ship-to-ship communication by means of telephony is available for use by ship stations on board any class of vessel in all zones of the Alaska area using telephony and operating in accordance with the applicable provisions of Part 8 of this chapter: *Provided*, That the authorized class of emission and the authorized transmitter power shall, with respect to ship stations in the Alaska area, be in conformity with Subpart E of this part.

§ 14.259 *Frequencies for ship-shore and ship-to-ship communication by telegraphy or telephony in all zones.* (a) Each of the following frequencies in kilocycles is authorized as an assigned frequency for use, in accordance with Subpart E of this part, by coast and ship stations in all zones of the Alaska area, as designated herewith:

(1) For communication by telegraphy and/or telephony between public coast stations and public ship stations on board any type of vessel—1622, 2382.

(2) For ship-to-ship communication (for business, operational and safety purposes) by telegraphy and/or telephony—1622 and 2382, except that after September 15, 1955, the use of these frequencies shall be—

(i) Between ship stations on board vessels of less than 500 gross tons—1622 only; and

(ii) Between ship stations on board vessels of 500 gross tons or more—2382 only.

(3) (i) Primarily for communication by telephony between public coast stations and public ship stations on board any type of vessel, during the hours from 6:00 a. m. to 9:00 p. m. local standard time only—4386.2;

(ii) Additionally the frequency 4386.2 kc may be used on a secondary basis for communication by telephony, during the hours from 6:00 a. m. to 9:00 p. m. local standard time only—

(*a*) Between public coast stations, separated not less than 50 miles, for the exchange of public correspondence under conditions which make it necessary to use this frequency for this purpose in lieu of an assigned frequency specifically designated in Subpart F of this part for fixed service; on condition that ship-shore communication shall be given priority at all times;

(*b*) Between ship stations on board any type of vessel for business, operational and safety purposes, on condition that harmful interference shall not be caused to the service of any coast station using telephony. In so far as is practicable, the use of this frequency for this purpose shall be limited to the relatively longer distances over which the use of frequencies below 2400 kc or above 156 Mc would not be effective.

§ 14.260 *Frequencies for ship-shore public telephone service in all zones.* (a) The frequency 2134 kc is authorized as an assigned frequency for use in all zones of the Alaska area by public ship stations, in accordance with Subpart E of this part, for communication exclusively with coast stations of the Alaska Communications System which are located in the Alaska area and are open to public correspondence. When transmitting on this frequency to any ACS coast station, ship stations normally shall employ class A3 emission for telephony; they may employ telegraphy if desired, with class of emission designated by the ACS, when the particular ACS coast station is capable of using telegraphy. The associated frequency to be used for transmission from the coast station to the ship station shall be within the frequency-band 1605–3400 kc and shall be designated for each location by the ACS.

NOTE: The ACS coast station transmitting frequency and the hours of service of each ACS coast station at the respective locations in the Alaska area at which this service is available may be obtained upon request made to the ACS or to the Commission's Engineer in Charge at Anchorage, Alaska, or Seattle, Washington. These frequencies are listed herewith as of April 6, 1955, for the information of ship station licensees.

ACS coast station location:	*Respective transmitting frequency (kc)*
Anchorage	2312
Barrow	2312
Cold Bay	2312
Cordova	2300
Craig	2312
Juneau	2784
Ketchikan	2300
Kodiak	2784
Naknek	2312
Nome	2784
Petersburg	2312
Seward	2312
Sitka	2312
Skagway	2312
Unalaska	2312
Valdez	2300
Whittier	2312
Wrangell	2312

(b) (1) The provisions of this paragraph shall apply to public coast stations in the Alaska area in lieu of the provisions of §§ 7.307 and 7.308 of this chapter, and to ship stations when communicating with public coast stations in the Alaska area in lieu of § 8.356 of this chapter.

(2) Each of the following frequencies in megacycles is authorized for use as an assigned frequency, in accordance with Subpart E of this part, for the exchange of public correspondence by means of telephony between public coast stations and ship stations, in all zones of the Alaska area, as designated herewith:

For coast station transmission: 161.9; for ship station transmission: 157.4. These two frequencies comprise one radio telephone circuit.

For coast station transmission: 162.0; for ship station transmission: 157.3. These two frequencies comprise one radio telephone circuit.

When alternate transmission by the coast station and the ship station on the same assigned frequency is required, either 157.4 Mc or 157.3 Mc shall be used by each class of station.

(3) At locations where one public ship-shore radiotelephone circuit in this frequency-band is sufficient to provide satisfactory public telephone service, the frequencies 161.9 Mc and 157.4 Mc for a two-frequency circuit or the frequency 157.4 Mc for a single-frequency circuit shall be used.

(4) The assigned frequency 162.0 Mc or 157.3 Mc normally may be authorized for use by a public coast station only when a satisfactory showing is made by the applicant for such authorization that such station under its outstanding license is utilizing the frequency 161.9 Mc or 157.4 Mc at maximum capacity to provide public ship-shore telephone service and there is a need by that station for an additional circuit to adequately serve users or prospective users of the station's service.

(c) Frequencies within the band 4000 kc–30 Mc designated in §§ 8.354 and 8.355 of this chapter for use by ship stations employing telephony for communication with public coast stations located in the vicinity of specified geographic locations (outside the Alaska area) are available for use by ship stations, at sea in the Alaska area, using telephony and operating in accordance with applicable provisions of Part 8 of this chapter, including provisions therein governing the class of emission and the authorized transmitter power.

§ 14.261 *Frequencies above 156 Mc for business and operational purposes.* (a) The provisions of this section shall, in respect to use of the assigned frequencies 156.4, 156.5, 156.6, 156.7, 156.9 and 157.0 Mc for business and operational purposes, apply to limited coast stations in the Alaska area in lieu of related provisions of §§ 7.356 and 7.361 of this chapter and to ship stations in the Alaska area in lieu of related provisions of § 8.360 of this chapter.

(b) Each of the following frequencies in megacycles is authorized as an assigned frequency for communication, in accordance with Subpart E of this part, between ship stations and limited coast stations and between ship stations in all zones of the Alaska area to serve the business and operational needs of ships, subject to the conditions herein set forth. These frequencies are not authorized for the handling of public correspondence, nor for communication of a personal nature not relative to safety or the business or operational needs of ships.

(1) (i) 156.4, 156.5 and 156.9—for telegraphy and/or telephony. The use of these frequencies by ship stations shall be limited to such stations on board commercial transport vessels, vessels of municipal governments in Alaska, and vessels of the territorial government of Alaska.

(ii) Additionally, limited coast stations authorized to transmit on one or more of these frequencies may communicate thereon with other limited coast stations in any zone of the Alaska area as may be necessary to facilitate the business or operation of ships in the Alaska area, or for transmission of any emergency messages relating to the safety of life or property.

(2) 156.7—for the same use and purposes and under the same conditions as are prescribed for 156.4, 156.5 and 156.9 Mc in subparagraph (1) of this paragraph; upon the express condition that its use, at the particular location and at the particular time, is not required for any maritime radio-location service as provided in §§ 7.356 (a) (1) and 8.359 (f) (1) of this chapter.

(3) 156.6—for telephony only; for communication solely in connection with harbor or port operations, including docking, lighterage, pilotage, dredging, towing, ship repair, port development, maintenance of navigable channels, and for communication concerning the passage of vessels through locks under governmental control. This frequency may be used for such purposes by limited coast stations and by ship stations on board any class of vessel.

(c) The frequency 157.0 Mc is authorized as an assigned frequency exclusively for use by ship stations in all zones of the Alaska area for ship-to-ship communication by means of telephony in accordance with Subpart E of this part; on condition that such ship stations are capable of transmitting and receiving (and are authorized to transmit) on the ship-to-ship frequency 156.3 Mc also. This frequency shall be used only by ship stations on board commercial transport vessels, vessels of municipal governments in Alaska, and vessels of the territorial government of Alaska, to serve the business and operational needs of such vessels. This frequency is not authorized for the handling of public correspondence, nor for communication of a personal nature not relative to safety or the business or operational needs of ships.

NOTE: The term "commercial transport vessel" is defined in § 8.2 (o) (3) of this chapter.

§ 14.262 *Use of marine utility stations.* Licensed marine-utility stations are authorized to be used on land and on board ship in all zones of the Alaska area on each of the frequencies 156.3, 156.4, 156.5, 156.6, 156.7, 156.8, 156.9 and 157.0 Mc, in conformity with the provisions of this part which are applicable to the use of these frequencies in the Alaska area, and subject further to such provisions of Parts 7 and 8 of this chapter that apply to this class of station which are not inconsistent with the applicable provisions of this part.

§ 14.263 *Frequencies for temporary use in all zones.* (a) Each of the following frequencies in kilocycles is authorized as an assigned frequency for use, in accordance with Subpart E of this part, temporarily for a limited period as designated herewith; for public coast stations in Alaska and for ship stations in Alaskan waters employing primarily telephony (telegraphy also is permissible) for ship-shore and ship-to-ship communication upon the condition that no interference will result to other services:

(1) 3265 and 5167.5—available under the respective provisions of subparagraphs (2) and (3) of this paragraph until not later than September 15, 1955, only to ship and coast stations licensed to transmit on the respective frequency before the effective date of this section;

(2) The frequency 3265 kc may be used where originally authorized prior to March 1, 1937, on a shared basis with fixed service subject to the requirement that its use shall be coordinated with use of the frequency 3261 kc by Alaska-public fixed stations located in zones 1, 4, and 5, so as to avoid harmful interference to the service of those stations;

(3) The frequency 5167.5 kc is available on a shared basis with the fixed service, for use during the hours from 6:00 a. m. to 6:00 p. m., P. s. t. only;

(4) 1660 and 3201—available for maritime mobile service (on a shared basis with fixed service) under the respective provisions of subparagraphs (5) and (6) of this paragraph until not later than January 1, 1957, only to ship and coast stations licensed to transmit on the respective frequency before the effective date of this section;

(5) Use of the frequency 1660 kc shall be coordinated as necessary with use of the frequency 1666 kc by fixed stations in the Alaska area so as to avoid harmful interference;

(6) At locations where use of the frequency 1660 kc or 3201 kc for maritime mobile service after September 15, 1955,

causes harmful interference to the service of a licensed fixed station or stations operating in accordance with applicable provisions of this part, or to any authorized government service, the station using either of these frequencies for maritime mobile service shall, except in an emergency involving the immediate safety of life or property, limit its transmissions to such periods of time as will not cause such interference;

(7) 3092.5—available until not later than June 1, 1955, to ship and coast stations licensed to transmit on the frequency before the effective date of this section.

(b) Each of the following frequencies in kilocycles is authorized as an assigned frequency for use temporarily, in accordance with Subpart E of this part, for a limited period as designated herewith (on a secondary basis in relation to their primary use by fixed stations pursuant to §§ 14.204 (a) (8) and 14.206) for public coast stations in Alaska and for ship stations in Alaskan waters employing primarily telephony (telegraphy also is permissible) for ship-shore and ship-to-ship communication upon the condition that no interference will result to other services:

(1) 2466, 2474 and 2632 kc—available for maritime mobile service until not later than September 15, 1955, only to ship and coast stations licensed to transmit on the respective frequency before the effective date of this section. At locations where the use of any of these frequencies for maritime mobile service as provided herein causes harmful interference to the service of a licensed fixed station or stations operating in accordance with applicable provisions of this part, or to any authorized government service, the station using the respective frequency involved shall, except in an emergency concerning the immediate safety of life or property, limit its transmissions to such periods of time as will not cause such interference.

(2) 5137.5, 5207.5 and 8070—available, during the hours from 6:00 a. m. to 6:00 p. m., P. s. t. only, for maritime mobile service until not later than September 15, 1955, only to ship and coast stations licensed to transmit on the respective frequency before the effective date of this section, and subject to the requirement that use of these frequencies shall be coordinated with their use by fixed stations in the Alaska area so as to avoid harmful interference: *Provided,* That the limitation in hours of use of 5207.5 and 8070 kc herein prescribed shall not apply to use of these two frequencies in the Aleutian Islands and contiguous regional waters west of 165 degrees west longitude.

§ 14.264 *Frequencies assigned for use in particular zones.* (a) Each of the following frequencies in kilocycles is authorized as an assigned frequency for use by public coast stations and ship stations employing telegraphy and/or telephony in accordance with Subpart E of this part: *Provided,* That telephony only shall be employed on the frequencies 4406.9 and 4434.5 kc. With respect to the operation of coast stations, these frequencies are authorized for use (below 3400 kc on a shared basis with Alaska-public fixed stations) by coast stations located only in the zone or zones designated herein opposite the respective frequency; and for use in accordance with paragraph (l) of this section, subject to the specific conditions and limitations designated herein by identifying reference placed opposite the respective frequency in each column.

Zones in which transmission on the particular frequency is authorized subject to the limiting conditions specified by references to following paragraphs of this section, including paragraph (l) in reference to each frequency:

Zone 1	Zone 2	Zone 3	Zone 4	Zone 5	Zone 6
1646			1646		1646.
	1652			1652	
		1708	1708		
1712 (b)				1712 (b)	
2066 (d)					
	2118 (m)		2118 (m)		
2422		2422			
	2430 (c) (n)		2430	2430	
		2450 (f)	2450 (f)		2450 (f).
		2482 (n) (g)	2482 (g)		2482 (g).
				2506 (h)	2506 (h).
2512	2512	2512	2512		
	2538 (e)	2538 (e)			
2566			2566	2566	
2616 (d) (l)					
3261 (j)			3261 (j)	3261 (j)	
4406.9 (k)	4406.9 (k)	4406.9 (k)			
			4434.5 (k)	4434.5 (k)	4434.5 (k).

(b) To minimize interference to the service of stations in zone 3 or 4 operating on 1708 kc, ship stations in zone 1 shall not transmit on 1712 kc when west of 138 degrees west longitude, nor in zone 5 when south of 62 degrees north latitude; also coast stations in zone 5 south of that latitude shall not transmit on 1712 kc.

(c) To minimize interference to the service of ship stations transmitting on 2430 kc to any public coast station in the vicinity of Seattle, Washington, ship stations in zone 2 shall not transmit on 2430 kc when south of 59 degrees north latitude.

(d) To minimize interference to or from the operation of stations outside the Alaska area or United States Government stations within Alaska, each of the frequencies listed in paragraph (a) of this section, to which this paragraph designator (d) is applied, is authorized for use annually in the respective zone only during the hours from 7:00 a. m. to 11:00 p. m. local standard time from May 15 to September 15 inclusive, and from 8:00 a. m. to 9:00 p. m. local standard time from April 1 to May 14 inclusive and from September 16 to October 31 inclusive.

(e) To minimize interference to or from the service of any coast station transmitting on 2538 kc and located in the vicinity of Vancouver, British Columbia, ship stations in zones 2 and 3 shall not transmit on 2538 kc when south of 56 degrees north latitude.

(f) Use of the frequency 2450 kc shall be coordinated as necessary with use of the frequency 2466 kc by fixed stations in the Alaska area as authorized in § 14.206, so as to avoid harmful interference.

(g) Use of the frequency 2482 kc shall be coordinated as necessary with use of the frequencies 2466 kc and 2474 kc by fixed stations in the Alaska area as authorized in § 14.206, so as to avoid harmful interference.

(h) Use of the frequency 2506 kc for maritime mobile service in the Alaska area is authorized on condition that harmful interference shall not be caused to the service of any coast station located in the vicinity of San Francisco or Eureka, California, to which this frequency is assigned as a carrier frequency for transmission.

(i) Use of the frequency 2616 kc shall be coordinated as necessary with use of the frequency 2632 kc by fixed stations in the Alaska area as authorized in § 14.206, so as to avoid harmful interference.

(j) In so far as is practicable, ship and coast stations shall limit their use of the frequency 3261 kc to communication over distances which cannot be effectively covered by the use of a frequency below 2700 kc or above 156 Mc.

(k) (1) The frequencies 4406.9 and 4434.5 kc are authorized for telephony exclusively; for use during the hours from 6:00 a. m. to 9:00 p. m. local standard time only. Such use of the frequency 4434.5 kc is authorized on condition that harmful interference shall not be caused to the service of any coast station located in the Great Lakes area to which this frequency is assigned as a carrier frequency for transmission.

(2) Additionally, public coast stations may communicate, on a secondary basis, during the hours from 6:00 a. m. to 9:00 p. m. local standard time only, on 4406.9 kc or 4434.5 kc for the exchange of public correspondence with other public coast stations within not less than 50 miles; under conditions which make it necessary to use either of these frequencies for this purpose in lieu of an assigned frequency specifically designated in Subpart F of this part for fixed service; and on condition that priority shall be given at all times to ship-shore communication.

(l) (1) When operating on any frequency designated in paragraph (a) of this section, a ship station shall transmit only on an assigned frequentcy which is specifically authorized by that paragraph for transmission in the zone in which the ship station then is located: *Provided,* That for communication with a ship or coast station located in a contiguous zone which uses a frequency in accordance with paragraph (a) but not designated by that paragraph for use in the zone in which the ship station then is located, such ship station may transmit on the contiguous zone frequency when, by reason of conditions not under its control, such operation becomes necessary.

(2) Ship stations are authorized generally to communicate on each frequency designated in this section with public coast stations using the same frequency, in accordance with § 14.253. A ship station may communicate on any of these frequencies with another ship station only when requested to do so by a public coast station which operates on the same frequency in accordance with paragraph (a) of this section and is within communication range of the ship station.

(m) Use of the frequency 2118 kc for maritime mobile service is subject to interference from transmission by ship stations on frequencies within the band 2065 to 2107 kc. Use of 2118 kc shall be coordinated as necessary with use of the frequency 2134 kc as authorized in § 14.260 (a) so as to avoid harmful interference.

(n) To minimize interference to or from the operation of stations outside the Alaska area, each of the frequencies listed in paragraph (a) of this section, to which this paragraph designator (n) is applied, is authorized for use annually in the respective zone only during the hours from 6:00 a. m. to 11:00 p. m. local standard time, from April 1 to September 30 inclusive.

(o) To provide for continuance of existing maritime mobile service in the Alaska area for a temporary period in which necessary changes in the frequency assignments of certain stations may be effected, any coast or ship station at any authorized location in Alaska, which, before the effective date of this section, was licensed to transmit on one or more of the frequencies listed in paragraph (a) of this section for communication with stations of the maritime mobile service in Alaska, may continue to transmit on such frequency or frequencies for the same purpose (without regard to the specific limitations and requirements set forth in paragraphs (a) through (n) of this section) until January 1, 1957. After that date, the station shall operate only in conformity with the provisions of those paragraphs: *Provided,* That after September 15, 1955, at each station location where such operation at variance with any of the provisions of paragraphs (a) through (n) causes harmful interference to the service of a licensed station operating in conformity with those paragraphs or to any authorized government service, the station which is operating not in conformity with those paragraphs shall, except in an emergency involving the immediate safety of life or property, limit its transmissions to such periods of time as will not cause such interference.

NOTE: The frequencies designated in paragraph (a) of § 14.264 are additionally available (except 4406.9 and 4434.5 kc) for Alaska-public fixed stations as provided in Subpart F of this part. This dual allocation is primarily for the purpose of providing a group of frequencies for radio station licensees in the Alaska area whose industrial operations require an integrated system of ship-shore and point-to-point communication.

§ 14.265 *Rules in other parts applicable.* The rules relating to the assignment and use of frequencies for ship, aircraft, marine-utility, and coast stations operating in the maritime mobile service and for stations operating in the maritime radiolocation service which are set forth in Parts 7 and 8 of this chapter (except §§ 7.307, 7.308 and 8.356) shall, except as otherwise specifically provided in this part, apply to stations of these services (including developmental stations) in the Alaska area so far as they are consistent with this part.

§ 14.266 *Extended interim use of conditional maritime service frequencies.* With respect to each assigned frequency authorized by this subpart to be used by certain coast stations until not later than January 1, 1957, those stations may, if the respective station licensee has made proper application not later than January 1, 1957 for renewal of the respective coast station license, continue to transmit on such frequency for maritime mobile service until the date on which the licensee receives the renewed license, or pending Commission action on the respective application until May 1, 1957, whichever date first occurs.

§ 14.267 *Temporary frequencies for treaty implementation.* In addition to the frequencies specifically assigned in this subpart, other assigned frequencies may be authorized temporarily for the purpose of facilitating the implementation of the Agreement concluded at the Extraordinary Administrative Radio Conference, Geneva, 1951.

[F. R. Doc. 55-4078; Filed, May 23, 1955; 8:45 a. m.]

PROPOSED RULE MAKING

DEPARTMENT OF AGRICULTURE

Agricultural Marketing Service

[7 CFR Part 984]

HANDLING OF WALNUTS GROWN IN CALIFORNIA, OREGON AND WASHINGTON

NOTICE OF RECOMMENDED DECISION AND OPPORTUNITY TO FILE WRITTEN EXCEPTIONS WITH RESPECT TO PROPOSED AMENDMENTS TO MARKETING AGREEMENT AND ORDER

Pursuant to the rules of practice and procedure governing proceedings to formulate marketing agreements and marketing orders (7 CFR Part 900, 19 F. R. 57), notice is hereby given of the filing with the Hearing Clerk of this recommended decision of the Deputy Administrator, Agricultural Marketing Service, United States Department of Agriculture, with respect to proposed amendments of the marketing agreement and order, as amended (19 F. R. 4214), regulating the handling of walnuts grown in California, Oregon, and Washington (hereinafter referred to as the "order"). That order is effective pursuant to the provisions of the Agricultural Marketing Agreement Act of 1937, as amended (7 U. S. C., 601 et seq.; 68 Stat. 906, 1047), (hereinafter referred to as the "act"), and any amendments which may be adopted as a result of this proceeding also will be effective pursuant to said act. Interested persons may file exceptions to this recommended decision with the Hearing Clerk, United States Department of Agriculture, Room 112A, Administration Building, Washington 25, D. C., not later than the 12th day after publication of this recommended decision in the FEDERAL REGISTER, except that if such 12th day should fall on a Saturday, Sunday, or holiday, they may be filed not later than the next work day. Exceptions should be filed in quadruplicate.

Preliminary statement. A public hearing, on the record of which the presently recommended amendments of the order are formulated, was held in San Francisco, California, on March 30, 1955, pursuant to a notice thereof which was published in the FEDERAL REGISTER (20 F. R. 1701) on March 22, 1955. The notice contained amendments to the order which had been proposed to the Secretary of Agriculture (hereinafter referred to as the "Secretary") by the Walnut Control Board, the administrative agency for operations under the order (hereinafter referred to as the "Board") with the request for a hearing thereon. The Board's proposals were designed principally to effect changes in the order intended to correct inequities and to improve, clarify, and simplify provisions which experience in 1954–55, the first marketing year of operations under the present order, indicated to be desirable. The notice also contained a proposal by Rosenberg Brothers and Company of San Francisco, California, which the proponent stated was designed to eliminate the substantial inequity which now exists with respect to export sales, in the event of a reduction in or the complete elimination of a surplus percentage.

The material issues presented on the record of the hearing in connection with the proposed amendments are as follows:

(1) The amendment of the provisions of § 984.11 of the order by modifying the definition of "to handle" so as to include the purchase within the area of production of walnuts from growers for use in commercial manufacturing, and so as to exclude certain types of sales and deliveries by growers and handlers which are presently included as handling transactions;

(2) The amendment of § 984.54 of the order so as to include therein a provision that any handler may declare to the Control Board his intention to handle specified quantities of shelled walnuts which he owns and has on hand, and withhold walnuts equal to the then applicable surplus percentage thereon, thus satisfying his surplus obligation on the walnuts declared for handling;

(3) The amendment of § 984.61 (b) and § 984.62 (a) of the order so as to provide that sales of merchantable restricted walnuts and surplus walnuts, respectively, may not be shipped or exported to Canada or Cuba when such countries are included in the trade demand estimate;

(4) The amendment of § 984.61 (b) so as to permit the transfer from one handler to another handler of any part or all of the first handler's surplus export credits in the Board's account;

(5) The amendment of § 984.61 of the order so as to provide for the crediting against the surplus obligation of a handler of the sound kernel weight of walnuts exported unless such handler advises the Board that he does not desire such credit;

(6) The amendment of § 984.62 (b) (2) of the order so as to prohibit accepting by the Board of surplus walnuts for pooling or distribution prior to a determination by the Board in the period December 1–15 as to the percentage of surplus withheld which may be accepted prior to February 15 of the marketing year, and the further amendment of such section so as to provide that on or after February 15 the Board shall not accept for pooling and disposition any surplus walnuts in excess of a handler's accumulated surplus obligation;

(7) The amendment of § 984.82 (a) of the order so as to change March 31 to February 15 as the date prior to which requests and recommendations to the Secretary in respect to changing the control percentages must be made;

(8) The amendment of § 984.68 so as to change from January 15 to January 31 as the date by which January 1 inventory reports to the Board by handlers must be filed;

(9) The amendment of § 984.34 so as to make its wording consistent with the provisions of the order authorizing a two-year term of office for Board members and alternates, and so as to specify June 15 instead of June 1 as the date by which nominations must be reported to the Secretary;

(10) The amendment of § 984.82 (a) so as to provide that in no event shall the surplus percentage be reduced below a percentage calculated by dividing the quantity actually exported to the date of the reduction by the quantity subject to regulation; and

(11) The making of such other changes in the order as are necessary to make the entire order conform with the amendments thereof, which are herein proposed for adoption, and the rearrangement and rewording of various provisions so as to clarify the meaning.

Findings and conclusions. The following findings and conclusions on the material issues are based upon the evidence adduced at the hearing and the record thereof.

(1) The term "to handle" as defined in § 984.11 of the order should be amended so as to provide specific authority for the regulation of walnuts which are purchased directly from growers for use in commercial manufacturing within the area of production. Such use would include the manufacture of confectionery, bakery, and ice cream products or any edible product in which walnut kernels or pieces thereof are an ingredient. Unless grower sales and deliveries of walnuts to such manufacturers are regulated, it would be unfair to handlers whose sales and deliveries to such outlets are regulated. There was testimony that substantial quantities of walnuts are sold by growers in the area of production directly to commercial manufacturers. In the case of walnuts purchased directly from growers by commercial manufacturers outside the area of production, which is of negligible volume, such walnuts would be handled at the time they are shipped out of the area of production by the growers, and such growers would be responsible for meeting all order obligations thereon. Because of the large number of growers who make sales of walnuts to commercial manufacturers in the area of production and the small quantities usually sold in such outlets by individual growers, it would be unduly burdensome and costly to regulate the growers as handlers in respect to such transactions. If growers were regulated as handlers in such transactions within the area of production, they would be required to submit reports to the Board such as are required of commercial handlers and would also be required to comply with the withholding and assessment obligations. Inspections of surplus withheld would be required and these inspections of very small lots would in most instances have to be made at the farms. Arrangements would have to be made for delivery of very small lots of surplus to the Board for pooling, or the growers would have to arrange for disposition directly into export outlets. Therefore, the selling and delivering of walnuts by growers to commercial manufacturers within the area of production should not, except as provided in § 984.73, be considered as handling. On the other hand, it would be practicable and desirable to regulate walnuts so purchased directly from growers for use in commercial manufacturing by considering the purchase of such walnuts a handling operation and requiring those manufacturers to comply with the withholding, assessment, reporting, and any other regulations. The proposal in the notice of hearing was that the "use" of walnuts in commercial manufacturing be considered a handling function. Testimony of the proponents changed the proposal to specify "purchase for use" instead of "use." This change was proposed so that regulation would apply at the time of purchase rather than at some later indefinite time when the walnuts would be used in commercial manufacturing. Any such manufacturer who purchases walnuts directly from growers should be considered the handler of those walnuts, subject to responsibility for meeting all applicable order requirements. A handler who makes sales or deliveries to a commercial manufacturer should continue to be considered as the responsible handler in respect to such transactions.

The provisions of § 984.73 of the order, other proposed changes in which are discussed under the issue numbered 11, would require reports to the Board of any shipments by growers to manufacturers which involve an interstate shipment within the area of production other than from Washington to Oregon. The proponents testified that this reporting requirement is necessary in maintaining identity of the walnuts involved in such movements so that the withholding percentages applicable to walnuts in the originating State could be applied at time of subsequent handling established pursuant to § 984.48 or § 984.53 or both. This type of movement should be retained as a handling movement for reporting purposes.

The definition should also be amended to exclude sales made within the area of production by handlers to packers or shellers for packing, shelling, further processing or handling. Such dispositions would be made by the last receiving handlers, and they should be held responsible for meeting the order obligations. Under this change it is contemplated that the regulation would be imposed on handlers in respect to transactions in which the walnuts are disposed of to the "trade." Except as indicated above, it is unnecessary to impose regulations prior to the time when sales and deliveries are made to the trade. Under the present definition sales and deliveries of walnuts within the area of production by handlers to packers or shellers for packing, shelling, further processing or other handling are considered as handling operations. In this connection "further processing" would mean further grading or sorting, chopping, or slicing of kernels, or any other operation which involves further work in preparing the walnuts for sale. The changing of the definition to exclude as handling operations sales and deliveries by handlers prior to sale and delivery to the "trade" should simplify order operations. Some rewording of the definition should be made for the purpose of clarification and simplification. For example, the words "area of production" should be substituted for the words "States of California, Oregon, or Washington."

(2) Section 984.54 of the order should be amended so as to include a provision whereby a handler of shelled walnuts may declare to the Control Board his intention to handle such walnuts and may by so doing incur the current marketing year's obligations with respect to such walnuts. Adoption of this provision would tend to equalize the position of the handler of shelled walnuts with that of the handler of unshelled walnuts in regard to the obligations which may be assumed on walnuts carried over from one marketing year to the next. Under present order provisions, the handler of unshelled walnuts has the option during a particular marketing year of having his prospective carryover of merchantable walnuts certified for handling. By exercising this option he is permitted to incur the obligations on such walnuts which are in effect for that marketing year instead of those in effect for the subsequent marketing year in which they may actually be sold and shipped to market. He may on the other hand elect to carry the walnuts over into the subsequent marketing year as uncertified walnuts and thus incur the obligation in effect for the subsequent marketing year, when the walnuts are certified for handling. This method of operation is of long standing under the order which, until last year, was concerned with the regulation only of unshelled walnuts. The present order, however, contains no similar provision for the certification of shelled walnuts for handling. Therefore, a handler who desires to assume the current marketing year's obligation on shelled walnuts in his prospective carryover must actually handle the walnuts. The evidence indicates that it may be inconvenient and costly for the handler to handle shelled walnuts at the time he would normally desire to assume the current year's obligations. The proposed procedure would obviate the need for him to handle the walnuts during a particular marketing year. Handlers who elect to declare shelled walnuts for handling should be required to file their intentions prior to the end of the marketing year to enable the Board to make proper verification and to keep proper accounts. They should be required further to file such declarations with the Board in writing so that the matter may be administered in a businesslike manner and so as to reduce the possibility of error and misunderstanding regarding the handler's intentions. The declaration of intent should be applicable only to shelled walnuts and only to those walnuts which the declaring handler then owns and has on hand. The proposed provision should be limited to shelled walnuts, and should not include unshelled walnuts intended for shelling, because of the possible misunderstanding which might arise between the Board and handlers concerning kernel yield of unshelled walnuts intended for shelling. The evidence indicates that this restriction to shelled walnuts will not result in undue hardship to shellers, since their carryovers of shelling stock are usually relatively small. The declaring handler should own the shelled walnuts; otherwise the possibility would exist that the same lot would be declared for handling by more than one handler. The handler also should be required to have the walnuts on hand, so that they can be checked and properly identified by a representative of the Board to indicate their category. A handler who has declared shelled walnuts for handling should be permitted to cancel such declaration prior to the end of the then current marketing year. This would afford a handler of shelled walnuts the same privilege as is afforded a handler of unshelled walnuts. The latter is permitted, under provisions of § 984.80, to cancel stock certificates covering inspections of unshelled walnuts. These changes should be effected by including them in a new paragraph (b) in § 984.54, and by changing the designations of present paragraphs (b) and (c) to (c) and (d) respectively.

(3) Paragraph (b) of § 984.61 and paragraph (a) of § 984.62 should be amended so as to clarify the status of Canada and Cuba as outlets for restricted and surplus walnuts. These paragraphs presently state that sales of merchantable restricted or surplus walnuts, as the case may be, to destinations outside the continental United States, Alaska, Hawaii, Puerto Rico, and the Canal Zone should be made only by the Board. Since Canada and Cuba are obviously outside the United States these provisions standing alone would appear to indicate that these two countries are at all times eligible outlets for restricted and surplus walnuts. The evidence shows, however, that the aforesaid provisions must be considered in the light of the action which the Board may take under the authority of § 984.20 (a) and (b) of the order with respect to the inclusion or exclusion of these countries in its estimate of trade demand for merchantable or shelled walnuts, respectively. In operating the agreement and order the eligibility of Canada or Cuba as outlets for restricted and surplus walnuts is necessarily dependent upon whether the Board, with the approval of the Secretary, includes either or both of these countries in its estimates of trade demand. This has been an interpretation of long standing insofar as merchantable restricted walnuts are concerned and this same interpretation is being applied to the shipment or export of surplus walnuts. The Board for a number of years has included Cuba but has excluded Canada in its estimate for trade demand. Some confusion arose during the 1954–55 marketing year as to whether or not Cuba was an eligible outlet for restricted and surplus walnuts and, in view of this situation and the possibility that a similar situation might develop with respect to Canada if that country was to be included in the trade demand estimate, the proposed amendment should be adopted. It should be clearly set forth that when either or both Canada or Cuba are included in the trade demand estimate, they should be regarded in the same category as the United States, Alaska, Hawaii, Puerto Rico, and the Canal Zone in respect to sales of merchantable restricted and surplus walnuts.

(4) The order should be amended by also including, at the end of § 984.62 (a), a provision permitting any handler who is an authorized export agent of the Board to transfer all or any part of his excess export credits in the Board's accounts to such other handler as he may designate. It was proposed that such provision be inserted at the end of § 984.61 (b). This paragraph, however, relates to the export of merchantable restricted walnuts. Since it is intended that the transfer of credits be applicable only to exports of surplus the provision properly belongs in paragraph (a) of § 984.62 which relates to the disposition of surplus by export. Such provision should tend to prevent oversatisfaction of the total surplus obligation in case some handlers exported in excess of their surplus obligations. The evidence was to the effect that export sales must be consummated early in the marketing year, before the supply and demand factors for walnuts may be appraised accurately, in order to take advantage of the demand in the early fall for holiday use. Handlers without export connections who had surplus obligations to meet would be able, to the extent of exporting handlers' excess surplus credits, to acquire credits in satisfaction of such obligations. This would probably be a more profitable alternative for such handlers than pooling their surpluses with the Board for diversion into the oil outlet. It is contemplated that the Board will act as a clearing house of information in this connection with a view of affording all handlers an opportunity to dispose of or acquire such excess credits. It is anticipated that the terms of transfer of such credits would be through bargaining of the handlers concerned. The requests for transfer of credits should be filed with the Board on or before July 31 of the marketing year since the accounts of the Board should be kept in proper order in relation to the surplus obligations for the marketing year. Such requests should be in writing to avoid misunderstandings and to place the procedure on a businesslike basis.

(5) The order should be amended so as to provide that the sound kernel weight of merchantable restricted walnuts and shelled walnuts which are exported shall be credited against the surplus obligation of the exporting handler unless such handler advises the Board, on or before July 31 of the marketing year, that he does not desire such credits. It was proposed that such amendment be incorporated in § 984.61 (b) of the order, which relates to the export of merchantable restricted walnuts. Since credits against a handler's surplus obligations may be secured by exporting shelled walnuts as well as merchantable restricted walnuts it appears that it would be desirable to include the proposed provision under § 984.62 (a) which relates to the disposition of surplus walnuts by export.

The language of the proposed amendment also was not clear as to whether the privilege of the exporting handler to reject credits should be on an all or nothing basis. The proponent testified that the intent of the proposal was that the exporting handler should have maximum discretion in this regard; that is, to select the quantities and lots with respect to which he does not wish to accept credits. The proponent also proposed substitute language for incorporation in the amendment to clarify that intent. This substitute language, which reads "of the quantities and lots of such exported walnuts that he does not wish to have so credited", should be adopted and has been substituted in the proposed revision of the amendment.

For practical operational purposes a handler should be required to take affirmative action to inform the Board of his desire not to accept credits and to specify the quantities and lots exported for which he does not desire credit. This proposal if adopted would not en-

able a handler to evade meeting his control obligations. Evidence was presented that, due to uncertainties of supply and demand factors early in a marketing year, a handler may have exported in relatively large volume, and may later decide that he does not want to use all of the sound kernel weight of his exports in satisfaction of his surplus obligation.

(6) The order should be amended by deleting the present provisions of § 984.62 (b) (2) and substituting in lieu thereof provisions under which the Board could not accept delivery of any surplus walnuts for pooling and disposition prior to a determination by the Board during the period December 1–15 of any marketing year as to the percentage of surplus walnuts withheld which it will accept for pooling prior to February 15 of such marketing year; and to provide further that on and after February 15 of any marketing year the Board shall not accept for pooling and disposition any surplus walnuts in excess of a handler's accumulated surplus obligation. Under present order operations, upon request of a handler, the Board may accept delivery of surplus walnuts for pooling early in the marketing year before the situation regarding crop production and trade demand may be determined with much precision.

Experience during the 1954–55 marketing year indicates the desirability of deferring acceptance by the Board of surplus walnuts for pooling and disposition until the Board can determine what proportion of the total surplus obligation may reasonably be considered as irrevocably surplus. The Board accepted more than 300,000 pounds sound kernel weight of surplus during the early part of the 1954–55 marketing year, for which a surplus percentage of eight had been established, and had them delivered for bulk storage at an oil mill preparatory to their being crushed into oil. Subsequent to such delivery, it became evident that the walnuts so delivered for pooling would have brought higher returns if they had not been delivered to the oil mill, but instead had been shelled and sold in the domestic market after the surplus percentage had been reduced to zero. Since under present operating procedure both cooperative and independent growers receive the amount obtained for surplus less the handling costs, it is desirable not to dispose of more walnuts in low cost surplus outlets than necessary to satisfy the surplus obligation.

The evidence is to the effect that during the period December 1–15 of any marketing year the Board will have, or can obtain, fairly reliable information as to merchantable and shelled walnut productions and can project with considerable accuracy total exports and sales in domestic trade outlets for the marketing year. It is logical to assume, therefore, that during this period the Board can estimate with reasonable accuracy the probable surplus position of the industry for the marketing year. Should crop production in a marketing year when a surplus percentage is in effect turn out to be greater, or trade demand to be less, than originally expected (thus indicating that no change probably would be made in the surplus percentage), the Board would be justified in fixing a high percentage for acceptance after its determination and prior to February 15. If, on the other hand, the reverse situation should prevail, the Board would be justified in adopting a conservative policy in accepting delivery of surplus during the indicated period. In view of the possibility of changed supply and demand conditions which may not be evident until December, it appears desirable that the Board be precluded from accepting surplus for pooling prior to its determination. The Board should be required to take affirmative action in regard to the percentage of withholdings to accept after its determination and prior to February 15, so that the industry may have definite knowledge of the Board's policy in this regard.

For the purpose of operating these proposed provisions, a handler's surplus should be considered as the total quantity of surplus for which he has become obligated up to the particular time minus any quantity disposed of in surplus outlets on which he had not declined surplus credit.

The determination by the Board as to the percentage of surplus withholdings to accept for pooling should be made as early in the marketing year as reasonably precise information regarding actual production and sales prospects is available. Such information should be available during the first half of December and the Board therefore should make its determination during the period December 1–15. Expenses should not have to be incurred in storing and caring for surplus any longer than is necessary to afford reasonable assurance that walnuts delivered will be within the final surplus percentage.

The proposed provision that subsequent to February 15 of any marketing year, the Control Board shall not accept for pooling and disposition any surplus walnuts in excess of a handler's accumulated surplus obligation is desirable in order to prevent overdeliveries of surplus. However, the word "subsequent" in the proposal should be changed to "on or after" in order to make it conform with provisions in § 984.82 requiring Board action prior to February 15 as recommended herein. Since it is difficult to anticipate what a handler's surplus obligation will be at any time during the remainder of a marketing year it is possible that an advance delivery of surplus by a handler might place him in a position of having overdelivered surplus. This provision should therefore tend to prevent such a situation from arising.

The present provisions of § 984.62 (b) (2) preclude the Board from disposing of more than 50 percent of the surplus prior to March 31 of any marketing year except in export. As indicated, the present provisions are intended to be superseded by the provisions which are discussed above under this issue. It is concluded that the present provisions should be deleted because the proposed provisions cover the same matter and are more detailed and restrictive.

(7) The order should be amended by substituting "February 15" for "March 31" where the latter date appears in § 984.82. This section provides in effect that the Secretary may decrease the merchantable restricted or surplus percentage under certain conditions, pursuant to a request by the Board made prior to March 31 of any marketing year, or if the Board fails to make a request, on request, prior to the same date, of two or more handlers who handled at least 10 percent of the tonnage handled in the preceding marketing year. The aforesaid section also requires that the Board review the control percentages prior to March 31 in years when such percentages have been established, on the basis of production in each of the two districts provided for in the order, and recommend to the Secretary such changes in the control percentages for each district as are necessary to give reasonable effect to the standards prescribed in §§ 984.47 (b) and 984.53 (b). It is further provided that if the Board fails to make such recommendation, then two or more handlers, in the aforementioned category, may request the Secretary, not later than March 31, to change the percentages.

It was testified that the presently specified date of March 31 is too early to make an estimate of new crop production. The earliest date by which an estimate of walnut production has been found to be practicable is June 1. Insofar as availability of information in respect to the new crop is concerned, an earlier date would be as satisfactory as March 31. Supply and demand factors for the marketing year may be appraised satisfactorily well in advance of March 31. It is desirable to have the control percentages finally established as early as practicable in the marketing year, since such action will contribute to market stability and trade confidence. The final establishment of the control percentages at an earlier date would place handlers in a better position to conduct their affairs efficiently, and would make possible final settlements by handlers with their growers at an earlier date. Board statistics on walnut shipments and stocks as of January 1 would be available by January 31 under another proposed amendment recommended herein, instead of by January 15 as presently required. It would, therefore, be practicable to advance the specified date of March 31 to February 15. This would give the Board and handlers sufficient time in which to analyze the statistical data as a basis for the recommendation or request to the Secretary.

(8) The provisions of § 984.68 of the order should be amended by deleting the date "January 15" and substituting in lieu thereof the date "January 31." This section of the order requires filing with the Board by each handler on or before January 15 each year of specified reports in respect to walnut inventories. It was testified that more time is needed by handlers to prepare accurate inventory reports for this period, since January 15 follows closely the most active phase of the walnut shipping season and shipping still may be active at that time in some marketing years. The later date for filing reports for that period would be more convenient for handlers. Its adoption would probably save the Board time and expense in contacting handlers in respect to filing the reports and making corrections, since the extension in time allowed for their preparation should encourage punctuality and accuracy. Inasmuch as the January 31 date would be 15 days before the proposed final date on which revisions of the control percentages may be recommended by the Board, sufficient time will intervene for the Board to summarize inventory data from the reports for consideration at its meeting.

(9) Section 984.34 of the order should be amended so as to be consistent with the provisions of § 984.33 which establishes beginning on July 1, 1955, a two year term of office for members and alternate members of the Board. The change from a one year to a two year term of office was among the amendments to the order made effective in July 1954. The provisions of § 984.34 in regard to the frequency of nominations should be made to conform to the increase in the length of the term of office. The present provisions of § 984.34 indicate that a new Board is to be nominated and selected each marketing year. These provisions are obviously inconsistent with the provisions of § 984.33 which provide for a two year term, and should be changed so as to prescribe that nominations and selections be made only in each nomination year. The date of June 1 was included in the notice of hearing as the final date for submission of nominations to the Secretary for the nine members and their alternates. Evidence was introduced at the hearing indicating that June 15 would be a more appropriate final date for the submission of such nominations and this change should be adopted. It was testified that the cooperative association which handles a large part of the California walnut crop holds its annual meeting on the second Thursday in June and that it would be convenient and desirable for it to take action in regard to nominations at that meeting in nomination years.

(10) Provision is made in § 984.82 (a) of the order for action by the Secretary to decrease the surplus percentage which previously had been established for the marketing year to conform to a finding, that the walnuts available for sale will not be sufficient to supply the trade demand therefor and provide an adequate carryover. Evidence was presented in support of a proposed amendment to § 984.82 (a) to read as follows: *"Provided, however,* That in no event shall the surplus percentage be reduced below that percentage calculated by dividing the total tonnage actually exported by all handlers, to the date of reduction of the surplus percentage, by tonnage of total supply subject to regulation as used by the Control Board in making its recommendation to the Secretary for revision of the surplus percentage. For the purposes of the foregoing proviso all tonnages shall be expressed in terms of sound kernel weight."

It was argued that this proposal together with the proposed amendment authorizing transfer of export credits discussed herein as issue (4), if made effective, would remove some of the inequities inherent in the power of the Secretary to reduce the initial surplus percentage established at the commencement of a marketing year, and that it would encourage the expansion of the export market. The argument, in substance, was that if the reduction of the surplus percentage were limited as proposed, a demand for surplus credits by handlers who needed them to satisfy their obligations represented by the finally established surplus percentage, would create a market for the excess surplus credits of handlers whose exports exceeded their surplus obligations as finally established.

The returns on exported walnuts are usually substantially lower than on domestic sales. Handlers with excess export credits would therefore have an opportunity of reducing losses on excess exports by sales of such credits to handlers who needed more surplus credits, and the latter would probably be able to purchase the credits at a price which would reduce their losses in disposing of walnuts in surplus outlets. In this respect it was argued that the proposal would be mutually advantageous to handlers in the two positions mentioned.

It was testified that if foreign outlets are to be fully utilized and developed, sales in export must be made early in the marketing year in response to the holiday demand. Therefore, if there is a possibility of the surplus percentage being eliminated or reduced below the percentage represented by exports to the approximate date of reduction, handlers may not take full advantage of the export demand, since they would probably incur losses on the quantities exported in excess of the finally established surplus percentage. Experience in the current marketing year was mentioned by the proponent. In 1954–55 exports through December 31 exceeded the surplus obligations of all handlers as of that date. Although the Board's recommendation to reduce the surplus percentage to zero was made on December 8, and the Secretary's action in that respect became effective on December 22, 1954, it is unlikely that any reduction would have been possible if the proposed amendment had been in effect.

Testimony in opposition to the proposal was presented on the basis that conditions as ascertained in September, when the Walnut Control Board makes its recommendation in respect to the surplus percentage, may change because of the actual outturn of the crop, unforeseen changes in competition with other nuts as pecans, and changes in world conditions and other conditions affecting supply and demand. It was argued that the provisions of the present order should remain flexible so that the surplus percentage can be reduced or eliminated as justified by developments.

The limitation proposed could restrict the Secretary's obligation under the act to change the percentages so as to tailor the existing supply to the then estimated trade demand.

The provision in the present order which permits handlers, acting as agents of the Board, to export their walnuts in satisfaction of their control obligations and retain the proceeds was approved on the basis of testimony at the promulgation hearing. Some handlers have well established export outlets to which they sell surplus and they retain the proceeds from such sales. In years when handlers do not make exports in excess of the finally established surplus percentage they are likely to obtain returns which are higher than the returns obtainable through domestic pooling of surplus. It is, therefore, not unfair to require them to assume the risk of exporting in excess of the finally established surplus percentage.

The marketing situation occurring in 1954–55 resulted in the elimination of the walnut surplus percentage on December 22, 1955. The fall of 1955 was unusual in that practically all changes in supply and demand factors tended to strengthen the walnut market. These included reductions in the production estimates of all four domestic tree nut crops. Walnut demand was stimulated particularly by the extremely short pecan crop. Domestic and foreign demand conditions strengthened and pressure on the domestic tree nut market from imports was not strong.

The adoption of the provision discussed herein as material issue (4) which would authorize transfer of export credits among handlers, and which is recommended for adoption, would afford exporting handlers some protection except in an occasional year when the surplus percentage would be eliminated. However, individual handlers may protect themselves by taking note of conditions indicating an exceptional year prior to the time when group action by the Board is taken. The opportunity to dispose of excess export credits to other handlers would of course depend on the quantity of such export credits and the quantity represented by the finally established surplus percentage.

A large majority of the walnut industry, including both cooperative and most of the independent segments, are opposed to the proposal or prefer to give further study to it or other procedures which might tend to accomplish the stated objective. It is concluded that the evidence does not justify the proposed amendment and it should not be adopted.

(11) It was testified at the hearing that changes should be made in certain provisions of the order to clarify their meaning and also to make any existing provisions conform with any specific amendments which are adopted.

A proposal was included in the notice of hearing to amend § 984.18 so as to clarify that the lot tolerances provided in the United States Standards for Shelled English Walnuts do not apply to individual kernels or portions thereof. The evidence indicates that the application of lot tolerances is not intended in determining the sound kernel weight of such walnuts and to avoid any possible confusion regarding this point the proposal in this regard should be adopted.

The provisions of §§ 984.49 (a) and 984.54 (a) of the order should be amended, as proposed in the notice of hearing, so as to conform to the pro-

posed deletion of § 984.74. The adoption of the change in the handling definition proposed herein which would remove from the ambit of that definition transactions in walnuts between handlers where subsequent handling is involved will require as a conforming change to the deletion of § 984.74. As a consequence of this deletion the provisos at the end of the above mentioned paragraphs should be amended to remove the references therein to the reporting requirements of said § 984.74.

Section 984.54 (b) of the order should be amended so as to clarify that the handler delivering surplus to the Board is responsible for placing the walnuts aboard cars or trucks at the place of delivery, i. e., handler's warehouse or storage. The present provisions state that such delivery shall be f. o. b. such place of delivery and although the term "f. o. b." is generally accepted as being inclusive of the cost of loading, the order provisions should be perfectly clear in regard to the handler's responsibility for loading. The evidence indicates that handlers were required to perform the loading operation in connection with surplus delivered to the Board during the 1954–55 marketing year and the proposed amendment would not involve any change in the accepted procedure.

Sections 984.75, 984.76, 984.77, and 984.78 should be renumbered as 984.74, 984.75, 984.76, and 984.77, respectively, to conform to the proposed deletion of the provisions presently designated as § 984.74.

Changes should be made in §§ 984.54 (a), 984.55 (b), and 984.66 (a) and (b) so that they will conform to the proposal herein recommended for adoption which would permit a handler to satisfy his surplus obligation with respect to shelled walnuts by declaring his intention to handle such walnuts and satisfying the then current obligations with respect to them.

The reference in § 984.61 (a) (1) (v) to § 984.75 should be changed to § 984.74 in accordance with renumbering of § 984.75 herein recommended.

Changes herein recommended in the definition of "to handle" require conforming changes in § 984.73. This section in the present order requires reports to the Board by the shipper and the consignee in respect to interstate shipments of unshelled walnuts other than merchantable, within the area of production, excepting shipments from Washington to Oregon. It was testified that this reporting requirement should be retained so that the State of origin of the shipment would be known to the Board and enable it to apply the withholding obligations for the originating district to the walnuts contained in such shipments when they are handled. This is necessary, since under the present order different control percentages may be established for district 1, California, and district 2, Oregon and Washington. Since it has been proposed, and is herein recommended, that control obligations be met at the time the walnuts are shipped to the trade, it is desirable for the Board to have a record, in respect to interstate movement within the area of production, of all categories of walnuts, rather than only of unshelled walnuts other than merchantable. Changes in § 984.73 should therefore be made so that the reports will be required in respect to all walnuts. The term "packer" should therefore be changed to "handler," and the heading of the section should be appropriately worded.

Rulings on proposed findings and conclusions. At the conclusion of the hearing, the presiding officer set April 15, 1955, as the time by which briefs from interested parties with respect to testimony presented in evidence at the hearing and the conclusions to be drawn therefrom must be mailed to the hearing clerk of the Department. A brief was filed on behalf of Rosenberg Brothers and Co., Inc., by Heller, Herman, White, and McAuliffe, attorneys-at-law. This brief in support of proposed amendment No. 16, as set forth in the hearing record, contained arguments and a proposed conclusion in respect thereto. Every point covered in such brief was considered carefully along with the testimony in the record in making the findings and reaching the conclusions set forth above. To the extent that the suggested conclusion contained in this brief is inconsistent with the findings and conclusions contained herein the request to reach such conclusion is denied on the basis of the facts found and stated in connection with this decision.

General findings. (a) The findings hereinafter set forth are supplementary and in addition to the findings and determinations (13 F. R. 4344) which were made in connection with the issuance of the marketing agreement and order, and the amendment thereof in July 1954 (19 F. R. 4214). All of said previous findings and determinations are hereby ratified and confirmed except insofar as such findings and determinations may be in conflict with the findings set forth herein;

(b) The marketing agreement and order, as hereby proposed to be further amended, and all of the terms and conditions hereof, will tend to effectuate the declared policy of the act;

(c) The marketing agreement and order, as hereby proposed to be further amended, will be applicable only to persons in the respective classes of industrial and commercial activities specified or necessarily included in the proposals upon which the amendment hearing has been held.

Recommended further amendment of the amended marketing agreement and order. The following further amendments to the amended marketing agreement and order are recommended as the detailed means by which the aforesaid conclusions may be carried out:

1. Delete the provisions of § 984.11 and substitute therefor the following:

§ 984.11 *To handle.* "To handle" means to sell, consign, transport or ship (except as a common or contract carrier of walnuts owned by another person), or in any other way to put walnuts, unshelled or shelled, in the current of commerce either within the area of production, or from such area to any point outside thereof, or within the area of production to purchase directly from a grower for use in commercial manufacturing. Except as provided in § 984.73, the term "to handle" shall not include sales and deliveries within the area of production, by growers to handlers or manufacturers, or by handlers to packers or shellers for packing, shelling, further processing, or handling, and shall not include the authorized disposition of merchantable restricted or surplus walnuts.

2. Delete the provisions of § 984.18 and substitute therefor the following:

§ 984.18 *Sound kernel.* "Sound kernel" means a kernel or portion of kernel which will not pass through a round opening one-eighth inch in diameter and which otherwise meets the requirements of U. S. Commercial Grade as set forth in the United States Standards for Shelled English Walnuts (19 F. R. 817). The lot tolerances provided in such standards shall not apply to individual kernels or portions thereof. This definition may be revised or amended by the Secretary, upon recommendation of the Control Board.

3. Delete the last three sentences of § 984.34 and substitute therefor the following: "Nominations received in the foregoing manner by the Control Board shall be reported to the Secretary on or before June 15 of 1955 and each second year thereafter, together with a certificate of all necessary tonnage data and other information deemed by the Control Board to be pertinent or requested by the Secretary. If the Control Board fails to report nominations to the Secretary in the manner hereinbefore specified on or before June 15 of any nomination year, the Secretary may select the member or alternate without nomination. If nominations for the tenth member or alternate are not submitted on or before August 1 of any such year, the Secretary may select such member or alternate without nomination."

4. Delete the provisions of § 984.49 (a) and substitute the following:

(a) Except as otherwise provided in § 984.81, whenever a regulation has been established by the Secretary under the provisions of § 984.48, each handler, before or upon handling any unshelled walnuts, shall have withheld from handling a quantity of merchantable walnuts equal to the merchantable allocation percentage, by weight, of such quantity handled or certified for handling by him: *Provided,* That this provision shall not apply to any lot of merchantable walnuts which is sold or delivered within the area of production to a handler for subsequent handling.

5. Delete the provisions of § 984.54 (a) and substitute the following:

(a) Except as otherwise provided in § 984.81, whenever a regulation has been established for a marketing year by the Secretary under the provisions of § 984.53, each handler, before or upon handling any walnuts, unshelled or shelled, shall have withheld from handling a quantity of walnuts having a sound kernel weight equal to the diversion percentage of the sound kernel weight of all unshelled walnuts handled or certified for handling, and the actual net weight of all shelled walnuts handled or declared for handling by him: *Provided,* That this provision shall not apply to any lot of walnuts which is sold or delivered within the area of production to a handler for subsequent handling.

6. Redesignate the paragraphs presently lettered (b) and (c) of § 984.54 as paragraphs (c) and (d), respectively, and insert a new paragraph lettered (b) to read as follows:

(b) Any handler may, at any time prior to the end of the marketing year, satisfy his surplus obligation with respect to shelled walnuts by declaring to the Control Board his intention to handle a specified quantity of shelled walnuts which he then owns and has on hand and by withholding a quantity of walnuts having a sound kernel weight equal to the diversion percentage of the actual net weight of shelled walnuts so declared for handling. Such declaration and withholding may be canceled by the handler prior to the end of the marketing year.

7. Delete the provisions of redesignated paragraph (c) of § 984.54 and substitute therefor the following:

(c) Walnuts withheld as surplus shall be set aside and thereafter held for the account of the Control Board at the expense of the handler and, from the date of withholding, at all times thereafter shall be held by the handler, available for inspection by the Control Board or its agents. Such walnuts shall be stored in such manner as to maintain them in the same condition as when certified for surplus, except for loss through fire, acts of God, acts of war, riot, or other conditions beyond the handler's control. Upon demand of the Control Board, they shall be delivered to the Control Board f. o. b. rail car or truck at handler's warehouse or point of storage. All such surplus walnuts so withheld by the handler shall be at the time of withholding placed by the handler, at his own expense, in suitable containers, which may be prescribed by the Control Board, and identified by appropriate seals or stamps and tags to be furnished by the Control Board and to be affixed to the containers by the handler under the direction and supervision of the Control Board or its designated inspectors.

8. Delete the provisions of § 984.55 (b) and substitute therefor the following:

(b) *For shelled walnuts handled.* All shelled walnuts handled or declared for handling by any handler during a marketing year shall be included in the total sound kernel weight for such handler at the actual net weight thereof, as shown by the reports submitted by him pursuant to § 984.71, or as shown by such handler's records.

9. Delete the provisions of § 984.61 (a) (1) (v) and substitute therefor the following:

(v) Pursuant to the provisions of § 984.74, report to the Control Board the receipt of any lot of merchantable restricted walnuts; and

10. Delete the provisions of § 984.61 (b) and substitute therefor the following:

(b) *By export.* Sale or shipment of merchantable restricted walnuts, withheld pursuant to § 984.49, for export to destinations outside (1) the continental United States, Alaska, Hawaii, Puerto Rico, and the Canal Zone and, (2) Canada or Cuba when included in the trade demand estimate, shall be made only by the Control Board. The Control Board shall be obligated to sell in export only such quantities for which it may be able to find satisfactory outlets. Sales for export shall be made by the Control Board only on execution of an agreement to prevent reimportation into the United States; and, in the case of export to Canada or Mexico, such walnuts shall be sold only on the basis of a delivered price, duty paid. A handler, at his request, shall be authorized to act as agent of the Control Board upon such terms and conditions as the Control Board may specify in negotiating export sales from merchantable restricted walnuts withheld by him, or a handler may be so authorized with respect to merchantable restricted walnuts withheld by others; and when so acting, shall be entitled to receive a commission of 5 percent of the export sales price, f. o. b. area of production. The proceeds of any such export sales by a handler, after deducting all expenses actually and necessarily incurred, shall be paid to the handler withholding the walnuts so sold by the Control Board.

11. Delete the provisions of § 984.62 (a) and substitute therefor the following:

(a) *By export.* Sale or shipment of surplus walnuts, withheld pursuant to § 984.54, for export to destinations outside (1) the continental United States, Alaska, Hawaii, Puerto Rico, and the Canal Zone and, (2) Canada or Cuba when included in the trade demand estimate, shall be made only by the Control Board and shall be governed by the provisions of § 984.61 (b). The sound kernel weight of merchantable restricted walnuts and shelled surplus walnuts so exported shall be credited against the surplus obligation of the exporting handler who is acting as agent for the Control Board, unless such exporting handler shall advise the Control Board, on or before July 31, of the quantities and lots of such exported walnuts that he does not wish to have so credited. At any time on or before July 31, upon written request of any handler who is an authorized export agent of the Control Board, the Board shall transfer any part or all of such handler's export credits in the Board's accounts to such other handler as he may designate.

12. Delete the present provisions of § 984.62 (b) (2) and substitute therefor the following:

(2) The Control Board shall not accept delivery of any surplus walnuts for pooling and disposition prior to making a determination, in the period December 1 to December 15 of any marketing year, as to the percentage of surplus walnuts withheld which may be accepted for pooling and disposition prior to February 15 of the same marketing year. On or after February 15 of any marketing year, the Control Board shall not accept for pooling and disposition any surplus walnuts in excess of a handler's accumulated surplus obligation.

13. Delete the provisions of § 984.66 (a) and (b) and substitute therefor the following:

(a) *Establishment of assessment rates by the Secretary.* The Secretary shall fix separate rates of assessments for each marketing year to be paid by each handler with respect to merchantable walnuts handled or certified for handling and with respect to shelled walnuts handled or declared for handling. At any time during or after a marketing year, the Secretary may increase either or both of these rates of assessment to apply respectively to all merchantable walnuts handled or certified for handling during the marketing year or to all shelled walnuts handled or declared for handling during such year to secure sufficient funds to cover the expenses authorized by § 984.65, or any later finding by the Secretary relative to the expenses of the Control Board, and such additional assessments shall be paid to the Control Board upon demand. The Control Board shall include with its recommendation of expenses pursuant to § 984.65, its recommendation in respect to the separate assessment rates to be fixed by the Secretary.

(b) *Requirement for payment.* Each handler of merchantable walnuts and shelled walnuts shall, with respect to the merchantable walnuts handled or certified for handling by him and the shelled walnuts handled or declared for handling by him, pay to the Control Board, upon demand, his pro rata share of the expenses which the Secretary finds are reasonable and are likely to be incurred during each marketing year. Each handler's share of such expenses shall be: For merchantable walnuts handled or certified for handling during the applicable marketing year, the ratio between the total quantity of merchantable walnuts handled or certified for handling by him and the total quantity of such walnuts handled or certified for handling by all handlers during such marketing year; for shelled walnuts handled or declared for handling the ratio of the weight of shelled walnuts handled or declared for handling by him during the applicable marketing year and the weight of all shelled walnuts handled or declared for handling during such marketing year by all handlers.

14. Delete the provisions of § 984.68 preceding paragraph (a) and substitute therefor the following:

§ 984.68 *Reports of handler carryovers.* Each handler, on or before August 15 and January 31 of each marketing year, shall file with the Control Board a written report of:

15. Delete the provisions of § 984.73 and substitute therefor the following:

§ 984.73 *Reports of interstate handling within the area of production.*

Within the area of production, any shipment of walnuts from California to Oregon or Washington, from Oregon to Washington, and from Oregon or Washington to California, for sale or delivery to a handler shall be reported to the Control Board by the shipper at time of shipment and by the handler immediately upon receipt of such shipment. The report by the shipper shall show the date of shipment, the quantities shipped, whether orchard run, merchantable, or shelled, and the identity of the consignee. The report by the consignee shall show the date of receipt of the walnuts so shipped, the quantities and categories of the walnuts so received, the identity of the shipper, and shall include a certification to the United States Department of Agriculture and to the Control Board that the walnuts so received will be handled in accordance with regulations established pursuant to the provisions of § 984.48 or § 984.53.

16. Delete the provisions of § 984.74.

17. Remember §§ 984.75, 984.76, 984.77 and 984.78, as §§ 984.74, 984.75, 984.76 and 984.77, respectively.

18. Delete the provisions of § 984.82 and substitute therefor the following:

§ 984.82 *Revision of control percentages.* (a) The Secretary, on request of the Control Board made at any time prior to February 15 of any marketing year (or if the Control Board shall fail so to request, on request within like time of two or more handlers who have handled during the immediately preceding marketing year at least 10 percent of the total tonnage of merchantable walnuts or of shelled walnuts, respectively, handled by all handlers during such marketing year) and after a finding of fact, based on such revised and current information as may be pertinent, that the merchantable walnuts or shelled walnuts, respectively, available for sale will not be sufficient to supply the respective trade demand therefor and provide an adequate carryover, may decrease the merchantable restricted percentage or the surplus percentage, respectively, to conform to such finding.

(b) The Control Board prior to February 15 of each year for which a control percentage has been established, shall review on the basis of actual production in each of the two districts the control percentages established for that year, and shall recommend to the Secretary on or before that date such changes of the control percentages established for each district as are necessary in order to give reasonable effect, on the basis of such actual production, to the standards prescribed in § 984.47 (b) and § 984.53 (b). The Secretary, on such recommendation by the Control Board (or if the Control Board shall fail to make a recommendation then on request not later than February 15 of two or more handlers who have handled during the immediately preceding marketing year at least 10 percent of the total tonnage of merchantable walnuts or of shelled walnuts, respectively, handled by all handlers in their district during such marketing year) and after a finding of fact that the merchantable restricted or surplus percentage established for that marketing year as to walnuts produced in either district is too high for that district in relation to said standards, the Secretary shall decrease accordingly such percentage for that district: *Provided, however*, That in no event shall the merchantable restricted or surplus percentage of one district, as thus changed, be less than one-half of such percentage as established for the other district.

Dated: May 19, 1955.

[SEAL] ROY W. LENNARTSON,
Deputy Administrator,
Marketing Services.

ATOMIC ENERGY COMMISSION

[10 CFR Part 25]

ACCESS TO RESTRICTED DATA

NOTICE OF PROPOSED RULE MAKING

Notice is hereby given that adoption of the following rules is contemplated. All interested persons who desire to submit written comments and suggestions for consideration in connection with the proposed rules should send them to the United States Atomic Energy Commission, Washington 25, D. C., Attention: Director, Division of Licensing, within 30 days after publication of this notice in the FEDERAL REGISTER.

GENERAL PROVISIONS

Sec.
25.1 Purpose.
25.2 Scope.
25.3 Definitions.
25.4 Interpretations.
25.5 Communications.
25.6 Applications.
25.7 Additional information.
25.8 Requirements for approval.
25.9 Terms and conditions of access.
25.10 Issuance.
25.11 Administration.
25.12 Term and renewal.
25.13 Assignment.
25.14 Modification.
25.15 Termination.

ENFORCEMENT

25.16 Violations.

AUTHORITY: §§ 25.1 to 25.16 issued under sec. 161 (q), 68 Stat. 951; 42 U. S. C. 2201.

GENERAL PROVISIONS

§ 25.1 *Purpose.* The regulations in this part are promulgated by the Atomic Energy Commission to establish procedures and criteria for permitting persons to have access to Confidential or Secret Restricted Data relating to civilian uses of atomic energy. Restricted Data which is primarily of military significance is not within the scope of this part.

§ 25.2 *Scope.* The regulations in this part apply to any person within or under the jurisdiction of the United States who desires access to the Restricted Data described in § 25.1 for use in his business, profession, or trade.

§ 25.3 *Definitions.* As used in this part:

(a) "Commission" means the Atomic Energy Commission or its duly authorized representatives.

(b) "Person" means (1) any individual, corporation, partnership, firm, association, trust, estate, public or private institution, group, Government agency other than the Commission, any state or any political subdivision, of, or any political entity within a state, or other entity; and (2) any legal successor, representative, agent, or agency of the foregoing.

§ 25.4 *Interpretations.* Except as specifically authorized by the Commission in writing, no interpretation of the meaning of the regulations in this part by any officer or employee of the Commission other than by the General Manager, the General Counsel, or the Director, Division of Licensing, in writing, will be recognized to be binding upon the Commission.

§ 25.5 *Communications.* All communications concerning the regulations in this part, and applications filed under them, should be addressed to the United States Atomic Energy Commission, 1901 Constitution Avenue NW., Washington 25, D. C., Attention: Director, Division of Licensing.

§ 25.6 *Applications.* (a) All persons requesting access to Confidential or Secret Restricted Data, pursuant to this part, shall file an application for an Access Permit with the Commission on the Application Form AEC ----, in accordance with instructions accompanying the form.

(b) The Application Form, AEC ----, will require the applicant to set forth the following information: (1) Name of applicant; (2) business address of applicant; (3) description of business or occupation of applicant; (4) (i) if applicant is an individual indicate citizenship; age; (ii) if applicant is a corporation or other entity, indicate: (*a*) the State where it was incorporated or organized; (*b*) the names, addresses, and citizenship of its principal officers; (*c*) whether it is owned, controlled, or dominated by an alien, a foreign corporation, or foreign government, and if so give details; (iii) indicate whether applicant is acting as agent with respect to this application; if so identify principal and furnish information required under subdivisions (i) and (ii) of this subparagraph with respect to principal; (5) total number of full-time employees; (6) familiarity with atomic energy technology (describe briefly extent of knowledge of classified and unclassified data and any work previously done in this field including work under AEC contract or subcontract); (7) classification of Restricted Data for which access is requested; (8) potential use of the Restricted Data in the applicant's business, profession or trade; (9) if Secret Restricted Data is requested, the specific area of this data and the detailed reasons why it is needed by the applicant, including length of time; (10) estimated number of individual AEC clearances which will be required; (11) principal location at which Restricted Data will be used.

(c) All statements made in an application for an Access Permit shall be deemed to be incorporated in and made a part of the permit issued thereon.

§ 25.7 *Additional information.* The Commission may, at any time after the filing of the original application and before the termination of the permit, require additional information in order to enable the Commission to determine whether the permit should be granted or denied or whether it should be modified or revoked.

§ 25.8 *Requirements for approval.* (a) Any applicant who executes the Application Form, AEC ----;

(1) May be granted an Access Permit for Confidential Restricted Data if he has evidenced a potential use or application of such data in his business, profession, or trade; and

(2) May be granted an Access Permit for Secret Restricted Data if he has evidenced a need, limited to a definite period of time, for specific information having an immediate or significant effect upon his business, profession, or trade.

(b) Any person who is a citizen or national of a foreign country, and any person who the Commission knows, or has reason to believe, is owned, controlled, or dominated by, or is acting as agent with respect to an application hereunder for, an alien, foreign corporation, or foreign government, shall be ineligible to obtain an access permit pursuant to this part.

§ 25.9 *Terms and conditions of access.* (a) Neither the Commission nor persons acting on behalf of the Commission will make any warranty with respect to any information made available pursuant to an Access Permit.

(b) The Commission will waive, under section 152 of the Atomic Energy Act of 1954, (1) its rights in inventions and discoveries made or conceived in the course of, in connection with, or resulting from access to confidential restricted data provided under the terms of an Access Permit, and (2) its rights, except an irrevocable, royalty-free, non-exclusive license for Governmental purposes, in inventions and discoveries made or conceived as a result of access to Secret Restricted Data obtained in the course of, in connection with, or under the terms of an Access Permit.

(c) The Applicant must agree:

(1) To conform to Part 95 of this chapter and all other applicable regulations and requirements of the Commission;

(2) To pay all established charges for personnel security clearances, and for such publication, reproduction, and other services as the Commission may furnish in connection with the Access Permit;

(3) To waive all claims for damages under section 183 of Title 35 U. S. Code by reason of the imposition of any secrecy order on any patent application, and all claims for just compensation under section 173 of the Atomic Energy Act of 1954, with respect to any invention or discovery made or conceived in the course of, in connection with, or under the terms of the Access Permit granted by the Commission;

(4) To grant to the Commission, for Governmental purposes, an irrevocable, royalty-free, non-exclusive license in, and to report to the Commission, any invention or discovery made or conceived as the result of access to secret restricted data made available in the course of, in connection with, or under the terms of the Access Permit;

(5) To waive any and all claims against the Commission and persons acting on its behalf that might arise in connection with the use, by the applicant, of any and all information supplied by them under the terms of the Access Permit;

(6) To obtain agreements from all individuals who will have access under the Access Permit to give effect to subparagraphs (1), (3), (4), and (5) of this paragraph.

§ 25.10 *Issuance.* Upon a determination that an application meets the requirements of the act and the regulations of the Commission, the Commission will issue to the applicant an Access Permit on Form AEC ----.

NOTE: An Access Permit is not a security clearance and does not authorize any individual not having an appropriate AEC security clearance to receive Restricted Data. See § 25.11 and Part 95 of this chapter.

§ 25.11 *Administration.* The Commission office designated to administer an Access Permit will:

(a) Process all personnel security clearances requested in connection with the permit; and

(b) Review the procedures submitted by the applicant, in accordance with Part 95 of this chapter, for the safeguarding of restricted data.

§ 25.12 *Term and renewal.* Each Access Permit shall continue in effect for a one year term unless otherwise stated in the permit, and may be renewed by the Commission upon the filing by the applicant, in accordance with § 25.6, of an application for renewal showing that he still satisfies the requirements of § 25.8.

§ 25.13 *Assignment.* An Access Permit is non-transferable and non-assignable.

§ 25.14 *Modification.* (a) An Access Permit may be modified from time to time upon application by the person to whom it is issued. An application for modification shall be filed in accordance with § 25.6 and shall specify the nature of and the basis for the modification requested.

(b) The Commission may modify an Access Permit from time to time, as it deems necessary in accordance with Commission regulations.

§ 25.15 *Termination.* The Commission may terminate or suspend any Access Permit for cause, including, but not limited to, a material false statement in the application, revealed conditions or facts which would have warranted a refusal to grant the Authorization in the first instance, or for violation of or failure to observe any of the terms and conditions of the Atomic Energy Act of 1954 or Commission regulations.

ENFORCEMENT

§ 25.16 *Violations.* An injunction or other court order may be obtained prohibiting any violation of any provision of the act or any regulation or order issued by the Commission under the act.

Dated at Washington, D. C., this 19th day of May 1955.

K. E. FIELDS,
General Manager.

FOURTH SECTION APPLICATIONS FOR RELIEF

MAY 19, 1955.

Protests to the granting of an application must be prepared in accordance with Rule 40 of the general rules of practice (49 CFR 1.40) and filed within 15 days from the date of publication of this notice in the FEDERAL REGISTER.

LONG-AND-SHORT HAUL

FSA No. 30641: Iron and steel articles from Kansas City, Mo.-Kans. Filed by W. J. Prueter, Agent, for interested rail carriers. Rates on iron and steel arti-

cles, carloads, from Kansas City, Mo.-Kans., to specified points in Illinois territory.

Grounds for relief: Circuitous routes.

Tariff: Supplement 27 to Agent Prueter's I. C. C. A-3821.

FSA No. 30642: Canned goods between Baltimore, Md., and Plant City, Fla. Filed by J. G. Kerr, Agent, for Baltimore Steam Packet Company and interested rail carriers. Rates on canned goods, carloads, between Baltimore, Md., and Plant City, Fla., over water-rail and rail-water routes via Hampton Roads ports.

Grounds for relief: Competition with all-rail routes and circuity.

Tariff: Supplement 54 to Agent Spaninger's I. C. C. No. 1354.

FSA No. 30643: Vegetable oil cake or meal to Florida. Filed by J. G. Kerr, Agent, for interested rail carriers. Rates on cottonseed oil cake meal and hulls, in mixed carloads with cottonseed oil cake or oil cake meal, from points in Alabama, Florida, Georgia, and South Carolina to points in Florida.

Grounds for relief: Analogous commodity. Short-line distance formula and circuity.

By the Commission.

DEPARTMENT OF THE INTERIOR

Office of the Secretary

CONFEDERATED TRIBES OF THE GRAND RONDE COMMUNITY

NOTICE OF PROPOSED MEMBERSHIP ROLL

MAY 12, 1955.

Pursuant to section 3 of the act of August 13, 1954 (68 Stat. 724), there is listed below the proposed roll of the members of the Confederated Tribes of the Grand Ronde Community who were living on August 13, 1954.

Appeals contesting the inclusion or omission of the name of any person on or from such roll may be filed within 90 days from the date of publication of this notice. Appeals shall be filed in accordance with the regulations of the Department of the Interior appearing in 25 CFR Part 55 (20 F. R. 336, January 14, 1955).

FRED G. AANDAHL, *Assistant Secretary of the Interior.*

CONFEDERATED TRIBES OF THE GRAND RONDE COMMUNITY, GRAND RONDE, OREGON

MARCH 26, 1955.

Proposed Census Roll. I certify that the following Proposed Census Roll for the Confederated Tribes of the Grand Ronde Community is, to the best of my knowledge and belief, an accurate and complete roll of all members of the said Confederated Tribes of the Grand Ronde Community, as of the 13th day of August, 1954:

VINCENT M. MERCIER, *Secretary, Confederated Tribes of Grand Ronde Community.*

CONFEDERATED TRIBES OF GRAND RONDE COMMUNITY

Bureau of Land Management

ALASKA

NOTICE OF PROPOSED WITHDRAWAL AND RESERVATION OF LANDS

MAY 17, 1955.

An application, serial number Anchorage 026583, for the withdrawal from all forms of appropriation under the public land laws, including the general mining laws of the lands described below was filed on April 30, 1954, by Territorial Department of Lands. The purposes of the proposed withdrawal: Public service sites for recreational purposes.

For a period of 60 days from the date of publication of this notice, persons having cause to object to the proposed withdrawal may present their objections in writing to the Area Administrator, Area 4, Bureau of Land Management, Department of the Interior, at Box 480, Anchorage, Alaska. In case any objection is filed and the nature of the opposition is such as to warrant it, a public hearing will be held at a convenient time and place, which will be announced, where opponents to the order may state their views and where proponents of the order can explain its purpose.

The determination of the Secretary on the application will be published in the FEDERAL REGISTER, either in the form of a public land order or in the form of a Notice of Determination if the application is rejected. In either case, a separate notice will be sent to each interested party of record.

The lands involved in the application are:

SUCKER LAKE

T. 7 N., R. 11 W., S. M.,
Sec. 17: When surveyed will be S½NW¼NW¼, SW¼NE¼NW¼, W½SE¼NW¼, and lots which will be a portion of SW¼NW¼ (unsurveyed).

Containing approximately 70 acres.

UNNAMED LAKES

T. 7 N., R. 11 W., S. M.,
Sec. 5: Lots which will be when surveyed portions of W½SW¼SW¼, SE¼SW¼SW¼ (unsurveyed).
Sec. 8: Lots which will be when surveyed portions of N½NW¼NW¼, NW¼NE¼NW¼ (unsurveyed).

Containing approximately 40 acres.

UNNAMED LAKES

T. 7 N., R. 11 W., S. M.,
Sec. 2: Lot which will be when surveyed a portion of N½NW¼NW¼ (unsurveyed).
Sec. 3: Lot which will be when surveyed a portion of N½NE¼NE¼ (unsurveyed).
T. 8 N., R. 11 W., S. M.,
Sec. 34: Lots which will be when surveyed portions of S½SE¼, S½NE¼SE¼ (unsurveyed).

Containing approximately 60 acres.

TWIN LAKES

T. 8 N., R. 11 W., S. M.,
Sec. 36: Lots which will be when surveyed portions of NW¼SW¼, S½SW¼NW¼, S½SE¼NW¼, W½NE¼SW¼ (unsurveyed).

Containing approximately 85 acres.

DANIELS LAKE

T. 8 N., R. 11 W., S. M.,
Sec. 22: Lots 2 and 3.
Sec. 27: Lots which will be when surveyed portions of NW¼NE¼NW¼, NE¼NW¼NW¼ (unsurveyed).

Containing approximately 79.77 acres.

UNNAMED LAKES

T. 8 N., R. 11 W., S. M.,
Sec. 22: E½NE¼NE¼.
Sec. 23: Lots 2, 3 and 4.

Containing approximately 66.40 acres.

PORCUPINE LAKE

T. 2 N., R. 12 W., S. M.,
Sec. 9: Lots 2 and 5.

Containing approximately 93.05 acres.

OSCAR LAKE

T. 16 N., R. 4 W., S. M.,
Sec. 1: Lots which will be when surveyed portions of NE¼NE¼NW¼, NW¼NW¼NE¼, SW¼NE¼ (unsurveyed).

Containing approximately 35 acres.

WILLOW CREEK

T. 19 N., R. 4 W., S. M.,
Sec. 1: Lot 3 (east 19.95 acres).
Sec. 5: Lot 1 (south 20.00 acres), Lot 2 (southeast 10.00 acres), E½SW¼NE¼, SW¼SW¼NE¼, N½NW¼SE½, SE¼SE¼NW¼.

Containing approximately 110 acres.

LAKE LEILA

Beginning at a point at the outlet of Lake Leila, Alaska, approximately latitude 61°53' 12" N., longitude 147°19'09" W.; thence west approximately 38 chains to the east boundary of the Glenn Highway right-of-way; thence southerly along the east boundary of the Glenn Highway right-of-way approximately 30 chains; thence east approximately 24 chains to the west shore of Lake Leila; thence by meander at mean high water of Lake Leila in a northeasterly direction approximately 39 chains to place of beginning containing approximately 80 acres.

SOURDOUGH CREEK

Beginning at the east corner of a T & M site filed by William J. Krause, Anchorage 014639, which will be when surveyed, the east corner of U. S. Survey No. 3170; thence by metes and bounds southerly 19 chains along the west boundary of the Richardson Highway right-of-way; thence west approximately 5 chains to the left limit of Sourdough Creek; thence downstream by meander along the left limit of Sourdough Creek approximately 60 chains to a point on the left limit of the Gulkana River; thence upstream with meanders of the left limit of the Gulkana River 35 chains; thence east approximately 25 chains to the west corner of U. S. Survey No. 3170 when surveyed; thence southeastward 10 chains along the southwest boundary of U. S. Survey No. 3170 when surveyed to the south corner of said survey; thence northeastward 5 chains along the southeast boundary of U. S. Survey No. 3170 when surveyed to the east corner of said survey and the point of beginning, containing approximately 110 acres.

Aggregating a total of 829.22 acres.

LOWELL M. PUCKETT,
Area Administrator.

UTAH

NOTICE OF FILING OF PLATS OF SURVEY

MAY 11, 1955.

Notice is given that the plats of survey of the following described lands will be officially filed in the Land Office, Salt Lake City, Utah, effective at 10:00 a. m. on the 35th day after the date of this notice:

SALT LAKE MERIDIAN, UTAH

T. 26 S., R. 14 E.,
Sections 2, 16, 32, and 36.

Area surveyed: 2,592.64 acres.
Plat of survey accepted March 2, 1955.

T. 28 S., R. 14 E.,
Section 36.

Area surveyed: 640 acres.
Plat of survey accepted April 11, 1955.

T. 28 S., R. 21 E.,
Sections 2, 16, 31, 32, and 36.

Area surveyed: 3,219.88 acres.
Plat of survey accepted April 11, 1955.

T. 29 S., R. 21 E.,
Sections 1, 2, 16, 32, 33, 34, 35, and 36.

Area surveyed: 5,122.08 acres.
Plat of survey accepted April 11, 1955.

T. 29½ S., R. 22 E.,
Sections 31, 32, 33, 34, 35, and 36.

Area surveyed: 3,853.37 acres.
Plat of survey accepted April 11, 1955.

T. 30 S., R. 16 E.,
Sections 2, 16, 32, and 36.

Area surveyed: 2,558.36 acres.
Plat of survey accepted February 24, 1955.

T. 30 S., R. 22 E.,
Sections 1, 2, 3, 16, 32, and 36.

Area surveyed: 3,835.04 acres.
Plat of survey accepted April 11, 1955.

T. 33 S., R. 6 E.,
Sections 1, 2, 3, 16, 32, and 36.

Area surveyed: 3,578.92 acres.
Plat of survey accepted April 11, 1955

T. 34 S., R. 6 E.,
Sections 1, 2, 3, 16, 31, 32, 33, and 36.

Area surveyed: 5,097.96 acres.
Plat of survey accepted April 11, 1955.

The primary purpose of these surveys was to accommodate the right of the State of Utah under Grant for Common Schools in the Act of July 16, 1894 (28 Stat. 107).

It is presumed that the right of the State of Utah attached to sections 2, 16, 32, and 36 of the above described lands on the date of acceptance of plat of survey, subject to valid existing rights and the provisions of existing withdrawals. Therefore, preference rights of veterans of World War II and the Korean conflict, and others, as provided for by the Act of September 27, 1944 (58 Stat. 747; 43 U. S. C. 279–284) as amended, does not attach to these sections.

No application for any of the lands described in any of the other sections may be allowed under the homestead, desert-land, small tract, or any other non-mineral public land law unless the land has already been classified as valuable for such application or shall be so classified upon consideration of an application.

At the hour and date specified above the said lands shall, subject to valid existing rights and the provisions of existing withdrawals, become subject to application, petition, location, or selection as follows:

(a) *Ninety-one day period for preference-right filings.* For a period of 91 days, commencing at the hour and on the day specified above, the public lands affected by this notice shall be subject only to (1) application under the homestead or the desert-land laws or the Small Tract Act of June 1, 1938, 52 Stat. 609 (43 U. S. C. 682a), as amended, by qualified veterans of World War II and other qualified persons entitled to preference under the act of September 27, 1944, 58 Stat. 747 (43 U. S. C. 279–284), as amended, subject to the requirements of applicable law, and (2) application under any applicable public-land law, based on prior existing valid settlement rights and preference rights conferred by existing laws or equitable claims subject to allowance and confirmation. Applications under subdivision (1) of this paragraph shall be subject to applications and claims of the classes described in subdivision (2) of this paragraph. All applications filed under this paragraph either at or before 10:00 a. m. on the 35th day after the date of this notice shall be treated as though filed simultaneously at that time. All applications filed under this paragraph after 10:00 a. m. on the said 35th day shall be considered in the order of filing.

(b) *Date for non-preference-right filings.* Commencing at 10:00 a. m. on the 126th day after the date of this notice, any lands remaining unappropriated shall become subject to such application, petition, location, selection, or other appropriation by the public generally as may be authorized by the public-land laws. All such applications filed either at or before 10:00 a. m. on the 126th day after the date of this notice, shall be treated as though filed simultaneously at the hour specified on such 126th day. All applications filed thereafter shall be considered in the order of filing.

A veteran shall accompany his application with a complete photostatic, or other copy (both sides), of his certificate of honorable discharge, or of an official document of his branch of the service which shows clearly his honorable discharge as defined in § 181.36 of Title 43 of the Code of Federal Regulations, or constitutes evidence of other facts upon which the claim for preference is based and which shows clearly the period of service. Other persons claiming credit for service of veterans must furnish like proof in support of their claims. Persons asserting preference rights, through settlement or otherwise, and those having equitable claims, shall accompany their applications by duly corroborated statements in support thereof, setting forth in detail all facts relevant to their claims.

Applications for these lands, which shall be filed in the Land Office, Salt Lake City, Utah, shall be acted upon in accordance with the regulations contained in § 295.8 of Title 43 of the Code of Federal Regulations and Part 296 of that title, to the extent that such regulations are applicable. Applications under the homestead laws shall be governed by the regulations contained in Parts 166 to 170, inclusive, of Title 43 of the Code of Federal Regulations, and applications under the desert-land laws and the said Small Tract Act of June 1, 1938, shall be governed by the regulations contained in Parts 232 and 257, respectively, of that title.

Inquiries concerning these lands shall be addressed to the Manager, Land Office, Room 312 Federal Building, Salt Lake City, Utah.

WM. N. ANDERSEN,
State Supervisor.

[F. R. Doc. 55-4179; Filed, May 23, 1955; 8:47 a. m.]

[Misc. 1002818, 699023]

CALIFORNIA AND ARIZONA

PARTIAL REVOCATION OF ORDERS OPENING LANDS UNDER THE FOREST HOMESTEAD ACT

MAY 18, 1955.

Upon request of the Department of Agriculture and pursuant to the authority delegated by Departmental Order No. 2583, section 2.22 (a) of August 16, 1950, it is ordered as follows:

Subject to valid existing rights, the orders described below opening lands in the following national forests for entry under the act of June 11, 1906 (34 Stat. 233; 16 U. S. C. 506–509) as amended, are hereby revoked as to the following-described lands:

LOS PADRES NATIONAL FOREST

(Formerly Santa Barbara National Forest)

[1002818]

CALIFORNIA

SAN BERNARDINO MERIDIAN

Forest List No. 5–2819. Date of order of opening: January 29, 1917.

T. 6 N., R. 24 W.,
Sec. 13, NE¼SW¼SE¼.

The area described contains 10.00 acres.

Forest List No. 5–1734. Date of order of opening: June 17, 1913.

T. 6 N., R. 24 W.,
Sec. 13, N½SE¼SE¼, NW¼SW¼SE¼, E½SE¼SW¼;
Sec. 24, W½NE¼NE¼, NW¼NE¼, NE¼NE¼NW¼.

The areas described aggregate 120.00 acres.

[699023]

SITGREAVES NATIONAL FOREST
ARIZONA
GILA AND SALT RIVER MERIDIAN

Forest List No. 3–3987. Date of order of opening: May 10, 1917.

T. 11 N., R. 19 E.,
Sec. 3, SE¼NW¼ and lots 1, 2, and 3.

The area described contains 161.20 acres.

EARL G. HARRINGTON,
Acting Associate Director.

[F. R. Doc. 55–4180; Filed, May 23, 1955; 8:47 a. m.]

Bureau of Reclamation

MISSOURI RIVER BASIN PROJECT, WYOMING

ORDER OF REVOCATION

DECEMBER 16, 1954.

Pursuant to the authority delegated by Departmental Order No. 2765 of July 30, 1954 (19 F. R. 5004), I hereby revoke Departmental Order of March 15, 1946, insofar as said order affects the following described lands; provided, however, that such revocation shall not affect the withdrawal of any other lands by said order or affect any other orders withdrawing or reserving the lands hereinafter described:

SIXTH PRINCIPAL MERIDIAN, WYOMING

T. 38 N., R. 94 W.,
Sec. 4, Lots 1 to 4 incl., S½N½, N½S½, NW¼SW¼SW¼, NE¼SE¼SW¼, N½S½SE¼, SE¼SE¼SE¼;
Sec. 5, Lots 1, 2, 3, N½SW¼NE¼, SE¼SW¼NE¼, SE¼NE¼, NE¼SE¼, E½NW¼SE¼, NE¼SW¼SE¼, N½SE¼SE¼;
Sec. 9, E½NE¼NE¼, NE¼SE¼NE¼;
Sec. 10, N½NE¼, SE¼NE¼, NW¼;
Sec. 29, S½NW¼NW¼, S½NW¼, NE¼SW¼, W½SW¼, NW¼SE¼.
T. 39 N., R. 94 W.,
Sec. 5, Lots 1, 2, S½NE¼, E½SE¼NW¼;
Sec. 8, NE¼NE¼NE¼, E½E½SE¼;
Sec. 17, NE¼NE¼SE¼, S½NE¼SE¼;
Sec. 21, NE¼, N½SE¼, N½SW¼SE¼, SE¼SE¼;
Sec. 28, NE¼NE¼, S½NW¼NE¼, S½NE¼, SE¼NW¼, NE¼SW¼, S½SW¼, SE¼;
Sec. 29, SE¼NE¼SW¼, E½SE¼SW¼, SW¼NE¼SE¼, S½NW¼SE¼, S½SE¼;
Sec. 32, NE¼, E½E½NW¼, S½.
T. 40 N., R. 94 W.,
Sec. 31, Lot 1;
Sec. 32, N½NW¼, NE¼SW¼SW¼, SE¼SW¼, E½.

The above areas aggregate 3560.84 acres.

FLOYD E. DOMINY,
Acting Asst. Commissioner.

[Misc. 2092921]

I concur. The records of the Bureau of Land Management will be noted accordingly.

MAY 18, 1955.

The land is located in the vicinity of Shoshone, Wyoming, along the east boundary and above the high water line of the Boysen Reservoir. The land is generally rolling, to rough and broken, and supports a native stand of salt brush and sagebrush. Soils are a shallow and upland type. The land is grazing land and is not considered suitable for farming. Substantial portions of the lands are withdrawn in Power Site Classification No. 375.

No application for the restored land may be allowed under the homestead, desert-land, small tract, or any other nonmineral public-land law unless the land has already been classified as valuable or suitable for such type of application, or shall be so classified upon the consideration of an application. Any application that is filed will be considered on its merits. The land will not be subject to occupancy or disposition until it has been classified.

This order shall not otherwise become effective to change the status of the restored land until 10:00 a. m. on the 35th day after the date of this order. At that time the said land shall become subject to application, petition and selection, subject to valid existing rights, the provisions of existing withdrawals, the requirements of applicable laws, and the 91-day preference-right filing period for veterans and others entitled to preference under the act of September 27, 1944 (58 Stat. 747; 43 U. S. C. 279–284), as amended.

Veterans' preference-right applications under the said act of September 27, 1944, may be filed on or before 10:00 a. m., on the 35th day after the date of this order, and those covering the same land shall be treated though simultaneously filed at that time. Applications filed under the act after that time and during the succeeding 91 days shall be considered in the order of filing. Applications by the general public under the public-land laws, including the mineral-leasing laws, on or before 10:00 a. m., on the 126th day after the date of this order shall be treated as though simultaneously filed at that time, where the applications are for the same land; otherwise, priority of filing shall govern.

Inquiries regarding the land shall be addressed to the Manager, Land Office, Bureau of Land Management, Cheyenne, Wyoming.

EARL G. HARRINGTON,
Acting Associate Director,
Bureau of Land Management.

FEDERAL COMMUNICATIONS COMMISSION

[Docket Nos. 10335, 10378; FCC 55M–424]

WESTERN UNION TELEGRAPH CO. ET AL.

ORDER CONTINUING HEARING

In the matter of The Western Union Telegraph Company, Complainant, v. All America Cables and Radio, Inc., The Commercial Cable Company, MacKay Radio and Telegraph Company, Inc., Defendants; Docket No. 10378. In the matter of The Western Union Telegraph Company, Complainant, v. RCA Communications, Inc., Defendant; Docket No. 10335.

The Hearing Examiner having under consideration the date of hearing herein, now scheduled for May 16, 1955; the motion of The Western Union Telegraph Company to dismiss the proceeding; the replies of the other parties to the motion, and the statement of the Common Carrier Bureau in regard to the motion; and

It appearing that the Commission may not be able to act on the motion before May 16, 1955; and it may be desirable for the hearing to be deferred until the Commission has time to act;

It is ordered, This 10th day of May 1955, upon the Hearing Examiner's own motion, that the hearing is continued to a date to be scheduled in a later order.

FEDERAL COMMUNICATIONS COMMISSION,
[SEAL] MARY JANE MORRIS,
Secretary.

[Docket Nos. 10844, 10845; FCC 55M–456]

RADIO ASSOCIATES, INC., AND WLOX BROADCASTING CO.

ORDER CONTINUING HEARING

In re applications of Radio Associates, Inc., Biloxi, Mississippi, Docket No. 10844, File No. BPCT–1150; WLOX Broadcasting Company, Biloxi, Mississippi, Docket No. 10845, File No. BPCT–1157; for construction permits for new commercial television broadcast stations (Channel 13).

The Commission having under consideration the motion of WLOX Broadcasting Company, filed May 13, 1955, that hearing in the above-entitled proceeding be continued, and the opposition thereto in behalf of Radio Associates, Inc.;

It appearing that by reason of (a) the pendency of an appeal to the Commission from a ruling of the Examiner denying a request to remove the hearing to the city of Biloxi, Mississippi, and (b) other business commitments of one of the principals of the moving party and the illness of members of his family, it is proposed by this pleading that the commencement of hearing await the Commission's action with regard to the appeal aforementioned; and

It appearing further that public interest considerations require that the proceedings in this matter be expedited in every way possible, since the applications involved have been in hearing status since January 6, 1954; and

It appearing further that, although the motion fails to state good cause and must be denied, present field hearing commitments of the Examiner assigned to the case are such that he will be unable to undertake the hearing herein on May 24, 1955, as presently scheduled, and that a brief continuance is necessary;

Accordingly, it is ordered, this 18th day of May 1955, that the instant motion is denied: *And it is further ordered,* On the Chief Hearing Examiner's own motion, that hearing in the above-entitled proceeding is continued to a date in the near future to be specified by the Examiner designated to preside therein.

FEDERAL COMMUNICATIONS COMMISSION,
[SEAL] MARY JANE MORRIS,
Secretary.

[Docket Nos. 10931, 10933; FCC 55M–448]

MERCER BROADCASTING CO. ET AL.

THIRD STATEMENT CONCERNING PRE-HEARING CONFERENCES AND ORDER CONTINUING HEARING

In re applications of Mercer Broadcasting Co., Trenton, New Jersey, Docket No. 10931, File No. BP–8714; Drew J. T. O'Keefe, Jack J. Dash & William F. Waterbury, Levittown-Fairless Hills, Pennsylvania, Docket No. 10933, File No. BP–8964; for construction permits.

1. A further pre-hearing conference was held herein on April 28, 1955, pursuant to direction of the Hearing Examiner. Max M. Leon, Inc., licensee of Station WDAS, was not represented.

2. Agreements were reached among the parties and were stated on the record, as reflected in the transcript which is incorporated herein by reference. Such agreements are found to be acceptable and approved by the Hearing Examiner. They include the following subjects:

(a) New engineering exhibit to be furnished by May 5, 1955, by Mercer (tr. 234–5; 243).

(b) Memorandum brief to be submitted in connection with request for ruling on admissibility of certain engineering measurements (tr. 228, 240–4; 254–7); reply (tr. 242–3); oral argument waived (tr. 241, 243–4).

(c) Procedure for reaching agreement on objections to lay evidence (tr. 244–8); list of unresolved objections to lay evidence to be served and filed by June 1, 1955 (tr. 255).

(d) Statement of basis for arriving at boundaries of Levittown and Fairless Hills to be submitted by June 1, 1955 unless a stipulation can be arrived at previously (tr. 257–9).

(e) Substitute engineering testimony, if required by Hearing Examiner's ruling on (b) above, to be exchanged by June 13, 1955 (tr. 254).

(f) Hearing scheduled for 10:00 a. m., June 15, 1955 (tr. 253).

It is ordered, This 18th day of May 1955, that the foregoing agreements and requirements shall govern the course of the proceeding to the extent indicated, unless modified by the Examiner for cause or by the Commission upon review of the Examiner's ruling, and the hearing herein is scheduled for June 15, 1955, at 10:00 a. m., at the Commission's offices in Washington, D. C.

MOAB, UTAH AREA

FINDING AND DETERMINATION OF CRITICAL DEFENSE HOUSING AREAS

Upon a review of specific data presented to me, I find that all of the conditions set forth in section 101 (b) of the Defense Housing and Community Facilities and Services Act of 1951, as amended, exist in the:

Moab, Utah Area. The area consists of the Precincts of East Moab and West Moab in Grand County and the Precinct of La Sal in San Juan County, Utah.

Accordingly, pursuant to section 101 of the Defense Housing and Community Facilities and Services Act of 1951 and by virtue of the authority vested in me by Executive Order 10206 of October 2, 1951, I hereby determine that said area is a critical defense housing area.

Dated: May 20, 1955.

SECURITIES AND EXCHANGE COMMISSION

[File Nos. 54-164, 59-14]

INTERNATIONAL HYDRO-ELECTRIC SYSTEM

NOTICE OF PETITION FILED BY INTERIM BOARD OF DIRECTORS FOR APPROVAL OF MAXIMUM AMOUNTS OF INTERIM FEES AND EXPENSES

MAY 18, 1955.

Notice is hereby given that the Interim Board of Directors of International Hydro-Electric System ("IHES"), a registered holding company now in process of reorganization pursuant to sections 11 (d) and 11 (f) of the Public Utility Holding Company Act of 1935 ("act"), has filed with this Commission a petition and an amendment thereto for the issuance of an order pursuant to Rule U-63 promulgated under the act approving maximum amounts which may be paid by Bartholomew A. Brickley, Trustee of IHES, or his agent, to defray the reasonable and necessary costs and expenses of the Board in performing the duties entrusted to it, as follows:

On December 8, 1954, the United States District Court for the District of Massachusetts entered an order provisionally approving the nine persons reported by the Trustee as having received the highest number of votes at the meeting of the Class A stockholders held April 27–28, 1954, pursuant to Part III (First Amendment) of the Trustee's Second Plan, namely, Cameron Biewend, James Bruce, John L. Burns, Justin Haynes, William K. Jacobs, Jr., Christian A. Johnson, Robert J. Marony, Alfred A. Romney, and Paul H. Todd, "as interim directors, constituting the Board of Directors of International Hydro-Electric System to serve until further order of this Court with only the authority and for the sole purpose of representing the Class A stockholders in all proceedings before the Securities and Exchange Commission and this Court and in particular with reference to the formulation of proposals for the consummation of Part IV (First Amendment) of the Trustee's Second Plan * * *"

Pursuant to said order of the Court, the Interim Board held its first meeting on December 20, 1954, at which it elected a chairman and temporary secretary; authorized the payment to each Director of $100 for attendance at each meeting of the Board together with expenses incidental to attending such meetings; selected Messrs. Purcell & Nelson of Washington, D. C. as counsel; and appointed a committee to formulate a plan for converting IHES into an investment company.

On January 13, 1955, at a special meeting, the Interim Board authorized the payment to each Director of $100 for attendance at each meeting of any committee of which he is a member together with expenses incurred in connection with attending committee meetings, and authorized the payment to counsel of a retainer of $2,000 per month, plus expenses and disbursements in connection with their representation of the Board (such payments to counsel to be subject to final Commission and Court review and determination of fee and expense allowances). The Board further authorized counsel to retain Messrs. Ropes, Gray, Best, Coolidge & Rugg of Boston on matters of Massachusetts law, and George E. Cleary, Esq. of Cleary, Gottlieb, Friendly & Hamilton, of New York City, on tax questions.

The Interim Board has formulated and filed with the Commission a definitive plan for the reorganization of IHES and for its continuation as a registered investment company, together with an application for modification of the Commission's order of July 21, 1942, requiring the liquidation and dissolution of IHES and for exemption of IHES pursuant to section 3 (a) (5) of the act.

Hearings have been held with respect to the plan and the application filed by the Interim Board, and with respect to plans filed by other interested persons.

The petition alleges that, in discharging their duties as directors, the members of the Interim Board have incurred and will continue to incur substantial costs and expenses chargeable to the estate of IHES.

The petition requests that the Commission enter an order approving the transfer by the Trustee from the treasury of IHES to a special account in a bank or trust company in the City of Boston, Massachusetts, of the sum of $50,000, and authorizing the Treasurer of IHES (or such other person as the aforesaid Court may approve) to make disbursements from such account in payment of fee and expense vouchers submitted by the Interim Directors, the Secretary and Assistant Secretary of the Interim Board, and counsel retained by the Interim Board, as to their respective fees, charges and expenses, all such vouchers to be submitted in a form satisfactory to the Treasurer or such other person as may be approved by the aforesaid Court and by the Interim Board; provided that such order shall not be deemed to limit the authority of the Commission or the Court with regard to the final determination of all fee and expense allowances (including those covered by the aforesaid petition) to any and all persons in connection with the reorganization of IHES pursuant to the provisions of the act.

In an amendment to the petition counsel to the Interim Board have supplied an itemized statement of fees and expenses requested to be paid from said fund, applicable to the period from December 20, 1954, to April 30, 1955, as follows:

Fees and estimated expenses of interim directors (4 board meetings and 1 committee meeting)	$4,900.00
Expenses and disbursements of secretary and assistant secretary (for mimeographing, photostats, stenography, etc.)	256.13
Counsel to the interim board, retainer for 5 months (representing 1,204 hours of lawyers' time)	10,000.00
Expenses and disbursements of counsel	5,812.03
Total to Apr. 30, 1955 (estimated in part)	20,968.16

Notice is further given that any interested person may, not later than May 31, 1955, at 5:30 p. m., request the Commission in writing that a hearing be held on such matter, stating the nature of his interest, the reasons for such request, and the issues of fact or law, if any, raised by said petition which he desires to controvert; or he may request that he be notified if the Commission should order a hearing thereon. Any such request should be addressed: Secretary, Securities and Exchange Commission, Washington 25, D. C. At any time after said date, said petition may be granted, or the Commission may take such other action as it may deem appropriate under the circumstances.

By the Commission.

[SEAL] ORVAL L. DUBOIS,
Secretary.

[File No. 54-191, File No. 54-173]

STANDARD GAS AND ELECTRIC CO. AND PHILADELPHIA CO.

SUPPLEMENTAL ORDER RELEASING JURISDICTION OVER THE SALE OF STOCK BY DISTRIBUTION AGENT

MAY 18, 1955.

Standard Gas and Electric Company ("Standard"), a registered holding company now in process of liquidation pursuant to section 11 (b) (2) of the Public Utility Holding Company Act of 1935 ("act"), has requested that the Commission release the jurisdiction reserved in its Order of December 10, 1954 (Holding Company Act Release No. 12735) with respect to certain incidental sales of common stock of Duquesne Light Company ("Duquesne") by the Distribution Agent ("Agent") as provided for in Step III–A of its amended plan for compliance with section 11 of the act.

Step III–A provided, among other things, for the distribution to Standard's common stockholders of 216,260.7 common shares of Duquesne on the basis of one-tenth share of such stock for each common share of Standard. No fractional shares were issued but prior to April 27, 1955, all persons entitled to fractional share interests could either sell such fractional interests or buy additional interests sufficient to make a full share. Thereafter, the Distribution Agent was directed to convert into cash all shares of Duquesne stock then held in respect of the unclaimed fractional

interests and remit the proceeds of such sale to the stockholders entitled thereto.

Standard has notified the Commission that it is necessary for the Agent to sell 527 Duquesne common shares in order to comply with the above-referred to provision. Standard has further notified Commission that if the jurisdiction heretofore reserved by the Commission is released, the Agent will sell said shares of Duquesne stock by means of ordinary brokers' transactions on the New York Stock Exchange, with no expenses involved except customary brokers' commissions and transfer taxes, if any, which costs will be paid by Standard.

In view of the manner in which the proposed sales of Duquesne shares to provide for the fractional shares will be conducted, and the limited nature thereof:

It is ordered, That the jurisdiction heretofore reserved with respect thereto be, and the same hereby is, released.

It is further ordered, That the jurisdiction heretofore reserved in all other respects be, and the same hereby is, continued.

By the Commission.

[SEAL] ORVAL L. DUBOIS,
Secretary.

[F. R. Doc. 55-4185; Filed, May 23, 1955; 8:48 a. m.]

[File No. 70-3383]

CENTRAL POWER AND LIGHT CO.

NOTICE OF FILING OF DECLARATION REGARDING PROPOSAL TO BORROW FROM BANKS ON SHORT-TERM NOTES

MAY 18, 1955.

Notice is hereby given that Central Power and Light Company ("Central"), a public-utility company subsidiary of Central and South West Corporation, a registered holding company, has filed with this Commission a declaration pursuant to the Public Utility Holding Company Act of 1935 ("act") regarding a proposal to borrow from banks not in excess of $9,000,000. Central designates sections 6 (a), 6 (b), and 7 of the act and Rule U-50 (a) (2) promulgated thereunder as applicable to the following proposed transactions:

Central states that by virtue of the exemption provided by the first sentence of section 6 (b) of the act, it is presently entitled to issue notes maturing not more than nine months from issuance in principal amounts not to exceed $6,319,900 in the aggregate. Central proposes to borrow from time to time an aggregate of not in excess of $9,000,000, and to issue its notes therefor. The $6,319,900 of notes which may be issued by Central pursuant to said exemption shall be regarded as a part of the total amount ($9,000,000) of notes herein proposed to be issued.

The proposed borrowings are to be made from the banks and in the amounts shown below:

The Corpus Christi National Bank	$200,000
State National Bank of Corpus Christi	150,000
The First State Bank of Corpus Christi	100,000
Corpus Christi Bank & Trust Co	200,000
Citizens State Bank of Corpus Christi	50,000
Union National Bank of Laredo	50,000
The Laredo National Bank	62,500
Victoria Bank & Trust Co	250,000
The Victoria National Bank	250,000
The First National Bank of Chicago	7,687,500
Total	9,000,000

The borrowings are to be evidenced by promissory notes to be dated the date of the respective borrowings, will mature on or before February 28, 1956, and will bear interest at the rate of 3 percent per annum, payable monthly. The notes are to be prepayable by the Company at any time and from time to time without premium or penalty. It is contemplated that the first borrowing will be made on or about June 10, 1955. The proceeds from the borrowings will be used by Central to finance temporarily a portion of its construction expenditures during the nine months beginning June 1, 1955. It is contemplated that the notes will be paid at or before maturity through the issuance and sale by Central of such securities as may be considered most appropriate in the light of market conditions existing at the time and as may be approved by the Commission to the extent required by the act.

It is stated that no commitment or other fees are proposed to be paid by Central in connection with the proposed borrowings; and that the expenses to be incurred in connection with the proposed transactions, consisting primarily of telephone, incidental and miscellaneous expense, are estimated at not to exceed $300.

It is also stated that no Federal Commission other than the Securities and Exchange Commission, and no State commission, has jurisdiction over the proposed transaction.

Notice is further given that any interested person may, not later than May 31, 1955, at 5:30 p. m., e. d. s. t., request the Commission in writing that a hearing be held in respect of the declaration, stating the nature of his interest, the reasons for such request, and the issues of fact or law which he desires to controvert, or he may request that he be notified should the Commission order a hearing thereon. Any such request should be addressed: Secretary, Securities and Exchange Commission, Washington 25, D. C. At any time after said date the Commission may permit the declaration as filed, or as amended, to become effective as provided by Rule U-23 promulgated under the act, or the Commission may exempt such transactions pursuant to Rules U-20 (a) and U-100 thereof.

By the Commission.

[SEAL] ORVAL L. DUBOIS,
Secretary.

LEOPOLD BISSINGER

NOTICE OF INTENTION TO RETURN VESTED PROPERTY

Pursuant to section 32 (f) of the Trading With the Enemy Act, as amended, notice is hereby given of intention to return, on or after 30 days from the date of publication hereof, the following property, subject to any increase or decrease resulting from the administration thereof prior to return, and after adequate provision for taxes and conservatory expenses:

Claimant, Claim No., Property, and Location

Leopold Bissinger, Laupheim, Wurttemberg, Germany, Claim No. 37097; ½ of $8,453.91 in the Treasury of the United States.

Executed at Washington D. C., on May 17, 1955.

For the Attorney General.

[SEAL] PAUL V. MYRON,
Deputy Director,
Office of Alien Property.

[F. R. Doc. 55-4193; Filed, May 23, 1955; 8:50 a. m.]

ADRIAAN J. SCHIPPER

NOTICE OF INTENTION TO RETURN VESTED PROPERTY

Pursuant to section 32 (f) of the Trading With the Enemy Act, as amended, notice is hereby given of intention to return, on or after 30 days from the date of publication hereof, the following property located in Washington, D. C., including all royalties accrued thereunder and all damages and profits recoverable for past infringement thereof, after adequate provision for taxes and conservatory expenses:

Claimant, Claim No., and Property

Adriaan J. Schipper, Kapelle near Goes, The Netherlands, Claim No. 42747; property described in Vesting Order No. 671 (8 F. R. 5004, April 17, 1943), relating to United States Letters Patent No. 2,279,596.

Executed at Washington, D. C., on May 17, 1955.

For the Attorney General.

[SEAL] PAUL V. MYRON,
Deputy Director,
Office of Alien Property.

[F. R. Doc. 55-4194; Filed, May 23, 1955; 8:50 a. m.]

TITLE 4—ACCOUNTS

Chapter I—General Accounting Office

[Accounting Systems Memorandum 38]

PART 11—CERTIFICATE TO BE USED BY CONTRACTORS AND VENDORS ON INVOICES OR BILLS

CERTIFICATION OF PUBLIC UTILITY BILLS

Section 11.6 is added as follows:

§ 11.6 *Certification of public utility bills.* Effective March 9, 1955, and until further notice, the General Accounting Office will not require that invoices or bills submitted by public utility companies, whose rates are fixed or adjusted by Federal, State, or other regulatory body, be certified by the vendor. It should be understood that the omission of the certificate from the bills or invoices submitted for public utility services to the Government agencies does not, in any manner, lessen the responsibility of the public utility companies in complying with all statutory requirements applicable to transactions with the Government, nor will it be understood as mitigating their liability for asserting false, fictitious and fraudulent claims against the Government, penalties for which are set forth in 18 U. S. C. 287.

(Secs. 309, 311, 42 Stat. 25; 31 U. S. C. 49, 52)

[SEAL] JOSEPH CAMPBELL,
Comptroller General,
of the United States.

FEDERAL REGISTER

Published daily, except Sundays, Mondays, and days following official Federal holidays, by the Federal Register Division, National Archives and Records Service, General Services Administration, pursuant to the authority contained in the Federal Register Act, approved July 26, 1935 (49 Stat. 500, as amended; 44 U. S. C., ch. 8B), under regulations prescribed by the Administrative Committee of the Federal Register, approved by the President. Distribution is made only by the Superintendent of Documents, Government Printing Office, Washington 25, D. C.

The FEDERAL REGISTER will be furnished by mail to subscribers, free of postage, for $1.50 per month or $15.00 per year, payable in advance. The charge for individual copies (minimum 15 cents) varies in proportion to the size of the issue. Remit check or money order, made payable to the Superintendent of Documents, directly to the Government Printing Office, Washington 25, D. C.

The regulatory material appearing herein is keyed to the CODE OF FEDERAL REGULATIONS, which is published, under 50 titles, pursuant to section 11 of the Federal Register Act, as amended August 5, 1953. The CODE OF FEDERAL REGULATIONS is sold by the Superintendent of Documents. Prices of books and pocket supplements vary.

There are no restrictions on the republication of material appearing in the FEDERAL REGISTER, or the CODE OF FEDERAL REGULATIONS.

information, it is hereby found that the amendment to the limitation of shipments, as hereinafter provided, will tend to effectuate the declared policy of the act, and is not for the purpose of maintaining prices to farmers above the level which it is declared to be the policy of Congress to establish thereunder.

b. It is hereby found that it is impracticable and contrary to the public interest to give preliminary notice, engage in public rule making procedure, and postpone the effective date of this amendment until 30 days after publication in the FEDERAL REGISTER (5 U. S. C. 1001 et seq.) in that (1) the time intervening between the date when information upon which this amendment is based became available and the time when this amendment must become effective in order to effectuate the declared policy of the act is insufficient, (2) more orderly marketing in the public interest, than would otherwise prevail, will be promoted by regulating the shipment of potatoes, in the manner set forth below, on and after the effective date of this amendment, (3) compliance with this amendment will not require any special preparation on the part of handlers which cannot be completed by the effective date, (4) information regarding the committee's recommendation has been made available to producers and handlers in the production area, (5) this amendment relieves restrictions on the handling of potatoes, and (6) the benefits to be derived from this amendment should be made available to producers and handlers as soon as practicable.

c. *Order, as amended.* The provisions of § 970.301 (b) (1) (19 F. R. 7284, 8556, 9171; 20 F. R. 1360) are hereby amended to read as follows:

(b) *Order.* (1) During the period May 25, 1955, to June 30, 1955, both dates inclusive, no handler shall ship:

(i) Potatoes of the round white varieties or of the red skin varieties unless the potatoes meet the requirements of the U. S. No. 1 grade, size A, and are of a size not smaller than 2 inches minimum diameter; or

(ii) Potatoes of the long varieties (including, but not being limited to, the Russet Burbank variety) unless the potatoes meet the requirements of the U. S. No. 2 grade, and are of a size not smaller than 1⅞ inches minimum diameter or 3 ounces minimum weight.

(Sec. 5, 49 Stat. 753, as amended; 7 U. S. C. 608c)

Done at Washington, D. C., this 23d day of May 1955, to become effective May 25, 1955.

[SEAL] S. R. SMITH,
Director, Fruit and Vegetable Division, Agricultural Marketing Service.

[F. R. Doc. 55–4240; Filed, May 24, 1955; 8:51 a. m.]

Subchapter B—Prohibitions of Imported Commodities

[Amdt. 4]

PART 1066—IRISH POTATOES

POTATO REGULATION NO. 1

Pursuant to the authority vested in me under section 8e of the Agricultural Adjustment Act of 1933, as amended and as reenacted and amended by the Agricultural Marketing Agreement Act of 1937, as amended (48 Stat. 31, as amended; 7 U. S. C. 601 et seq.; 68 Stat. 906, 907, 1047), § 1066.1 Potato Regulation No. 1 (20 F. R. 175, 484, 1761, 2055) is hereby amended to read as follows:

§ 1066.1 *Potato Regulation No. 1.* During the period May 25, 1955, to June 30, 1955, both dates inclusive, and subject to the general regulations (19 F. R. 7707, 8012) applicable to the importation of listed commodities and the requirements of this section, no person shall import any potatoes, other than certified seed potatoes, (a) of the round white or red skin varieties unless such potatoes meet the requirements of the U. S. No. 1 or better grade, Size A, 2 inches minimum diameter; and (b) of the long white varieties (including, but not limited to Russet Burbank variety) unless such potatoes meet the requirements of U. S. No. 2 or better grade, Size A, 2 inches minimum diameter or 4 ounces minimum weight.

(Sec. 5, 49 Stat. 753, as amended; 7 U. S. C. 608c)

Findings. It is hereby found that it is impracticable and contrary to the public interest to give preliminary notice, engage in public rule making procedure, and postpone the effective date of this amendment until 30 days after publication in the FEDERAL REGISTER (5 U. S. C. 1001 et seq.) in that (a) the requirements established by this import regulation are issued pursuant to section 8e of the act which makes such regulation mandatory; (b) an amendment to grade, size, and quality regulations in effect on domestic shipments of potatoes pursuant to Order No. 70 (7 CFR 970.301; 19 F. R. 7284, 8556, 9171; 20 F. R. 1360) will become effective on May 25, 1955; (c) such regulations and those applicable pursuant to Order No. 57 (7 CFR 957.312; 19 F. R. 3792; 20 F. R. 3528) will terminate on June 30, 1955; (d) this amendment relieves restrictions on imports of potatoes.

Done at Washington, D. C., this 23d day of May 1955, to become effective May 25, 1955.

[SEAL] S. R. SMITH,
Director, Fruit and Vegetable Division, Agricultural Marketing Service.

[F. R. Doc. 55–4239; Filed, May 24, 1955; 8:51 a. m.]

TITLE 14—CIVIL AVIATION

Chapter II—Civil Aeronautics Administration, Department of Commerce

[Amdt. 116]

PART 608—RESTRICTED AREAS

ALTERATIONS

The restricted area alterations appearing hereinafter have been coordinated with the civil operators involved, the Army, the Navy and the Air Force, through the Air Coordinating Committee, Airspace Panel, and are adopted to become effective when indicated in order to promote safety of the flying public. Since a military function of the United States is involved, compliance with the notice, procedure, and effective date provisions of section 4 of the Administrative Procedure Act is not required.

Part 608 is amended as follows:

1. In § 608.51, the Matagorda Island, Texas, area (R–224 formerly D–224), amended on November 28, 1951, in 16 F. R. 11954, is further amended by changing the "Controlling Agency" column to read: "Headquarters, Second Air Force, Barksdale AFB, Shreveport, Louisiana".

2. In § 608.51, the Waco, Texas, area (R–374 formerly D–374), amended on April 26, 1952, in 17 F. R. 3724, is rescinded.

3. In § 608.51, the Waco, Texas, area (R–375 formerly D–375), published on September 7, 1951, in 16 F. R. 9070, is rescinded.

4. In § 608.51, the Waco, Texas, area (R–376 formerly D–376), published on September 7, 1951, in 16 F. R. 9070, is rescinded.

5. In § 608.32, the Black Creek, Mississippi, area (R–451 formerly D–451), published on May 20, 1954, in 19 F. R. 2943, is redesignated as follows:

Name and location (chart)	Description by geographical coordinates	Designated altitudes	Time of use	Controlling agency
BLACK CREEK (R-451) (Mobile).	NW. corner: latitude 31°12'54", longitude 89°11'03"; NE. corner: latitude 31°11'48", longitude 89°00'00"; SE. corner: latitude 31°04'36", longitude 89°00'00"; SW. corner: latitude 31°04'36", longitude 89°11'03".	Surface to 13,000 feet mean sea level.	Continuous	National Guard, Camp Shelby, Miss.

(Sec. 205, 52 Stat. 984, as amended; 49 U. S. C. 425. Interprets or applies sec. 601, 52 Stat. 1007, as amended; 49 U. S. C. 551)

This amendment shall become effective on May 25, 1955.

[SEAL] S. A. KEMP,
Acting Administrator of Civil Aeronautics.

[F. R. Doc. 55–4231; Filed, May 24, 1955; 8:48 a. m.]

TITLE 16—COMMERCIAL PRACTICES

Chapter I—Federal Trade Commission

[Docket 6181]

PART 13—DIGEST OF CEASE AND DESIST ORDERS

CLEAN-RITE VACUUM STORES, INC., ET AL.

Subpart—*Advertising falsely or misleadingly:* § 13.170 *Qualities or properties of product or service;* § 13.200 *Sample, offer or order conformance.* Subpart—*Offering unfair, improper and deceptive inducements to purchase or deal:* § 13.2060 *Sample, offer or order conformance.* In connection with the offering for sale, sale, and distribution of vacuum cleaners or other similar merchandise in commerce: (1) Representing, directly or by implication, that said merchandise is offered for sale when such offer is not a bona fide offer to sell the merchandise so offered; (2) using any sales plan or procedure involving the use of false, deceptive, or misleading statements or representations in advertising which are designed to obtain leads or prospects for the sale of other or different merchandise; or (3) representing, directly or by implication, that vacuum cleaners which have little or no value as cleaning devices will, in fact, do a satisfactory job of cleaning; prohibited.

(Sec. 6, 38 Stat. 721; 15 U. S. C. 45. Interpret or apply sec. 5, 38 Stat. 719, as amended; 15 U. S. C. 45) [Cease and desist order, Clean-Rite Vacuum Stores, Inc., et al., Washington, D. C., Docket 6181, April 6, 1955]

In the Matter of Clean-Rite Vacuum Stores, Inc., a Corporation, and Samuel Berenson, and Etta Berenson, Individually

This proceeding was heard by Earl J. Kolb, hearing examiner, upon the complaint of the Commission which charged respondents with the use of unfair and deceptive acts and practices and unfair methods of competition in the advertising of their products, and upon respondents' answer thereto, testimony and other evidence, and proposed findings as to the facts and conclusions pre-

sented by counsel; and said hearing examiner, having duly considered the matter and being fully advised in the premises, found that such proceeding, thus before him for final consideration, was in the interest of the public, and made his initial decision comprising certain findings as to the facts and conclusion drawn therefrom, and order to cease and desist.

Thereafter, respondents having filed their appeal from said initial decision and the Commission having heard said matter and having concluded, for the reasons set forth in its decision on said appeal, that said initial decision was correct, that respondents' exceptions thereto were without merit, and that respondents' appeal should be denied, the matter was disposed of by the Commission's "Final Order", Docket 6181, April 8, 1955, as follows:

Respondents Clean-Rite Vacuum Stores, Inc., a corporation, and Samuel Berenson and Etta Berenson, individually, having filed, on August 4, 1954, their appeal from the intial decision of the hearing examiner in this proceeding; and the matter having been heard by the Commission on briefs and oral argument; and the Commission having rendered its decision denying the appeal and affirming the initial decision:

It is ordered, That the aforesaid respondents shall, within sixty (60) days after service upon them of this order, file with the Commission a report in writing, setting forth in detail the manner and form in which they have complied with the order contained in said initial decision.

The cease and desist order in said initial decision, thus made the decision of the Commission, is as follows:

It is ordered, That respondents Clean-Rite Vacuum Stores, Inc., a corporation, and its officers and respondents Samuel Berenson and Etta Berenson, individually and as officers of the corporate respondent, and their respective representatives, agents and employees, directly or through any corporate or other device, in connection with the offering for sale, sale and distribution of vacuum cleaners or other similar merchandise in commerce, as "commerce" is defined in the Federal Trade Commission Act, do forthwith cease and desist from:

1. Representing, directly or by implication, that said merchandise is offered for sale when such offer is not a bona fide offer to sell the merchandise so offered.

2. The use of any sales plan or procedure involving the use of false, deceptive or misleading statements or representations in advertising which are designed to obtain leads or prospects for the sale of other or different merchandise.

3. Representing, directly or by implication, that vacuum cleaners which have little or no value as cleaning devices will, in fact, do a satisfactory job of cleaning.

Issued: April 8, 1955.

[SEAL] ROBERT M. PARRISH,
Secretary.

[F. R. Doc. 55-4224; Filed, May 24, 1955; 8:48 a. m.]

TITLE 36—PARKS, FORESTS, AND MEMORIALS

Chapter I—National Park Service, Department of the Interior

PART 1—GENERAL RULES AND REGULATIONS

COMMERCIAL AUTOMOBILES AND BUSES

CROSS REFERENCE: For exceptions to the prohibition against the admission of commercial automobiles and buses to Crater Lake National Park, see § 20.2 of this chapter, *infra*.

PART 20—SPECIAL REGULATIONS

CRATER LAKE NATIONAL PARK

Section 20.2 *Crater Lake National Park* is amended by the addition of paragraph (d), reading as follows:

(d) *Commercial automobiles and buses.* The prohibition against the admission of commercial automobiles and buses to Crater Lake National Park, contained in § 1.36 of this chapter, shall be subject to the following exceptions: Commercial passenger carrying vehicles will be accorded admission to the Park upon establishing to the satisfaction of the Superintendent that said vehicles are operated from such places and in such a manner as not to provide, in effect, a regular and duplicating service conflicting with, or in competition with, the transportation services provided for the public at or outside of the Park pursuant to contract authorization with the Secretary. Admission to the Park will be accorded such motor vehicles upon payment of a special tour permit fee of $1.00 per passenger-carrying seat in the vehicle.

(Sec. 3, 39 Stat. 535, as amended; 16 U. S. C. 3)

Issued this 27th day of April 1955.

[SEAL] THOMAS J. WILLIAMS,
Superintendent, Crater Lake National Park.

[F. R. Doc. 55-4211; Filed, May 24, 1955; 8:45 a. m.]

TITLE 29—LABOR

Chapter V—Wage and Hour Division, Department of Labor

PART 701—METAL, PLASTICS, MACHINERY, INSTRUMENT, TRANSPORTATION EQUIPMENT, AND ALLIED INDUSTRIES IN PUERTO RICO

MINIMUM WAGE ORDER

CROSS REFERENCE: For amendment to Part 701 to the extent that it applies to the metal, machinery, transportation equipment, and allied industries in Puerto Rico, see Part 712 of this chapter, *infra*.

PART 712—METAL, MACHINERY, TRANSPORTATION EQUIPMENT, AND ALLIED INDUSTRIES IN PUERTO RICO

MINIMUM WAGE ORDER

Pursuant to the provisions of the Administrative Procedure Act (60 Stat. 237; 5 U. S. C. 1001), notice was published in the FEDERAL REGISTER on April 27, 1955 (20 F. R. 2821) of the Administrator's proposed decision to approve the recommendations of Special Industry Committee No. 16-B for the Metal, Machinery, Transportation Equipment, and Allied Industries in Puerto Rico, together with the wage order which he proposed to issue to carry such decision into effect.

As indicated in the notice, the Administrator's findings and conclusions in this matter were set forth in a document entitled "Findings and Opinion of the Administrator in the Matter of the Recommendations of Special Industry Committee No. 16-B for Puerto Rico for Minimum Wage Rates in the Metal, Machinery, Transportation Equipment, and Allied Industries in Puerto Rico."

Interested parties were given an opportunity to file exceptions to the proposed decision within fifteen days of the date of publication. One objection has been filed together with a request for additional time to file data in support thereof. The request for an extension has been denied and I find the objection insufficient to justify a change in my decision as proposed.

Accordingly, pursuant to authority under the Fair Labor Standards Act of 1938, as amended (52 Stat. 1060, as amended; 29 U. S. C. 201 et seq.), Reorganization Plan No. 6 of 1950 (5 U. S. C. 611), General Order No. 45-A (15 F. R. 3290), and, the position of the Administrator being presently vacant, General Order No. 85 (20 F. R. 2066), the said decision is affirmed and made final; the recommendations of Special Industry Committee No. 16-B for minimum wage rates in the metal, machinery, transportation equipment, and allied industries in Puerto Rico are hereby approved and the wage order contained in 29 CFR, Part 701 is hereby amended, to the extent that it applies to the metal, machinery, transportation equipment, and allied industries in Puerto Rico, as hereinafter defined.

Sec.
712.1 Approval of recommendations of industry committee.
712.2 Wage rates.
712.3 Notices of order.
712.4 Definition of the metal, machinery, transportation equipment and allied industries in Puerto Rico, and divisions thereof.

AUTHORITY: §§ 712.1 to 712.4 issued under sec. 8, 52 Stat. 1064, as amended; 29 U. S. C. 208.

§ 712.1 *Approval of recommendations of industry committee.* The committee's recommendations are hereby approved.

§ 712.2 *Wage rates.* (a) Wages at a rate of not less than 65 cents an hour shall be paid under section 6 of the Fair Labor Standards Act of 1938, as amended, by every employer to each of his employees in the fabricated wire products, steel spring, and slide fastener division of the metal, machinery, transportation equipment, and allied industries in Puerto Rico who is engaged in commerce or in the production of goods for commerce.

(b) Wages at a rate of not less than 75 cents an hour shall be paid under section 6 of the Fair Labor Standards Act of 1938, as amended, by every employer to each of his employees in the general division of the metal, machinery, transportation equipment, and allied industries in Puerto Rico who is engaged in commerce or in the production of goods for commerce.

§ 712.3 *Notices of order.* Every employer employing any employees so engaged in commerce or in the production of goods for commerce in the metal, machinery, transportation equipment, and allied industries in Puerto Rico shall post in a conspicuous place in each department of his establishment where such employees are working such notices of this order as shall be prescribed, from time to time, by the Wage and Hour Division of the United States Department of Labor and shall give such other notice as the Division may prescribe.

§ 712.4 *Definition of the metal, machinery, transportation equipment, and allied industries in Puerto Rico, and divisions thereof.* (a) (1) The metal, machinery, transportation equipment, and allied industries in Puerto Rico to which this part shall apply is hereby defined as follows: The mining or other extraction of metal ore and the further processing of such ore into metal; the manufacture (including repair) of any product or part made wholly or chiefly of metal; and the manufacture from any material of machinery, tools, transportation equipment, and ordnance: *Provided, however*, That the definition shall not include (i) the production of any basic material other than metal; (ii) the further processing of any basic material other than metal except when done by an establishment producing from such materials a product of these industries or subassembly of such product; (iii) the building and repairing (including painting) of ocean-going ships when performed in drydocks or shipyards; (iv) any activity included within the button, buckle, and jewelry industry, or the shoe manufacturing and allied industries as defined in the wage orders for those industries; (v) or any activity included within the electrical, instrument, and related manufacturing industries as defined in Administrative Order No. 440 appointing Special Industry Committees Nos. 16-A, 16-B, and 16-C for Puerto Rico. The definition supersedes the definition of the decorations and party favors industry with respect to the manufacture of (metal) articles other than those made from metallic chenille, foil, or tinsel.

(2) The definition contained in subparagraph (1) of this paragraph supersedes the definitions contained in any and all wage orders issued heretofore for other industries in Puerto Rico to the extent that such definitions include products or operations covered by the definition of this industry.

(b) The separable divisions of the industries defined in paragraph (a) (1) of this section, to which this part shall apply are hereby defined as follows:

(1) *Fabricated wire products, steel spring, and slide fastener division.* This division consists of the drawing of wire and rod and the fabrication of wire and rod products including, but without limitation, nails, brads, spikes, staples, chain, fencing, bare wire rope and cable, barbed wire, bale ties, and garment hangers; the manufacture of steel springs; and the manufacture of slide fasteners.

(2) *General division.* This division consists of all products and activities included in the metal, machinery, transportation equipment, and allied industries, except products and activities included in the fabricated wire products, steel spring, and slide fastener division, as defined in this part.

The wage order above shall become effective June 27, 1955.

Signed at Washington, D. C., this 20th day of May 1955.

STUART ROTHMAN,
Solicitor of Labor.

NOTICES

DEPARTMENT OF LABOR

Wage and Hour Division

LEARNER EMPLOYMENT CERTIFICATES

ISSUANCE TO VARIOUS INDUSTRIES

Notice is hereby given that pursuant to section 14 of the Fair Labor Standards Act of 1938, as amended (52 Stat. 1068, as amended; 29 U. S. C. 214) and Part 522 of the regulations issued thereunder (29 CFR Part 522), special certificates authorizing the employment of learners at hourly wage rates lower than the minimum wage rates applicable under section 6 of the act have been issued to the firms listed below. The employment of learners under these certificates is limited to the terms and conditions therein contained and is subject to the provisions of Part 522. The effective and expiration dates, occupations, wage rates, number or proportion of learners and learning periods for certificates issued under general learner regulations (§§ 522.1 to 522.12) are as indicated below; conditions provided in certificates issued under special industry regulations are as established in these regulations.

Apparel Industry Learner Regulations (29 CFR 522.20 to 522.24, as amended April 19, 1955, 20 F. R. 2304).

Better Maid Apparel Co., 707 River St., Peckville, Pa., effective 5-16-55 to 5-15-56, 5 learners for normal labor turnover purposes (ladies' dresses).

Brookfield Manufacturing Co., Warrensburg, Mo., effective 5-11-55 to 5-10-56, 10 learners for normal labor turnover purposes (men's work clothing).

Decatur Shirt Corp., Decatur, Miss., effective 5-16-55 to 11-15-55, 25 learners for plant expansion purposes (boys' sport shirts).

Frackville Manufacturing Co., Broad Mountain Avenue, Frackville, Pa., effective 5-28-55 to 5-27-56, 10 percent of the total number of factory production workers for normal labor turnover purposes (men's and boys' pajamas, etc.).

Fuhrman-Levitt, Inc., 39 Woodland Avenue, Pitman, N. J., effective 5-24-55 to 5-23-56, 4 learners for normal labor turnover purposes (children's cotton dresses).

Indiana Rayon Corp., Greenfield, Ind., effective 5-22-55 to 5-21-56, 10 percent of the total number of factory production workers for normal labor turnover purposes (knitted polo shirts).

Miller Manufacturing Co., Inc., Tenth and Virginia Streets, Joplin, Mo., effective 5-13-55 to 5-12-56, 10 percent of the total number of factory production workers for normal labor turnover (men's and boys' clothing).

Mitchell Garment Co., Inc., 119 West Third Street, Farmville, Va., effective 5-16-55 to 5-15-56, 5 learners for normal labor turnover purposes (children's dresses).

Mode-O'Day Corp., No. 2 Plant, 146 Southwest Temple, Salt Lake City, Utah, effective 5-22-55 to 5-21-56, 10 percent of the total number of factory production workers for normal labor turnover purposes (dresses).

The Newton Co., Newton, Miss., effective 5-9-55 to 5-8-56, 10 percent of the total number of factory production workers engaged in the production of men's slacks, for normal labor turnover purposes (men's slacks).

The Newton Co., Newton, Miss., effective 5-9-55 to 5-8-56, 10 percent of the total number of factory production workers engaged in the production of ladies' slacks, for normal labor turnover purposes (ladies' slacks).

Star Union Co., of Tenn., Manchester, Tenn., effective 5-16-55 to 5-15-56, 10 percent of the total number of factory production workers for normal labor turnover purposes (men's and boys' pajamas).

United Garment Manufacturing Co., 316 West Lake Street, Chisholm, Minn., effective 5-18-55 to 5-17-56, 10 learners for normal labor turnover purposes (outerwear).

Each certificate has been issued upon the employer's representation that employment of learners at subminimum rates is necessary in order to prevent curtailment of opportunities for employment, and that experienced workers for the learner occupations are not available. The certificates may be canceled in the manner provided in the regulations and as indicated in the certificates. Any person aggrieved by the issuance of any of these certificates may seek a review or reconsideration thereof within fifteen days after publication of this notice in the FEDERAL REGISTER pursuant to the provisions of Part 522.

Signed at Washington, D. C., this 16th day of May 1955.

MILTON BROOKE,
Authorized Representative of the Administrator.

CIVIL AERONAUTICS BOARD

[Docket No. 3051 et al.]

NEW YORK-FLORIDA PROCEEDING

NOTICE OF HEARING

In the matter of the proceeding known as the New York-Florida Proceeding.

Notice is hereby given, pursuant to the Civil Aeronautics Act of 1938, as amended, particularly sections 205 (a) and 1001 of that act, that a hearing in the above-entitled proceeding is assigned to be held on June 6, 1955, at 10:00 a. m., e. d. s. t., in the Burgundy Room of the Sheraton-Park Hotel, Connecticut Avenue and Woodley Road NW., Washington, D. C., before Examiner Thomas L. Wrenn.

Notice is further given that any person not a party to the proceeding desiring to be heard in opposition to the matters set forth in the case must file with the Board on or before June 6, 1955, a statement setting forth issues of fact or law which he desires to contest. Any person filing such a statement may appear and participate at the hearing in accordance with 14 CFR 302.14 of the Procedural Regulations under Title IV of the Civil Aeronautics Act, as amended.

For further details of the proceeding and issues involved, interested persons are referred to the applications consolidated in the proceeding by Order Nos. E-8882 and E-9011 and to the reports of the prehearing conference in the case on file with the Civil Aeronautics Board.

Dated at Washington, D. C., May 19, 1955.

FEDERAL POWER COMMISSION

[Docket Nos. G-2063, G-2399, G-2409, G-2458, G-2465, G-2491, G-4259, G-4261]

NORTHERN NATURAL GAS CO. AND NORTH CENTRAL PUBLIC SERVICE CO.

NOTICE OF PETITION; DENIAL OF MOTION TO DISMISS; ORDER CONSOLIDATING PROCEEDINGS AND FIXING DATE OF HEARING

In the matters of Northern Natural Gas Company, Docket Nos. G-2063, G-2399, G-2409, G-2458, G-2465, G-2491, G-4259, G-4260, G-4261; North Central Public Service Co., Docket No. G-8654.

Notice is hereby given that North Central Public Service Co. (North Central), successor to Perry Gas Company and Key City Gas Company, filed on March 21, 1955, a petition entitled "Petition for Emergency Relief", in which it alleges, among other things:

(1) Pursuant to the Company's request in Docket No. G-2063, it was allocated 10,000 Mcf of natural gas per day from Northern Natural Gas Company's system to meet estimated requirements for Dubuque, Iowa, and thereafter on April 15, 1954, it entered into a service agreement with Northern for a contract demand of 10,000 Mcf per day, beginning October 27, 1954.

(2) The requirements for Dubuque, Iowa, were overstated by 5,000 Mcf per day, due to the inability of Northern Central to connect and sell natural gas to all of the anticipated customers,

(3) If North Central is not relieved of its obligation to the extent of 5,000 Mcf per day, grave financial difficulties will occur, which will impair its ability to render service.

(4) Northern Natural Gas Company has refused to relieve North Central from its obligation by reducing the contract amount, even though other customer companies of Northern desire additional volumes of gas.

On April 20, 1955, Northern Natural Gas Company filed an answer to the above petition of North Central Public Service Co. that the request of North Central be denied and that the petition be consolidated for hearing with the presently pending matters in the consolidated Docket Nos. G-2399, et al., as such consolidation will expedite determination of the issues.

On April 4, 1955, Northern Natural Gas Company filed a motion to reconvene the hearing in the above Docket Nos. G-2063, et al., in which it alleges:

The public interest would be best served by a reconvening of these consolidated proceedings for the purpose of receiving testimony and evidence bearing upon the following issues: (1) What is the economic and proper construction program to be undertaken by Northern in 1955 to satisfy the needs of gas consumers; (2) how should such increased daily system sales capacity of Northern be allocated among the many claimants therefor; (3) what does the present or future public convenience and necessity require as to construction of additional facilities by Northern and the sale of its increased system salable capacity.

On April 14, 1955, Intervenors, National Coal Association, United Mine Workers of America, Fuels Research Council, Inc., Western States Fuel Policy Council, Anthracite Institute, and Chesapeake and Ohio Railway Company, filed an answer to the request for reconvening the hearing and a motion to again dismiss Northern's applications in Dockets Nos. G-2399 et al.

Certain other Intervenors filed answers objecting to and in support of Northern's motion to reconvene the hearings, and also in reply to the motion to dismiss by National Coal Association, et al.

The Commission finds:

(1) It is appropriate and in the public interest that the motion to dismiss be denied and the proceedings on the above applications as filed by Northern be concluded, and to this end Northern and other parties should be permitted to introduce such further evidence relating to the applications as they may determine advisable.

(2) The petition by North Central Public Service Co. in Docket No. G-8654 is so interrelated and dependent upon the above applications filed by Northern that consolidation for hearing therewith is necessary.

(3) If Northern desires to restrict its requests for authorization as set forth in the above applications, all parties should be so advised.

The Commission orders:

(A) The aforesaid motion to dismiss and other objections to reconvening the above entitled hearings be and they are hereby denied.

(B) That Northern Natural Gas Company shall file, at least ten days prior to the date herein fixed for hearing, a plan for disposition of all volumes of natural gas available for allocation.

(C) The above entitled proceeding in Docket No. G-8654 be and it hereby is consolidated for a hearing with Docket Nos. G-2063, G-2399, G-2409, G-2458, G-2465, G-2491, G-4259, G-4260, and G-4261.

(D) Pursuant to authority contained in and subject to the jurisdiction conferred upon the Federal Power Commission by sections 7 and 15 of the Natural Gas Act and the Commission's rules of practice and procedure, a hearing be held on June 6, 1955, commencing at 10:00 a. m., e. d. s. t., in a Hearing Room of the Federal Power Commission, 441 G Street NW., Washington 25, D. C., concerning the matters involved and the issues presented by the above-entitled proceedings.

(E) Interested State commissions may participate as provided by §§ 1.8 and 1.37 (f) (18 CFR 1.8 and 1.37 (f)) of the Commission's rules of practice and procedure.

Adopted: May 18, 1955.

Issued: May 19, 1955.

By the Commission.

[SEAL] LEON M. FUQUAY,
Secretary.

[F. R. Doc. 55-4216; Filed, May 24, 1955; 8:46 a. m.]

[Docket Nos. G-3505, G-8756]

PHILLIPS PETROLEUM CO.

NOTICE OF APPLICATIONS AND DATE OF HEARING

MAY 19, 1955.

Take notice that Phillips Petroleum Company (Phillips), an independent producer with its principal place of business in Bartlesville, Oklahoma, filed, on September 27, 1954, an application in Docket No. G-3505 for a certificate of public convenience and necessity pursuant to section 7 (c) of the Natural Gas Act, authorizing the acts or operations hereinafter described.

Applicant sells natural gas produced by two wells located in the Panhandle Field, Moore County, Texas, to Skelly Oil Company (Skelly) at a price of approximately 3.5 cents per Mcf under a contract dated November 14, 1947, as amended. Annual deliveries total approximately 132,000 Mcf. Such gas is resold by Skelly to Panhandle Eastern Pipeline Company.

Take notice that Phillips filed, on April 12, 1955, an application in Docket No. G-8756 for permission and approval pursuant to section 7 (b) of the Natural Gas Act to abandon the above-described service rendered Skelly, or, alternatively, a declaratory order that such authorization is not required. Phillips proposes to deliver and sell such natural gas to El Paso Natural Gas Company (El Paso) under the terms of a contract dated October 13, 1945, as amended (Phillips' FPC Gas Rate Schedule No. 32), at a price of 9.3 cents per Mcf. Phillips states that the acreage from which the gas involved is produced is part of the acreage subject to preferential purchase by El Paso under said contract, and that the gas was sold to Skelly on a short-term basis because it was then uneconomical for Phillips to transport such gas. Skelly has agreed to the proposed termination of service.

By order issued March 11, 1955, Phillips' notice of termination of its rate schedule covering the above-described sale to Skelly (No. 222) was rejected for lack of prior Commission approval pursuant to the provisions of section 7 (b) of the act.

Take further notice that, pursuant to the authority contained in and subject to the jurisdiction conferred upon the Federal Power Commission by sections 7 and 15 of the Natural Gas Act, and the Commission's rules of practice and procedure, a hearing will be held on June 14, 1955, at 9:30 a. m., e. d. s. t., in a Hearing Room of the Federal Power Commission, 441 G Street NW., Washington, D. C., concerning the matters involved and the issues presented by such applications: *Provided, however,* That the Commission may, after a noncontested hearing, dispose of the proceeding pursuant to the provisions of § 1.30 (c) (1) or (2) of the Commission's rules of practice and procedure. Failure of any party to appear at and participate in the hearing shall be construed as waiver of and concurrence in omission herein of the intermediate decision procedure in cases where a request therefor is made.

Protests or petitions to intervene may be filed with the Federal Power Commission, Washington, D. C., in accordance with the rules of practice and procedure (18 CFR 1.8 or 1.10) on or before the 9th day of June 1955. The application is on file with the Commission for public inspection.

[SEAL] LEON M. FUQUAY,
Secretary.

[F. R. Doc. 55-4213; Filed, May 24, 1955; 8:46 a. m.]

[Docket No. G-6960]

F. WILLIAM CARR ET AL.

NOTICE OF APPLICATION AND DATE OF HEARING

MAY 19, 1955.

Take notice that F. William Carr et al. (Applicant), individuals whose address is Corpus Christi, Texas, filed on November 30, 1954, an application for a certificate of public convenience and necessity pursuant to section 7 of the Natural Gas Act, authorizing Applicant to render service as hereinafter described, subject to the jurisdiction of the Commission, all as more fully represented in the application which is on file with the Commission and open for public inspection.

Applicant proposes to sell 500 Mcf per day of natural gas produced from the Weesatche Field, Goliad County, Texas, to United Gas Pipe Line Company at 6.5¢ per Mcf for transportation in interstate commerce for resale.

This matter is one that should be disposed of as promptly as possible under the applicable rules and regulations, and to that end:

Take further notice that, pursuant to the authority contained in and subject to the jurisdiction conferred upon the Federal Power Commission by sections 7 and 15 of the Natural Gas Act, and the Commission's rules of practice and procedure, a hearing will be held on June 14, 1955, at 11:00 a. m., e. d. s. t., in a Hearing Room of the Federal Power Commission, 441 G Street NW., Washington, D. C., concerning the matters involved in and the issues presented by such application: *Provided, however,* That the Commission may, after a noncontested hearing, dispose of the proceeding pursuant to the provisions of § 1.32 (b) of the Commission's rules of practice and procedure.

Protests or petitions to intervene may be filed with the Federal Power Commission, Washington 25, D. C., in accordance with the rules of practice and procedure (18 CFR 1.8 or 1.10) on or before June 7, 1955.

[SEAL] LEON M. FUQUAY,
Secretary.

[F. R. Doc. 55-4214; Filed, May 24, 1955; 8:46 a. m.]

[Docket Nos. G-8695—G-8697, G-8919]

STANOLIND OIL AND GAS CO. ET AL.

ORDER FOR HEARING, CONSOLIDATING PROCEEDINGS, AND DENYING APPLICATIONS TO VACATE OR MODIFY SUSPENSIONS

In the matters of Stanolind Oil and Gas Company (Operator) et al., Docket No. G-8697; Phillips Petroleum Company, Docket No. G-8695; Continental Oil Company, Docket No. G-8696; Gulf Oil Corporation, Docket No. G-8919.

On April 1, 1955, the Commission issued orders suspending proposed changes in rate filings made by Stanolind Oil and Gas Company (Operator) et al., (Stanolind) in Docket No. G-8697, Phillips Petroleum Company (Phillips) in Docket No. G-8695, and Continental Oil Company (Continental) in Docket No. G-8696, all related to sales of natural gas made in interstate commerce by the foregoing companies to Mississippi River Fuel Corporation in the Woodlawn Field, Harrison County, Texas.

On February 4, 1955, Gulf Oil Corporation (Gulf) filed its Notice of Change in Rate Schedule, designated as Supplement No. 5 to Gulf's FPC Gas Rate Schedule No. 22, pertaining to sales of natural gas in interstate commerce to Mississippi River Fuel Corporation in the Woodlawn Field, Harrison County, Texas, which sales are related to or are made simultaneously with the same sales made by Stanolind, Phillips, and Continental to Mississippi River Fuel Corporation. By letter dated April 6, 1955, Gulf was notified that Supplement No. 5 to its FPC Gas Rate Schedule No. 22 would be permitted to become effective.

On May 19, 1955, the Commission issued its Order of Investigation into the lawfulness and reasonableness of the rates, charges and classifications of or pertaining to Supplement No. 5 to Gulf's FPC Gas Rate Schedule No. 22, in Docket No. G–8919.

On April 29, 1955, Continental filed in Docket No. G–8696 its Application for Rehearing and Reconsideration of the aforesaid Order Suspending Proposed Changes in Rates, and on May 2, 1955, Stanolind filed in Docket No. G–8697 an Application to Vacate or Modify the aforesaid Order Suspending Change in Rate Schedule.

The Commission finds:

(1) It is proper and in the public interest that the proceedings in Docket Nos. G–8695, G–8696, G–8697, and G–8919 should be consolidated for hearing.

(2) Upon consideration of the Orders of Suspension of Changes in Rate Schedules in the Stanolind proceeding, Docket No. G–8697, and the Continental proceeding, Docket No. G–8696, the applications to vacate or modify the said Orders of Suspension, or in the alternative for a rehearing, set forth no new facts and no principles of law which either were not fully considered by the Commission when it adopted said orders, or which having now been considered warrant any change in, or modification of said suspension orders.

The Commission orders:

(A) The proceedings in Docket Nos. G–8695, G–8696, G–8697, and G–8919 be and they hereby are consolidated for purposes of hearing.

(B) Pursuant to the authority contained in and subject to the authority conferred upon the Federal Power Commission by the Natural Gas Act, including particularly sections 4, 5, 14, 15, and 16, a public hearing be held, commencing June 15, 1955, at 10:00 a. m., e. d. s. t., in a Hearing Room of the Federal Power Commission, 441 G Street NW., Washington, D. C., concerning the matters involved and the issues presented in these proceedings.

(C) The application filed by Stanolind in Docket No. G–8697 to vacate or modify Suspension Order, or in the alternative for a Rehearing, and the application filed by Continental in Docket No. G–8696 for Rehearing and Reconsideration of the Order Suspending Proposed Changes in Rates be and the same are hereby denied.

(D) Interested State commissions may participate as provided by §§ 1.8 and 1.37 (f) (18 CFR 1.8 and 1.37 (f)) of the Commission's rules of practice and procedure.

Adopted: May 18, 1955.

Issued: May 19, 1955.

By the Commission.[1]

[SEAL] LEON M. FUQUAY, *Secretary.*

[F. R. Doc. 55–4217; Filed, May 24, 1955; 8:46 a. m.]

[1] Commissioner Digby dissenting.

[Docket No. G–8718]

TEXAS CO.

NOTICE OF APPLICATION AND DATE OF HEARING

MAY 19, 1955.

Take notice that The Texas Company (Applicant), a Delaware corporation whose address is Houston, Texas, filed an application on April 4, 1955, for a certificate of public convenience and necessity, pursuant to section 7 of the Natural Gas Act, authorizing Applicant to render service as hereinafter described, subject to the jurisdiction of the Commission, all as more fully represented in the application which is on file with the Commission and open for public inspection.

Applicant proposes to produce natural gas from the Magnolia City Field, Jim Wells County, Texas, and sell the gas to Tennessee Gas Transmission Company, which will transport and resell the gas in interstate commerce. Delivery will be made at Tennessee Gas Transmission Company's lateral line serving the Magnolia City Field. The proposed deliveries are estimated at approximately 14,290 Mcf per month at 14.65 psia. The initial price is stated at 12.12268 cents per Mcf.

This matter is one that should be disposed of as promptly as possible under the applicable rules and regulations and to that end:

Take further notice that, pursuant to the authority contained in and subject to the jurisdiction conferred upon the Federal Power Commission by sections 7 and 15 of the Natural Gas Act, and the Commission's rules of practice and procedure, a hearing will be held on June 17, 1955, at 9:40 a. m., e. d. s. t., in a Hearing Room of the Federal Power Commission, 441 G Street NW., Washington, D. C., concerning the matters involved in and the issues presented by such application: *Provided, however,* That the Commission may, after a noncontested hearing, dispose of the proceedings pursuant to the provisions of § 1.30 (c) (1) or (2) of the Commission's rules of practice and procedure.

Protests or petitions to intervene may be filed with the Federal Power Commission, Washington 25, D. C., in accordance with the rules of practice and procedure (18 CFR 1.8 or 1.10) on or before June 9, 1955. Failure of any party to appear at and participate in the hearing shall be construed as waiver of and concurrence in omission herein of the intermediate decision procedure in cases where a request therefor is made.

[SEAL] LEON M. FUQUAY, *Secretary.*

[F. R. Doc. 55–4215; Filed, May 24, 1955; 8:46 a. m.]

[Docket No. G–8921]

ARKANSAS FUEL OIL CORP.

ORDER SUSPENDING PROPOSED CHANGES IN RATES

Arkansas Fuel Oil Corporation (Applicant), on April 18, 1955, tendered for filing proposed changes in presently effective rate schedules for sales subject to the jurisdiction of the Commission. The proposed changes, which constitute increased rates and charges, are contained in the following designated filing which is proposed to become effective on the date shown:

Description	Purchaser	Rate schedule designation	Effective date [1]
Notice of change, undated.....	United Gas Pipeline Co.....	Supplement No. 2 to applicant's FPC gas rate schedule No. 13.	June 1, 1955

[1] The stated effective date is the first day after expiration of the required 30 days' notice, or the effective date proposed by applicant if later.

The increased rates and charges proposed in the aforesaid filing have not been shown to be justified, and may be unjust, unreasonable, unduly discriminatory, or preferential, or otherwise unlawful.

The Commission finds: It is necessary and proper in the public interest and to aid in the enforcement of the provisions of the Natural Gas Act that the Commission enter upon a hearing concerning the lawfulness of the said proposed changes, and that the above-designated supplement be suspended and the use thereof deferred as hereinafter ordered.

The Commission orders:

(A) Pursuant to the authority contained in sections 4 and 15 of the Natural Gas Act and the Commission's general rules and regulations (18 CFR Chapter I), a public hearing be held upon a date to be fixed by notice from the Secretary concerning the lawfulness of said proposed changes in rates and charges; and, pending such hearing and decision thereon, the above-designated supplement be and the same hereby is suspended and the use thereof deferred until November 1, 1955, and until such further time as it is made effective in the manner prescribed by the Natural Gas Act.

(B) Interested State commissions may participate as provided by §§ 1.8 and 1.37 (f) (18 CFR 1.8 and 1.37 (f)) of the Commission's rules of practice and procedure.

Adopted: May 18, 1955.

Issued: May 19, 1955.

By the Commission.[1]

[SEAL] LEON M. FUQUAY, *Secretary.*

[1] Commissioners Smith and Digby dissenting.

[Docket No. G–8919]

GULF OIL CORP.

ORDER INSTITUTING INVESTIGATION

Gulf Oil Corporation (Gulf) is an independent producer of natural gas and as such, among other operations, is an owner of partial interests in gas well operations in an unitized area of the Woodlawn Field, Harrison County, Texas.

On February 4, 1955, Gulf filed with the Federal Power Commission a proposed Change in Rate Schedule, designated as Supplement No. 5 to Gulf's FPC Gas Rate Schedule No. 22, applicable to sales made by Gulf to Mississippi River Fuel Corporation, St. Louis, Missouri, and proposed to be and which became effective April 3, 1955.

On the basis of data available to the Commission, the rates, charges, services or classifications for or in connection with such sales of natural gas subject to the jurisdiction of the Commission, as described in Supplement No. 5 to Gulf's FPC Gas Rate Schedule No. 22, may be unjust, unreasonable, unduly discriminatory or preferential.

The Commission finds: It is necessary and proper in the public interest, and to aid in the enforcement of the provisions of the Natural Gas Act, that an investigation be instituted by the Commission into and concerning any rate, charge, service or classification demanded, observed, charged or collected by Gulf Oil Corporation for or in connection with the sale of natural gas by Gulf to Mississippi River Fuel Corporation in accordance with Supplement No. 5 to Gulf's FPC Gas Rate Schedule No. 22.

The Commission orders:

(A) Pursuant to the authority contained in and subject to its authority conferred upon the Federal Power Commission by the Natural Gas Act, including particularly sections 4, 5, 14, 15, and 16, an investigation be and it hereby is instituted for the purpose of enabling the Commission to determine whether any rate, charge, service, or classification demanded, observed, charged, or collected by Gulf Oil Corporation for or in connection with the sale of natural gas subject to the jurisdiction of the Commission in accordance with Supplement No. 5 to Gulf's FPC Gas Rate Schedule No. 22, or any related rule, regulation, practice or contract affecting such rate, charge, service or classification, is unjust, unreasonable, unduly discriminatory or preferential.

(B) If, after hearing, it shall find that any such rates, charges, services, classifications, rules, regulations, practices or contracts related to Supplement No. 5 to Gulf's FPC Gas Rate Schedule No. 22 are unjust, unreasonable, unduly discriminatory or preferential, to determine and fix by appropriate order or orders, just, reasonable, non-discriminatory or non-preferential rates, charges, services, classifications, rules regulations, practices or contracts to be thereafter observed and in force.

(C) Interested State commissions may participate as provided by §§ 1.8 and 1.37 (f) (18 CFR 1.8 and 1.37 (f)) of the Commission's rules of practice and procedure.

Adopted: May 18, 1955.

Issued: May 19, 1955.

By the Commission.[1]

[Docket No. G–8925]

HUMBLE OIL & REFINING CO.

ORDER SUSPENDING PROPOSED CHANGES IN RATES

Humble Oil & Refining Company (Applicant), on April 21, 1955, tendered for filing proposed changes in presently effective rate schedules for sales subject to the jurisdiction of the Commission. The proposed changes, which constitute increased rates and charges, are contained in the following designated filing which is proposed to become effective on the date shown:

Description	Purchaser	Rate schedule designation	Effective date [1]
Notice of change, dated Apr. 20, 1955.	United Gas Pipe Line Co....	Supplement No. 2 to applicant's FPC gas rate schedule No. 35.	June 1, 1955

[1] The stated effective date is the first day after expiration of the required 30 days' notice, or the effective date proposed by applicant if later.

The increased rates and charges proposed in the aforesaid filing have not been shown to be justified, and may be unjust, unreasonable, unduly discriminatory, or preferential, or otherwise unlawful.

The Commission finds: It is necessary and proper in the public interest and to aid in the enforcement of the provisions of the Natural Gas Act that the Commission enter upon a hearing concerning the lawfulness of the said proposed changes, and that the above-designated supplement be suspended and the use thereof deferred as hereinafter ordered.

The Commission orders:

(A) Pursuant to the authority contained in sections 4 and 15 of the Natural Gas Act and the Commission's general rules and regulations (18 CFR Chapter I), a public hearing be held upon a date to be fixed by notice from the Secretary concerning the lawfulness of said proposed changes in rates and charges; and, pending such hearing and decision thereon, the above-designated supplement be and the same hereby is suspended and the use thereof deferred until November 1, 1955, and until such further time as it is made effective in the manner prescribed by the Natural Gas Act.

(B) Interested State commissions may participate as provided by §§ 1.8 and 1.37 (f) (18 CFR 1.8 and 1.37 (f)) of the Commission's rules of practice and procedure.

Adopted: May 18, 1955.

Issued: May 19, 1955.

By the Commission.[2]

INTERSTATE COMMERCE COMMISSION

FOURTH SECTION APPLICATIONS FOR RELIEF

MAY 20, 1955.

Protests to the granting of an application must be prepared in accordance with Rule 40 of the general rules of practice (49 CFR 1.40) and filed within 15 days from the date of publication of this notice in the FEDERAL REGISTER.

LONG-AND-SHORT HAUL

FSA No. 30644: Fertilizer and fertilizer materials—Canada to Western points. Filed by W. J. Prueter, Agent, for interested rail carriers. Rates on fertilizer and fertilizer materials, carloads, from Calgary and Ft. Saskatchewan, Alta., Kimberley and Warfield, B. C., Canada to points in Colorado, Illinois, Iowa, Kansas, Michigan (upper peninsula), Missouri, Nebraska, North Dakota, South Dakota, Wisconsin and Wyoming.

Grounds for relief: Short-line distance formula, market competition, and circuity.

Tariffs: Canadian National Railway tariff I. C. C. No. W. 672; Canadian Pacific Railway Company tariff I. C. C. No. W. 1045.

FSA No. 30645: Iron and steel articles—Gadsden, Ala., to Ohio River crossings. Filed by J. G. Kerr, Agent, for interested rail carriers. Rates on iron and steel articles, carloads, from Gadsden, Ala., and grouped origins to Cairo and Metropolis, Ill., Evansville, Ind., Louisville and Paducah, Ky.

Grounds for relief: Short-line distance formula and circuity.

Tariff: Supplement 105 to Agent Spaninger's I. C. C. 1258.

FSA No. 30646: Fertilizers from, to, and between points in the southwest. Filed by F. C. Kratzmeir, Agent, for interested rail carriers. Rates on fertilizer and fertilizer materials, carloads, from, to, and between points in southwestern

and western trunk-line territories as described in the application.

Grounds for relief: Short-line distance formula and circuity.

Tariff: Supplement 64 to Agent Kratzmeir's I. C. C. 4112, and one other tariff.

FSA No. 30647: Pressure pipe— Birmingham, Ala., to Louisiana. Filed by J. G. Kerr, Agent, for interested rail carriers. Rates on cast iron pressure pipe, fittings and related articles, carloads, from Birmingham, Ala., and grouped origins to Shreveport, La., and other specified Louisiana points intermediate to Shreveport.

Grounds for relief: Circuitous routes.

Tariff: Supplement 42 to Agent Spaninger's I. C. C. 1374.

FSA No. 30648: Alcohol and related articles—Southwest to Official and Illinois Territories. Filed by F. C. Kratzmeir, Agent, for interested rail carriers. Rates on industrial alcohols, and related articles, carloads, also kindred alcohols, carloads, from points in southwestern territory as defined to points in official and Illinois territories as described in the application.

Grounds for relief: Short-line distance formula and circuity.

Tariff: Supplement 9 to Agent Kratzmeir's I. C. C. 4129.

FSA No. 30649: Ingot molds—Neville Island, Pa., to Alabama City, Ala. Filed by C. W. Boin, Agent, for interested rail carriers. Rates on ingot molds, ingot molds stools, and bottom plates (sprue plates), carloads, from Neville Island, Pa., to Alabama City, Ala.

Grounds for relief: Barge-rail competition.

Tariff: Supplement 75 to Agent Boin's I. C. C. A–968.

FSA No. 30650: Motor rail rates—St. Louis-San Francisco Railway. Filed by Middlewest Motor Freight Bureau, for the St. Louis-San Francisco Railway Company, Frisco Transportation Company and other interested motor carriers. Rates on various commodities, truck loads and less-truck loads, loaded on railroad flat cars, between St. Louis, Mo., and Tulsa, Okla.

Grounds for relief: Competition with other motor carriers.

Tariff: Supplement 23 to Middlewest Motor Freight Bureau tariff MF–I. C. C. No. 223.

FSA No. 30651: Motor-rail rates—Chicago Great Western Railway. Filed by Middlewest Motor Freight Bureau, for the Chicago Great Western Railway Company, the Raymond Motor Transportation, Inc., and other interested motor carriers. Rates on commodities, various, truck loads and less-than-truck loads on highway trailers loaded on railroad flat cars, between Chicago, Ill., and St. Paul, Minn.

Grounds for relief: Motor carrier competition.

Tariff: Supplement 23 to Middlewest Motor Freight Bureau tariff, MF–I. C. C. No. 223.

FSA No. 30652: Motor-rail rates—Missouri-Kansas-Texas Railroad. Filed by Middlewest Motor Freight Bureau, Agent, for Missouri-Kansas-Texas Railroad Company, Be-Mac Transport Company, Inc., and other interested motor carriers. Rates on commodities, various, truck loads and less-than-truck loads, in highway truck or trailers loaded on railroad flat cars, between (a) St. Louis, Mo., and Oklahoma City, Okla., and (b) between Kansas City, Kans., and Oklahoma City and Tulsa, Okla.

Grounds for relief: Motor carrier competition.

Tariff: Supplement 23 to Middlewest Motor Freight, tariff MF–I. C. C. No. 223.

FSA No. 30653: Iron and steel articles to Genoa, Tex. Filed by F. C. Kratzmeir, Agent, for interested rail carriers. Rates on iron and steel articles, carloads, from various interstate origins in the United States to Genoa, Tex.

Grounds for relief: Maintenance of destination rate relations with Galveston, Tex.

Tariffs: Supplement 185 to Agent Kratzmeirs I. C. C. 3443; Supplement 59 to Agent Kratzmeir's I. C. C. 4115.

By the Commission.

[Notice 61]

MOTOR CARRIER APPLICATIONS

MAY 20, 1955.

Protests, consisting of an original and two copies, to the granting of an application must be filed with the Commission within 30 days from the date of publication of this notice in the FEDERAL REGISTER and a copy of such protest served on the applicant. Each protest must clearly state the name and street number, city and state address of each protestant on behalf of whom the protest is filed (49 CFR 1.240 and 1.241). Failure to seasonably file a protest will be construed as a waiver of opposition and participation in the proceeding unless an oral hearing is held. In addition to other requirements of Rule 40 of the general rules of practice of the Commission (49 CFR 1.40), protests shall include a request for a public hearing, if one is desired, and shall specify with particularity the facts, matters and things, relied upon, but shall not include issues or allegations phrased generally. Protests containing general allegations may be rejected. Requests for an oral hearing must be supported by an explanation as to why the evidence cannot be submitted in the forms of affidavits. Any interested person, not a protestant, desiring to receive notice of the time and place of any hearing, prehearing conference, taking of depositions, or other proceedings shall notify the Commission by letter or telegram within 30 days from the date of publication of this notice in the FEDERAL REGISTER.

Except when circumstances require immediate action, an application for approval, under section 210a (b) of the act, of the temporary operation of motor carrier properties sought to be acquired in an application under section 5 (a) will not be disposed of sooner than 10 days from the date of publication of this notice in the FEDERAL REGISTER. If a protest is received prior to action being taken, it will be considered.

APPLICATIONS OF MOTOR CARRIERS OF PROPERTY

No. MC 200 Sub 178, filed March 14, 1955, amended May 9, 1955, published in the April 20, 1955 issue, page 2634, RISS & COMPANY, INC., Riss building, 15 West 10th Street, Kansas City, Mo. Applicant's representative: M. W. Van Cleave (same address as applicant). For authority to operate as a *common carrier*, over a regular route, transporting: *General commodities, including commodities of unusual value, Class A and B explosives, household goods as defined by the Commission, commodities in bulk, and those requiring special equipment*, but excluding livestock, between Pueblo, Colo., and Kit Carson, Colo., from Pueblo over Colorado Highway 96 to junction U. S. Highway 287, thence over U. S. Highway 287 to Kit Carson, and return over the same route, serving the intermediate point of Pueblo Ordnance Depot, Colo. Applicant is authorized to conduct operations in Colorado, Connecticut, Illinois, Indiana, Iowa, Kansas, Kentucky, Maryland, Massachusetts, Michigan, Missouri, Nebraska, New Jersey, New York, Ohio, Oklahoma, Pennsylvania, Texas, Virginia, West Virgina, and the District of Columbia.

No. MC 263 Sub 75, filed May 13, 1955, GARRETT FREIGHTLINES, INC., 2055 Pole Line Road, P. O. Box 349, Pocatello, Idaho. Applicant's attorney: Maurice H. Greene, P. O. Box 1554, Boise, Idaho. For authority to operate as a *common carrier* over a regular route, transporting: *Class A and B explosives*, including *ammunition*, between the Wingate Ordnance Depot, near Gallup, N. Mex., and Cortez, Colo., from the Wingate Ordnance Depot over U. S. Highway 66 to Gallup, thence over U. S. Highway 666 to Cortez, (also from Shiprock, N. Mex., over U. S. Highway 550 to Durango, Colo., thence over U. S. Highway 160 to Cortez), and return over the same route, serving all intermediate points. Applicant is authorized to conduct operations in California, Idaho, Montana, Nevada, Oregon, Utah, and Wyoming.

No. MC 1129 Sub 4, Filed May 9, 1955, INTERSTATE FREIGHT LINES, INC., 1700 First Avenue South, Seattle, Wash. Applicant's attorney: William B. Adams, Pacific Building, Portland 4, Oreg. For authority to operate as a *common carrier*, transporting: *Class A, B and C explosives*, serving Grand Mound, Wash., as an intermediate point for the purpose of interchanging traffic with other motor carriers, in connection with carrier's regular route operations between Portland, Oreg. and Seattle Wash., over U. S. Highway 99. Applicant is authorized to conduct operations in Oregon and Washington.

No. MC 2986 Sub 16 filed March 18, 1955, INDIANAPOLIS & SOUTHERN MOTOR EXPRESS, INC., P. O. Box 491, Vincennes, Ind. Applicant's attorney: Ferdinand Born, 708 Chamber of Commerce Building, Indianapolis 4, Ind. For authority to operate as a *common carrier*, over regular and irregular routes, transporting: *General commodities*, except commodities of unusual value, Class A and B explosives, household goods as defined by the Commission, commodities in bulk, and those requiring special equipment. REGULAR ROUTES: (1) Between Loogootee, Ind., and junction U. S. Highway 50 and Indiana Highway 37, from Loogootee over U. S. Highway 50 to junction Indiana Highway 37, and return over the same route, serving all intermediate points, and off-route points in Martin County, Ind. The carrier is authorized this regular route in Certificate No. MC 2986 Sub 12, but service is authorized to and from the intermediate point of Shoals, Ind., only, therefore, duplication with present authority should be eliminated. (2) Serving all off-route points in Martin County, Ind., in connection with carrier's regular route operations between junction U. S. Highways 50 and 150 at or near Shoals, Ind., and junction U. S. Highway 150 and Indiana Highway 56 at or near Prospect, Ind., over U. S. Highway 50. IRREGULAR ROUTES: Between points in Martin County, Ind. Applicant is authorized to conduct operations in Illinois, Indiana and Ohio.

No. MC 8253 Sub 2, filed May 12, 1955, ED. WELLESTAT, INC., 2641 South Wells Street, Chicago, Ill. For authority to operate as a *common carrier*, over irregular routes, transporting: *Livestock*, other than ordinary, *attendants*, and in connection therewith, *personal* effects of attendants, *supplies* and *equipment*, used in the care and exhibition of such animals, (1) between points in Colorado, Arizona, Nevada, California, Utah, New Mexico, Idaho, Montana, Washington, Oregon, and Wyoming, and (2) between points in Colorado, Arizona, Nevada, California, Utah, New Mexico, Idaho, Montana, Washington, Oregon, and Wyoming, on the one hand, and, on the other, points in Alabama, Arkansas, Connecticut, Delaware, Florida, Georgia, Illinois, Indiana, Iowa, Kansas, Kentucky, Louisiana, Maine, Maryland, Massachusetts, Michigan, Minnesota, Mississippi, Missouri, Nebraska, New Hampshire, New Jersey, New York, North Dakota, Ohio, Oklahoma, Pennsylvania, Rhode Island, South Carolina, South Dakota, Tennessee, Texas, Vermont, Virginia, West Virginia, Wisconsin, and the District of Columbia. Applicant is authorized to conduct operations in Alabama, Arkansas, Connecticut, Delaware, Florida, Georgia, Illinois, Indiana, Iowa, Kansas, Kentucky, Louisiana, Maine, Maryland, Massachusetts, Michigan, Minnesota, Mississippi, Missouri, Nebraska, New Hampshire, New Jersey, New York, North Dakota, Ohio, Oklahoma, Pennsylvania, Rhode Island, South Carolina, South Dakota, Tennessee, Texas, Vermont, Virginia, West Virginia, Wisconsin, and the District of Columbia.

No. MC 9895 Sub 82, filed May 12, 1955, R. B. "DICK" WILSON, INC., P. O. Box 838, East 59th Ave. and Highway 6, Denver, Colo. Applicant's attorney: Marion F. Jones, Suite 526 Denham Building, Denver 2, Colo. For authority to operate as a *common carrier*, over irregular routes, transporting: *Molasses*, in bulk, in tank trucks, between points in Colorado, Wyoming, those in Nebraska on and west of U. S. Highway 183, and those in Kansas on and west of U. S. Highway 183.

No. MC 11185 Sub 88, filed May 16, 1955, J–T TRANSPORT COMPANY, INC., 6504 E. 37th St., Kansas City, Mo. Applicant's attorney: James F. Miller, 500 Board of Trade, 10th and Wyandotte, Kansas City 6, Mo. For authority to operate as a *contract carrier*, over irregular routes, transporting: *Airplane fuel tanks*, uncrated, between Beech Aircraft Corporation plant located approximately eleven (11) miles northeast of Herington, Kans. and Farmingdale, Long Island, N. Y. Applicant is authorized to conduct operations throughout the United States.

No. MC 13026 Sub 3, filed May 10, 1955, ARTHUR A. FREDA, doing business as FREDA'S TRUCKING COMPANY, 318 Talbot Avenue, Braddock, Pa. Applicant's attorney: Arthur J. Diskin, 924 Frick Bldg., Pittsburgh 19, Pa. For authority to operate as a *common carrier*, over irregular routes, transporting: *Brick, tile*, and *stone*, from points in Ohio on and east of U. S. Highway 23, to points in Allegheny, Washington, Beaver, Butler, Lawrence, Westmoreland, Armstrong, Fayette, Greene, and Indiana Counties, Pa. Applicant is authorized to conduct operations in Ohio, Pennsylvania, and West Virginia.

No. MC 18320 Sub 3, filed May 9, 1955, YORK TRANSPORTATION COMPANY, INC., 1007 E. Boundary Ave., York, Pa. For authority to operate as a *common carrier*, over regular routes, transporting: *General commodities*, except those of unusual value, Class A and B explosives, household goods as defined by the Commission, commodities in bulk, and those requiring special equipment, between York, Pa. and junction of State Highway No. 43 (Schuylkill Expressway) and U. S. Highway No. 1, from York, Pa. over U. S. Highway 30 to Paoli, Pa., thence over U. S. Highway 202 to junction Pennsylvania State Highway No. 43 (Schuylkill Expressway) and thence to its junction with U. S. Highway No. 1, and return over the same route, as an alternate or connecting route for operating convenience only, serving no intermediate points, in connection with carrier's authorized regular route between York, Pa. and New York, N. Y. Applicant is authorized to conduct operations in Pennsylvania, New Jersey, New York, and Connecticut.

No. MC 18639 Sub 6, filed May 16, 1955, EARL BUTTERWORTH, doing business as BUTTERWORTH MOTOR FREIGHT LINES, 809 1st Avenue, N., Humboldt, Iowa. Applicant's representative; William A. Landau, 1307 East Walnut Street, Des Moines 16, Iowa. For authority to operate as a *common carrier*, over irregular routes, transporting: *Malt beverages*, in containers, from LaCrosse, Wis., to Algona, Iowa, and *empty containers or other such incidental facilities* (not specified) used in transporting the commodities specified in this application on return movement. Applicant is authorized to conduct operations in Illinois, Iowa and Minnesota.

No. MC 25643 Sub 32, filed May 2, 1955, EVERTS' COMMERCIAL TRANSPORT, INC., 920 18th Place West, Eugene, Oreg. Applicant's attorney: Earle V. White, 1401 Northwest 19th Avenue, Portland 9, Oreg. For authority to operate as a *common carrier*, over irregular routes transporting: Methanol (Methyl alcohol), in bulk, in tank trucks, from points in Solano, Marin, Contra Costa, Alameda, San Francisco, San Mateo and Santa Clara Counties, Calif., to Springfield and Portland, Oreg., and Seattle, Wash.

No. MC 31378 Sub 1, filed March 31, 1955, W. C. GEISMAN, INC., 250 Freeman Street, Brooklyn 22, N. Y. Applicant's representative: William D. Traub, 60 East 42d Street, New York 17, N. Y. For authority to operate as a *common carrier*, over irregular routes, transporting: *Brick* and *hollow tile*, between points in Nassau, Suffolk, Westchester, Putnam, Rockland and Orange Counties, N. Y.; Fairfield and New Haven Counties, Conn.; and Bergen, Essex, Passaic, Hudson, Union, Middlesex, Monmouth, Morris, Sommerset, Sussex and Hunterdon Counties, N. J., restricted to shipments having a prior or a subsequent movement by rail. Applicant is authorized to conduct operations in Connecticut, New Jersey and New York.

No. MC 32474 Sub 16, filed May 12, 1955, C. A. CONKLIN TRUCK LINE, INC., 247 Pearl St., Adrian, Mich. For authority to operate as a *common carrier*, over regular routes, transporting: *Empty trailers*, between Milwaukee, Wis., and Rockford, Ill., from Milwaukee over Wisconsin Highway 15 to junction Wisconsin Highway 140, thence over Wisconsin Highway 140 to the Wisconsin-Illinois State line, thence over Illinois Highway 76, to junction Illinois Highway 173, thence over Illinois Highway 173 to Rockford, and return over the same route, serving no intermediate or off-route points, for operating convenience only in connection with applicant's regular-route operations between (1) Monroe, Wis., and Rockford, Ill., and (2) between Chicago, Ill., and Milwaukee, Wis. Applicant is authorized to conduct operations in Illinois, Michigan, Indiana, Ohio, Wisconsin, and Iowa.

No. MC 38170 Sub 10, filed May 9, 1955, WHITE STAR TRUCKING, INC., 1750 Southfield, Lincoln Park, Mich. Applicant's attorney: Wilhelmina Boersma, 2850 Penobscot Building, Detroit 26, Mich. For authority to operate as a *common carrier*, transporting: *General commodities*, except those of unusual value, Class A and B explosives, household goods as defined by the Commission, commodities in bulk, and commodities requiring special equipment, serving the Ford Motor Company, Sterling Plant, located at or near the intersection of Mound Road and 17-Mile Road, Sterling Township, Macomb County, Mich., an off-route point in connection with the carrier's regular route operations between Detroit, Mich., and Flint, Mich., over U. S. Highway 10. Applicant is authorized to conduct operations in Ohio and Michigan.

No. MC 44443 Sub 2, filed March 30, 1955, PACKAGE DELIVERY COM-

PANY, a corporation, 320 South 2d Avenue, Sioux Falls, S. Dak. Applicant's attorney: H. Lauren Lewis, Morrell Building No. 50, Post Office Box 707, Sioux Falls, S. Dak. For authority to operate as a common carrier, over irregular routes, transporting: *New furniture*, uncrated, from Sioux Falls, S. Dak., to points in that part of Minnesota on and west of U. S. Highway 71 and on and south of U. S. Highway 14, and those in that part of Iowa on and west of U. S. Highway 71 and on and north of Iowa Highway 3.

No. MC 50002 Sub 24, (amended) published on page 1594, issue of March 16, 1955. T. CLARENCE BRIDGE AND HENRY W. BRIDGE, doing business as BRIDGE BROTHERS, 610 West Elm Street, Post Office Box 588, Lamar, Colo. Applicant's attorney: C. Zimmerman, 503 Schweiter Building, Wichita, 2, Kans. For authority to operate as a *common carrier*, over irregular routes, transporting: *Liquefied chemical fertilizer*, in bulk, in tank vehicles, between points in Colorado, Kansas, Nebraska, Wyoming, that portion of Oklahoma on and north of U. S. Highway 60 and on and west of U. S. Highway 183, Pryor, Okla., and points within fifteen (15) miles thereof, and Etter, Tex., and points within five (5) miles thereof, and points in Missouri on and north of U. S. Highway 40, and on and west of Missouri Highway 23 to junction with U. S. Highway 65, and on and west of U. S. Highway 65 to the Missouri-Iowa State line.

No. MC 35211 Sub 1, filed May 9, 1955, FRANK MURPHY, 730 Richmond Terrace, New Brighton, Staten Island, N. Y., Applicant's attorney: August W. Heckman, 880 Bergen Ave., Jersey City 6, N. J. For authority to operate as a *contract carrier*, over irregular routes, transporting: (1) *Building materials*, other than cement, lumber, and brick, as listed in the application, from the facilities of the United States Gypsum Company at the Towns and Townships of Stony Point and Haverstraw (Rockland County), N. Y. (a) to points in New Hampshire, Vermont, Massachusetts, Connecticut, Rhode Island, and New Jersey; (b) Nassau, Suffolk, Westchester, Rockland, Orange, Putnam, Dutchess, Ulster, Sullivan, Columbia, Greene, Delaware, Albany, Rensselaer, Schoharie, Broome, Tioga, Chemung, Cortland, Tompkins, Chenango, Otsego, Cayuga, Onondaga, Madison, Oneida, Herkimer, Montgomery, Fulton, Schenectady, Saratoga, Washington, Warren, Hamilton, Lewis, Oswego, Jefferson, Essex, Clinton, Franklin and St. Lawrence Counties, New York, and New York, N. Y.; (c) Philadelphia, Delaware, Chester, Lebanon, Montgomery, Bucks, Lehigh, Northampton, Berks, Dauphin, Schuylkill, Northumberland, Montour, Columbia, Luzerne, Carbon, Monroe, Pike, Wayne, Lackawanna, Wyoming, Susquehanna, Bradford, Sullivan, Lycoming and Tioga Counties, Pa.; (2) *gypsum board paper*, from the facilities of the United States Gypsum Company at Clark Township (Union County), N. J., to the facilities of the United States Gypsum Company at the Towns and Townships of Stony Point and Haverstraw (Rockland County), N. Y.; (3) *lime and lime products*, (a) from the facilities of the United States Gypsum Company at Falls Village (Canaan Township, County of Litchfield), Conn., and (b) from Farnams (Berkshire County), Mass., to the facilities of the United States Gypsum Company at the Towns and Townships of Stony Point and Haverstraw (Rockland Co.), N. Y.; (4) *pulpboard*, from the facilities of the United States Gypsum Company at Jersey City (Hudson Co.), N. J., to the facilities of the United States Gypsum Company at the Towns and Townships of Stony Point and Haverstraw (Rockland Co.), N. Y.; (5) *pallets* used in transporting the above-named commodities on return. Applicant is authorized to conduct operations in Connecticut, New Jersey and New York.

No. MC 59310 Sub 42, filed May 9, 1955, SPROUT & DAVIS, INC., 2500 Indianapolis Blvd., Whiting, Ind. Applicant's representative: George S. Mullins, 4704 W. Irving Park Road, Chicago 41, Ill. For authority to operate as a *contract carrier*, over irregular routes, transporting: *Petroleum* and *petroleum products*, in bulk, in tank vehicles, from East Chicago and Whiting, Ind., to points in Wisconsin, except points in Dane, Columbia, Rock, Green, Jefferson, Sheboygan, Racine, Walworth, Green Lake, Dodge, Milwaukee, Marquette, Washington, Ozaukee, Fond du Lac, Kenosha, and Waukesha Counties, Wis. Applicant is authorized to conduct operations in Illinois, Indiana, Iowa, Michigan, Missouri, and Wisconsin.

No. MC 59925 Sub 2, filed May 12, 1955, and amended May 18, 1955, JOHN PETER GARRISON, doing business as GARRISON, Branchville, N. J. Applicant's representative: Bert Collins, 140 Cedar St., New York 6, N. Y. For authority to operate as a *common carrier*, over irregular routes, transporting: *Humus*, in bulk, in bags, and loose, from points in Sussex and Warren Counties, N. J., except those within five miles of Newton, N. J., to Philadelphia, Pa., points in Wayne, Pike, Monroe, Northampton, Bucks, and Montgomery Counties, Pa., New York, N. Y., and points in Nassau, Suffolk, Orange, Westchester, Rockland, Sullivan and Ulster Counties, N. Y.

No. MC 60253 Sub 18, filed May 13, 1955, AGNES METZ, doing business as ARLINGTON TRUCK COMPANY, 940 Toronto Avenue, Toledo, Ohio. Applicant's attorney: Arthur R. Cline, 420 Security Building, Toledo 4, Ohio. For authority to operate as a *contract carrier*, over irregular routes, transporting: *Plate glass, laminated glass*, and *glass building materials* and *fittings therefor*, from Toledo, Ohio, and points within five miles thereof, to points in that part of New York west of U. S. Highway 15 (except Buffalo), and points in that part of Pennsylvania west of a line beginning at the New York-Pennsylvania State line and extending along U. S. Highway 15 to Williamsport, Pa., thence along U. S. Highway 220 to the Pennsylvania-Maryland State line, including points on the indicated portions of the highways specified, and *empty containers* and *bucks and blocking* used in connection with the transportation of the above-specified commodities, from the above-specified destination points to Toledo, Ohio, and points within five miles thereof. Applicant is authorized to conduct operations in Illinois, Indiana, Iowa, Kentucky, Michigan, New York, Ohio, Pennsylvania, West Virginia and Wisconsin.

No. MC 64110 Sub 17, Filed April 15, 1955 (Amended), GRANT J. MEAD AND ALBERT L. MEAD, doing business as MEAD TRUCK LINES, 36 Gardeau Street, Perry, N. Y. Applicant's representative: Raymond A. Richards, 13 Lapham Park, (Mailing address: P. O. Box 382), Webster, N. Y. For authority to operate as a *common carrier*, over irregular routes, transporting: *Meats, packinghouse products* and *commodities used by packing-houses*, as defined by the Commission in Ex Parte No. MC 45, *frozen meats* and *frozen foods*, from points in New York on and west of U. S. Highway 11, Albany, N. Y. and North East, Pa. to points in Alabama, Florida, Georgia, North Carolina and South Carolina, and *empty containers or other such incidental facilities* (not specified) used in transporting the commodities specified in this application, on return movement. Applicant is authorized to conduct operations in New York, Florida, Alabama and Georgia.

No. MC 65772 Sub 9, Filed May 6, 1955 (amended), EARL D. CHANEY, doing business as CHANEY TRANSPORTATION CO., 23 Howard St., Cumberland, Md. For authority to operate as a *common carrier*, over irregular routes, transporting: *Glass, materials, supplies, equipment* and *machinery* used in the manufacture of glass, between points in Allegany County, Md., on the one hand, and, on the other, points in Pennsylvania, New York, New Jersey, Delaware, Connecticut, Rhode Island, Massachusetts, Maryland and the District of Columbia.

No. MC 68807 Sub 23, Filed May 11, 1955, BENJAMIN H, HERR, doing business as HERR'S MOTOR EXPRESS, Quarryville, Pa. Applicant's representative: Bernard N. Gingerich, Quarryville, Pa. For authority to operate as a *contract carrier*, over irregular routes, transporting: *Plumbers' goods*, (1) from Ellwood City, Pa., to Zanesville, Ohio, (2) from Zanesville, Ohio, to points in Maine, New Hampshire, Vermont, Pennsylvania, Connecticut, the District of Columbia, Massachusetts, New York, (except points in the New York, N. Y., Commercial Zone as defined by the Commission), Virginia (except points in that portion on, south and west of a line beginning at the Virginia-West Virginia State line, thence extending along U. S. Highway 60 to Buena Vista, Va., thence along U. S. Highway 501 to the Virginia-North Carolina State line), Wilmington, Del., Frederick, Cumberland, Prince Frederick, Cambridge, and Rockville, Md., Paterson, Passaic, Newton, Red Bank, Freehold, Asbury Park, Egg Harbor City, and Haddon Heights, N. J., and Providence, R. I., and *empty containers or other such incidental facilities* (not specified) used in transporting the commodities specified above on return movements. Applicant is authorized to conduct operations in Connecticut, Delaware, Maryland, Massachusetts, New Jersey, New York, Pennsylvania, Rhode Island, Virginia and the District of Columbia.

NOTE: Applicant has common carrier, irregular route authority under Certificate No. MC 105461, dated August 24, 1950—section 210 may be involved.

No. MC 73756 Sub 4, filed March 25, 1955, DAVID GINSBURG, SARAH GINSBURG, SINGER, TILLIE MOORE AND MORRIS SINGER, a partnership, doing business as WASTE MOTOR HAULAGE COMPANY, South Brandywine Ave., Downingtown, Pa. Applicant's attorney: Paul F. Barnes, 801 I. B. M. Bldg., Phila., Pa. For authority to operate as a *contract carrier*, over irregular routes, transporting: *Paper board, fibre board*, and *pulp board*, from Downingtown, Pa., to points in Rhode Island, North Carolina, South Carolina, West Virginia, New York, Detroit, Mich., Cincinnati, Columbus, and Youngstown, Ohio, St. Louis, Mo., and Chicago, Ill., and *waste paper*, and *empty skids* used in the transportation of the commodities specified above on return movements. Applicant is authorized to conduct operations in Washington, D. C., Connecticut, New York, New Jersey, Delaware, Maryland, Virginia, Ohio, Massachusetts and Pennsylvania.

NOTE: Applicant is agreeable to the revocation of all duplicating authority if and when the authority herein applied for is granted.

No. MC 76032 Sub 94, filed May 4, 1955, published May 18, 1955, on page 3484, and amended May 17, 1955, NAVAJO FREIGHT LINES, INC., 381 So. Broadway, Denver, Colo. Applicant's attorney: O. Russell Jones, 54½ E. San Francisco St., Santa Fe, N. Mex. For authority to operate as a *common carrier*, over irregular routes, transporting: *General commodities*, including *Class A, B and C explosives, ammunition*, not included in Class A, B and C explosives, and *component parts* of explosives and ammunition, but excluding those of unusual value, household goods, as defined by the Commission, commodities in bulk, commodities requiring special equipment, and those injurious or contaminating to other lading, serving the site of the Jack Pyle Project of the Isbell Construction Company approximately nine miles north of Laguna, N. Mex., as an off-route point in connection with carrier's regular-route operations between Amarillo, Tex., and Los Angeles, Calif. Applicant is authorized to conduct operations in California, New Mexico, Nevada, Arizona, Colorado, Nebraska, Missouri, Iowa, and Illinois.

No. MC 76177 Sub 258, filed May 13, 1955, BAGGETT TRANSPORTATION COMPANY, a corporation, 2 South 32d Street, Birmingham, Ala. Applicant's attorney: Harold G. Hernly, 1624 Eye Street, NW., Washington, D. C. For authority to operate as a *common carrier*, serving the intermediate point of Bynum, Ala., including the Site of the Anniston Ordnance Depot located at Bynum, in connection with carrier's authorized regular route operations between Birmingham and Gadsden, Ala., transporting *General commodities*, except those of unusual value, Class A and B explosives, blasting materials, household goods as defined by the Commission, commodities in bulk, and those injurious or contaminating to other lading, operating from Birmingham over U. S. Highway 78 to Anniston, Ala., thence over U. S. Highway 241 to Gadsden (also from Anniston over Alabama Highway 11 to Piedmont, Ala., and thence over Alabama Highway 74 to Gadsden), and return over these routes. Service is authorized to and from the intermediate points of Leeds, Pell City, and Anniston, Ala., and those on Alabama Highways 11 and 74. Applicant is authorized to conduct operations in Alabama.

NOTE: Applicant states: The only purpose of instant application is to secure the right to serve Bynum (including the Anniston Ordnance Depot), Ala., as an intermediate point in connection with its authorized operations as above-described, contained in Certificate No. MC 76177 dated October 18, 1948.

No. MC 91306 Sub 5, filed May 16, 1955, JOHNSON BROTHERS TRUCKERS, INC., Box 189, Elkin, N. C. Applicant's attorney: James E. Wilson, Continental Bldg., 14th Street at K, NW., Washington 5, D. C. For authority to operate as a *common carrier*, over irregular routes, transporting: *New furniture* and *new furniture parts*, from Elkin, Ronda, and North Wilkesboro, N. C., to points in New York, New Jersey, and Delaware, those in Pennsylvania on and east of U. S. Highway No. 11, and those in Maryland and Virginia east of Chesapeake Bay beginning at Chesapeake City, Md., and continuing south along Chesapeake Bay to the Atlantic Ocean. Applicant is authorized to conduct operations in North Carolina, New Jersey, Tennessee, Delaware, Maryland, New York, Ohio, Pennsylvania, Virginia, West Virginia, and the District of Columbia.

No. MC 92983 Sub 128, filed May 16, 1955, ELDON MILLER, INC., 330 East Washington, Iowa City, Iowa. For authority to operate as a *common carrier*, over irregular routes, transporting: *Vegetable oils, vegetable oil products*, and *blends thereof*, in bulk, in tank vehicles, (1) from points in Arkansas, Illinois, Indiana, Kentucky, Michigan, Ohio, and Tennessee, to St. Louis, Mo., and (2) between St. Louis, Mo., on the one hand, and, on the other, points in Iowa, Minnesota, and Wisconsin. Applicant is authorized to conduct operations in Arkansas, Illinois, Indiana, Iowa, Kansas, Michigan, Minnesota, Missouri, Nebraska, New York, North Dakota, Ohio, Pennsylvania, South Dakota, Tennessee, Texas, and Wisconsin.

No. MC 98707 Sub 2, filed May 5, 1955, MILES MOTOR TRANSPORT SYSTEM, a corporation, P. O. Box 510, Stockton, Calif. Applicant's attorney: Bertram S. Silver, 100 Bush Street, San Francisco 4, Calif. For authority to operate as a *common carrier*, over regular and irregular routes, transporting: REGULAR ROUTES: *General commodities, including commodities in bulk*, but excluding household goods as defined by the Commission, Class A and B explosives, petroleum products in bulk, livestock, articles of extraordinary value, poultry and unprocessed agricultural commodities, and commodities requiring refrigerated equipment, (1) between Los Angeles, Calif., and Sacramento, Calif., over U. S. Highway 99, (2) between Los Angeles, Calif., and San Francisco, Calif., from Los Angeles over U. S. Highway 99 to junction California Highway 120, thence west over California Highway 120 to junction U. S. Highway 50, thence over U. S. Highway 50 to San Francisco (also from Los Angeles over U. S. Highway 99 to Sacramento, Calif., and thence west over U. S. Highway 40 to San Francisco) and return over the same route, (3) between Los Angeles, Calif., and Eureka, Calif., from Los Angeles over U. S. Highway 101 to Eureka, Calif. (also from Los Angeles over U. S. Highway 101 Alternate to Oxnard, Calif., thence over U. S. Highway 101 to San Jose, Calif., thence over U. S. Highway 101 By-Pass to San Francisco, Calif., thence over U. S. Highway 101 to Eureka), and return over the same route, serving all intermediate points, and off-route points within 25 miles of the above routes. RESTRICTIONS: (1) No shipments of iron and steel articles and tinplate having origin or destination at Pittsburg, Calif., shall be transported, (2) No shipments shall be transported having both origin and destination (a) between San Francisco, Calif., and San Jose, Calif., inclusive; (b) between San Francisco, Richmond, Albany, El Cerrito, Oakland, Emeryville, Berkeley, Alameda, San Leandro, and Hayward, Calif., and (c) between points located within ten miles of Los Angeles, Calif. (3) No shipments of less than 20,000 pounds or subject to a charge lower than applicable on 20,000 pounds shall be transported (except that between San Francisco and Eureka shipments shall be 30,000 pounds or more or bear a charge applicable to 30,000 pounds) except that in the case of empty containers applicant shall not transport any such shipment of less than 5,000 pounds or subject to a charge lower than applicable on 5,000 pounds. IRREGULAR ROUTES: *Cement*, in bulk, and in sacks, (1) from points in San Mateo, Santa Clara, Santa Cruz, San Joaquin, Alameda and Calaveras Counties, Calif., to points in Oregon and Nevada, and (2) from Gold Hill, Oreg., to points in California north of the northern boundaries of San Luis Obispo, Kern and San Bernardino Counties, Calif. If and when this application is granted the carrier should request that the second proviso filing in Docket No. MC 98707 be dismissed. Applicant is authorized to conduct operations in California under the second proviso of section 206 (a) of the Interstate Commerce Act.

No. MC 103947 Sub 28, filed May 9, 1955, TERMINAL TRANSPORT CO., a corporation, 2330 West County Road "C", St. Paul, Minn. For authority to operate as a *common carrier*, over irregular routes, transporting: *Liquid synthetic resin, surface coating resin compound*, and *ester gums*, in bulk, in tank trucks, from Minneapolis and St. Paul, Minn., to points in Illinois, Iowa, Minnesota, Missouri, and Wisconsin.

No. MC 106020 Sub 14, filed May 16, 1955, G. L. ALLEN COMPANY, a corporation, 5850 Pardee Road, Dearborn, Mich. Applicant's representative: G. H.

Dilla, 3350 Superior Ave., Cleveland 14, Ohio. For authority to operate as a *common carrier*, over irregular routes, transporting: *Pig iron, scrap, iron* and *steel*, between Detroit, Mich., and points in the Detroit, Mich. Commercial Zone as defined by the Commission, to points in Michigan, and *empty containers or other such incidental facilities* (not specified) used in transporting the commodities specified in this application, on return movement.

No. MC 107128 Sub 6, filed May 4, 1955, FAST FREIGHT, INC., 2612 W. Morris Street, Indianapolis 21, Ind. Applicant's attorney: Wilhelmina Boersma, 2850 Penobscot Building, Detroit 26, Mich. For authority to operate as a *contract carrier*, over irregular routes, transporting: *Glass containers and accessories therefor*, in cartons and knocked-down paper board boxes, *fillers* and *advertising matter*, moved in connection therewith, from points in that portion of West Virginia on and west of a line commencing at the West Virginia-Ohio State line at or near Waverly, W. Va., and extending along West Virginia Highway 2 to Parkersburg, W. Va., to points in that part of Wisconsin on and south of Wisconsin Highway 54 and on and east of Wisconsin Highway 80. Applicant is authorized to conduct operations in Illinois, Indiana, Kentucky, Missouri, Pennsylvania, West Virginia and Wisconsin.

No. MC 107403 Sub 202, filed May 10, 1955, E. BROOKE MATLACK, INC., 33d & Arch Streets, Philadelphia 4, Pa. Applicant's attorney: Paul F. Barnes, 801–804 I. B. B. Bldg., 226 South 15th Street, Philadelphia, Pa. For authority to operate as a *common carrier*, over irregular routes, transporting: *Acids, chemicals*, and *resins*, in bulk, in tank vehicles, from Bristol and Philadelphia, Pa., to points in Louisiana. Applicant is authorized to conduct operations in Alabama, Delaware, Georgia, Illinois, Indiana, Maryland, Minnesota, Missouri, New Jersey, New York, North Carolina, Ohio, Pennsylvania, South Carolina, Tennessee, Virginia, West Virginia, and the District of Columbia.

No. MC 107515 Sub 176, filed May 12, 1955, REFRIGERATED TRANSPORT CO., INC., 290 University Ave. SW., Atlanta, Ga. Applicant's attorney: Allan Watkins, Grant Bldg., Atlanta 3, Georgia. For authority to operate as a *common carrier*, over irregular routes, transporting: *Frozen foods, including frozen fruits and vegetables*, from Independence, La., to points in Alabama, Georgia, Florida, North Carolina, South Carolina, and Tennessee. S. Highway 141 to junction Wisconsin Highway 144, thence over Wisconsin Highway 144 to Wisconsin Highway 57, thence over Wisconsin Highway 57 to junction U. S. Highway 141, thence over U. S. Highway 141 to Milwaukee, Wis., thence over U. S. Highway 41, to Chicago, and *Supplies, consisting of unfabricated styrofoam, setup boxes and containers*, and *sequins*, on return.

APPLICATIONS OF MOTOR CARRIERS OF PASSENGERS

No. MC 1501 Sub 103, filed May 9, 1955, GREYHOUND CORPORATION, 2600 Board of Trade Bldg., Chicago, Ill. Applicant's attorney: Linwood C. Major, Jr., 2001 Massachusetts Avenue, NW., Washington 6, D. C. For authority to operate as a *common carrier*, over a regular route, transporting: *Passengers and their baggage*, and *express, mail*, and *newspapers*, in the same vehicle with passengers, from junction U. S. Highway 27 and Tennessee Highway 61, near Harriman, Tenn., to Rockwood, Tenn., over Tennessee Highway 61, via Emory Gap and Cardiff, Tenn., a distance of approximately eight (8) miles, and return over the same route, serving all intermediate points. Applicant is authorized to conduct operations throughout the United States.

APPLICATIONS UNDER SECTION 5 AND 210a (b)

No. MC–F–5972. Authority sought for purchase by GARDEN CITY TRANSPORTATION CO., LTD., P. O. Box 857, San Jose, Calif., of the operating rights and property of VINCENT LIPPOLIS and DAVID L. DITTO, a partnership, doing business as V. LIPPOLIS DRAYAGE CO., 330 Keyes St., San Jose, Calif., and for acquisition by JOSEPH MINARDI, VERNON CRISTINA, ROBERT A MINARDI, NATHAN MARTIN, and FRANK PETERS, San Jose, Calif., of control of the operating rights and property through the purchase. Applicants' attorney: J. Richard Townsend, 1700 Mills Tower, San Francisco, Calif. Operating rights sought to be transferred: *Canned fruits and vegetables and dried fruit, supplies used in the operation of canneries and fruit packing plants, flour, olive oil, cheese and canned food, such articles as are dealt in by retail and wholesale hardware concerns*, as a common carrier, over irregular routes, from, to and between certain points in California. Vendee is authorized to operate as a common carrier in California. Application has been filed for temporary authority under section 210a (b).

No. MC–F–5981. Authority sought for control by WEST END TRUCK SALES, INC., 300 Lunenburg St., Fitchburg, Mass., of the operating rights and property of A B & C MOTOR TRANSPORTATION CO., INC., 300 Lunenburg St., Fitchburg, Mass., and for acquisition of IAN S. MURDOCH, 145 Pinckney St., Boston, Mass., and ALVIN R. HOLMES, 306 Belmont St., Worcester, Mass., of control of the operating rights and property through the transaction. Applicants' attorney: Kenneth B. Williams, 89 State St., Boston, Mass. Operating rights sought to be controlled: *General commodities*, with certain exceptions, including household goods, as a *common carrier*, over regular routes, including routes between Fitchburg, Mass., and New York, N. Y., between Worcester, Mass., and New Haven, Conn., between Greenfield, Mass., and Springfield, Mass., between Boston, Mass., and Worcester, Mass., between Greenfield, Mass., and Fitchburg, Mass., between Providence, R. I., and Lowell, Mass., serving certain intermediate and off-route points; between Boston, Mass., and Albany, N. Y., serving all intermediate points and certain off-route points; *general commodities*, with certain exceptions, including household goods, over alternate regular routes for operating convenience only, including routes between Holyoke, Mass., and junction U. S. Highway 202 and Massachusetts Highway 2; between Providence, R. I., and junction U. S. Highway 20 and Massachusetts Highway 131 near Sturbridge, Mass., between Concord, Mass., and junction Massachusetts Highway 12 and Massachusetts Highway 2, near Leominster, Mass.; *general commodities*, with exceptions as specified above, over irregular routes, between Springfield and Boston, Mass., and points in Massachusetts within ten miles of Boston, and Albany and Saugerties, N. Y., and points in New York within 15 miles of Albany, on the one hand, and, on the other, points in Massachusetts; *paper and paper products, hot water heaters, machine rolls, machinery, oil*, in containers, *rugs, malt beverages, empty malt beverage containers, iron and steel wire, new furniture*, from, to and between certain points in Massachusetts, Rhode Island, New York and Connecticut. West End Truck Sales, Inc., is not a motor carrier, but is controlled by Ian S. Murdoch and Alvin R. Holmes. The latter is a motor carrier and controls other motor carriers. Mr. Murdoch is in control of Murdoch & Hatch Motor Transport, Inc., these carriers operate in numerous states along the Eastern Seaboard. Application has been filed for temporary authority under section 210a (b).

No. MC–F–5982. Authority sought for purchase by INTERSTATE MOTOR LINES, INC., 235 West Third Street, South, Salt Lake City, Utah, of a portion of the operating rights and certain property of ARROWHEAD FREIGHT LINES, LTD., 2222 East 38th Street, Los Angeles, Calif., and for acquisition by T. S. CARTER, Salt Lake City, Utah, of control of said operating rights through the purchase. Applicants' attorney: Edward M. Berol, 100 Bush St., San Francisco 4, Calif. Operating rights sought to be transferred: *General commodities*, with no exceptions, as a *common carrier*, over regular routes, between Jerome, Idaho, and Gooding, Idaho, serving no intermediate points; *general commodities*, moving in express service, between Weiser, Idaho, and Salt Lake City, Utah, serving certain intermediate and off-route points; *general commodities*, with certain exceptions, including household goods, over regular routes, including routes between Paris, Idaho, and Randolph, Utah, between Salt Lake City, Utah, and Paris, Idaho, and between Mills Junction, Utah, and Eureka, Utah, serving certain intermediate and off-route points; *general commodities*, with certain exceptions, not including household goods, over regular routes, including routes between Los Angeles Harbor, Calif., and Ogden, Utah, and between Barstow, Calif., and Davis Dam Site, Nev., serving certain intermediate and off-route points; *general commodities*, with certain exceptions, including household goods, over and alternate regular route for operating convenience only, between Preston, Idaho, and McCammon, Idaho; *such materials and supplies* as are used in the maintenance and operation of Civilian Conservation Corps Camps, over irregular routes, between Pocatello, Idaho, and Civilian Conservation Corps Camps within 30 miles of Afton, Wyo. Vendee is authorized to operate in Colorado, Utah, Wyoming, Nevada, California, Illinois and Nebraska. Application has not been filed for temporary authority under section 210a (b).

No. MC–F–5983. Authority sought for purchase by RALPH G. SMITH, INC., 239 Market St., West Chester, Pa., and DELAWARE VALLEY TRUCKING COMPANY, INC., 15 Exchange Place, Jersey City, N. J., of the operating rights and property of RALPH G. SMITH, JR., 239 Market St., West Chester, Pa., and for acquisition by RALPH G. SMITH, JR., of control of the operating rights and property through the purchase. Applicants' attorney: Robert H. Shertz, 226 South Fifteenth St., Philadelphia, Pa. Operating rights sought to be transferred: (Ralph G. Smity, Inc.) *Household goods*, as a *common carrier*, over irregular routes, between points in Chester, Delaware, Lancaster, and Montgomery Counties, Pa., on the one hand, and, on the other points in New Hampshire, Massachusetts, Rhode Island, Connecticut, New York, New Jersey, Pennsylvania, Delaware, Maryland, Virginia, North Carolina, Ohio, and the District of Columbia; *Livestock*, other than ordinary livestock, and in connection therewith, *personal effects* of their attendants, and *supplies and equipment*, including mascots, used in the care or exhibition of such livestock, between points in Connecticut, Delaware, Florida, Illinois, Kentucky, Maine, Maryland, Massachusetts, New Hampshire, New Jersey, New York, North Carolina, Ohio, Pennsylvania, Rhode Island, South Carolina, Vermont, Virginia, West Virginia, and the District of Columbia; *horses*, (other than ordinary livestock), and *equipment*, and *paraphernalia incidental to the care, transportation, and exhibition of such horses*, between points in Ohio, Kentucky, Michigan, Illinois, Indiana, Missouri, Louisiana, Arkansas, Virginia, West Virginia, Maryland, Pennsylvania, and New York; (Delaware Valley Trucking Company, Inc.), *milk and milk products*, requiring refrigeration, in containers (not in tank trucks), between Mechanicsburg, Pa., and points within 25 miles of Mechanicsburg, on the one hand, and, on the other, points in Connecticut, Delaware, Maryland, New Jersey, New York, Ohio, North Carolina, South Carolina, Indiana, Virginia, and the District of Columbia. Neither vendee holds any authority from the Commission. Application has not been filed for temporary authority under section 210a (b).

No. MC–F–5984. Authority sought for control by PACIFIC INTERMOUNTAIN EXPRESS CO., 299 Adeline St., Oakland, Calif., of the operating rights and property of ORANGE TRANSPORTATION COMPANY, INC., 758 West 14th North, Salt Lake City, Utah, and COLLETT TANK LINES, 758 West 14th North, Salt Lake City, Utah. Applicants' attorneys: A. S. Glikbarg, 155 Sansome St., San Francisco, Calif., Edward M. Berol, 100 Bush St., San Francisco, Calif., and Lynn S. Richards, 716 Newhouse Bldg., Salt Lake City, Utah. Operating rights sought to be controlled: (Orange Transportation Company, Inc.), *General commodities*, with certain exceptions, including household goods, as a *common carrier*, over regular routes, including routes between Sugar, Idaho, and Victor, Idaho, serving the intermediate and off-route points of Teton, Newdale, Clementsville, Tetonia, Driggs, Drummond, and Felt, Idaho; and between Idaho Falls, Idaho, and Ammon, Idaho, serving all intermediate points; *general commodities*, with certain exceptions, not including household goods, including routes between Salt Lake City, Utah, and Boise, Idaho, between Tremonton, Utah, and St. Anthony, Idaho, between Brigham, Utah, and Downey, Idaho, between Boise, Idaho and Lucky Peak Dam, Idaho, between Wendell, Idaho and Bliss, Idaho, between Jerome, Idaho and Idaho Falls, Idaho, and between Salmon, Idaho, and Missoula, Mont., serving certain intermediate and off-route points. Orange Transportation Company, Inc., is also authorized to operate over several regular routes for operating convenience only: *Such materials, supplies and equipment* as are necessary to the maintenance and operation of Civilian Conservation Corps Camps, over irregular routes, between certain points in Idaho; (Collett Tank Lines), *petroleum and/or petroleum products*, as a *common carrier*, over regular routes, including routes between Billings, Mont., and Boise, Idaho, between Great Falls, Mont., and Boise, Idaho, between Parco, Wyo., and Salt Lake City, Utah, between Boise, Idaho and Weiser, Idaho, between Boise, Idaho and Emmett, Idaho, between Pocatello, Idaho and La Barge, Wyo., between Cedar City, Utah and St. George, Utah; *petroleum and/or petroleum products*, over regular and irregular routes, including routes between Powder Wash, Colo., and Woods Cross, Utah; *petroleum and/or petroleum products*, over irregular routes, from, to and between certain points in Montana, Oregon, Idaho, Colorado, Utah, Wyoming, Nevada, and New Mexico. Pacific Intermountain Express Co., is authorized to operate in Colorado, Utah, Wyoming, California, Nevada, Idaho, Missouri, Kansas and Illinois. Application has not been filed for temporary authority under section 210a (b).

No. MC–F–5985. Authority sought for purchase by PATERSON TRUCK LINE, INC., 600 Roosevelt St., Houma, La., of the operating rights and property of HERMAN C. POLK, doing business as H. C. POLK TRUCKING COMPANY, Front St., Prentiss, Miss., and for acquisition by RUTH C. PATTERSON and CHARLES R. PATTERSON, JR., Houma, La., of control of the operating rights and property through the purchase. Applicants' attorney: H. Minor Pipes, P. O. Box 326, Houma, La. Operating rights sought to be transferred: *Machinery, materials, supplies, and equipment*, incidental to or used in, the construction, development, operation, and maintenance of facilities for the discovery, development, and production of natural gas and petroleum, as a *common carrier*, over irregular routes, between points in Louisiana, Arkansas, Mississippi, Oklahoma, and Texas. Vendee is authorized to operate in Louisiana under the Second Proviso of section 206 (a) (1). Application has been filed for temporary authority under section 210a(b).

By the Commission.

[SEAL] HAROLD D. McCOY, *Secretary*.

T. 1½ N., R. 80 W.,
Section 34: Lots 1, 2, 3, 4.
T. 2 N., R. 80 W.,
Section 34: S½SW¼; SW¼SE¼.

495.60 acres.

The minerals in the above described lands were wholly or partly reserved by the grantor or by prior grantors, and any person acquiring any of these lands must accept title subject to such reservations. Information as to any mineral rights reconveyed to the United States is of record in the Colorado Land Office, 437 Post Office Building, Denver, Colorado.

This order is subject to any withdrawals, reservations, rights-of-way or easements which may now affect the land, and to any withdrawals, reservations, rights-of-way or easements which may hereafter be affected.

The lands embraced in this order are situated in central and western Colorado and are rolling to very steep, with generally thin rocky soils unsuited for farming.

No applications for these lands may be allowed under the homestead, small tract, desert-land, or any other nonmineral public-land laws, unless the lands have already been classified as valuable or suitable for such type of application, or shall be so classified upon consideration of an application. Any application that is filed will be considered on its merits. The lands will not be subject to occupancy or disposition until they have been classified.

This order shall not otherwise become effective to change the status of such lands until 10:00 a. m. on the 35th day after the date of this order. At that time the said lands shall, subject to valid existing rights and the provisions of existing withdrawals, become subject to application, petition, location, and selection as follows:

(a) Ninety-one day period for preference-right filings. For a period of 91 days, commencing at the hour and on the day specified above, the public lands affected by this order shall be subject only to (1) application under the homestead or the desert-land laws or the Small Tract Act of June 1, 1938, 52 Stat. 609 (43 U. S. C. 682a), as amended, by qualified veterans of World War II and other qualified persons entitled to preference under the act of September 27, 1944, 58 Stat. 747 (43 U. S. C. 279–284), as amended, subject to the requirements of applicable law, and (2) application under any applicable public-land law, based on prior existing valid settlement rights and preference rights conferred by existing laws or equitable claims subject to allowance and confirmation. Applications under subdivision (1) of this paragraph shall be subject to applications and claims of the classes described in subdivision (2) of this paragraph. All applications filed under this paragraph either at or before 10:00 a. m. on the 35th day after the date of this order shall be treated as though filed simultaneously at that time. All applications filed under this paragraph after 10:00 a. m. on the said 35th day shall be considered in the order of filing.

(b) Date for non-preference-right filings. Commencing at 10:00 a. m. on the 126th day after the date of this order, any lands remaining unappropriated shall become subject to such application, petition, location, selection, or other appropriation by the public generally as may be authorized by the public-land laws. All such applications filed either at or before 10:00 a. m. on the 126th day after the date of this order, shall be treated as though filed simultaneously at the hour specified on such 126th day. All applications filed thereafter shall be considered in the order of filing.

A veteran shall accompany his application with a complete photostatic, or other copy (both sides), of his certificate of honorable discharge, or of an official document of his branch of the service which shows clearly his honorable discharge as defined in § 181.36 of Title 43 of the Code of Federal Regulations, or constitutes evidence of other facts upon which the claim for preference is based and which shows clearly the period of service. Other persons claiming credit for service of veterans must furnish like proof in support of their claims. Persons asserting preference rights, through settlement or otherwise, and those having equitable claims, shall accompany their applications by duly corroborated statements in support thereof, setting forth in detail all facts relevant to their claims.

Applications for these lands, which shall be filed in the Colorado Land Office, 437 Post Office Building, Denver, Colorado, shall be acted upon in accordance with the regulations contained in 295.8 of Title 43 of the Code of Federal Regulations and Part 296 of that title, to the extent that such regulations are applicable. Applications under the homestead laws shall be governed by the regulations contained in Parts 166 to 170, inclusive, of Title 43 of the Code of Federal Regulations, and applications under the desert-land laws and the said Small Tract Act of June 1, 1938, shall be governed by the regulations contained in Parts 232 and 257, respectively, of that title.

Inquiries concerning these lands shall be addressed to the Land Office Manager, Colorado State Office, 429 Post Office Building, Box #1018, Denver 1, Colorado.

MAX CAPLAN,
State Supervisor.

UNITED STATES TARIFF COMMISSION

[Investigation 9a]

RYE

NOTICE OF INVESTIGATION AND PUBLIC HEARING

Investigation instituted. By direction of the President, dated May 20, 1955, the United States Tariff Commission, on the 20th day of May 1955, instituted, and hereby gives notice of, an investigation under section 22 of the Agricultural Adjustment Act, as amended, and Executive Order No. 7233 of November 23, 1935, for the purpose of determining whether rye, rye flour, and rye meal are practically certain to be imported into the United States after June 30, 1955, under such conditions and in such quantities as to render or tend to render ineffective or materially interfere with the price-support program for rye undertaken by the United States Department of Agriculture pursuant to sections 301 and 401 of the Agricultural Adjustment Act of 1949, as amended, or to reduce substantially the amount of products processed in the United States from domestic rye with respect to which such program is being undertaken.

Hearing. All parties interested will be given opportunity to be present, to produce evidence, and to be heard at a public hearing to be held in the Tariff Commission Building, 8th and E Streets NW., Washington, D. C., beginning at 10 a. m., e. d. s. t., on the 14th day of June 1955.

Request to appear at hearing. Interested parties desiring to appear at the public hearing should notify the Secretary of the Commission in writing, at the Commission's offices in Washington, D. C., at least three days in advance of the hearing.

I hereby certify that the above investigation was instituted and hearing was ordered on the 20th day of May 1955.

Issued: May 20, 1955.

DONN N. BENT,
Secretary.

Subchapter F—Security Servicing and Liquidations

[FHA Instruction 462.1]

PART 371—OPERATING LOANS

MISCELLANEOUS AMENDMENTS

1. In § 311.23 of this chapter (19 F. R. 1363) reference to §§ 321.41 to 321.44 of this chapter is changed to § 332.3 of this chapter.

2. Subpart C of Part 316 of this chapter, consisting of §§ 316.41 and 316.42 (13 F. R. 9395), is revoked.

3. Section 321.22 (a) (3) of this chapter (15 F. R. 4885) is revised to read as follows:

§ 321.22 *Preparation of option*—(a) *Use of option.* * * *

(3) When the option has been signed by the seller and the buyer, the County Supervisor will determine whether it is satisfactory and unless corrections are required it will be held in the applicant's file pending action upon the loan application.

4. Subpart C of Part 321 of this chapter, consisting of §§ 321.41 to 321.44 (14 F. R. 3913), is revoked.

5. In § 321.65 of this chapter (13 F. R. 9400) reference to §§ 331.1 to 331.11 and §§ 332.1 to 332.10 of this chapter are changed to Part 332 of this chapter.

6. Subchapter B of this chapter is amended to revoke Parts 331 and 332, consisting of §§ 331.1 to 331.13 (13 F. R. 9410, 16 F. R. 10920, 17 F. R. 1409), §§ 332.1 to 332.10 (13 F. R. 9413, 17 F. R. 1079, 8375), and §§ 332.21 to 332.23 (14 F. R. 2161, 17 F. R. 1081), and to add a new Part 332, Processing Initial Loans, as follows:

Sec.
- 332.1 General.
- 332.2 Loan approval authority.
- 332.3 County committee certification.
- 332.4 Deferred payments.
- 332.5 Second mortgage direct loans.
- 332.6 Preparation of loan dockets.
- 332.7 Action by loan approval official.
- 332.8 Accepting option and requesting title service.
- 332.9 Cancellation of loans.
- 332.10 Increase or decrease in amount of loan.
- 332.11 Occupancy of farms by Tenant Purchase and Farm Enlargement borrowers.
- 332.12 Action by State Office after approval of loan.
- 332.13 Action by County Supervisor following receipt of closing instructions.
- 332.14 Loans to homestead entrymen.

AUTHORITY: §§ 332.1 to 332.14 issued under sec. 41 (1), 60 Stat. 1066, sec. 4 (c), 64 Stat. 100; 7 U. S. C. 1015 (1), 40 U. S. C. 442 (c) § 332.14 also issued under R. S. 161, 5 U. S. C. 22. Interpret or apply sec. 44 (b), 62 Stat. 1069, 7 U. S. C. 1018 (b). Other statutory provisions interpreted or applied are cited to text in parentheses.

§ 332.1 *General.* (a) This part prescribes the authorities, policies, and procedures for processing initial insured and direct Farm Ownership loans.

(b) As used in this part, "preliminary title evidence" includes preliminary title insurance binder or other preliminary report of title from the title insurance company, or in appropriate cases, the abstract of title, attorney's preliminary opinion of title, or certificate of title. "Final evidence of title" means a mortgagee's policy of title insurance, the attorney's final opinion or certificate of title after loan closing, or the abstract of title extended to the date of loan closing. "Local representative furnishing title evidence" means the local representative of the title company, the abstracter, or the closing attorney as the case may be.

§ 332.2 *Loan approval authority.* The State Field Representative is au-

thorized to approve or disapprove initial direct and insured loans in accordance with Farmers Home Administration procedures, except that individual loans in connection with a subdivision will not be approved by the State Field Representative until prior approval of the subdivision has been received from the State Director.

§ 332.3 *County committee certification.* The County Supervisor will arrange for a meeting of the County Committee to make a final determination as to the eligibility of the applicant for a Farm Ownership loan, to inspect the farm, and to make the necessary determinations with respect to the applicant and the farm. He will make available to the Committee for all loans except a Building Improvement loan completed Forms FHA–596, "Earning Capacity Report," FHA–5968, "Map of Farm," FHA–643, "Farm Development Plan," FHA–14, "Farm and Home Plan," and FHA–14A, "Long-Time Farm and Home Plan." For Building Improvement loans he will make available completed Forms FHA–440, "Farm Appraisal Report," FHA–596B, FHA–643 and Form FHA–197A, "Report on Application for Loan." However, when a Building Improvement loan is being made to an active borrower who already is receiving supervision, existing Forms FHA–14 and FHA–14A will be revised at the time the Building Improvement loan is developed to show significant changes in the financial statement and the plan of operation. These Forms will be made available to the County Committee instead of Form FHA–197A.

(a) *Certification as to applicant.* The County Committee is responsible for certifying as to the eligibility of each applicant to receive the benefits of Title I of the Bankhead-Jones Farm Tenant Act, as amended; that, in the opinion of the Committee, the applicant by reason of his character, ability, industry, and experience honestly will endeavor to, and successfully will carry out undertakings and obligations required of him under a Farm Ownership loan; and that credit, sufficient in amount to finance the actual needs of the applicant, is not available to him at the rates (but not exceeding the rate of 5 percent per annum) and terms prevailing in the community in or near which the applicant resides for loans of similar size and character from commercial banks, cooperative lending agencies, or from any other responsible source.

(b) *Certification as to farm.* The County Committee is responsible for certifying that the farm is of such character that there is a reasonable likelihood that the making or insuring of the loan with respect thereto will carry out the purposes of Title I. The County Committee is also responsible for certifying as to the fair and reasonable value of the farm based upon its normal earning capacity. The County Committee's certification as to the fair and reasonable value of the farm should represent its actual bona fide determination with respect to the particular farm under consideration after personally inspecting the farm and reviewing Form FHA–596 or Form FHA–440. The Committee should not be influenced by the amount of the proposed loan or the county average value in making its determination of the fair and reasonable value of the farm. Usually the inspection of the farm will be accomplished by the Committee as a group in order to obtain the benefit of group discussion. For Building Improvement loans, the County Committee in determining the fair and reasonable value of the farm should be largely governed by Form FHA–440 and the facts it discloses concerning the value of the real estate security.

NOTE: The fair and reasonable value will not be based on the normal market value.

(1) A fair and reasonable value higher than the value recommended by the appraiser may be justified when the following conditions exist.

(i) The farm or tract is particularly desirable because of its present high state of development or productivity, or development substantially greater than that contemplated by the appraiser is provided for in the Farm Development Plan.

(ii) The long-time farm and home plan shows definite possibilities of net income substantially greater than shown in the appraisal report. This may result from the system of farming outlined in the plan being more intensive and more profitable than the system outlined in the appraisal report. It is essential in such instances that the planned operation be sound and that the farming system planned be one that is established and successful in the area. (This item does not apply to Building Improvement loans except when made to an active borrower who already is receiving supervision.)

(iii) The applicant has outstanding managerial ability and experience which indicates that he will be successful under the system of farming planned.

(2) A fair and reasonable value less than the appraiser's recommended value should be determined when:

(i) The planned operation is less intensive or less profitable than the one outlined in the earning capacity report; or

(ii) Adequate provisions are not made in the farm development plan or farm and home plans for carrying out the improvements recommended by the appraiser.

(3) If the fair and reasonable value of the farm, as determined by the Committee, should exceed by as much as 5 percent the value as determined by the appraiser, a specific justification signed by the Committee must be attached to Form FHA–491, "County Committee Certification."

(4) In case of a load to a disabled veteran for a less than an efficient family-type farm-management unit, the County Committee, in certifying as to the suitability of the farm, will consider the factors listed in § 321.3 of this chapter. The fair and reasonable value will not be in excess of the normal market value of the farm and the amount of loan recommended will not exceed the debt-paying ability of the application considering both his farm income and non-farm income.

(c) *Execution of Form FHA–491.* The County Committee will certify to the above determinations on Form FHA–491 if they recommend that a loan be made. If the County Committee does not execute Form FHA–491, the County Supervisor will notify the applicant as to the reason why a loan cannot be made.

(Secs. 1 (c), 2 (a), (b) and (d), 42 (c) and (d), 44 (a) (2) and (3), 60 Stat. 1073, 1074, 1067, 1068; 7 U. S. C. 1001 (c), 1002 (a), (b) and (d), 1016 (c) and (d), 1018 (a) (2) and (3))

§ 332.4 *Deferred payments.* (a) Except for a Building Improvement Loan the initial payment on a Farm Ownership loan may be deferred until the end of the second full crop year from the date of the loan. Such payments may be deferred only when the farm and home plan covering the first full crop year clearly demonstrates that for the period for which deferment is proposed there will be insufficient income to meet a regular annual installment on the loan after farm operating, family living, and other essential expenses are paid. Further, in the judgment of the loan approval official, there must be adequate evidence that income in subsequent years will be sufficient to meet the requirements of the loan. The initial payment must always be more than a nominal payment. Deferred payments will not be used to permit the accelerated repayment of other debts, to purchase an unusually large amount of capital goods, or to perform major items of land development. Deferment will be justified only when:

(1) There is a conversion of the farming system from an unsound, ill-balanced farm organization to a sound, well-balanced farm organization, adequate returns from which will be delayed for one or two full crop years; or

(2) There is being established a system of farming requiring substantial investments in land clearing, draining, leveling, irrigating, basic fertilizing, and seeding, or other land development or soil improvement operations, adequate returns from which will be delayed for one or two full crop years.

(3) The conversion of the farming system or the performance of major land development provided above are clearly outlined in Forms FHA–14A and FHA–643.

(b) For an insured loan, in addition to the above requirements, the initial payment may be deferred only when the lender has agreed to such deferment and the deferment does not violate State or local laws or regulations to which the lender may be subject.

(Sec. 48, 60 Stat. 1070, sec. 4, 65 Stat. 198; 7 U. S. C. 1022)

§ 332.5 *Second mortgage direct loans.* When a direct loan is to be secured by a second mortgage the following items will apply.

(a) Form FHA–446, "Agreement with Prior Lienholder," will be used when the loan approval official considers, in view of the repayment terms or other objectionable provisions of the prior mortgage, or for any other reason, that it would be unduly hazardous to make a second mortgage loan without the additional protection which the agreement is designed to afford.

(b) The applicant will be required to furnish the County Supervisor, before the docket is assembled, a copy of any note and mortgage held by the prior lien holder so that a proper determination can be made as to whether it should be refinanced. In addition, the County Supervisor will be furnished a current statement from the mortgagee showing (1) the correct outstanding principal balance of the existing mortgage(s), (2) the amount of any accrued interest, (3) whether the account(s) is (are) current or delinquent, and (4) rate of interest if not shown in the mortgage. Any cost incident to securing such copy of mortgage or current statement will be paid by the applicant.

(c) In States where a prior mortgage holder may foreclose his mortgage without giving the Government actual notice of foreclosure, the closing of loans to be secured by second mortgages will be conditioned on the prior mortgage holder's executing an agreement whereby the Government will be given actual notice of the commencement of foreclosure proceedings. The State Director will furnish the appropriate form of notice agreement and will issue a State Instruction regarding its use. If the recordation of such an agreement is necessary to bind assignees of the prior mortgage holder, the cost of recordation will be paid by the borrower.

(Par. (a), 68 Stat. 525; 7 U. S. C. 1003 (a))

§ 332.6 *Preparation of loan dockets.* Forms required in loan processing will be prepared in the County Office. The County Supervisor will assemble the loan docket when the County Committee has signed Form FHA–491 and will submit the loan docket to the loan approval official.

§ 332.7 *Action by loan approval official*—(a) *Effective docket development.* While it is not a requirement that the loan approval official interview all applicants and visit all farms, he will do so with sufficient frequency to discharge properly his responsibility for seeing that (1) loans are sound, (2) dockets are properly developed, and (3) that basic policies of the Farm Ownership program are being carried out in each County Office area under his jurisdiction.

(b) *Examination of loan.* Before approving any Farm Ownership loan, the loan approval official will make a comprehensive and objective study of the proposed loan, utilizing all available information regarding the family, the farm, and the plans of operation. The study is to determine the soundness of the loan, to see if the docket is correctly prepared, and to ascertain if it is within the loan limits as prescribed in Subpart B of Part 311 of this chapter. In the case of a direct loan where the property is subject to an existing mortgage, the loan approval official must determine whether the loan is to be secured by a first or second mortgage. If the loan approval official's findings do not concur with the County Supervisor's recommendation, the docket will be returned to the County Supervisor for revision. For the efficient family-type farm-management unit, the loan approval official before approving the loan will determine that:

(1) The applicant is eligible, and the proper loan (insured or direct) has been selected.

(2) The farm is, or can be developed into, an efficient family-type farm-management unit.

(3) If the fair and reasonable value of the farm exceeds the recommendation of the appraiser by 5 percent or more, the County Committee Certification is supported by a narrative justification.

(4) The farm and home plans provide for a sound system of farming which can be carried out by the family.

(5) The planned improvements are adequate for the planned operations and meet minimum construction standards and minimum land development standards.

(6) The planned improvements will put the farm in livable and operable condition at the outset, and the amount of work to be done by the family in connection with the improvements is within the capacity of the family and will not seriously interfere with their farming operations.

(7) The family's resources are such as reasonably to assure that the family can meet debt obligations and become successful owner-operators of the farm. Careful consideration should be given to the amount of chattels and equipment owned, the amount of debts outstanding, and cash available for operations.

(8) In case of a Farm Enlargement or a Farm Development loan, the unit is not an efficient family-type farm before enlargement or development, but will be an efficient family-type farm when the planned enlargement or development is completed.

(c) *Special requirements for Building Improvement loans.* The loan approval official will determine that the period of the loan is consistent with the debt-paying ability of the applicant and the security interest of the Government and that the amount of the loan is not in excess of the debt-paying ability of the applicant or the fair and reasonable value of the farm, less any prior lien not to be refinanced, whichever is less. The loan approval official will recognize that the only buildings to be improved are those that were mutually agreed upon by the applicant and the County Supervisor; moreover, a determination will be made that such improvements are essential to the farm and meet minimum construction standards insofar as is practicable.

(d) *Special requirements for a loan to a veteran.* (1) For each loan to a veteran the loan approval official will check the evidence of discharge or release. After the loan has been approved or disapproved the evidence of discharge will be returned to the applicant.

(2) In the case of a veteran with pensionable disability, the written evidence of disability will be checked to verify the amount of the pension and the type of disability. Special attention will be necessary with respect to an application for a loan to a disabled veteran who desires a Farm Ownership loan on less than an efficient family-type farm-management unit. The loan approval official will make the same determinations as for any other loan except the farm may be less than an efficient family-type farm-management unit. For such a loan he will determine that the farming operations to the extent undertaken are sound, and, together with the pensionable income, will provide a reasonable standard of living and meet required expenditures.

(e) *Approval or disapproval of a loan.* (1) If the loan is approved, the loan approval official will:

(i) Indicate approval of the loan and sign the certificate on Form FHA–476, "Record of Actions."

(ii) Sign Form FHA–643, "Farm Development Plan."

(iii) Sign Form FHA–5, "Loan Authorization," for a direct loan or an insured loan when the United States as trustee for a State Rural Rehabilitation Corporation is the lender.

(2) If the loan is disapproved, the loan approval official will explain on Form FHA–476 the reasons therefor and initial and date the original. The County Supervisor will notify the applicant, giving the reasons for the disapproval of the loan.

(Secs. 1, 3 (a) and (b) (4), 12 (a) and (c) (4), 60 Stat. 1072, 1074, 1076, sec. 2 (f), 64 Stat. 99; 7 U. S. C. 1001, 1003 (a) and (b) (4), 1005b (a) and (c) (4), 40 U. S. C. 440 (f))

§ 332.8 *Accepting option and requesting title service.* (a) Subject to the provisions of paragraph (b) of this section, when the County Supervisor receives Form FHA–476 indicating approval of the loan, he will: (1) In case of a Tenant Purchase or Farm Enlargement loan prepare the acceptance of option letter, Form FHA–191, "Acceptance of Option (Vendor to Furnish Abstract)," or Form FHA–191B, "Acceptance of Option (Vendor to Furnish Title Insurance)." The original of the option acceptance letter will be signed by the applicant as "Buyer," and by his wife if she is named in the option, and mailed to the seller. Form FHA–191B also will be signed by the County Supervisor. If it is necessary that the seller submit a deposit for furnishing an abstract in connection with placing the order for title insurance, information to that effect will be added to the option acceptance letter, and it will be the responsibility of the County Supervisor to see that the necessary action is taken by the seller; and (2) see that title service is requested in accordance with Part 327 of this chapter. For all types of loans he will stamp or type "Insured" or "Direct" on the signed application for title insurance and forward it to the representative of the title insurance company or to the office of the company whichever is customary. When forwarding the application for title insurance or requesting title clearance other than title insurance, the County Supervisor will request that the preliminary title evidence be sent to the Farmers Home Administration County Office. He will also request that the mortgagee policy of title insurance and owner's policy of title insurance, if any, be sent to the Farmers Home Administration County Office. In the case of an insured loan, the County Supervisor will request that the mortgagee title insurance policy be made payable to the mortgagee and/or the United States of America.

(b) For an insured loan, no acceptance of option letter will be prepared and no title service will be requested until the County Supervisor ascertains the name and address of the lender who will make the specific loan.

§ 332.9 *Cancellation of loans.* (a) Loans may be cancelled before loan closing upon request of the applicant or upon order of the County Supervisor through the use of Form FHA–903, "Request for Cancellation of Loan," and approval of such cancellation by the loan approval official. For an insured loan, any checks advanced will be returned promptly to the lender with an explanatory letter.

(b) If title insurance has been ordered, the title insurer's representative with whom the order was placed and, if possible, the local representative responsible for examining the title will be promptly notified of the cancellation by the County Supervisor. If title insurance is not used, the abstracter or attorney likewise will be notified. Actual cancellation of the order for title insurance or title examination is a matter between the party who ordered the services and the party rendering the services. The Government will not be liable for charges made for services performed.

§ 332.10 *Increase or decrease in amount of loan.* If it becomes necessary that the amount of the loan be increased or decreased, the County Supervisor will request that all distributed docket forms be returned to the County Office. The loan docket will be revised accordingly and reprocessed.

§ 332.11 *Occupancy of farms by Tenant Purchase and Farm Enlargement borrowers.* Upon acceptance of the option the contract of sale of the farm becomes complete, conditional upon delivery of satisfactory title by the seller. When the acceptance of option letter, Form FHA–191 or FHA–191B, has been mailed to the seller, the borrower will arrange with the seller, in consultation with the Supervisor, to occupy and operate the farm as soon as practicable. Agreements will be in writing and cover such subjects as disposition of growing crops, rentals, payment of maintenance costs, and other pertinent points. The following Forms will be used for this purpose, as appropriate:

(a) Form FHA–189, "Short-Term Lease of Optioned Land".

(b) Form FHA–198, "Short-Term Lease (Between Purchaser and Seller)".

(c) Form FHA–129, "Temporary Cropping License".

(d) Form FHA–199, "Agreement (Between Seller, Purchaser, and Tenant)".

(Secs. 3 (b) (4), 12 (c) (4), 60 Stat. 1074, 1076; 7 U. S. C. 1003 (b) (4), 1005b (c) (4))

§ 322.12 *Action by State Office after approval of loan.* (a) For an insured loan if the lender was not previously known, the State Office will inform the County Supervisor as soon as the lender is known.

(b) Upon receipt of Form FHA–971, "Request for Check," the State Director, or other authorized person whose "Signature Card" has been submitted to the National Office, will examine the Form and if the Form is correctly prepared the State Director or other authorized person will sign and date the attestation to the signature of the County Supervisor. Form FHA–971 will then be immediately forewarded to the lender.

§ 332.13 *Action by the County Supervisor following receipt of closing instructions.* When closing instructions have been received by the County Supervisor from the Attorney in Charge, the County Supervisor will provide a copy of the closing instructions for the local representative furnishing title evidence, and they will discuss the closing instructions and determine the date on which the loan will be closed. The borrower and seller, if any, will be notified of the loan closing date. The loan will be closed in accordance with the closing instructions and the following appropriate actions will be taken prior to and after loan closing.

(a) *Insured loan.* When the proposed date for loan closing has been determined the County Supervisor will prepare and sign Form FHA–971 and forward it to the State Director except when the United States as trustee for a State Rural Rehabilitation Corporation is the lender. In a case where the seller is to become the lender, the amount of the check requested will be only the amount of cash he will advance. In those cases where it appears probable that the bank handling the supervised bank account will require the lender's personal check to clear before checks can be drawn on the supervised bank account, the word "certified" should be inserted before "check" in the first line of Form FHA–971.

(b) *Deposit of check.* The loan check will be deposited in a supervised bank account on the date of loan closing in accordance with procedures outlined in Part 303 of this chapter.

(c) *Assignment of income from property to be mortgaged.* Assignments will be taken when income is to be received by the borrower from royalties, leases, or other existing agreements under which the value of the security will be depreciated. Such assigned income will be applied as an extra payment on the loan. When the County Supervisor deems it advisable, assignments may also be taken for all or a portion of the income derived from nondepleting items such as bonus payments or annual delay rentals. Such assigned income will be applied as a regular payment. When a direct second mortgage loan is made, the written consent of the prior lienholder to the assignment will be obtained either by a letter or written approval by the lienholder on the assignment form.

(1) In cases in which income is to be received by the borrower from a mineral lease or other existing agreement pertaining to the property at the time of purchase, a Form FHA–253A, "Assignment of Income From Property to be Mortgaged," will be prepared and executed by the borrower and his wife at the time of loan closing. The original and one copy will be forwarded to the lessee with the request that the original be signed and returned to the County Office.

(2) If he deems it advisable, the County Supervisor, upon advice of the Attorney in Charge, may require the acknowledgment and recordation of the assignment. Any cost incident thereto will be borne by the borrower.

(d) *Collection of appraisal fee and initial mortgage insurance charge for insured loans.* (1) The County Supervisor will collect a $20 appraisal fee from each applicant at the time of loan closing. This fee may be included in the loan. Form FHA–37, "Receipt for Payment," will be prepared for the appraisal fee payment.

(2) The initial mortgage insurance charge will be collected from an insured mortgage applicant at the time of loan closing. The amount of such charge will be computed at the rate of one percent of the principal amount of the loan for the period from the date of loan closing to the first January 1 thereafter. Such charge must be paid from the applicant's personal funds. The amount of the initial mortgage insurance charge will be included on the same Form FHA–37 prepared for the appraisal fee payment. If the first installment on the loan, or any portion thereof, is collected at the time of loan closing, it will be entered as a regular payment on the same Form FHA–37.

(e) *Preparation of note.* The date of the note will be the date of loan closing.

(1) When determining the amount of the first installment, the County Supervisor will consider the borrower's financial circumstances and the extent to which he will receive income from the farm during the calendar year preceding the date of the first installment. The amount of the first installment may be less but not more than a regular annual installment. If the borrower will not receive income from the farm during the calendar year preceding the date of the first installment, a nominal first installment will be sufficient, unless the borrower desires to pay more.

(2) The regular amortized installment will be the amount of principal and interest which if paid annually will retire the full amount of the note plus interest within the amortization period of the loan.

(3) When a loan is closed between December 1 and January 1 the first installment will be collected at the time of loan closing.

(4) The promissory note will be signed by the borrower and his wife, if married, at the time of loan closing.

(f) *Mortgage forms.* Real estate mortgage forms in series FHA–187 will be used for direct loans and forms in series FHA–363 will be used for insured loans.

(g) *Insurance endorsement for insured loan.* The County Supervisor is authorized to insert the effective date and to execute the insurance endorsement on the reverse of Form FHA–360, "Promissory Note (Insured Loan)," or 360A, "Bond (Insured Loan)." The effective date of the insurance endorsement will be the date of loan closing. Execution of the insurance endorsement constitutes the Government's insurance of the loan.

(h) *Other closing actions.* (1) When there are insurable buildings on the farm, the County Supervisor will see that adequate insurance is provided, effective as of the time of loan closing.

(2) For an insured loan, when the mortgage is returned by the recording official, the County Supervisor will forward it to the lender immediately.

(3) If the borrower secures an owner's policy of title insurance, the County Supervisor will deliver it to the borrower as soon as it is received from the title insurance company.

(4) The original deed of conveyance, if any, and conformed copy of the mortgage will be delivered to the borrower.

(5) Immediately after loan closing, the original Form FHA–190, "Promissory Note," will be sent to the Finance Office.

(6) Immediately after loan closing, the original Form FHA–360 will be sent to the lender, except that when the United States as trustee for a State Rural Rehabilitation Corporation is the lender the original Form FHA–360 and the original mortgage will be forwarded to the State Director for safe keeping.

(7) Any abstract of title will be delivered to the borrower for safe keeping. The County Supervisor will obtain a receipt from the borrower at the time the abstract is delivered to him. The receipt will be signed and dated by the borrower and the abstract will be identified in the receipt by showing the name of the abstracter who prepared the abstract, the number, if any, assigned by the abstracter; and the period covered by the abstract.

(8) When the County Supervisor receives the final opinion from the Attorney in Charge, he will place the remaining loan documents, including the mortgagee title insurance policy, in the borrower's County Office case folder. The County Supervisor promptly will send to the lender Form FHA–38, certifying that the Farmers Home Administration has custody of the property insurance policy, mortgagee title insurance policy or other title evidence, and appraisal report.

(9) A Farm Ownership loan is considered closed when the mortgage is filed for record.

(Secs. 3 (a) and (b) (1), (3) and (4), 12 (a), (c) (4), (d) and (e) (1), 48, 60 Stat. 1074, 1076, 1070, sec. 3, 62 Stat. 534, sec. 2 (f), 64 Stat. 99; 7 U. S. C. 1003 (a) and (b) (1), (3) and (4), 1005b (a), (c) (4), (d) and (e) (1), 1022, 40 U. S. C. 440 (f))

§ 332.14 *Loans to homestead entrymen*—(a) *General.* This section provides additional policies and procedures applicable to the making of insured and direct Farm Ownership loans to homestead entrymen.

(1) *Authority.* Public Law 361, 81st Congress, authorizes the insuring and making of Farm Ownership loans to eligible homestead entrymen on unpatented public lands, including public lands within Federal reclamation projects and in Alaska, in accordance with the provisions of Title I of the Bankhead-Jones Farm Tenant Act, as amended.

(2) *Cooperation between the Department of Agriculture and the Department of the Interior.* The extension of financial assistance authorized in subparagraph (1) of this paragraph will be facilitated through the cooperation of the Farmers Home Administration, the Bureau of Land Management, and the Bureau of Reclamation.

(3) *Special policy applicable to Farm Ownership borrowers.* Farm Ownership loans to homestead entrymen will include sufficient funds to put the farm in livable and operable condition at the outset, to provide needed water facilities, and, when necessary, to provide for refinancing (i) the outstanding balances of any existing mortgages against the entryman's interest in the farm, (ii) any construction or operation and maintenance charges or irrigation district charges against the land which are due at the time of loan closing, (iii) the outstanding balance of any land leveling contract between the entryman and the Bureau of Reclamation, and (iv) any taxes legally assessed against the farm which are due at the time of loan closing. If any items other than those specified are to be refinanced, the prior approval of the Administrator will be required on an individual case basis.

(4) *Patent requirements.* All homestead entrymen will be expected to comply promptly and fully with pertinent laws and regulations of the Department of the Interior relating to the issuance of a patent for a homestead entry. When applicable, reclamation proof must be filed by the borrower at the earliest possible date.

(i) *Residence requirements.* The entryman must establish residence upon the land entered within six months from the date of allowance of entry. When he has established residence, he should notify the Manager of the District Land Office by mail or otherwise. Under certain conditions additional time, not exceeding six months, may be allowed by the Bureau of Land Management. Residence must be maintained for a period of at least seven months during each of the first three years, except where credit is allowed for residence on account of military or naval service.

(ii) *Final homestead proof.* Final proof must be filed within 5 years from the date of allowance of entry issued to the entryman by the Bureau of Land Management. A patent will not be issued by the United States until the entryman has submitted final proof. Final proof must show that a habitable house is on the land at the time proof is submitted, that residence requirements have been met, that the improvements are of such character as to show good faith, and that the entryman is a citizen of the United States. A habitable dwelling within the meaning of the homestead laws is any permanent building or structure erected on the land entered which is suitable for, and actually occupied as, a dwelling as distinguished from other buildings. When the entryman borrower is ready to submit final proof, he should notify the District Land Office and request instructions regarding the procedure to be followed.

(iii) *Reclamation proof.* Reclamation proof may be submitted with, or at any time after, the submission of homestead proof. In addition to the final homestead proof mentioned in subdivision (ii) of this subparagraph, the filing of reclamation proof is required as a condition in obtaining a patent to any entry within a reclamation project. Reclamation proof must show reclamation and cultivation of at least one-half of the irrigable area in the entry for two years immediately preceding the date of submission of proof and the payment of all reclamation charges due at that time. Reclamation proof, in proper form, must be submitted to the District Land Office accompanied by the payment of final homestead commissions.

(b) *Loan processing.* Existing Farm Ownership policies, procedures, and loan authorities will be followed, except as follows:

(1) *Applications* — (i) *Applications from homestead entrymen not in a Federal reclamation project.* An application for a Farm Ownership loan from a homestead entryman entering public land not within a Federal reclamation project will be considered only after the entryman has selected a farm and received his allowance of entry from the Bureau of Land Management. The original document showing allowance of entry must be attached to Form FHA–197 "Application for FHA Services."

(ii) *Applications from homestead entryman in a Federal reclamation project.* An application for a Farm Ownership loan from a homestead entryman entering public land within a Federal reclamation project will not be considered until after the entryman has received a certificate of eligibility from the Bureau of Reclamation and has selected a farm. If at the time of making application the entryman has received his allowance of entry from the Bureau of Land Management, he will attach the original of such document to Form FHA–197. If the entryman has not received his allowance of entry, a copy of his certificate of eligibility must be attached to Form FHA–197. However, the docket will not be approved until the original document showing allowance of entry has been received from the applicant and placed in the loan docket.

(iii) *Supplemental information on applicant.* At the time of making application for a Farm Ownership loan, the homestead entryman may be requested to authorize the Farmers Home Administration to secure from the Bureau of Land Management or the Bureau of Reclamation any available information concerning his application for homestead or reclamation entry which may be used by the Farmers Home Administration in determining his eligibility for the loan.

(2) *Special items in development of Farm Ownership dockets.* Loan dockets for loans to homestead entrymen will be prepared and distributed in accordance with §§ 332.1 to 332.13, except as modified by this subparagraph.

(i) *Development plan.* As used in this subdivision the term "plan" refers to Form FHA–643, "Farm Development Plan." When the entryman's farm is located in a Federal reclamation project, any development items listed on the plan must be consistent with the over-all plans for development of the reclamation project. If the development plans for the unit conflict with the over-all plans for the development of the Federal reclamation project, officials of the Bureau of Reclamation will so advise the County Supervisor. The processing of the loan will not be delayed while awaiting such advice from the Bureau of Reclamation.

(3) *Title clearance.* The entryman applicant will be required to furnish and pay for a certified statement prepared by a qualified title examiner (including designated attorneys) or abstracter which will include findings with respect to any outstanding land leveling contracts and any other claims of any kind on record against the entry. When there is an outstanding land leveling contract, the applicant's copy of such contract also will be included in the loan docket and returned to the borrower when the loan is closed.

(4) *Loan closing.* Except as provided by this section, Farm Ownership loans will be closed in accordance with §§ 332.1 to 332.13. Real estate mortgage forms in series FHA–186 will be used for direct loans and forms in series FHA–443 will be used for insured loans.

(Sec. 1, 63 Stat. 883; 7 U. S. C. 1006a)

7. Section 333.6 (b) of this chapter (14 F. R. 6327) is revoked.

8. In § 333.7 of this chapter (14 F. R. 6327) reference to Part 331, Subpart A of this subchapter is changed to Part 332 of this chapter.

9. In § 371.15 (a) of this chapter (19 F. R. 3991) reference to Part 343 of this chapter is changed to Part 342 of this chapter, and item 11 of the miscellaneous amendments to this chapter dated January 12, 1955 (20 F. R. 398), is hereby corrected accordingly.

Issued this 23d day of May 1955.

[SEAL] R. B. McLEAISH,
Administrator,
Farmers Home Administration.

Chapter IX—Agricultural Marketing Service (Marketing Agreements and Orders), Department of Agriculture

[Plum Order 1]

PART 936—FRESH BARTLETT PEARS, PLUMS, AND ELBERTA PEACHES GROWN IN CALIFORNIA

REGULATION BY GRADES AND SIZES

§ 936.498 *Plum Order 1*—(a) *Findings.* (1) Pursuant to the marketing agreement, as amended, and Order No. 36, as amended (7 CFR 936), regulating the handling of fresh Bartlett pears, plums, and Elberta peaches grown in the State of California, effective under the applicable provisions of the Agricultural Marketing Agreement Act of 1937, as amended, and upon the basis of the recommendations of the Plum Commodity Committee, established under the aforesaid amended marketing agreement and order, and upon other available information, it is hereby found that the limitation of shipments of plums of the variety hereinafter set forth, and in the manner herein provided, will tend to effectuate the declared policy of the act.

(2) It is hereby further found that it is impracticable and contrary to the public interest to give preliminary notice, engage in public rule making procedure, and postpone the effective date of this section until 30 days after publication thereof in the FEDERAL REGISTER (60 Stat. 237; 5 U. S. C. 1001 et seq.) in that, as hereinafter set forth, the time intervening between the date when information upon which this section is based became available and the time when this section must become effective in order to effectuate the declared policy of the act is insufficient; a reasonable time is permitted, under the circumstances, for preparation for such effective time; and good cause exists for making the provisions hereof effective not later than May 26, 1955. A reasonable determination as to the supply of, and the demand for, such plums must await the development of the crop thereof, and adequate information thereon was not available to the Plum Commodity Committee until May 18, 1955; recommendation as to the need for, and the extent of, regulation of shipments of such plums was made at the meeting of said committee on May 18, 1955, after consideration of all available information relative to the supply and demand conditions for such plums, at which time the recommendation and supporting information was submitted to the Department; shipments of the current crop of such plums are expected to begin on or about May 30, 1955, and this section should be applicable to all such shipments of such plums in order to effectuate the declared policy of the act; and compliance with the provisions of this section will not require of handlers any preparation therefor which cannot be completed by the effective time hereof.

(b) *Order.* (1) During the period beginning at 12:01 a. m., P. s. t., May 26, 1955, and ending at 12:01 a. m., P. s. t., November 1, 1955, no shipper shall ship from any shipping point during any day any package or container of Beauty plums unless:

(i) Such plums grade at least U. S. No. 1 with a total tolerance of ten (10) percent for defects not considered serious damage in addition to the tolerances permitted for such grade; and

(ii) Such plums are of a size not smaller than a size that will pack a 5 x 5 standard pack.

(2) Section 936.143 of the rules and regulations, as amended (18 F. R. 712, 2839; 19 F. R. 425), sets forth the requirements with respect to the inspection and certification of shipments of fruit covered by this section. Such section also prescribes the conditions which must be met if any shipment is to be made without prior inspection and certification. Notwithstanding that shipments may be made without inspection and certification, each shipper shall comply with all grade and size regulations applicable to the respective shipment.

(3) As used in this section, "U. S. No. 1" and "serious damage" shall have the same meaning as set forth in the revised United States Standards for plums and prunes (fresh) (§§ 51.1520 to 51.1530 of this title); "standard pack" shall have the applicable meanings of the terms "standard pack" and "equivalent size" as when used in § 936.142 of the aforesaid amended rules and regulations; and all other terms shall have the same meaning

as when used in the amended marketing agreement and order.

(Sec. 5, 49 Stat. 753, as amended; 7 U. S. C. 608c)

Dated: May 23, 1955.

[SEAL] S. R. SMITH,
Director, Fruit and Vegetable Division, Agricultural Marketing Service.

[F. R. Doc. 55-4277; Filed, May 25, 1955; 8:53 a. m.]

[Plum Order 2]

PART 936—FRESH BARTLETT PEARS, PLUMS, AND ELBERTA PEACHES GROWN IN CALIFORNIA

REGULATION BY GRADES AND SIZES

§ 936.499 *Plum Order 2*—(a) *Findings.* Pursuant to the marketing agreement, as amended, and Order No. 36, as amended (7 CFR Part 936), regulating the handling of fresh Bartlett pears, plums, and Elberta peaches grown in the State of California, effective under the applicable provisions of the Agricultural Marketing Agreement Act of 1937, as amended, and upon the basis of the recommendations of the Plum Commodity Committee, established under the aforesaid amended marketing agreement and order, and upon other available information, it is hereby found that the limitation of shipments of plums of the variety hereinafter set forth, and in the manner herein provided, will tend to effectuate the declared policy of the act.

(2) It is hereby further found that it is impracticable and contrary to the public interest to give preliminary notice, engage in public rule making procedure, and postpone the effective date of this section until 30 days after publication thereof in the FEDERAL REGISTER (60 Stat. 237; 5 U. S. C. 1001 et seq.) in that, as hereinafter set forth, the time intervening between the date when information upon which this section is based became available and the time when this section must become effective in order to effectuate the declared policy of the act is insufficient; a reasonable time is permitted, under the circumstances, for preparation for such effective time; and good cause exists for making the provisions hereof effective not later than June 1, 1955. A reasonable determination as to the supply of, and the demand for, such plums must await the development of the crop thereof, and adequate information thereon was not available to the Plum Commodity Committee until May 18, 1955; recommendation as to the need for, and the extent of, regulation of shipments of such plums was made at the meeting of said committee on May 18, 1955, after consideration of all available information relative to the supply and demand conditions for such plums, at which time the recommendation and supporting information was submitted to the Department; shipments of the current crop of such plums are expected to begin on or about June 7, 1955, and this section should be applicable to all such shipments of such plums in order to effectuate the declared policy of the act; and compliance with the provisions of this section will not require of handlers any preparation therefor which cannot be completed by the effective time hereof.

(b) *Order.* (1) During the period beginning at 12:01 a. m., P. s. t., June 1, 1955, and ending at 12:01 a. m., P. s. t., November 1, 1955, no shipper shall ship from any shipping point during any day any package or container of Santa Rosa plums unless:

(i) Such plums grade at least U. S. No. 1 with a total tolerance of ten (10) percent for defects not considered serious damage in addition to the tolerances permitted for such grade; and

(ii) Such plums are of a size not smaller than a size that will pack a 4 x 5 standard pack.

(2) Section 936.143 of the rules and regulations, as amended (18 F. R. 712, 2839; 19 F. R. 425), sets forth the requirements with respect to the inspection and certification of shipments of fruit covered by this section. Such section also prescribes the conditions which must be met if any shipment is to be made without prior inspection and certification. Notwithstanding that shipments may be made without inspection and certification, each shipper shall comply with all grade and size regulations applicable to the respective shipment.

(3) As used in this section, "U. S. No. 1" and "serious damage" shall have the same meaning as set forth in the revised United States Standards for plums and prunes (fresh) (§§ 51.1520 to 51.1530 of this title); "standard pack" shall have the applicable meanings of the terms "standard pack" and "equivalent size" as when used in § 936.142 of the aforesaid amended rules and regulations; and all other terms shall have the same meaning as when used in the amended marketing agreement and order.

(Sec. 5, 49 Stat. 753, as amended; 7 U. S. C. 608c)

Dated: May 23, 1955.

[SEAL] S. R. SMITH,
Director, Fruit and Vegetable Division, Agricultural Marketing Service.

[Plum Order 3]

PART 936—FRESH BARTLETT PEARS, PLUMS, AND ELBERTA PEACHES GROWN IN CALIFORNIA

REGULATION BY GRADES AND SIZES

§ 936.500 *Plum Order 3*—(a) *Findings.* (1) Pursuant to the marketing agreement, as amended, and Order No. 36, as amended (7 CFR Part 936), regulating the handling of fresh Bartlett pears, plums, and Elberta peaches grown in the State of California, effective under the applicable provisions of the Agricultural Marketing Agreement Act of 1937, as amended, and upon the basis of the recommendations of the Plum Commodity Committee, established under the aforesaid amended marketing agreement and order, and upon other available information, it is hereby found that the limitation of shipments of plums of the variety hereinafter set forth, and in the manner herein provided, will tend to effectuate the declared policy of the act.

(2) It is hereby further found that it is impracticable and contrary to the public interest to give preliminary notice, engage in public rule making procedure, and postpone the effective date of this section until 30 days after publication thereof in the FEDERAL REGISTER (60 Stat. 237; 5 U. S. C. 1001 et seq.) in that, as hereinafter set forth, the time intervening between the date when information upon which this section is based became available and the time when this section must become effective in order to effectuate the declared policy of the act is insufficient; a reasonable time is permitted, under the circumstances, for preparation for such effective time; and good cause exists for making the provisions hereof effective not later than June 1, 1955. A reasonable determination as to the supply of, and the demand for, such plums must await the development of the crop thereof, and adequate information thereon was not available to the Plum Commodity Committee until May 18, 1955; recommendation as to the need for, and the extent of, regulation of shipments of such plums was made at the meeting of said committee on May 18, 1955, after consideration of all available information relative to the supply and demand conditions for such plums, at which time the recommendation and supporting information was submitted to the Department; shipments of the current crop of such plums are expected to begin on or about June 7, 1955, and this section should be applicable to all such shipments of such plums in order to effectuate the declared policy of the act; and compliance with the provisions of this section will not require of handlers any preparation therefor which cannot be completed by the effective time hereof.

(b) *Order.* (1) During the period beginning at 12:01 a. m., P. s. t., June 1, 1955, and ending at 12:01 a. m., P. s. t., November 1, 1955, no shipper shall ship from any shipping point during any day any package or container of Formosa plums unless:

(i) Such plums grade at least U. S. No. 1 with a total tolerance of ten (10) percent for defects not considered serious damage in addition to the tolerances permitted for such grade; and

(ii) Such plums are of a size not smaller than a size that will pack a 4 x 5 standard pack.

(2) Section 936.143 of the rules and regulations, as amended (18 F. R. 712, 2839; 19 F. R. 425), sets forth the requirements with respect to the inspection and certification of shipments of fruit covered by this section. Such section also prescribes the conditions which must be met if any shipment is to be made without prior inspection and certification. Notwithstanding that shipments may be made without inspection and certification, each shipper shall comply with all grade and size regulations applicable to the respective shipment.

(3) As used in this section, "U. S. No. 1" and "serious damage" shall have the same meaning as set forth in the revised United States Standards for plums and prunes (fresh) (§§ 51.1520 to 51.1530 of this title); "standard pack" shall have the applicable meanings of the terms "standard pack" and "equivalent size" as when used in § 936.142 of the aforesaid amended rules and regulations; and all other terms shall have the same meaning as when used in the amended marketing agreement and order.

(Sec. 5, 49 Stat. 753, as amended; 7 U. S. C. 608c)

Dated: May 23, 1955.

[Plum Order 4]

PART 936—FRESH BARTLETT PEARS, PLUMS, AND ELBERTA PEACHES GROWN IN CALIFORNIA

REGULATION BY GRADES AND SIZES

§ 936.501 *Plum Order 4*—(a) *Findings.* (1) Pursuant to the marketing agreement, as amended, and Order No. 36, as amended (7 CFR Part 936), regulating the handling of fresh Bartlett pears, plums, and Elberta peaches grown in the State of California, effective under the applicable provisions of the Agriculture Marketing Agreement Act of 1937, as amended, and upon the basis of the recommendations of the Plum Commodity Committee, established under the aforesaid amended marketing agreement and order, and upon other available information, it is hereby found that the limitation of shipments of plums of the variety hereinafter set forth, and in the manner herein provided, will tend to effectuate the declared policy of the act.

(2) It is hereby further found that it is impracticable and contrary to the public interest to give preliminary notice, engage in public rule making procedure, and postpone the effective date of this section until 30 days after publication thereof in the FEDERAL REGISTER (60 Stat. 237; 5 U. S. C. 1001 et seq.) in that, as hereinafter set forth, the time intervening between the date when information upon which this section is based became available and the time when this section must become effective in order to effectuate the declared policy of the act is insufficient; a reasonable time is permitted, under the circumstances, for preparation for such effective time; and good cause exists for making the provisions hereof effective not later than June 1, 1955. A reasonable determination as to the supply of, and the demand for, such plums must await the development of the crop thereof, and adequate information thereon was not available to the Plum Commodity Committee until May 18, 1955; recommendation as to the need for, and the extent of, regulation of shipments of such plums was made at the meeting of said committee on May 18, 1955, after consideration of all available information relative to the supply and demand conditions for such plums, at which time the recommendation and supporting information was submitted to the Department; shipments of the current crop of such plums are expected to begin on or about June 7, 1955, and this section should be applicable to all such shipments of such plums in order to effectuate the declared policy of the act; and compliance with the provisions of this section will not require of handlers any preparation therefor which cannot be completed by the effective time hereof.

(b) *Order.* (1) During the period beginning at 12:01 a. m., P. s. t., June 1, 1955, and ending at 12:01 a. m., P. s. t., November 1, 1955, no shipper shall ship from any shipping point during any day any package or container of Climax plums unless:

(i) Such plums grade at least U. S. No. 1 with a total tolerance of fifteen (15) percent for defects not considered serious damage in addition to the tolerances permitted for such grade; and

(ii) Such plums are of a size not smaller than a size that will pack a 4 x 5 standard pack.

(2) Section 936.143 of the rules and regulations, as amended (18 F. R. 712, 2839; 19 F. R. 425), sets forth the requirements with respect to the inspection and certification of shipments of fruit covered by this section. Such section also prescribes the conditions which must be met if any shipment is to be made without prior inspection and certification. Notwithstanding that shipments may be made without inspection and certification, each shipper shall comply with all grade and size regulations applicable to the respective shipment.

(3) As used in this section, "U. S. No. 1" and "serious damage" shall have the same meaning as set forth in the revised United States Standards for plums and prunes (fresh) (§§ 51.1520 to 51.1530 of this title); "standard pack" shall have the applicable meanings of the terms "standard pack" and "equivalent size" as when used in § 936.142 of the aforesaid amended rules and regulations; and all other terms shall have the same meaning as when used in the amended marketing agreement and order.

(Sec. 5, 49 Stat. 753, as amended; 7 U. S. C. 608c)

Dated: May 23, 1955.

TITLE 14—CIVIL AVIATION

Chapter I—Civil Aeronautics Board

Subchapter A—Civil Air Regulations

[Supp. 21]

PART 41—CERTIFICATION AND OPERATION RULES FOR SCHEDULED AIR CARRIER OPERATIONS OUTSIDE THE CONTINENTAL LIMITS OF THE UNITED STATES

AVERAGE ADULT PASSENGER WEIGHT; CORRECTION

The purpose of this supplement is to correct 19 F. R. 7342, published on November 13, 1954. The date indicating the beginning of the calendar period during which 165 pounds may be used as an average adult passenger weight was inadvertently omitted from § 41.41-1. Section 41.41-1 (e) (2) is corrected by adding the date "November 1" between the words "period" and "through."

(Sec. 205, 52 Stat. 984, 49 U. S. C. 425. Interpret or apply secs. 601, 52 Stat. 1007, as amended; 49 U. S. C. 551)

This supplement shall become effective upon publication in the FEDERAL REGISTER.

[SEAL] S. A. KEMP,
Acting Administrator of Civil Aeronautics.

TITLE 16—COMMERCIAL PRACTICES

Chapter I—Federal Trade Commission

[Docket 6251]

PART 13—DIGEST OF CEASE AND DESIST ORDERS

SOUTHERN NATIONAL INSURANCE CO.

Subpart—*Advertising falsely or misleadingly:* § 13.260 *Terms and conditions;* § 13.275 *Undertakings, in general.* Subpart—*Offering unfair, improper and deceptive inducements to purchase or deal:* § 13.2080 *Terms and conditions;* § 13.2090 *Undertakings, in general.* In connection with the offering for sale, sale, and distribution in commerce, of any accident, health, hospital, or surgical insurance policy, representing, directly or by implication: (1) That said policy may be continued in effect indefinitely or for any period of time, when, in fact, said policy provides that it may be cancelled by respondent or terminated under any circumstances over which insured has no control, during the period of time represented; (2) that no medical examination is required or that applicant's health is not a factor in securing insurance, unless the representation is clearly and conspicuously limited in immediate connection therewith to insurance on claims not caused by previous conditions of health of the insured; (3) that said policy provides for indemnification to insured in cases of sickness or accident generally or in any or all cases of sickness or accident, when such is not the fact; or (4) that said policy will pay in full or in any specified

amount or will pay up to any specified amount for any medical, surgical, or hospital service unless the policy provides that the actual cost to the insured for that service will be paid in all cases up to the amount represented; prohibited.

(Sec. 6, 38 Stat. 721; 15 U. S. C. 46. Interpret or apply sec. 5, 38 Stat. 719, as amended; 15 U. S. C. 45) [Cease and desist order, Southern National Insurance Company, Little Rock, Ark., Docket 6251, April 14, 1955]

This proceeding was heard by J. Earl Cox, hearing examiner, upon the complaint of the Commission which charged respondent with misrepresenting various provisions of the insurance policies which it issued, and upon a Stipulation for Consent Order which was entered into between said respondent and counsel supporting the complaint, and was approved by the Director and Assistant Director of the Commission's Bureau of Litigation and transmitted to the hearing examiner.

Said stipulation provided, among other things, that respondent admitted all the jurisdictional allegations set forth in the complaint and that the record therein might be taken as if findings of jurisdictional facts had been made in accordance with such allegations; that the stipulation, together with the complaint, should constitute the entire record in the matter; that the complaint might be used in construing the order agreed upon, which might be altered, modified, or set aside in the manner provided by statute for orders of the Commission; that the signing of the stipulation was for settlement purposes only and did not constitute an admission by respondent that it had violated the law as alleged in the complaint; and that the order provided for in the stipulation and to be included in the decision should have the same force and effect as if made after a full hearing, presentation of evidence and findings and conclusions thereon.

All parties further waived the filing of answer, hearings before a hearing examiner or the Commission, the making of findings of fact or conclusions of law by the hearing examiner or the Commission, the filing of exceptions and oral argument before the Commission, and all further and other procedure before the hearing examiner and the Commission to which respondent might be entitled under the Federal Trade Commission Act or the rules of the Commission, including any and all right, power, or privilege to challenge or contest the validity of the order entered in accordance with the stipulation.

Thereafter said hearing examiner made his initial decision in which he set forth the aforesaid matters, found that the order agreed upon conformed in substance to that contained in the notice accompanying the complaint, and disposed of all the issues raised therein, accordingly accepted the Stipulation for Consent Order, found the proceeding to be in the public interest, and issued his order to cease and desist.

Thereafter said initial decision, including said order, as announced and decreed by "Decision of the Commission and Order to File Report of Compliance", dated April 14, 1955, became, on that date, pursuant to Rule XXII of the Commission's rules of practice, the decision of the Commission.

Said order to cease and desist is as follows:

It is ordered, That respondent Southern National Insurance Company, a corporation, and its officers, agents, representatives and employees, directly or through any corporate or other device, in connection with the offering for sale, sale and distribution in commerce, as "commerce" is defined in the Federal Trade Commission Act, of any accident, health, hospital or surgical insurance policy, do forthwith cease and desist from representing, directly or by implication:

1. That said policy may be continued in effect indefinitely or for any period of time, when, in fact, said policy provides that it may be cancelled by respondent or terminated under any circumstances over which insured has no control, during the period of time represented;

2. That no medical examination is required or that applicant's health is not a factor in securing insurance, unless the representation is clearly and conspicuously limited in immediate connection therewith to insurance on claims not caused by previous conditions of health of the insured;

3. That said policy provides for indemnification to insured in cases of sickness or accident generally or in any or all cases of sickness or accident, when such is not the fact;

4. That said policy will pay in full or in any specified amount or will pay up to any specified amount for any medical, surgical or hospital service unless the policy provides that the actual cost to the insured for that service will be paid in all cases up to the amount represented.

By said "Decision of the Commission," etc., report of compliance was required as follows:

It is ordered, That respondent Southern National Insurance Company, a corporation, shall, within sixty (60) days after service upon it of this order, file with the Commission a report in writing setting forth in detail the manner and form in which it has complied with the order to cease and desist.

Issued: April 14, 1955.

By the Commission.

[SEAL] ROBERT M. PARRISH, *Secretary.*

TITLE 19—CUSTOMS DUTIES

Chapter I—Bureau of Customs, Department of the Treasury

[T. D. 53804]

PART 3—DOCUMENTATION OF VESSELS

YACHT PRIVILEGES AND OBLIGATIONS

T. D. 53606, approved September 28, 1954 (19 F. R. 6375, amended certain sections of the customs regulations in view of changes in existing law made by section 501 of the Customs Simplification Act of 1954 (68 Stat. 1140), relating to entry, clearance, and manifesting requirements for certain yachts and undocumented American pleasure vessels. However, § 3.53 (c) of the customs regulations, requiring entry at the customhouse on return of a yacht to the United States, was not amended through an inadvertence.

Section 3.53 (c) is therefore amended to read as follows:

(c) On the return to the United States of any yacht so commissioned, such commission shall be surrendered to the customs officer to whom the required report of arrival is made.

(R. S. 161, sec. 624, 46 Stat. 759, sec. 2, 23 Stat. 118, as amended; 5 U. S. C. 22, 19 U. S. C. 1624, 46 U. S. C. 2. Interprets or applies secs. 433, 441, 46 Stat. 711, 712, as amended, R. S. 4217, as amended; 19 U. S. C. 1433, 1441, 46 U. S. C. 105)

[SEAL] D. B. STRUBINGER, *Acting Commissioner of Customs.*

Approved: May 19, 1955.

H. CHAPMAN ROSE, *Acting Secretary of the Treasury.*

TITLE 33—NAVIGATION AND NAVIGABLE WATERS

Chapter II—Corps of Engineers, Department of the Army

PART 203—BRIDGE REGULATIONS

APPOQUINIMINK RIVER, DEL.; NIAGARA RIVER, N. Y.

1. Pursuant to the provisions of section 5 of the River and Harbor Act of August 18, 1894 (28 Stat. 362; 33 U. S. C. 499), § 203.236 is hereby prescribed to govern the operation of the Delaware State Highway Department bridge across Appoquinimink River at Fennimores, Delaware, as follows:

§ 203.236 *Appoquinimink River, Del.; Delaware State Highway Department bridge at Fennimores, Del.* (a) The owner of this bridge will not be required to keep a draw tender in constant attendance.

(b) Whenever a vessel unable to pass under the closed bridge desires to pass through the draw, at least 24 hours' advance notice of the time the opening is required shall be given to the authorized representative of the owner of the bridge.

(c) Upon receipt of such advance notice, the authorized representative shall arrange for the prompt opening of the draw at the time specified in the notice for the passage of the vessel.

(d) The owner of the bridge shall keep conspicuously posted on both the upstream and downstream sides of the bridge, in such manner that it can easily be read at any time, a copy of these regulations together with a notice stating exactly how the representative specified in paragraph (b) of this section may be reached.

(e) The operating machinery of the draw shall be maintained in a serviceable condition, and the draw shall be opened and closed at intervals frequent enough to make certain that the machinery is in proper order for satisfactory operation.

2. Pursuant to the provisions of section 5 of the River and Harbor Act of August 18, 1894 (28 Stat. 362; 33 U. S. C. 499), § 203.708 governing the operation of the Canadian National Railways bridge between Buffalo, New York, and Fort Erie, Ontario, is hereby amended by the addition of a paragraph advising navigation that the easterly channel is closed to navigation when the draw is open and all vessels shall proceed through the westerly opening of the bridge draw, as follows:

§ 203.708 *Niagara River; Canadian National Railway bridge (International Bridge) between Buffalo, New York, and Fort Erie, Ontario, Canada.* (a) The owner of or agency controlling the bridge will not be required to keep a draw tender in constant attendance.

(b) Whenever a vessel unable to pass under the closed bridge desires to pass through the draw, at least 24 hours' advance notice of the time the opening is required shall be given to the authorized representative of the owner or agency controlling the bridge.

(c) Upon receipt of such advance notice, the said authorized representative shall arrange for the prompt opening of the draw at the time specified in the notice for the passage of the vessel.

(d) Whenever the bridge is opened for the passage of a vessel, the navigator of such vessel shall fix his course so as to proceed through the westerly opening of the bridge draw.

(e) The operating machinery of the draw shall be maintained in a serviceable condition, and the draw shall be opened and closed at intervals frequent enough to make certain that the machinery is in proper order for satisfactory operation.

[Regs., May 9 and May 19, 1955, 823.01-ENGWO] (Sec. 5, 28 Stat. 362; 33 U. S. C. 499)

[SEAL] JOHN A. KLEIN, *Major General, U. S. Army, The Adjutant General.*

[F. R. Doc. 55-4241; Filed, May 25, 1955; 8:45 a. m.]

PART 203—BRIDGE REGULATIONS

TURNER CREEK, TYBEE (BULL) RIVER, LAZARETTO CREEK, AND WILMINGTON RIVER, GA., AND NECHES RIVER, TEX.

1. Pursuant to the provisions of section 5 of the River and Harbor Act of August 18, 1894 (28 Stat. 362; 33 U. S. C. 499), § 203.404 governing the operation of State Highway Department of Georgia highway drawbridges across Turner Creek, Tybee (Bull) River, and Lazaretto Creek on U. S. Route 80 between Thunderbolt and Savannah Beach, Georgia, is hereby amended to relieve existing hazards resulting from congestion of summer traffic, effective on publication in the FEDERAL REGISTER due to the necessity for effective measures at the earliest possible date, as follows:

§ 203.404 *Turner Creek, Tybee (Bull) River, and Lazarreto Creek, Ga.; highway bridges on U. S. Highway 80 between Savannah Beach and Thunderbolt, Ga.* (a) The owner or agency controlling the above described bridges may keep the drawspans closed to navigation between 7:00 a. m. and 10:00 a. m., and between 4:00 p. m. and 7:00 p. m., except on the hour, when the bridges shall be opened to allow all accumulated vessels to pass, with the exception that on Saturdays, Sundays, and holidays, during the period 1 April to 30 September, both dates inclusive, the drawspans will remain closed to navigation between 7:00 a. m. and 10:00 p. m., except on the hour, when the bridges shall be opened to allow all accumulated vessels to pass.

(b) The draws shall be opened at any time to allow the passage of a tow, common carrier, Air Force Crash Boat, or vessel in distress.

(c) The owner of or agency controlling the bridges shall keep a copy of these regulations conspicuously posted on both the upstream and downstream sides of the bridges in such manner that it can easily be read at any time.

[Regs., May 10, 1955, 823.01-ENGWO] (Sec. 5, 28 Stat. 362; 33 U. S. C. 499)

2. Pursuant to the provisions of section 5 of the River and Harbor Act of August 18, 1894 (28 Stat. 362; 33 U. S. C. 499), § 203.405 governing the operation of the swing highway bridge across Wilmington River at Thunderbolt, Georgia, is hereby amended, effective on publication in the FEDERAL REGISTER due to existing hazards resulting from congestion of summer traffic, as follows:

§ 203.405 *Wilmington River, Ga.; swing highway bridge on U. S. Route 80, at Thunderbolt, Ga.* (a) During the period 1 May 1955 through 30 September 1955 the owner of or agency controlling this bridge will not be required to open the drawspan between the hours of 7:00 a. m. and 10:00 p. m., on Saturdays, Sundays, and holidays, except on the hour, when the bridge shall be opened to allow all accumulated vessels to pass.

(b) The draw shall be opened at any time for the passage of a tow, common carrier, or Air Force Crash Boat, or a vessel in distress.

(c) The owner of or agency controlling this bridge shall place appropriate signs, indicating the nature of the regulations, at such locations upstream and downstream from the bridge and in such manner as may be directed by the District Engineer, Savannah District, Corps of Engineers, Savannah, Georgia.

[Regs., May 10, 1955, 823.01-ENGWO] (Sec. 5, 29 Stat. 362; 33 U. S. C. 499)

3. Pursuant to the provisions of section 5 of the River and Harbor Act of August 18, 1894 (28 Stat. 362; 33 U. S. C. 499), § 203.523 governing the operation of the Texas Highway Department drawbridge across the Neches River at Beaumont, Texas, is hereby revoked, the bridge having been replaced by a fixed bridge.

§ 203.523 *Neches River at Beaumont, Tex.; bridge (highway) at Ash Street.* [Revoked]

[Regs., April 25, 1955, 823.01 (Neches River, Tex.)-ENGWO] (Sec. 5, 28 Stat. 362; 33 U. S. C. 499)

[SEAL] JOHN A. KLEIN, *Major General, U. S. Army, The Adjutant General.*

TITLE 47—TELECOMMUNICATION

Chapter I—Federal Communications Commission

[Docket No. 11020; FCC 55-591]

[Rules Amdts. 3-45, SGEP-AM-21]

PART 3—RADIO BROADCAST SERVICES

MISCELLANEOUS AMENDMENTS

In the matter of amendment of Part 3 of the Commission's rules and regulations (Radio Broadcast Services) and the Standards of Good Engineering Practice Concerning Standard Broadcast Stations, Docket No. 11020.

1. The Commission has under consideration its notice of proposed rule making issued on May 6, 1954 (FCC 54-588), and published in the FEDERAL REGISTER on May 12, 1954 (19 F. R. 2734), proposing to amend Part 3 of its rules and regulations governing the Broadcast Service and the Standards of Good Engineering Practice Concerning Standard Broadcast Stations.

2. The purpose of this proceeding is to revise certain of the Commission's rules relating to the broadcast service in order to bring them up to date and, where appropriate, to shift certain of the provisions now in the Standards to the rules. Interested parties have been afforded the opportunity of submitting their comments to the Commission with respect to the proposed changes, and we have afforded such comments careful consideration in reaching our final Report and Order in this proceeding. The comments filed by the various parties in the proceeding are discussed below.

3. The second paragraph appearing after Table V in section 1 of the AM Standards deals with the minimum separation of standard broadcast stations. The Commission stated in its notice of proposed rule making issued in this proceeding that it believed the material contained in this paragraph should more appropriately appear in the rules and therefore proposed to delete this paragraph from the Standards and to add it, with editorial changes, as § 3.37 in the rules, to read as follows:

§ 3.37 *Minimum separation between stations.* A license will not be granted for the operation of a station on a frequency of ±30 kc from that of another station, if the area enclosed by the 25 mv/m ground wave contours of the two stations overlap, nor will a license be granted for the operation of a station on a frequency of ±20 kc or ±10 kc from the frequency of another station if the area enclosed by the 25 mv/m ground wave contour of either one overlaps the area enclosed by the 2 mv/m ground wave contour of the other.

4. John H. Poole, tr/as John Poole Broadcasting Company, filed comments directed to this proposal. Mr. Poole urges that the Commission's purpose would be better served if the proposed rule were modified by substituting the words "construction permit" for the term "license" as used in the rule. He notes that the proposed section would contain substantially the same provisions which now appear in the Standards and that the Commission made clear in its notice of proposed rule making that the purpose of the rule was not to modify the Commission's policy; rather it was merely intended to transfer certain provisions relating to the minimum separations of stations from the Standards to the rules. Mr. Poole submits, however, that since the Standards were established as a flexible guide to assist the Commission in the allocation of broadcast stations, transferring the provisions to the rules constitutes a significant change. He contends that even though some provisions of the Standards have been strictly applied by the Commission, other provisions in the Standards have been deviated from in numerous instances; while the rules, on the other hand, are generally regarded as rigid requirements to be adhered to in all but very special and extraordinary circumstances. Mr. Poole asserts that while the minimum separation provisions of the Standards have only been applied in the construction permit stage, § 3.37 as proposed would also be applicable at the license and renewal stages. He contends that there are existing licensed operations which do not conform to the terms of the proposed rule and that, accordingly, adoption of the rule would cast doubt on the validity of such authorizations. Mr. Poole argues that while the Commission may not intend to apply the rule to such existing situations, the mere existence of the rule would cause uncertainty. Mr. Poole notes that in interpreting the Standards, the Commission has made it clear that it realizes that interference will not necessarily exist in all cases where there is 25 mv/m overlap. He argues, therefore, that the overlap requirements have been designed to avoid interference problems which may but do not necessarily always arise when adjacent-channel stations are assigned in the same general area, and urges that such a precautionary rule must be applied strictly only at the construction permit stage. He argues, further, that where an existing, previously authorized overlap situation is discovered, the matter should be considered in the light of the particular facts of the case. He suggests that in many instances the imposition of a condition in the license that the station must satisfy all complaints of interference due to overlap would be a sufficient precaution. Mr. Poole concedes that in some cases the interference might be so severe as to require modification of the permits or licenses involved. In light of the foregoing, Mr. Poole suggests that the proposed Section be revised to specify "construction permit" rather than "license".

5. The Commission in shifting certain provisions from the Standards to the rules in this proceeding is not intending to modify its allocation policy and practices. The Commission has merely proposed to transfer requirements with regard to minimum separation of stations from the Standards to the rules since it is of the view that provisions such as these more appropriately should appear in the rules. The suggestions advanced by Mr. Poole, however, are directed toward the Commission's allocation policy in connection with the implementation of its minimum separation requirements. In shifting these provisions to the rules the Commission is not changing their manner of implementation. We do not believe that the public interest would be served by adopting the changes in wording suggested by Mr. Poole at this time.

6. Section 2B of the Standards deals with field intensity measurements necessary to establish performance of directional antennas. The Commission has proposed in this proceeding to incorporate the provisions of section 2B of the Standards into the rules as § 3.151. In this connection, the Commission has also proposed that photographs of monitoring points be submitted as an aid to both the licensee and the Commission in identifying such points in the future, and it was proposed that the various directions in which radial measurements are to be made be specified. Mid-America Broadcasting Corporation (WKLO), Louisville, Kentucky, and Salt Lake City Broadcasting Company, Inc. (KALL), Salt Lake City, Utah, filed comments directed to § 3.151 (a) (3), as proposed, which relates to the location and description of the monitoring points for stations using directional antennas. Mid-America and Salt Lake City Broadcasting Company suggests that in addition to furnishing photographs of the monitoring points, a rough sketch be furnished depicting the approach to each monitoring point. They point out that photographs might be useless in some instances in view of a lack of outstanding background identification of objects within the range of the camera. In its experience in this field the Commission has discovered that a word description of a location of a monitoring point may in many cases be insufficient for purposes of locating the exact location of the monitoring point at some future date. The Commission, therefore, in its notice of proposed rule making proposed to require that photographs of the monitoring points be submitted with the license application. The Commission is also of the view that a further requirement such as suggested—a rough sketch or map depicting the route of approach to the monitoring point—would be of assistance in the future identification of the monitoring points both by the licensees and the Commission. In this connection, it should be pointed out that a number of licensees have already submitted this type of information in connection with their license applications. We have therefore adopted the suggested changes of WKLO and KALL and have modified § 3.151 to reflect their proposal.

7. Section 14 of the AM Standards and section 13 of the FM Standards set forth requirements for Type Approval of transmitters. The Commission advised in its notice that instead of requiring type approval it was proposing instead that transmitters, including television transmitters, would be accepted for licensing by the Commission. It was noted that Type Acceptance was a form of approval given by the Commission based on an examination of certified test data submitted by the manufacturer of the transmitter or by a licensee employing the transmitter. The Commission noted that the general matter of Type Acceptance is the subject of proposed rule making in Docket 10798. The Commission proposed to delete section 14 of the AM Standards and Section 13 of the FM Standards and to add to Part 3 of the rules new §§ 3.48, 3.250, 3.550, and 3.640 dealing with acceptability of transmitters for licensing.

8. Comments were filed by the Radio Corporation of American in connection with the above proposed new Sections dealing with the acceptability of broadcast transmitters for licensing. RCA notes that the proposed rules include provision for the Type Acceptance of broadcast transmitters and that transmitters accepted under these provisions would be included in a published list. RCA notes, also, that the proposed rules would provide that prospective licensees specifying transmitters not included on the list could submit data to the Commission in order to obtain conditional Type Acceptance upon applying for a construction permit, but that the rules would make no provision for transmitter manufacturers themselves to seek such conditional acceptance prior to obtaining Type Acceptance. RCA therefore urges that manufacturers, as well as prospective licensees, be permitted to submit data in order to obtain conditional acceptance of transmitters. By such a provision, RCA submits, prospective licensees would be relieved of the burden of filing voluminous transmitter data with their applications and the Commission would be relieved of the task of repeated examination of similar material.

9. In proposing the new provisions in the Rules dealing with the acceptance for licensing of transmitters not on the accepted list, the Commission intended to provide for the acceptance of "composite" transmitters. The suggestion advanced by RCA comports with the present practice followed by the Commission, and we believe that it would be appropriate to modify the sections dealing with Type Acceptance of transmitters for licensing to permit a prospective licensee to specify a transmitter not on the Type Accepted List but for which Type Acceptance has been requested by the manufacturer. In such a case, the technical details of transmitters need not be submitted with the construction permit. However, the submission and acceptance of equipment performance measurements would be required prior to the granting of a license. A manufacturer that has submitted a request for Type Acceptance may defer the submission of the required performance data until such time as the measurements may be taken at an actual installation. However, before such a transmitter may be placed on the Type Accepted List, the manufacturer must submit the required measurements. Such measurements may be the same as those furnished by the permittee but must be filed separately from those furnished with the license application.

10. The Association of Federal Communications Consulting Engineers (the Association) filed comments directed to several of the proposed rules, opposing certain of them. The Association states that, as a general matter, it is opposed to any proposal which would result in substituting "experienced engineering judgment pertaining to a specific problem [by] a rule." The Association submits that rules cannot be drafted specifying how certain engineering tests shall be carried out and opposes the transfer of a defined procedure from the Standards—intended to be a medium expressing accepted engineering practice—to the rules, which are intended as rigid requirements.

11. It should be understood, in the first place, that the Standards of Good Engineering Practice are a part of the rules. The Standards, since the adoption of the Administrative Procedure Act, have been amended only in appropriate rule making proceedings. Certain Standards, in light of their nature, have been applied as rigidly as rules; while others have been deviated from as the public interest required in individual cases. Thus, it is the nature of the pertinent provisions of the Standards, rather than the fact that the provisions are set out in the Standards, which determines the flexibility with which the provisions are to be applied by the Commission. We see no merit, therefore, to the contentions advanced by the Association with respect to shifting certain provisions of the Standards to the rules. Those portions of the Standards which are susceptible to the exercise of engineering judgment, moreover, are being retained in the Standards.

12. The Association agrees that the provisions of the Standards relating to separations of stations on adjacent channels (proposed § 3.37) should be placed in the rules. It recommends, however, that the prohibition against the granting of such applications be eased in those cases where the stations involved do not serve the same communities.

13. The reason for the rule is that a determination of interference solely in accordance with the appropriate interference ratio does not realistically portray the potential interference that might result in such a case.[1] The Commission has held in all cases that the prohibition is not limited to stations in the same city or in very close proximity. The recommendation of the Association that the overlap rule be eased when the stations concerned do not serve the same community would be extremely difficult to implement since it would require determining in each case what constituted the same community. We do not believe that this suggestion has merit and it is not being adopted.

14. The Association states that it favors the adoption of "acceptability of broadcast transmitters for licensing" rule, provided the Commission does not require that transmitter performance measurements be submitted in connection with the license application for standard broadcast stations. The Type Acceptance rule which we have proposed provides that applicants for standard broadcast station licenses utilizing transmitters on the Accepted List would not be required to submit performance measurements with the license application. Applicants proposing to employ transmitters not on the Type Accepted List would be required to submit equipment performance measurements with their license applications. The present AM and FM rules require that equipment performance measurements be made at yearly intervals, whether or not the transmitter is on the Type Accepted List.

15. Section 3.54 of the rules relates to direct measurement of operating power and refers in a footnote to section 7 of the Standards. In its Notice the Commission proposes, for the sake of compactness and convenience, to transfer the provisions of section 7 from the Standards to § 3.54 of the rules. The Association contends that § 3.54 as proposed continues an inconsistency now present in the Standards since from 10 to 12 antenna resistance measurements for non-directional antenna are required to be made covering a band of frequencies 50 to 60 kc wide, whereas resistance measurements on a directional antenna system are required to be made at 5, 10, 15, and 20 kc on each side of the carrier frequency. The Commission believes that the Association's comment has merit and that the inconsistency should be eliminated. We have therefore changed the rule with respect to non-directional antennas to require that measurements be made over the same group of frequencies each side of the authorized carrier frequency for both directional and non-directional antennas.

16. Section 3 of the Standards sets forth the data required to be filed with applications involving directional antenna systems. In its Notice the Commission proposed that the provisions of this section be shifted to the rules as § 3.150. The Association in its comments suggests that in connection with the data required with applications for directional antennas, the word "exact" be deleted from the showing required for calculated horizontal patterns because the exact location of the minima in many arrays is not always susceptible of calculation. The Commission agrees that the term "exact" should be deleted from § 3.150 (b) (5) as suggested by the Association and this provision has been revised accordingly.

17. The Association urges, further, that if in submitting calculations with respect to directional antennas, the formulas employed are also required to be submitted, it should not be necessary to furnish the detailed arithmetic employed in computing the patterns. It is the Commission's intent to require the filing of only the tabulation of the values used in plotting the patterns since other portions of the rules provide for the submitting of sample calculations. The Commission has re-worded this section in order to make clear that only the tabulations of the results of the final calculated data used in plotting the patterns are required to be furnished.

18. The Association suggests in connection with proposed § 3.150 (c) that the Commission make clear that the minor lobe details between the 5 degree elevation intervals need not be submitted since such a requirement would not be consistent with the use of the highest value of the field in the interval to calculate interference as set forth in section 1, Annex 11 of the Standards with respect to the use of figure 6A. As the Commission states in its proposed rule, the minor lobe and null details occurring between the 5 degree intervals need not be calculated or submitted, since the calculated value of the field intensity in any portion of the 5 degree interval would, in most instances, vary only slightly from the value obtained from a curve drawn through the calculated value for each 5 degree interval, and such deviations will not be considered in allocation problems. We believe that such minor nulls and lobes less than 5 degrees broad and appearing between the 5 degree intervals are of insufficient significance to be considered in station allocation matters.

19. Section 2B of the Standards deals with field intensity measurements to establish performance of directional antennas. In its Notice the Commission proposed to delete section 2B from the Standards and to incorporate its provisions in the rules as § 3.151. The Association urges that the requirements for approving performance of directional antennas should not be in the rules since such a proof requires application of considerable engineering judgment not permitted by the precise, rigid requirements inherent in rules. In this connection it should be noted that § 3.33 of the rules presently requires the filing of proof of performance of directional antennas and refers to section 2B of the Standards. This section of the Standards, which we now propose to incorporate with minor changes into the rules as § 3.151, sets forth only the specific data that is to be submitted and does not treat the manner of taking measurements and analyzing the results of such measurements. These matters are covered by section 2A of the Standards. After such judgment has been made and the final results determined, however, the submission of the data requested in § 3.151 as proposed is necessary in order to determine that the provisions of the construction permit have been complied with and that the directional antenna is operating properly. We see no basis, therefore, for re-

[1] Such as cross modulation, etc. See "Report of the Commission, In the matter of amendment of Standards of Good Engineering Practice Concerning Standard Broadcast Stations" (Docket No. 8089) dated June 7, 1947.

taining the provisions of section 2B in the Standards and believe that these provisions should appropriately be set forth in the rules.

20. The Association objects to the proposed requirement in § 3.151 (b) which would provide for the submission of the measured 25, 10, and 5 mv/m field intensity contours in connection with the submission of data relating to performance of directional antennas. The Association submits that the requirement to determine the location of certain field intensity contours does not relate to the determination of radiated field. Concededly, the location of the 25, 10, and 5 mv/m contours is not related to the primary proof of performance of directional antennas. The Commission's experience in this field indicates that in certain cases, such as the instance where a station's operation is limited by interference within its 5 mv/m contour, no useful purpose would be served by the delineation of this contour. We are of the view, however, that the nighttime interference-free contour should be plotted if it is encountered within the measuring distances provided for under section 2 of the Standards; and if the 25 and 5 mv/m contours are encountered in these distances and lie within the interference-free contours, they should similarly be indicated. We believe that we should retain the present requirements that measurements be made to distances in excess of 20 miles in pertinent directions when the borders of a city in which the main studio is located lie beyond this distance. With respect to daytime directional antenna measurements, it is our view that in addition to the 25 mv/m contour, only the highest field intensity contours enclosing the city need be shown when such signal intensity is greater than 5 mv/m. If, however, the 5 mv/m contour does not encompass the city, then the 5 mv/m contour must be shown together with the highest field intensity that does encompass the city. Upon further consideration of these requirements and the suggestions advanced by the Association, we have concluded that the showing of the measured 10 mv/m contour need not be plotted or submitted and the rule has been altered accordingly.

21. The Association suggests that the requirement for determining the inverse field in all minor lobes and nulls by radial measurements is not desirable. They urge that the present practice of measuring along a number of radials and filling in the gaps by cross radial measurements affords more information than that obtained with any reasonable number of measured radials. In a multielement array there might be several minor lobes and nulls, and the Commission agrees that the proposed requirement for the measurement of each null and lobe would constitute an unnecessary burden. We have therefore revised § 3.151 to provide that measurements be made on those radials specified by the instrument of authorization and on at least three radials in the major lobe and along a sufficient number of other radials necessary to establish the effective field and pattern shape. The location of other radials to establish the effective field and pattern shape is left to the discretion of the permittee.

22. The Commission's notice points out that when field intensity measurements are taken for use by parties in hearing, Section 2C of the Standards requires that detailed reports on the measurements of antenna resistance shall also be presented if the station is owned by the party on whose behalf the measurements are made. The Commission stated that it believed the submission of such data has in the past been burdensome and unnecessary and therefore proposed to eliminate this requirement. The Commission proposed to remove section 2C from the Standards and to incorporate its provisions in the rules as § 3.152. The Association suggests, however, that § 3.152 as proposed may conflict with the last sentence of paragraph 5B of the proposal to amend the Standards in Docket 8333, which appears to prohibit the establishment of contours by field intensity measurements. The Association also submits that it is unnecessary to establish the inverse field at one mile in order to establish the location of the contour. The Association recommends that § 3.152 not be adopted as proposed and that section 2C be deleted from the Standards.

23. The Commission has not yet reached its final determination in the proceedings of Docket 8333. Moreover, we see no conflict between our proposal in that proceeding and § 3.152 as proposed in the instant proceeding since this section only provides that groundwave measurements take precedence over theoretical values. The proposal in Docket 8333 which provides that interference shall be determined by the use of the groundwave versus distance curves in the Standards continues the provisions presently contained in the Standards, whereby these curves are to be used whether in conjunction with actual field intensity measurements or the theoretical conductivity values given in Figure M–3. The Association contends that field intensity measurements need not be sufficiently complete as to reveal the radiated fields in particular directions in order to afford the requisite information, i. e., the location of pertinent field intensity contours. In the allocation of standard broadcast stations the Commission has, in the past, required the submission of complete measurements, and we see no basis for modifying these requirements in this proceeding. We have considered that full field intensity data is necessary to establish not only the location of contours but to provide the basis for determining why the contours are so located. Information of this nature, which can be made available to the Commission without imposing an undue burden on the licensee, represents a useful addition to the Commission's ever-increasing fund of information relating to propagation. Without such information, for example, we would have been unable to accomplish effectively the recent revision of our Ground Conductivity Map; nor would other valuable information with respect to groundwave propagation have been made available to the Commission. We have concluded that the submission of such information serves the public interest, and that the slight burden imposed upon the stations in submitting this data is warranted.

24. In view of the foregoing, the Commission has concluded that the public interest, convenience and necessity would be served by the adoption of the amendments herein as set forth below. Authority for the adoption of the amendments is contained in sections 4 (i), 301, and 303 (b), (f), and (r) of the Communications Act of 1934, as amended.

25. *It is ordered*, That effective June 30, 1955, the Standards of Good Engineering Practice Concerning Standard Broadcast Stations and Part 3 of the Commission's rules and regulations, are amended, as set forth below.

(Sec. 4, 48 Stat. 1066 as amended; 47 U. S. C. 154. Interpret or apply secs. 301, 303, 48 Stat. 1081, 1082; 47 U. S. C. 301, 303)

Adopted: May 19, 1955.

Released: May 23, 1955.

FEDERAL COMMUNICATIONS COMMISSION,
[SEAL] MARY JANE MORRIS,
Secretary.

I. Delete from the parenthetical expression at the end of paragraph (a) of § 3.28 the expression "Sec. C".

II. Section 3.33 is amended by the deletion of the parenthetical expression at the end of paragraphs (a) and (b).

III. A new § 3.37 is added to read as follows:

§ 3.37 *Minimum separation between stations.* A license will not be granted for a station on a frequency of ±30 kc from that of another station if the area enclosed by the 25 mv/m groundwave contours of the two stations overlap, nor will a license be granted for the operation of a station on a frequency ±20 kc or ±10 kc from the frequency of another station if the area enclosed by the 25 mv/m groundwave contour of either one overlaps the area enclosed by the 2 mv/m groundwave contour of the other.

IV. Section 3.41 is amended by deleting the text preceding the table and substituting the following:

§ 3.41 *Maximum rated carrier power; tolerances.* The maximum rated carrier power of a transmitter shall be an even power step as recognized by the Commission's plan of allocation (100 watts, 250 watts, 500 watts, 1 kw., 5 kw., 10 kw., 25 kw., 50 kw.,) and shall not be less than the authorized power nor shall it be greater than the value specified in the following table:

* * * * *

V. Section 3.42 is amended by deleting paragraphs (a), (b), and (c).

VI. A new § 3.48 is added to read as follows:

§ 3.48 *Acceptability of broadcast transmitters for licensing.* (a) In order to facilitate the filing of an action on applications for station authorizations, transmitters will be accepted for licensing by the Commission under one of the following conditions:

(1) A transmitter may be Type-Accepted upon the request of any manufacturer of transmitters built in quantity by following the type acceptance procedure set forth in Part 2 of this subchapter, provided that the data and information submitted indicates that the transmitter meets the requirements of section 12 of the Standards of Good Engineering Practice Concerning Standard Broadcast Stations. If accepted, such transmitter will be included on the Commission's "Radio Equipment List, Part B, Aural Broadcast Equipment". Applicants specifying transmitters included on such a list need not submit detailed descriptions and diagrams where the correct type number is specified, provided that the equipment proposed is identical with that accepted. Copies of this list are available for inspection at the Commission's office in Washington, D. C., and at each of its field offices.

(2) An application specifying a transmitter not included on the Radio Equipment List, Part B may be accepted upon the request of a prospective licensee submitting with the application for construction permit a complete description of the transmitter, including the circuit diagram, listing of all tubes used, function of each, multiplication in each stage, plate current and voltage applied to each tube, a description of the oscillator circuit together with any devices installed for the purpose of frequency stabilization and the means of varying output power to compensate for power supply voltage variations. However, if this data has been filed with the Commission by a manufacturer in connection with a request for type acceptance, it need not be submitted with the application for construction permit but may be referred to as "on file". Measurement data for type acceptance made in accordance with subparagraph (1) of this paragraph shall be submitted with the license application.

(3) A transmitter shown on an instrument of authorization by manufacturer and type number, or as a composite, and which was in use prior to June 30, 1955 may continue to be used by the licensee, his successors or assignees, provided such transmitter continues to comply with the rules and regulations.

(b) Additional rules with respect to withdrawal of type-acceptance, modification of type-accepted equipment and limitations on the findings upon which type acceptance is based are set forth in Part 2 of this subchapter.

VII. Section 3.51 is amended to read as follows:

§ 3.51 *Operating power; how determined.* (a) Except as provided in paragraph (b) of this section, the operating power shall be determined by the direct method (the square of the antenna current times the antenna resistance at the point where the current is measured and at the operating frequency).

(b) Operating power shall be determined on a temporary basis by the indirect method:

(1) In case of an emergency where the licensed antenna system has been damaged by causes beyond the control of the licensee (see § 3.45), or (2) Pending completion of authorized changes in the antenna system, or (3) If any change is made in the antenna system or any other change is made which may affect the antenna system. (See § 3.45.)

VIII. Section 3.52 is amended to read as follows:

§ 3.52 *Operating power; indirect measurement.* (a) The operating power determined by indirect measurement from the plate input power of the last radio stage is the product of the plate voltage (Ep), the total plate current of the last radio stage (Ip), and the proper factor (F) given in paragraph (b) of this section: That is

Operating power = $Ep \times Ip \times F$

Factor (F)	Method of modulation	Maximum rated carrier power	Class of amplifier
0.70	Plate	0.1–1.0 kw.	
.80	Plate	5 kw and over	
.35	Low Level	0.1 kw and over	B
.65	Low Level	0.1 kw and over	B O [1]
.35	Grid	0.1 kw and over	

[1] All linear amplifier operation where efficiency approaches that of Class C operation.

(c) In computing operating power by the indirect method, the factor in paragraph (b) of this section shall apply in all cases, and no distinction will be recognized due to the operating power being less than the maximum rated carrier power.

IX. Section 3.53 is deleted.

X. Section 3.54 is amended to read as follows:

§ 3.54 *Operating power; direct measurement.* (a) Applications to determine the operating power by the direct method shall be made on FCC Form 302.

(b) The resistance variation method, substitution method and bridge method are acceptable methods of measuring the total antenna resistance.

(c) A determination of the resistance of an omni-directional antenna shall be made by taking a series of measurements at 5, 10, 15, and 20 kc on each side of the operating frequency. The values measured should be plotted with frequency as abscissa and resistance in ohms as ordinate and a smooth curve drawn. The point on the ordinate where this curve intersects the operating frequency gives the value of the antenna resistance.

(d) Antenna resistance for a directional antenna system shall be measured at the point of common radio frequency input to the directional antenna system. The following conditions shall obtain:

(1) The antenna shall be finally adjusted for the required pattern.

(2) The reactance at the operating frequency and at the point of measurement shall be adjusted to zero or as near thereto as practical.

(3) Suitable radio-frequency bridge or other method shall be employed to determine the resistance and reactance at the point of common radio frequency input.

(4) Resistance and reactance measurements at approximately 5, 10, 15, and 20 kc. on each side of the operating frequency shall be made. The values measured shall be plotted and the resistance at the operating frequency determined in the same manner as set forth in paragraph (c) of this section.

(5) A permanently installed antenna ammeter shall be placed in each element of the system as well as at the point of measurement of resistance.

(e) The license for a station of power of 5 kw or under which employs a directional antenna will specify the antenna resistance as 92.5 percent of that determined at the point of common input. The resistance specified for stations of a power over 5 kw will be 95 percent of that determined at the point of common input.

XI. Section 3.56 is amended by the addition of a note to paragraph (a) as follows:

NOTE: Approved modulation monitors are included on the Commission's "Radio Equipment List, Part B, Aural Broadcast Equipment". Copies of this list are available for inspection at the Commission's office in Washington, D. C. and at each of its field offices.

XII. Section 3.60 is amended by the addition of a note to paragraph (a) as follows:

NOTE: Approved frequency monitors are included on the Commission's Radio Equipment List, Part B, Aural Broadcast Equipment. Copies of this list are available for inspection at the Commission's office in Washington, D. C., and at each of its field offices.

XIII. Section 3.62 is amended by the deletion of the parenthetical expression "(See Approved Equipment)".

XIV. Footnote 17 to § 3.63 is amended by deleting the parenthetical expression at the end of the footnote.

XV. New §§ 3.150, 3.151, 3.152, 3.153 are added immediately following the undesignated centerheading which reads General Rules Applicable to Standard Broadcast Stations, to read as follows:

§ 3.150 *Data required with applications for directional antenna systems.* (a) The following engineering data shall be submitted with the application for authority to install a directional antenna:

(1) Complete description of the proposed system showing:

(i) Number of elements,

(ii) Type of each element (i. e., guyed or self-supporting, uniform cross section or tapered (specifying base width), grounded or insulated, etc.),

(iii) Complete engineering details of top loading or sectionalizing, if any,

(iv) Height of vertical lead of each element in feet (height above base insulator or base, if grounded),

(v) Overall height in feet of each element above ground,

(vi) Details including sketches of ground system for each element (length and number of radials, dimensions of ground screen, if used, and depth buried) and outlines of property,

(vii) Ratio of fields from elements (identifying elements).

(2) Calculated horizontal (ground) plane field intensity patterns for each mode of operation plotted to the largest scale possible on standard letter-size polar coordinate paper (main engraving approximately 7" x 10") using only

scale divisions and subdivisions having values of 1, 2, 2.5, or 5 times 10^{n} and showing:

(i) Inverse field intensity at 1 mile and effective field intensity (RMS).

(ii) Direction true north shall be shown at zero azimuth.

(iii) Direction and distance to each existing station with which interference may be involved. (All directions shall be determined by accurate calculation or from Lambert Conformal Conic Projection Map such as United States Coast and Geodetic Survey Map, No. 3060a, or map of equal accuracy, and all distances shall be determined by accurate calculation or from United States Albers Equal Area Projection Map scale 1/2,500,000 or map of equal accuracy. These may be obtained from the United States Coast and Geodetic Survey and the United States Department of Interior, Geological Survey.)

(iv) Orientation of array with respect to true north and time phasing of fields from elements (specifying degrees leading [+] or lagging [−]) and space phasing of elements (identifying elements). (Space phasing should be given in feet as well as in degrees.)

(v) The location of all the minima in the pattern.

(3) Calculated field intensity vs azimuth patterns for every 5 degrees of elevation through 60 degrees. These may be plotted in polar or rectangular coordinates but shall be submitted one to a page. Minor lobe and null detail occurring between the 5 degree intervals need not be submitted.

(4) Data used in computing the patterns in subparagraphs (2) and (3) of this paragraph including:

(i) Formula used for calculating the horizontal patterns, sample calculations. (Derivation of formula if other than standard is used.)

(ii) All assumptions made and basis therefor, including electrical height, current distribution and efficiency of each element, and ground conductivity.

(iii) Complete tabulation of final calculated data used in plotting patterns, including data for determination of RMS value of pattern.

(5) Values of field intensity less than 10 percent of the effective field intensity of the patterns in subparagraphs (2) and (3) of this paragraph shown on an enlarged scale.

(6) In the event actual inverse distance field intensities expected to be determined in practice (that is, the values determined from actual measurements, particularly in sharp nulls) are different from the calculated values in subparagraphs (2) and (3) of this paragraph, the maximum expected operating values (MEOV) as well as the calculated values shall be shown on both the full patterns and the enlarged sections.

(7) Any additional information required by the application form.

§ 3.151 *Field intensity measurements to establish performance of directional antennas.* (a) In addition to the information required by the license application form, the following showing must be submitted to indicate that the pattern obtained for each mode of directional operation is essentially the same as that predicted by the application and required by terms of the authorization and that any specific requirements set out are fully met:

(1) Horizontal field intensity pattern(s) showing the inverse field intensity at 1 mile and effective field intensity (RMS) as determined from field intensity measurements taken and analyzed in accordance with section 2 of the Standards of Good Engineering Practice Concerning Standard Broadcast Stations in at least the following directions:

(i) Those specified in the instrument of authorization.

(ii) In major lobes. Generally at least three radials are necessary to establish a major lobe; however, additional radials may be required.

(iii) Along sufficient number of other radials to establish the effective field. In the case of a relatively simple directional antenna pattern, approximately five radials in addition to those in subdivisions (i) and (ii) of this subparagraph are sufficient. However, when more complicated patterns are involved, that is, patterns having several or sharp lobes or nulls, measurements shall be taken along as many radials as may be necessary, to definitely establish the pattern(s).

(2) Pattern(s) plotted with direction true north as zero azimuth and showing the orientation of array with respect to true north, time and space phasing of elements and both calculated and measured parameters. (Specify degrees leading [+] or lagging [−] and space phasing in feet as well as in degrees.)

(3) Pattern(s) plotted to the largest scale possible on standard letter-size polar coordinate paper (main engraving approximately 7" x 10") using divisions and subdivisions having values of 1, 2, 2.5, or 5 times 10^{n} (no other values shall be used). All values of field intensity less than 10 percent of the RMS field intensity of the pattern shown on an enlarged scale.

(4) Complete tabulation of all data used in plotting the above pattern(s).

(5) The 25 and 5 mv/m field intensity contours and the nighttime interference-free contour, when the pattern is for nighttime operation, as well as any other contours specified by the instrument of authorization, plotted on a map which has the largest practical scale. These contours need not be shown for distances greater than 20 miles from the antenna except that the field intensity contours on the far side of the business and residential areas of the city in which the main studio is located shall be shown. When the station is limited by interference within the 5 mv/m contour the latter contour need not be shown. In the event the 5 mv/m contour includes and extends beyond the city and beyond 20 miles, the highest signal intensity contour that entirely includes the city may be plotted in lieu of the 5 mv/m contour; in the event that the 5 mv/m contour does not include the city, the contour of highest signal intensity encompassing the city shall be plotted in addition to the 5 mv/m contour.

(6) The actual field intensity measured at each monitoring point established in the various directions for which a limiting field was specified in the instrument of authorization together with accurate and detailed description of each monitoring point together with ordinary snapshots, clear and sharp, taken with the field intensity meter in its measuring position and with the camera so located that its field of view takes in as many pertinent landmarks as possible. In addition, the directions for proceeding to each monitoring point together with a rough sketch or map upon which has been indicated the most accessible approaches to the monitoring points should be submitted.

§ 3.152 *Field intensity measurements in support of applications or evidence at hearings.* In the determination of interference, groundwave field intensity measurements will take precedence over theoretical values, provided such measurements are properly taken and presented. When measurements of groundwave signal intensity are presented, they shall be sufficiently complete in accordance with section 2 of the Standards of Good Engineering Practice Concerning Standard Broadcast Stations to determine the field intensity at 1 mile in the pertinent directions for that station.

NOTE: The antenna resistance measurements required by section 2 of the Standards need not be taken or submitted.

§ 3.153 *Use of frequency and modulation monitors at auxiliary transmitters.* (a) The following shall govern the installation of approved frequency and modulation monitors at auxiliary transmitters:

(1) In case the auxiliary transmitter location is at a site different from that of the main transmitter, an approved frequency monitor shall be installed at the auxiliary transmitter, except when the frequency of the auxiliary transmitter can be monitored by means of the frequency monitor at the main transmitter.

(2) The provision that the frequency monitor may be located at the site of the main transmitter shall not relieve the obligation that the frequency deviation of the auxiliary transmitter shall be maintained within 20 cycles.

(3) Installation of an approved modulation monitor at the location of the auxiliary transmitter, when different from that of the main transmitter, is optional with the licensee. However, when it is necessary to operate the auxiliary transmitter beyond 2 calendar days, a modulation monitor shall be installed and operated at the auxiliary transmitter. The monitor (if taken from the main transmitter) shall be reinstalled at the main transmitter immediately upon resumption of operation of the main transmitter.

(4) In all cases where the auxiliary transmitter and the main transmitter have the same location, the same frequency and modulation monitor may be used for monitoring both transmitters, provided they are so arranged as to be switched readily from one transmitter to the other.

XVI. Section 3.181 is amended by deleting paragraph (b) (4) (iv).

XVII. A new § 3.250 is added to read as follows:

§ 3.250 *Acceptability of broadcast transmitters for licensing.* (a) In order to facilitate the filing of and action on applications for station authorizations, transmitters will be accepted for licensing by the Commission under one of the following conditions:

(1) A transmitter may be Type-Accepted upon the request of any manufacturer of transmitters built in quantity by following the type acceptance procedure set forth in Part 2 of this subchapter, provided that the data and information submitted indicates that the transmitter meets the requirements of section 8 of the Appendix to Subpart B. If accepted, such transmitter will be included on the Commission's "Radio Equipment List, Part B, Aural Broadcast Equipment". Applicants specifying transmitters included on such a list need not submit detailed descriptions and diagrams where the correct type number is specified, provided that the equipment proposed is identical with that accepted. Copies of this list are available for inspection at the Commission's office in Washington, D. C., and at each of its field offices.

(2) An application specifying a transmitter not included on the Radio Equipment List, Part B, may be accepted upon the request of a prospective licensee submitting with the application for construction permit a complete description of the transmittter, including the circuit diagram, listing of all tubes used, function of each, multiplication in each stage, plate current and voltage applied to each tube, a description of the oscillator circuit together with any devices installed for the purpose of frequency stabilization and the means of varying output power to compensate for power supply voltage variations. However, if this data has been filed with the Commission by a manufacturer in connection with a request for type acceptance, it need not be submitted with the application for construction permit but may be referred to as "on file". Measurement data for type acceptance made in accordance with subparagraph (1) of this paragraph shall be submitted with the license application.

(3) A transmitter shown on an instrument of authorization by manufacturer and type number, or as a composite, and which was in use prior to June 30, 1955 may continue to be used by the licensee, his successors or assignees, provided such transmitter continues to comply with the rules and regulations.

(b) Additional rules with respect to withdrawal of type-acceptance, modification of type-accepted equipment and limitations on the findings upon which type acceptance is based are set forth in Part 2 of this subchapter.

XVIII. Section 3.252 is amended by the addition to paragraph (a) of a note as follows:

NOTE: Approved frequency monitors are included on the Commission's "Radio Equipment List, Part B, Aural Broadcast Equipment". Copies of this list are available for inspection at the Commission's office in Washington, D. C., and at each of its field offices.

XIX. Section 3.253 is amended by the addition to paragraph (a) of a note as follows:

NOTE. Approved modulation monitors are included on the Commission's "Radio Equipment List, Part B. Aural Broadcast Equipment." Copies of this list are available for inspection at the Commission's office in Washington, D. C., and at each of its field offices.

XX. Section 3.254 is amended by the deletion of the parenthetical expression (sections 8 and 13) in paragraph (a).

XXI. Section 7–I of the Appendix to Subpart B of Part 3 is amended to read as follows:

I. Information regarding data required in connection with standard broadcast directional antenna systems may be found in § 3.150 of this chapter. (See also Standards of Good Engineering Practice Concerning Standard Broadcast Stations.)

XXII. Paragraph D (2) of section 8 of the Appendix to Subpart B of Part 3 is amended to read as follows:

(2) Since an operator must be on duty at the transmitter control point during operation, suitable facilities for his welfare and comfort shall be provided at the control point.

XXIII. Footnote 2 of section 8 of the Appendix to Subpart B of Part 3 is deleted.

XXIV. Sections 13, 16, 17, and 18 of the Appendix to Subpart B of Part 3 are deleted.

XXV. A new § 3.550 is added to read as follows:

§ 3.550 *Acceptability of broadcast transmitters for licensing.*

(a) In order to facilitate the filing of an action on applications for station authorizations, transmitters will be accepted for licensing by the Commission under one of the following conditions:

(1) A transmitter may be Type-Accepted upon the request of any manufacturer of transmitters built in quantity by following the type acceptance procedure set forth in Part 2 of this subchapter, provided that the data and information submitted indicates that the transmitter meets the requirements of section 8 of the Appendix to Subpart B. If accepted, such transmitter will be included on the Commission's "Radio Equipment List, Part B, Aural Broadcast Equipment". Applicants specifying transmitters included on such a list need not submit detailed descriptions and diagrams where the correct type number is specified, provided that the equipment proposed is identical with that accepted. Copies of this list are available for inspection at the Commission's office in Washington, D. C., and at each of its field offices.

(2) An application specifying a transmitter not included on the Radio Equipment List, Part B, may be accepted upon the request of a prospective licensee submitting with the application for construction permit a complete description of the transmitter, including the circuit diagram, listing of all tubes used, function of each, multiplication in each stage, plate current and voltage applied to each tube, a description of the oscillator circuit together with any devices installed for the purpose of frequency stabilization and the means of varying output power to compensate for power supply voltage variations. However, if this data has been filed with the Commission by a manufacturer in connection with a request for type acceptance, it need not be submitted with the application for construction permit but may be referred to as "on file". Measurement data for type acceptance made in accordance with subparagraph (1) of this paragraph shall be submitted with the license application.

(3) A transmitter shown on an instrument of authorization by manufacture and type number, or as a composite, and which was in use prior to June 30, 1955, may continue to be used by the licensee, his successors or assignees, provided such transmitter continues to comply with the rules and regulations.

(b) Additional rules with respect to withdrawal of type-acceptance, modification of type-accepted equipment and limitations on the findings upon which type acceptance is based are set forth in Part 2 of this subchapter.

XXVI. Section 3.552 is amended by the addition to paragraph (a) of a note as follows:

NOTE: Approved frequency monitors are included on the Commission's "Radio Equipment List, Part B, Aural Broadcast Equipment". Copies of this list are available for inspection at the Commission's office in Washington, D. C., and at each of its field offices.

XXVII. Section 3.553 is amended by the addition to paragraph (a) of a note as follows:

NOTE: Approved modulation monitors are included on the Commission's "Radio Equipment List, Part B, Aural Broadcast Equipment". Copies of this list are available for inspection at the Commission's office in Washington, D. C., and at each of its field offices.

XXVIII. A new § 3.640 is added to read as follows:

§ 3.640 *Acceptability of broadcast transmitters for licensing.* (a) In order to facilitate the filing of and action on applications for station authorizations, transmitters will be accepted for licensing by the Commission under one of the following conditions.

(1) A transmitter may be Type-Accepted upon the request of any manufacturer of transmitters built in quantity by following the type acceptance procedure set forth in Part 2 of this subchapter, provided that the data and information submitted indicates that the transmitter meets the requirements of § 3.687. If accepted, such transmitter will be included on the Commission's "Radio Equipment List, Part A, Television Broadcast Equipment." Applicants specifying transmitters included on such a list need not submit detailed descriptions and diagrams where the correct type number is specified, provided that

the equipment proposed is identical with that accepted. Copies of this list are available for inspection at the Commission's office in Washington, D. C., and at each of its field offices.

(2) An application specifying a transmitter not included on the Radio Equipment List, Part A, may be accepted upon the request of a prospective licensee submitting with the application for construction permit a complete description of the transmitter, including the circuit diagram, listing of all tubes used, function of each, multiplication in each stage, plate current and voltage applied to each tube, a description of the oscillator circuit together with any devices installed for the purpose of frequency stabilization and the means of varying output power to compensate for power supply voltage variations. However, if this data has been filed with the Commission by a manufacturer in connection with a request for type acceptance, it need not be submitted with the application for construction permit but may be referred to as "on file." Measurement data for type acceptance made in accordance with subparagraph (1) of this paragraph shall be submitted with the license application.

(3) A transmitter shown on an instrument of authorization by manufacturer and type number, or as a composite, and which was in use prior to June 30, 1955, may continue to be used by the licensee, his successors or assignees, provided such transmitter continues to comply with the rules and regulations.

(b) Additional rules with respect to withdrawal of type-acceptance, modification of type-accepted equipment and limitations on the findings upon which type acceptance is based are set forth in Part 2 of this subchapter.

XXIX. The second paragraph appearing after Table V in section I of the Standards of Good Engineering Practice Concerning Standard Broadcast Stations is deleted.

XXX. Subsections B and C of section 2 and sections 3, 7, 8, 9, 10, 14, 17, 20, 21, 22 and 23 of the Standards of Good Engineering Practice Concerning Standard Broadcast Stations are deleted.

XXXI. Footnote 19 to section 2A of the AM Standards is amended to read as follows:

[19] See § 3.54 and "Indicating instruments pursuant to § 3.58."

XXXII. Subparagraph (5) of section 2A of the AM standards is amended by the deletion of the parenthetical expression (see subsection B5a, b, and C.).

XXXIII. Paragraph A (9) a2 of section 12 of the AM Standards is amended by the deletion of footnote 32.

XXXIV. Paragraph D (2) of section 12 of the AM Standards is amended to read as follows:

(2) Since an operator must be on duty at the transmitter control point during operation, suitable facilities for his welfare and comfort shall be provided at the control point.

[F. R. Doc. 55-4265; Filed, May 25, 1955; 8:50 a. m.]

[Docket No. 11305; FCC 55-579]

[Rules Amdt. 7-16]

PART 7—STATIONS ON LAND IN THE MARITIME SERVICES

FACILITIES REQUIRED FOR PUBLIC COAST STATIONS

In the matter of amendment of Part 7 of the Commission's rules with respect to the transmitter power requirement on 2182 kc for public coast stations licensed in the band 1600 kc to 3500 kc employing telephony, Docket No. 11305; Rules Amdt. 7-16.

At a session of the Federal Communications Commission held at its offices in Washington, D. C., on the 18th day of May 1955;

The Commission having under consideration its notice of proposed rule making in the above-entitled matter; and

It appearing, that in accordance with the requirements of section 4 (a) of the Administrative Procedure Act, the aforementioned notice of proposed rule making which made provision for the submission of written comments by interested parties was duly published in the FEDERAL REGISTER on March 23, 1955 (20 F. R. 1743) and that the period provided for the filing of comments has now expired; and

It further appearing, that Inland Navigation Company, American Waterways Operators, Inc., and American Telephone & Telegraph Company filed comments in support of the Commission's proposal; and

It further appearing, that the Southern California Marine Radio Council submitted comments to the effect that the adoption of the proposal might be detrimental to the effectiveness of 2182 kc with respect to safety of life at sea, that there should be no general relaxation of safety requirements at this time, that meritorious cases might be handled on an individual basis, and that, generally, an applicant financially qualified to operate a coast station should be willing and able to fully assume the obligations that go with such a public trust; and

It further appearing, that Southern California Marine Radio Council's concern with respect to the instant proposal is unwarranted for the reasons that (1) the amendment does not constitute a general relaxation of safety requirements since it makes no change in the 2182 kc antenna power requirement for those public coast stations subject to the present rule which operate with 100 watts or more antenna power on authorized working frequencies, and therefore, the requirement is not altered for the great majority of coast stations; and (2) public coast stations affected by the amendment are those serving areas where apparently satisfactory coverage on authorized working frequencies is being afforded with less than 100 watts antenna power and which may be expected to afford at least as much and as satisfactory coverage on the frequency 2182 kc using the same amount of power; and

It further appearing, that in the absence of amendment to the present rule, licensees of public coast stations, which are not equipped with as much as 100 watts antenna power, would be required to install additional equipment at a substantial cost despite the fact that users of the service would not appreciably benefit thereby; and

It further appearing, that the public interest, convenience and necessity will be served by the amendment herein ordered, the authority for which is contained in section 303 (c) (f) and (r) of the Communications Act of 1934, as amended;

It is ordered, That, effective June 27, 1955, Part 7 of the Commission's rules is amended as set forth below.

(Sec. 4, 48 Stat. 1066 as amended; 47 U. S. C. 154. Interprets or applies sec. 303, 48 Stat. 1082 as amended; 47 U. S. C. 303)

Released: May 23, 1955.

FEDERAL COMMUNICATIONS COMMISSION,
[SEAL] MARY JANE MORRIS,
Secretary.

Section 7.104 (b) (1) of the Commission's Rules is amended to read:

(1) Each coast station licensed to transmit by telephony on any radiochannel within the band 1600 kc to 3500 kc shall be capable of transmitting and receiving (and shall be licensed to transmit) class A3 emission (modulation by voice frequencies) on the radio-channel of which 2182 kc is the authorized carrier frequency, with antenna power not less than the maximum antenna power which it is capable of using for transmission by telephony on any other authorized radio frequency in this band; except that in any event the required antenna power on 2182 kc need not be more than 100 watts when no modulation is present.

[Docket No. 11263; FCC 55-578]

[Rules Amdt. 12-11]

PART 12—AMATEUR RADIO SERVICE

NOVICE CLASS OPERATOR PRIVILEGES

In the matter of petition for amendment of Part 12, rules governing Amateur Radio Service, concerning Novice Class operator privileges; Docket No. 11263; Rules Amdt. 12-11.

At a session of the Federal Communications Commission held at its offices in Washington, D. C., on the 18th day of May 1955;

The Commission having under consideration its notice of proposed rule making in the above-entitled matter in which it was proposed to amend § 12.23 (e) (2) (ii) of Part 12 of the Commission's rules to provide for an expansion in the Novice Class operator privileges in the 7 Mc frequency band from 7175-7200 kc to 7150-7200 kc; and

It appearing, that in accordance with the requirements of section 4 (a) of the Administrative Procedure Act, the above-mentioned notice of proposed rule making was duly published in the FEDERAL REGISTER on February 3, 1955 (20 F. R. 748), and that the time provided therein for the submission of written comments by interested parties has now expired; and

It further appearing, that the majority of comments received in response to the above-mentioned notice of proposed rule making were in favor of the proposed amendment and expressed a general opinion that the frequency space presently available to the Novice Class amateur operator in the 7 Mc frequency band is too crowded and inadequate to permit necessary training essential to meeting the objectives of the Novice Class license; and

It further appearing, that the few comments submitted in opposition to the proposed amendment claiming (1) that the present Novice space was adequate for local contacts; (2) that the present crowded condition of the Novice band encourages increased operating skill; (3) that more space would lower Novice operating standards; and (4) that only a few Novices would benefit from the proposed additional space whereas higher class amateur operators would lose frequency space, have been found unsupported by sufficient evidence to justify dismissal of the proposed amendment; and

It further appearing, that it is in the public interest to encourage the Novice Class amateur radio operator to qualify, through improvement of his operating proficiency, for a higher class of amateur radio operator license by making available the additional operating space which would be provided by the proposed amendment;

It is ordered, That under authority contained in section 4 (i) and 303 (f), (g), and (r) of the Communications Act of 1934, as amended, that effective June 22, 1955, § 12.23 (e) (2) (ii) of Part 12 of the Commission's rules is amended as set forth below.

(Sec. 4, 48 Stat. 1066 as amended; 47 U. S. C. 154. Interprets or applies sec. 303, 48 Stat. 1082 as amended; 47 U. S. C. 303)

Released: May 23, 1955.

FEDERAL COMMUNICATIONS COMMISSION,
[SEAL] MARY JANE MORRIS,
Secretary.

Section 12.23 (e) (2) (ii) of Part 12, rules governing Amateur Radio Service, is amended as follows:

(ii) 7150-7200 kc. radiotelegraphy using only type A1 emission.

PART 64—MISCELLANEOUS RULES RELATING TO COMMON CARRIERS

CHARGES FOR U. S. GOVERNMENT TELEGRAPH COMMUNICATIONS

In the matter of charges for United States Government Telegraph Communications, amendment of Part 64 of the Commission's rules and regulations (Miscellaneous Rules Relating to Common Carriers); Docket No. 11315; Rules Amdt. 64-9.

At a session of the Federal Communications Commission held at its offices in Washington, D. C., on the 18th day of May 1955;

The Commission, having under consideration the matter of the amendment of Section 64.310 ("Term") of Subpart C (United States Government Foreign and Overseas Telegraph Communications), of Part 64 of the Commission's rules and regulations; and also having under consideration its notice of proposed rule making adopted herein on March 30, 1955, and published in the FEDERAL REGISTER on April 7, 1955 (20 F. R. 2202), in accordance with Section 4 (a) of the Administrative Procedure Act;

It appearing, that the period in which interested persons were afforded an opportunity to submit comments expired on April 29, 1955, and that no comments were received;

It further appearing, that it is in the public interest to amend Subpart C in order to extend the term thereof;

It further appearing, that the amendments herein ordered are issued under authority of sections 4 (i) and 601 (b) of the Communications Act of 1934, as amended, and pursuant to the provisions of the permits or licenses granted by the President of the United States, giving the Postmaster General authority to fix rates and charges for United States Government telegraph communications transmitted by any carrier or carriers subject to the terms of such permits or licenses, which authority was transferred to the Commission by section 601 (b) of the Communications Act;

It is ordered, That, effective July 1, 1955, § 64.310 of Subpart C of Part 64 of the Commission's rules and regulations is amended to read as follows:

§ 64.310 *Term.* The provisions of this subpart shall continue in effect through June 30, 1956, unless changed by order of the Commission.

(Sec. 4, 48 Stat. 1066 as amended; 47 U. S. C. 154. Interprets or applies sec. 601, 48 Stat. 1101, 47 U. S. C. 601)

TITLE 49—TRANSPORTATION

Chapter I—Interstate Commerce Commission

[Rev. S. O. 562, Amdt. 7]

PART 97—ROUTING OF TRAFFIC

REROUTING OF TRAFFIC; APPOINTMENT OF AGENT

At a session of the Interstate Commerce Commission, Division 3, held at its office in Washington, D. C., on the 20th day of May A. D. 1955.

Upon further consideration of the provisions of Revised Service Order No. 562 (14 F. R. 2697), as amended (15 F. R. 3105; 8651; 16 F. R. 4551; 17 F. R. 4675; 18 F. R. 3048; 19 F. R. 2966), and good cause appearing therefor: *It is ordered*, That:

Section 97.562 *Rerouting of traffic; appointment of agent*, of Revised Service Order No. 562 be, and it is hereby, further amended by substituting the following paragraphs (a) and (d) hereof for paragraphs (a) and (d) thereof:

(a) Charles W. Taylor, Director, Bureau of Safety and Service, Interstate Commerce Commission, Washington 25, D. C., is hereby designated and appointed an Agent of the Interstate Commerce Commission and vested with authority to authorize diversion and rerouting of loaded and empty freight cars from and to any point in the United States whenever in his opinion an emergency exists whereby any railroad is unable to move traffic currently over its lines.

(d) Expiration date: This order shall expire at 11:59 p. m., May 25, 1956, unless otherwise modified, changed, suspended, or annulled by order of this Commission.

It is further ordered, That this amendment shall become effective at 11:59 p. m., May 25, 1955; that a copy of this order and direction be served upon the state railroad regulatory bodies of each State, upon all common carriers by railroad subject to the Interstate Commerce Act, and upon the Association of American Railroads, Car Service Division, as agent of the railroads subscribing to the car service and per diem agreement under the terms of that agrement; and that notice of this order be given to the general public by depositing a copy in the office of the Secretary of the Commission at Washington, D. C., and by filing it with the Director, Division of the FEDERAL REGISTER.

(Sec. 12, 24 Stat. 383, as amended; 49 U. S. C. 12. Interprets or applies sec. 1, 24 Stat. 379, as amended, sec. 15, 24 Stat. 384, as amended; 49 U. S. C. 1, 15)

By the Commission, Division 3.

[SEAL] HAROLD D. McCOY,
Secretary.

PROPOSED RULE MAKING

DEPARTMENT OF AGRICULTURE

Agricultural Marketing Service

[7 CFR Part 936]

FRESH BARTLETT PEARS, PLUMS, AND ELBERTA PEACHES GROWN IN CALIFORNIA

EXPENSES AND FIXING OF RATES OF ASSESSMENT FOR 1955–56 SEASON

Consideration is being given to the following proposals submitted by the Control Committee, established under the marketing agreement, as amended, and Order No. 36, as amended (7 CFR Part 936), regulating the handling of fresh Bartlett pears, plums, and Elberta peaches grown in the State of California, effective under the Agricultural Marketing Agreement Act of 1937, as amended (7 U. S. C. 601 et seq.), as the agency to administer the provisions thereof:

(a) That the Secretary of Agriculture find, with respect to Bartlett pears, early varieties of plums, late varieties of plums, and Elberta peaches, that expenses not to exceed the following amounts are likely to be incurred, during the season beginning March 1, 1955, and ending February 29, 1956, both dates inclusive, by the Control Committee for the maintenance and functioning of such committee and the respective commodity committees established under the aforesaid amended marketing agreement and order:

(1) Bartlett pears, $25,861.04;

(2) Early varieties of plums, $17,132.71;

(3) Late varieties of plums, $18,359.75; and

(4) Elberta peaches, $20,631.50.

(b) That the Secretary of Agriculture fix, as each handler's pro rata share of such expenses, the following rates of assessment which each handler shall pay in accordance with the provisions of said amended marketing agreement and order:

(1) 8½ mills ($0.0085) per standard western pear box of Bartlett pears, or its equivalent in other containers or in bulk;

(2) 9 mills ($0.009) per standard four-basket crate of early varieties of plums, or its equivalent in other containers or in bulk;

(3) 9 mills ($0.009) per standard four-basket crate of late varieties of plums, or its equivalent in other containers or in bulk; and

(4) 4 mills ($0.004) per California peach box of Elberta peaches, or its equivalent in other containers or in bulk.

All persons who desire to submit written data, views, or arguments for consideration in connection with the proposals may do so by submitting the same to the Director, Fruit and Vegetable Division, Agricultural Marketing Service, United States Department of Agriculture, Washington 25, D. C., not later than the 10th day following publication of this notice in the FEDERAL REGISTER.

Terms used in the amended marketing agreement and order shall, when used herein, have the same meaning as is given to the respective term in said amended marketing agreement and order.

(Sec. 5, 49 Stat. 753, as amended; 7 U. S. C. 608c)

Dated: May 20, 1955.

[SEAL] S. R. SMITH,
Director, Fruit and Vegetable Division, Agricultural Marketing Service.

[F. R. Doc. 55-4276; Filed, May 25, 1955; 8:53 a. m.]

[7 CFR Part 987]

HANDLING OF MILK IN CENTRAL MISSISSIPPI MARKETING AREA

NOTICE OF RECOMMENDED DECISION AND OPPORTUNITY TO FILE WRITTEN EXCEPTIONS THERETO WITH RESPECT TO PROPOSED AMENDMENTS TO TENTATIVE MARKETING AGREEMENT AND TO ORDER

Pursuant to the provisions of the Agricultural Marketing Agreement Act of 1937, as amended (7 U. S. C. 601 et seq.), and the applicable rules of practice and procedure, as amended, governing proceedings to formulate marketing agreements and marketing orders (7 CFR Part 900), notice is hereby given of the filing with the Hearing Clerk of this recommended decision of the Deputy Administrator, Agricultural Marketing Service, United States Department of Agriculture, with respect to a proposed marketing agreement and a proposed order amending the order, regulating the handling of milk in the Central Mississippi marketing area.

Interested parties may file written exceptions to this recommended decision with the Hearing Clerk, Room 112 Administration Building, United States Department of Agriculture, Washington 25, D. C., not later than the close of business on the third day after the publication of this recommended decision in the FEDERAL REGISTER. Exceptions should be filed in quadruplicate.

Preliminary statement. A public hearing on the record of which the proposed marketing agreement and the proposed order amending the order were formulated was held at Jackson, Mississippi, on May 9, 1955, pursuant to notice thereof issued May 3, 1955 (20 F. R. 3028).

The material issues of record related to:

(1) Payments to cooperative associations, and

(2) Classification of milk transferred from supply plants to distributing plants.

Findings and conclusions. The following findings and conclusions are based on the evidence received at the hearing and the record thereof:

1. Provision should be included in the order to require a handler to make payment to a cooperative association for milk received from members of such association. Provisions should also be made to require payment by handlers at the appropriate class prices of the order for milk received from cooperative associations which are also handlers.

The Central Mississippi order presently contains no provisions for payments by handlers to cooperative associations for milk received either from member producers of such association or from plants operated by cooperatives. Recent developments in the Central Mississippi market make such provisions necessary for orderly marketing procedures.

Three cooperative associations are presently marketing milk of their members in the Central Mississippi market. The largest of these represents a substantial majority of the producers whose milk is received at the plants of proprietary handlers. This association operates no plant of its own. Two smaller associations each operate a plant at which milk is physically received from member producers and from which it is disposed of to other handlers or to unregulated plants.

Handlers have recently discontinued receiving the milk of a number of the member producers of the bargaining association. Under the handler pooling provisions of the Central Mississippi order, this association has no means whereby it can return to such member producers any share of the fluid milk market unless it is in position to blend the returns of all or a part of its membership so that fluid milk sales of other producer members are pooled with the returns that can be received for milk of the "cut off" producers delivered to manufacturing plants. It is probable that milk of the producers who have lost their market during the current flush production period may be needed for fluid use later in the year. Such producers cannot be expected to maintain facilities for Grade A milk production unless they receive more than manufacturing prices for the period until the milk is needed on the market for fluid use. The cooperative association will be unable to fulfill its obligations to such members unless it can include in their returns some share of the fluid milk market.

The proponent bargaining cooperative incorporated in the record its by-laws and membership agreement as evidence of authority to collect payment for milk of its members. It also showed that it had arrangements with the operators of milk manufacturing plants to market milk of its members at prices in excess of the Class II price of the order and to collect payment for such milk. The cooperative must collect payment from handlers for milk of other members before it can so pool or blend proceeds of its sales that the producers in question can share in the fluid milk market.

No testimony was received in opposition to requiring payment to a cooperative association for milk of its members. Handler testimony related solely to administrative details and need for assurance that payments to the cooperative association would be in full satisfaction for the milk received. Handlers understandably do not wish to become involved in any dispute that might arise between a cooperative association and a producer. In the amendment herein proposed the authority of a cooperative association to collect payment and the producers to whom such authority applies is made a matter of determination by the market administrator, as an appropriate public administrative authority whose determination should avoid controversy.

Certain items of information are required by a cooperative association to check the accuracy of the total payment received and to compute and transmit appropriate payment to its members. Payment to the cooperative should be at such time as to permit it to distribute payment to its members on the date specified for payments by handlers to individual producers. In order that this may be accomplished in a minimum of time after announcement of the uniform price, computation of the payment due the cooperative is specified as a lump sum rather than the sum of the individual payments otherwise due producers.

The cooperative associations which operate plants have recently become handlers under the order when such plants qualified as supply plants. The order should require that handlers receiving milk from cooperative associations which are also handlers pay such associations for such milk not less than the applicable class prices of the order, including charges and differentials prescribed by the order. Such payment should be by the same date as payment is required to other cooperative associations.

While no provision is made to require payment of the handling or processing charges which operating cooperatives normally add for services they have performed with respect to milk received at their plants, the required payment of class prices will assure such cooperatives that they will receive the minimum prices provided for direct shipped milk and will insure that proprietary handlers pay at least minimum prices for all milk of producers that is used in their plants.

2. Milk transferred from a supply plant to a distributing plant should be classified pro rata with receipts of producer milk at the distributing plant.

The Central Mississippi order presently provides that when milk is transferred from one regulated plant to another the handlers operating such plants may agree upon the classification of such milk subject only to the limitations necessary to insure priority in classification of producer milk over other source milk.

When the order first became fully effective in November 1954 the only supply plants associated with the market were receiving stations of handlers who also operated distributing plants at which Class I milk was bottled and from which routes were operated in the marketing area. More recently, however, plants of the operating cooperatives mentioned earlier in this decision have qualified as supply plants from which bulk milk is furnished to distributing plants of other handlers. The ability to determine classification of milk so moved by agreement with the receiving handler, while direct receipts of producer milk are classified by rules of the order, has resulted in a situation whereby the Class I sales of certain plants are shared disproportionately between separate groups of producers supplying such plants. Under the handler pool distribution of returns to producers set forth in the Central Mississippi order, the classification agreement determines which producers are paid for the Class I milk.

It appears appropriate to provide that the Class I business of a distributing plant shall be shared pro rata among the milk supplied by supply plants and that supplied by producers whose milk is received directly at the distributing plants. It was suggested at the hearing that such division be modified during the months of March through July by providing a base for each supply plant comparable to that established for each producer. Such a procedure should not be adopted until further experience under the order shows the seasonal nature of shipments required from supply plants.

In order that there may be no ambiguity concerning the interplant movements to which the proposed rules of classification shall apply, the definition of a supply plant is modified to exclude any plant which also qualifies as a distributing plant.

General findings. (a) The proposed marketing agreement and the order, as hereby proposed to be amended, and all of the terms and conditions thereof, will tend to effectuate the declared policy of the act;

(b) The parity prices of milk as determined pursuant to section 2 of the act are not reasonable in view of the price of feeds, available supplies of feeds and other economic conditions which affect market supply of and demand for milk, in the marketing area and the minimum prices specified in the proposed marketing agreement and order, as hereby proposed to be amended, are such prices as will reflect the aforesaid factors, insure a sufficient quantity of pure and wholesome milk, and be in the public interest; and

(c) The proposed marketing agreement and order, as hereby proposed to be amended, will regulate the handling of milk in the same manner as, and will be applicable only to persons in the respective classes of industrial and commercial activity specified in a proposed marketing agreement and order upon which a hearing has been held.

Rulings. A brief was filed on behalf of producers. The proposed findings and conclusions and the arguments contained in this brief were considered in making the findings and reaching the conclusions in this decision. To the extent that any proposed findings and conclusions in the brief are at variance with the findings and conclusions of this decision, such proposed findings and conclusions are denied for the reasons set forth in support of the findings and conclusions of this decision on the issue to which the proposed findings and conclusions related.

Recommended marketing agreement and order. The following amendments to the order are recommended as the detailed and appropriate means by which the foregoing conclusions may be carried out. The recommended marketing agreement is not included in this decision because the regulatory provisions thereof would be identical with those contained in the order as proposed to be further amended:

1. Amend § 987.8 to read as follows:

§ 987.8 *Supply plant.* "Supply plant" means (a) any plant other than a distributing plant from which Grade A milk, skim milk or cream is shipped during the month to a distributing plant in any of the months of January through July, or (b) any plant other than a distributing plant from which not less than 50 percent of the Grade A milk received from dairy farmers during the month is shipped in such month as milk, skim milk or cream to distributing plants during the months of August through December.

2. Add the following § 987.31 (c):

(c) Each handler who receives producer milk for which payment is to be made to a cooperative association pursuant to § 987.90 (e) shall report to such cooperative association with respect to each such producer as follows:

(1) On or before the 20th day of each month the total pounds of milk received during the first 15 days of the month;

(2) On or before the 10th day after the end of each month:

(i) The daily and total pounds of milk received during the month with separate totals for base and excess milk for the months of March through July, and the average butterfat test thereof; and

(ii) The amount or rate and nature of any deductions.

3. Delete § 987.44 (a) and substitute therefor the following:

(a) As follows if transferred in the form of products designated as Class I milk in § 987.41 (a) (1) to the fluid milk plant of another handler, except a producer-handler, unless utilization as Class II milk is claimed by both handlers in their reports submitted for the month to the market administrator pursuant to § 987.30, subject in any event to the conditions set forth in subparagraph (3) of this paragraph:

(1) As Class I milk, if transferred from a distributing plant to a fluid milk plant or from a supply plant to a supply plant;

(2) Pro rata to the amounts of skim milk and butterfat, respectively, remaining in each class in the plant(s) of the transferee handler after subtraction pursuant to § 987.46 (a) (4) and the corresponding step of paragraph (b) thereof of any skim milk or butterfat classified pursuant to subparagraph (1) of this paragraph, if transferred from a supply plant to a distributing plant;

(3) (i) In no event shall the skim milk or butterfat assigned to Class II milk exceed the amount thereof remaining in Class II milk in the plant(s) of the trans-

feree handlers after subtraction of other source milk pursuant to § 987.46 and any additional amounts of such skim milk or butterfat shall be classified as Class I milk; and

(ii) If either or both handlers have other source milk during the month, the skim milk or butterfat so transferred shall be classified at both plants so as to allocate the greatest possible Class I milk utilization to producer milk of both handlers.

4. Add the following as § 987.90 (e):

(e) In lieu of payments pursuant to paragraphs (a), (b) and (c) of this section each handler shall make payment to a cooperative association which has filed a written request for such payment with such handler and with respect to producers for whose milk the market administrator determines that such cooperative association is authorized to collect payment, as follows:

(1) On or before the 26th day of each month, an amount equal to not less than the Class II price for the preceding month multiplied by the hundredweight of milk received during the first 15 days of the month from such producers; and

(2) On or before the 13th day after the end of each month an amount equal to not less than the applicable uniform price(s) pursuant to §§ 987.71 and 987.72, multiplied by the hundredweight of milk received from such producers to which each such price is applicable, subject to the butterfat differential computed pursuant to § 987.91 and the location differential computed pursuant to § 987.92, less payment made such cooperative association pursuant to subparagraph (1) of this paragraph, and proper deductions authorized in writing by such producers or such cooperative associations.

5. Add the following as § 987.90 (f):

(f) On or before the 13th day after the end of the month each handler shall pay to each cooperative association which is also a handler for milk received from it not less than the value of such milk as classified pursuant to § 987.44 (a) at the applicable respective class prices, including charges and differentials prescribed by the order.

Filed at Washington, D. C., this 23d day of May 1955.

[SEAL] ROY W. LENNARTSON,
Deputy Administrator.

FEDERAL COMMUNICATIONS COMMISSION

[47 CFR Parts 2, 3]

[Docket No. 11396; FCC 55–588]

CLASS B FM BROADCAST STATIONS

REVISED TENTATIVE ALLOCATION PLAN

In the matter of amendment of the Revised Tentative Allocation Plan for Class B FM Broadcast Stations; Docket No. 11396.

1. Notice is hereby given of further proposed rule making in the above entitled matter.

2. It is proposed to amend the Revised Tentative Allocation Plan for Class B FM Broadcast Stations in the following manner:

General area	Channels	
	Delete	Add
Leaksville, N. C.		247
Greensboro, N. C.	247	
Danville, Va.	250	

3. The purpose of the proposed amendment is to provide a Class B channel in Leaksville, North Carolina, to facilitate consideration of a pending application for a Class B assignment there.

4. Authority for adoption of the proposed amendment is contained in sections 4 (i), 301, 303 (c), (d), (f), and (r), and 307 (b) of the Communications Act of 1934, as amended.

5. Any interested party who is of the opinion that the proposed amendment should not be adopted or should not be adopted in the form set forth herein, may file with the Commission on or before June 17, 1955, a written statement or brief setting forth his comments. Comments in support of the proposed amendment also may be filed before or on the same date. Comments or briefs in reply to the original comments may be filed within 10 days from the last day for filing said original comments or briefs. The Commission will consider all such comments that are submitted before taking action in this matter, and if any comments appear to warrant the holding of a hearing or oral argument, notice of the time and place of such hearing or oral argument will be given.

6. In accordance with the provisions of § 1.764 of the Commission's rules and regulations, an original and 14 copies of all statements, briefs, or comments shall be furnished the Commission.

Adopted: May 18, 1955.

Released: May 20, 1955.

INTERSTATE COMMERCE COMMISSION

[49 CFR Part 170]

COMMERCIAL ZONES

REDEFINITION OF BOUNDARY OF NEW ORLEANS, LA.

MAY 18, 1955.

Revision of definition of boundary of New Orleans, La., commercial zone heretofore defined in Ex Parte No. MC–37, Commercial Zones and Terminal Areas, 48 M. C. C. 95, 48 M. C. C. 441, 62 M. C. C. 151.

Pursuant to section 4 (a) of the Administrative Procedure Act (60 Stat. 237, 5 U. S. C. 1003) notice is hereby given that, for the purpose of including additional points and areas, which by reason of industrial and other developments and growth have become a part thereof, within the defined limits of the zone which is adjacent to and commercially a part of New Orleans, La., within the meaning of section 203 (b) (8) of the Interstate Commerce Act, the Interstate Commerce Commission, informed by experience and by an informal investigation, proposes to modify and redefine, as hereinafter indicated, the limits of the zone adjacent to and commercially a part of New Orleans, La., as heretofore defined in the eighth supplemental report in Commercial Zones and Terminal Areas, 62 M. C. C. 151, and to revise the description of such zone limits in 49 CFR 170.27 to read as follows:

All points in the area bounded by a line as follows: Commencing at a point on the shore of Lake Pontchartrain where it is crossed by the Jefferson Parish-Orleans Parish line; thence easterly along the shore of Lake Pontchartrain to the Rigolets; thence through the Rigolets in an easterly direction to Lake Borgne; thence southwesterly along the shore of Lake Borgne to the Bayou Bienvenue; thence in a general westerly direction along the Bayou Bienvenue (which also constitutes the Orleans Parish-St. Bernard Parish line) to Paris Road; thence in a southerly direction along Paris Road and beyond it in the same direction to the middle of the Mississippi River; thence along the middle of the Mississippi River to the Augusta Canal; thence in a westerly direction along the Augusta Canal to the Gulf Intracoastal Waterway; thence in a northeasterly direction along the middle of the Gulf Intracoastal Waterway to the crossing of Louisiana Highway 31; thence along Louisiana Highway 31 in a northwesterly direction to a point approximately 2 miles south of Gretna where a high tension transmission line crosses Louisiana Highway 31; thence in a westerly direction following such transmission line to the intersection thereof with U. S. Highway 90; thence westerly along U. S. Highway 90 to the Jefferson Parish-St. Charles Parish line; thence north along such parish line to the middle of the Mississippi River; thence westerly along the middle of the Mississippi River to a point 1 mile west of the Jefferson Parish-St. Charles Parish line; thence north to the shore of Lake Pontchartrain; thence along the shore of Lake Pontchartrain in an easterly direction to the Jefferson Parish-Orleans Parish line, the point of beginning.

No oral hearing is contemplated, but anyone wishing to make representations in favor of, or against, the above-proposed revision of the defined boundary of the New Orleans, La., commercial zone, may do so by the submission of written data, views, or arguments. An original and five copies of such data, views, or arguments shall be filed with the Commission on or before June 30, 1955.

Notice to the general public of the action herein taken shall be given by depositing a copy of this notice in the Office of the Secretary of the Commission for public inspection and by filing a copy thereof with the Director, Division of the Federal Register.

By the Commission, Division 5.

[SEAL] HAROLD D. MCCOY,
Secretary.

REDELEGATION OF AUTHORITY WITH RESPECT TO PROVIDING FOR TEMPORARY USE BY CIVILIANS OF RESERVE COMPONENT FACILITIES AS HEREIN DEFINED, AND TO ESTABLISH A UNIFORM PROCEDURE FOR MANAGEMENT AND CONTROL THEREOF

I. The term "Reserve Component facility" as used herein means any entire structure or part thereof, including any interest in land together with any improvements thereon, and any storage or other facility which is currently used or is to be used for the administration and training of one or more units of any Reserve Component of the Armed Forces of the United States and which either is owned in fee simple by the Federal Government or over which the Federal Government has an exclusive possessory interest.

II. Pursuant to section 5 of the National Defense Facilities Act of 1950 (P. L. 783, 81st Congress, approved September 11, 1950), there is hereby delegated to the Secretary of the Army, the Secretary of the Navy, and the Secretary of the Air Force, and to such individuals as they may designate, the authority granted the Secretary of Defense under said act to take the following specific actions in addition to those actions heretofore delegated (16 F. R. 9863, September 28, 1951):

1. Administer, operate, maintain and equip, subject to policy guidance by the Assistant Secretary of Defense (Properties and Installations), those Reserve Component facilities over which they exercise control and accountability.

2. Issue licenses or permits for use of Reserve Component facilities over which they exercise control and accountability, to persons and organizations identified in b. below. Licenses or permits so issued shall be subject to the following conditions and restrictions and to such additional conditions and restrictions as are deemed essential by the licensing department to protect the interests of the Government:

a. The license or permit shall be revokable at will by the Government and shall provide for payment by the licensee or permittee of an amount that is commensurate with the actual or estimated pro rate cost of utilities and services furnished by the Government during such period of usage, including the wages of guards, charworkers and other personnel, plus the amount of additional costs resulting directly from such usage, which shall include but not be limited to the replacement cost of items of personal property or fixtures destroyed or damaged and the cost of repairs for damage to the real and personal property in excess of damage occasioned by normal wear and tear, provided that monetary charges may be waived when the amount determined is less than the estimated cost of collection. In any event provision shall be made in the license or permit for payment for property damaged or destroyed.

b. Licensees or permittees shall be restricted to persons and organizations promoting or providing public entertainment, social functions, recreation, amateur athletic contests or activities, and demonstrations or enterprises of an educational, religious or civic welfare nature.

c. Licensees or permittees may make an admission charge for functions conducted in the Reserve Component facilities and engage in the sale of goods or merchandise therein, provided all net profits derived from such charges and sales inure only to non-profit organizations or charitable purposes and further provided that such charges and sales do not constitute unfair competition with local commercial enterprises.

III. No use of the Reserve Component facilities herein specified shall be permitted which will interfere with the use thereof for the administration and training of units of the Reserve Components of the Armed Forces of the United States, or in time of war or national emergency by other units of the Armed Forces of the United States or any other use by the Government.

IV. Security of Government property such as training equipment, explosives, vehicles and administrative materials during use of the Reserve Component facilities by individuals and organizations is essential, and the officer having immediate jurisdiction over the Reserve Component facility so used shall exert every effort to safeguard such property against loss, damage or unlawful removal.

V. The redelegation of authority of March 3, 1953 (18 F. R. 1187), is hereby superseded and canceled.

C. E. WILSON,
Secretary of Defense.

DEPARTMENT OF THE INTERIOR

Bureau of Land Management

[Doc. 46, Arizona State Office]

ARIZONA

SMALL TRACT CLASSIFICATION 35

1. Pursuant to authority delegated to me by Bureau Order No. 541, dated April 21, 1954 (19 F. R. 2473), I hereby classify the following described public lands totaling 670 acres in Yavapai County, Arizona, as suitable for lease and sale for residence and/or business purposes, under the Small Tract Act of June 1, 1938 (52 Stat. 609, 43 U. S. C. 682a), as amended:

GILA AND SALT RIVER MERIDIAN

T. 11 N., R. 2 E.
Sec. 14: Lots 1 to 52 incl.; 59 to 66 incl.; SE¼NE¼, NE¼SE¼, N½SE¼SE¼, SW¼SE¼SE¼;
Sec. 15: NE¼.

2. Classification of the above-described lands by this order segregates them from all appropriations, including locations under the mining laws, except as to applications under the Small Tract Act and applications under the mineral leasing laws.

3. These lands are located about 60 miles north of Phoenix and about 40 miles southeast of Prescott, at the junction of the Prescott and Verde Valley branches of the new Black Canyon Highway, State Highway No. 69 and 70. The location is known as Cordes Junction and the area is considered suitable for development under the Small Tract Act. The topography varies from gently rolling to rough and broken. The soil grades from a fine sandy loam to coarse gravel with rocky outcrops. There is no certainty that an adequate supply of domestic water can be developed from wells but one well in the area, 326 feet deep, produces about 3,000 gallons per day. Electric power is available in the area.

4. (a) The individual tracts vary in size from 1.13 acre to 7.19 acre, however, the greater number are approximately 5 acres. Plats showing the size and location of tracts designated as lots are on file in the Land Office, Room 251, Main Post Office Building, Phoenix, Arizona.

(b) The legal subdivisions will be leased by aliquot parts in tracts of approximately 5 acres with the longer di-

mension either east-west or north-south provided each tract is contained in a single sixty-fourth subdivision.

(c) Rights-of-way 66 feet in width, for street and road purposes and for public utilities, will be reserved on the section lines and quarter, sixteenth and sixty-fourth subdivision lines on lot boundaries except between Lots 64 and 65, and Lots 52 and 59.

(d) The appraised value of the tracts varies from $200 to $350 per tract, as shown below.

Sec. 14: Lots 1 to 16 incl.; 35, 43, SE¼NE¼, NE¼SE¼, N½SE¼SE¼, SW¼SE¼SE¼, appraised at $200 per tract. Advance 3 year rental, $30; Lots 27, 33, 34, 38 to 40 incl., 44, 47 to 50 incl., 61, 62, appraised at $250 per tract. Advance 3 year rental, $37.50; Lots 19 to 26 incl., 28 to 31 incl., 41, 42, 45, 46, 51, 63, appraised at $300 per tract. Advance 3 year rental, $45; Lots 17, 18, 32, 36, 37, 52, 59, 60, 64, 65, 66, appraised at $350 per tract. Advance 3 year rental, $52.50.

Sec. 15: NE¼, appraised at $200 per tract. Advance 3 year rental, $30.

5. Leases will be issued for a term of three years and will contain an option to purchase in accordance with 43 CFR 257.13. Lessees who comply with the general terms and conditions of their leases will be permitted to purchase their tracts at the prices listed above providing that during the period of their leases they either, (a) construct the improvements specified in paragraph 6, or (b) file a copy of an agreement in accordance with 43 CFR 257.13 (d). Leases will not be renewable unless failure to construct the required improvements is justified under the circumstances and non-renewal would work an extreme hardship on the lessee.

6. To maintain their rights under their leases, lessees will be required either (a) to construct substantial improvements on their lands or (b) to file a copy of an agreement with their neighbors binding them to construct substantial improvements on their land. Such improvements must conform with health, sanitation, and construction requirements of local ordinances and must, in addition, meet the following standards: The home must be suitable for year-round use, on a permanent foundation and with a minimum of 500 square feet of floor space. The homes must be built in a workmanlike manner out of attractive materials properly finished. Adequate disposal and sanitary facilities must be installed.

7. Applicants must file, in duplicate, with the Manager, Land Office, 251 Main Post Office Building, Phoenix, Arizona, application Form 4–776 filled out in compliance with instructions on the form and accompanied by any showings or documents required by those instructions. Copies of the application form can be secured from the above-named official.

The applications must be accompanied by a filing fee of $10.00, plus the advance rental specified above. Failure to transmit these payments with the application will render the application invalid. Advance rentals will be returned to unsuccessful applicants. All filing fees will be retained by the United States.

8. The lands are now subject to application under the Small Tract Act.

(a) All valid applications for lands in Lots 1 to 52 incl., and 59 to 66 incl., in said Sec. 14, filed prior to February 21, 1951, will be granted preference right provided by 43 CFR 257.5 (a). All valid applications from persons entitled to veterans preference filed after February 21, 1951, and prior to 10:00 a. m., June 22, 1955, will be considered as simultaneously filed at that time. All valid applications from persons entitled to veterans' preference filed after 10:00 a. m., June 22, 1955, will be considered in the order of filing. All valid applications from other persons filed after February 21, 1951, and prior to 10:00 a. m., September 21, 1955, will be considered as simultaneously filed at that time. All valid applications filed after 10:00 a. m., September 21, 1955, will be considered in the order of filing.

(b) All valid applications for lands in SE¼NE¼, NE¼SE¼, N½SE¼SE¼, SW¼SE¼SE¼ of said Section 14 and NE¼ of said Section 15, filed prior to 10:30 a. m., August 6, 1954, will be granted the preference right provided by 43 CFR 257.5 (a). All valid applications from persons entitled to veterans' preference filed after 10:30 a. m., August 6, 1954, and prior to 10:00 a. m., June 22, 1955, will be considered as simultaneously filed at that time. All valid applications from persons entitled to veterans' preference filed after 10:00 a. m., June 22, 1955, will be considered in the order of filing. All valid applications from other persons filed after 10:30 a. m., August 6, 1954, and prior to 10:00 a. m., September 21, 1955, will be considered as simultaneously filed at that time. All valid applications filed after 10:00 a. m., September 21, 1955, will be considered in the order of filing.

9. Inquiries concerning these lands shall be addressed to: Manager, Land Office, 251 Main Post Office Building, Phoenix, Arizona.

E. I. Rowland,
State Supervisor.

May 17, 1955.

[F. R. Doc. 55–4247; Filed, May 25, 1955; 8:46 a. m.]

Colorado

Notice of Proposed Withdrawal and Reservation of Lands

The United States Air Force has filed an application, Serial No. Colo. 09006, amended, for the withdrawal of the lands described below, from all forms of appropriation including the mining and mineral leasing laws.

The applicant desires the land for use in the establishment of the Air Force Academy authorized under Public Law 325, 83d Congress.

For a period of 30 days from the date of publication of this notice, persons having cause may present their objections in writing to the undersigned official of the Bureau of Land Management, Department of the Interior.

If circumstances warrant it, a public hearing will be held at a convenient time and place, which will be announced.

The determination of the Secretary on the application will be published in the Federal Register. A separate notice will be sent to each interested party of record.

The lands involved in the application are:

6th Principal Meridian, Colorado

T. 11 S., R. 67 W.,
Sec. 31: All.
T. 12 S., R. 67 W.,
Sec. 6: All;
Sec. 7: All;
Sec. 18: All;
Sec. 19: N½NE¼, SE¼NE¼, Lots 1, 2, 3, 4, E½NW¼, SE¼SW¼, S½SE¼;
Sec. 30: All;
Sec. 31: All.

Max Caplan,
State Supervisor.

May 19, 1955.

[F. R. Doc. 55–4248; Filed, May 25, 1955; 8:46 a. m.]

Colorado

Restoration Order No. 8 (Area III) Under Federal Power Act

May 19, 1955.

Pursuant to determination DA–346, Colorado, of the Federal Power Commission, and in accordance with Order No. 541, section 2.5, of the Director, Bureau of Land Management, approved April 21, 1954 (19 F. R. 2473–2476), it is ordered as follows:

Subject to valid existing rights and the provisions of existing withdrawals, the following described lands shall, commencing at 10:00 a. m., local time, Colorado, on the ninety-first day after the date of this order, be open to location under the United States Mining Laws only, subject to the stipulation quoted below, to be executed and acknowledged in favor of the United States by the locators, for themselves, their heirs, successors, and assigns, and recorded in the County records and in the United States Land and Survey Office at Denver, Colorado, before locations are made:

Sixth Principal Meridian, Colorado

T. 3 N., R. 73 W.,
Sec. 12: SW¼SE¼;
Sec. 13: W½NE¼; E½NW¼; and NE¼SW¼;
Sec. 24: E½SW¼ and SE¼;
Sec. 25: NE¼.

The areas described total 640 acres.

Any disposition of the lands described herein shall be subject to the stipulation that if and when the land is required in whole or in part for power development purposes, any structure or improvement placed thereon which may be found to obstruct or interfere with such development, shall, without cost, expense or delay to the United States, its licensees or permittees, be removed or relocated insofar as may be necessary to eliminate interference with such power development, and subject to the further condition that the locator or locators shall use and occupy the lands so located for mining purposes only and no facility or activity shall be erected or conducted thereon for other purposes until such time as compliance with the United States Mining laws has been made and patent issued.

The lands described shall be subject to application by the State of Colorado for a period of 90 days from the date of publication of the order in the Federal Register for right-of-way for public highways or as a source of material for construction and maintenance of such highways, in accordance with and subject to the provisions of section 24 of the Federal Power Act (16 U. S. C. 818), as amended, and the special stipulations provided in the preceding paragraph.

The lands described in this order are within the Roosevelt National Forest, and therefore, not subject to provisions contained in the act of September 27, 1944 (58 Stat. 747; 43 U. S. C. 279–284), as amended, granting a preference right of application to veterans of World War II and others.

Inquiries concerning these lands shall be addressed to the Land Office Manager, 437 Post Office Building, Post Office Box #1018, Denver 1, Colorado.

Max Caplan,
State Supervisor.

[F. R. Doc. 55–4249; Filed, May 25, 1955; 8:46 a. m.]

Idaho

Order Providing for Opening of Lands; Correction

May 18, 1955.

Order providing for opening of public lands, dated February 21, 1955, published in the Federal Register, dated March 2, 1955, 20 F. R. 1294, is corrected to read as follows:

The State of Idaho has certified that the hereinafter-described lands patented to the State under the provisions of section 4 of the act of August 18, 1894 (28 Stat. 422; 43 U. S. C. sec. 641), as amended, commonly known as the Carey Act, have not been reclaimed, as required by the Carey Act, and that water is not available for the irrigation of these tracts. The State of Idaho, therefore, has reconveyed the lands to the United States:

Boise Meridian, Idaho

T. 11 S., R. 13 E.
Sec. 34, NE¼, E½SW¼, SE¼;
Sec. 35, E½, W½NW¼, W½SW¼;
T. 12 S., R. 13 E.
Sec. 1, Lot 4, SW¼NW¼, W½SW¼;
Sec. 2, Lots 1, 2, 4, SW¼NE¼, S½SE¼;
Sec. 3, E½W½, W½E½, W½NW¼, NW¼SW¼, NE¼NE¼;
Sec. 4, Lot 1, SE¼NE¼, E½SE¼;
Sec. 10, NW¼, W½NE¼;
Sec. 11, NW¼, E½SE¼, SW¼SE¼;
Sec. 12, N½NW¼, SW¼NW¼, S½;
Sec. 13, W½, N½SE¼, E½NE¼, SW¼NE¼;
Sec. 14, SE¼SE¼, SE¼SW¼;
Sec. 15, SE¼;
Sec. 24, NE¼NW¼, SE¼SW¼, W½SE¼, SW¼NE¼;
Sec. 25, W½NE¼;
Sec. 26, SW¼SW¼;
Sec. 27, SW¼NE¼, N½SE¼, SE¼SE¼.

The areas described total 4,115.02 acres.

The lands described are located in Idaho Grazing District No. 1. The lands are located at distances of from about 8 to 13 miles southerly from Castleford, Idaho, via a hard-surfaced county road and in part by little-improved connecting roads. Situated on a bench of nearly level to gently undulating surface, the elevations of the lands range from about 4,300 feet to approximately 4,500 feet. There are some low outcrops of basaltic lava, which have resulted in some minor knolls. Slopes are generally northerly and northeasterly and are of low gradients.

Although these lands, more or less, are of somewhat arable quality, most of them contain areas of outcropping lava, of shallow soils, or of lava fragments. Their receipt of annual precipitation is insufficient to permit the economic production of agricultural crops thereon by ordinary or by dry-farming methods. There is no known water supply for their adequate irrigation on a permanent basis. They were reconveyed to the United States because of the fact that under the local Carey Act Project (as to State Segregation List No. 26), there was no project water available for their irrigation. Available information is to the effect that local ground waters are at economically unfeasible depths. It is thus very doubtful that any or these lands could be favorably classified for entry under the agricultural land disposal acts.

The S½SW¼, Sec. 13; SE¼SW¼, SE¼SE¼, Sec. 14; NE¼NW¼, Sec. 24, T. 12 S., R. 13 E., B. M., Idaho, are now occupied by William Bell Arness, and the E½SE¼, SW¼SE¼, Sec. 11, T. 12 S., R. 13 E., B. M., Idaho, are occupied by Otto L. Mitton, who have cultivated and improved the lands and who have the water rights necessary for their development. Any applicant under this order will be required to file evidence of a water right sufficient to irrigate all the irrigable portions of the lands. Any applicants adverse to the present entrymen, according to Departmental rules, will be required to reimburse the entrymen for all improvements which cannot be removed from the lands without injury to the improvements or to the lands.

This order shall not otherwise become effective to change the status of the described lands until 10:00 a. m., on the 35th day after the date of this order. At that time, the said lands shall become subject to application, petition, location and selection under the applicable public-land laws, subject to valid existing rights, the provisions of existing withdrawals, the requirements of applicable laws, and the 91-day preference right filing period for veterans and others entitled to preference under the act of September 27, 1944 (58 Stat. 747; 43 U. S. C. 279–284), as amended. All applications filed pursuant to the Veterans' Preference Act of 1944, on or before 10:00 a. m., of the 35th day after the date of this order, shall be treated as though simultaneously filed at that time. All other applications under the public-land laws filed on or before 10:00 a. m., of the 126th day after the date of this order shall be treated as simultaneously filed at that time.

Inquiries concerning these lands shall be addressed to Manager, Land Office, Box 2237, Boise, Idaho.

Nolan F. Keil,
Acting State Supervisor.

[F. R. Doc. 55–4246; Filed, May 25, 1955; 8:46 a. m.]

[Misc. 64226, 65650]

New Mexico and California

Partial Revocation of Departmental Orders of December 3, 1907, and February 24, 1908, Which Reserved Lands for Use of Forest Service as Administrative Sites

May 18, 1955.

Upon the request of the Department of Agriculture and pursuant to Departmental Order No. 2583 of August 16, 1950, section 2.22 (a), as amended, it is ordered as follows:

1. The order of the Secretary of the Interior of December 3, 1907, reserving lands in the Big Burros National Forest (now Gila National Forest) for use of the Forest Service, Department of Agriculture, as administrative sites is hereby revoked so far as it refers to the following described lands:

New Mexico

[64226]

Big Burros Administrative Site

New Mexico Principal Meridian

T. 19 S., R. 15 W.,
Sec. 29, NW¼, NW¼NE¼.

The area described contains 199 acres.

2. The order of the First Assistant Secretary of the Interior of February 24, 1908, withdrawing lands in the Sierra National Forest (now Sequoia National Forest), for use of the Forest Service, Department of Agriculture, for use as administrative sites, is hereby revoked so far as it refers to the following-described lands:

California

[65650]

Cain Spring Administrative Site

Mount Diablo Meridian

T. 23 S., R. 30 E.,
Sec. 16, SW¼NE¼ and W½SE¼NE¼.

The area described contains 60 acres.

Earl G. Harrington,
Acting Associate Director.

Oregon

Notice of Proposed Withdrawal and Reservation of Lands

May 18, 1955.

The Department of Agriculture, Forest Service, has filed an application, Serial No. Oregon 04043, for the withdrawal of the lands described below, from all forms of appropriation under the general mining laws and mineral leasing laws except oil and gas leasing.

The applicant desires the land for: administrative sites.

For a period of 30 days from the date of publication of this notice, persons having cause may present their objections in writing to the undersigned official of the Bureau of Land Management, Department of the Interior.

If circumstances warrant it, a public hearing will be held at a convenient time and place, which will be announced.

The determination of the Secretary on the application will be published in the FEDERAL REGISTER. A separate notice will be sent to each interested party of record.

The lands involved in the application are:

WILLAMETTE MERIDIAN, OREGON

SIUSLAW NATIONAL FOREST

Cummins Peak Administrative Site

T. 15 S., R. 11 W.,
Sec. 22: E½SW¼, W½SE¼;
Sec. 27: W½NE¼, E½NW¼.

Total area, 320 acres.

DEPARTMENT OF AGRICULTURE

Office of the Secretary

LOUISIANA

DESIGNATION OF AREAS FOR PRODUCTION EMERGENCY LOANS

For the purpose of making production emergency loans pursuant to section 2 (a) of Public Law 38, 81st Congress (12 U. S. C. 1148a-2 (a)), as amended, it is determined that in the following named additional parishes in the State of Louisiana a production disaster has caused a need for agricultural credit not readily available from commercial banks, cooperative lending agencies, or other responsible sources.

STATE OF LOUISIANA

St. Helena. Tangipahoa.

Pursuant to the authority as set forth above, such loans will not be made in the above-named parishes in the State of Louisiana after December 31, 1955, except to borrowers who previously received such assistance.

Done at Washington, D. C., this 20th day of May 1955.

[SEAL] EZRA TAFT BENSON,
Secretary of Agriculture.

FOURTH SECTION APPLICATIONS FOR RELIEF

MAY 23, 1955.

Protests to the granting of an application must be prepared in accordance with Rule 40 of the general rules of practice (49 CFR 1.40) and filed within 15 days from the date of publication of this notice in the FEDERAL REGISTER.

LONG-AND-SHORT-HAUL

FSA No. 30654: Motor-rail rates—Pennsylvania Railroad. Filed by Eastern Central Motor Carriers Association, Agent, for Pennsylvania Railroad Company, Interstate Motor Freight System and other interested motor carriers. Rates on various commodities, in truck loads and less-than-truck loads, in highway truck trailers loaded on a railroad flat cars, between Chicago, Ill., and Philadelphia, Pa., and Kearny, N. J.

Grounds for relief: Motor-carrier competition.

Tariff: Eastern Central Motor Carriers Association tariff I. C. C. No. 4.

FSA No. 30655: Motor-rail rates—Pennsylvania Railroad. Filed by Eastern Central Motor Carriers Association, Agent, for Pennsylvania Railroad Company and interested motor carriers. Rates on various commodities, truckloads and less-truck-loads, in highway truck trailers loaded on railroad flat cars, between East St. Louis, Ill., and Philadelphia, Pa., and Kearny, N. J.

Grounds for relief: Motor-carrier competition.

Tariff: Eastern Central Motor Carriers Association tariff I. C. C. No. 4.

FSA No. 30656: Sand—Ohio to South Carolina and Tennessee. Filed by H. R. Hinsch, Agent, for interested rail carriers. Rates on sand, ground or pulverized, carloads, from Glass Rock and Howard, Ohio to Anderson, S. C., and from Glass Rock, Ohio, to Chattanooga and Nashville, Tenn.

Grounds for relief: Short-line distance formula, market competition, and circuity.

Tariff: Supplement 70 to Agent Hinsch's I. C. C. 4510.

FSA No. 30657: Cement—Houston, Tex., to southern territory. Filed by F. C. Kratzmeir, Agent, for interested rail carriers. Rates on portland cement, carloads, from Houston, Tex., to specified destinations in southern territory.

Grounds for relief: Short-line distance formula.

Tariff: Supplement 19 to Agent Kratzmeir's I. C. C. No. 4050.

By the Commission.

[SEAL] HAROLD D. McCOY,
Secretary.

[No. 31786]

DELAWARE, LACKAWANNA AND WESTERN RAILROAD CO.

INVESTIGATION INSTITUTED AND HEARING ORDERED ON INTRASTATE COMMUTATION FARES

At a session of the Interstate Commerce Commission, Division 1, held at its office in Washington, D. C., on the 13th day of May A. D. 1955.

It appearing that by petition filed April 20, 1955, The Delaware, Lackawanna and Western Railroad Company alleges that its intrastate commutation fares between points in the State of New Jersey, made or imposed by the authority of that State, through its Board of Public Utility Commissioners, cause and will continue to cause undue and unreasonable advantage, preference and prejudice as between persons and localities in intrastate commerce, on the one hand, and interstate commerce, on the other hand, and undue, unreasonable, and unjust discrimination against interstate commerce, in violation of section 13 (4) of the Interstate Commerce Act;

It further appearing that a copy of the petition was sent to the New Jersey Board which asks that it be denied, or in the alternative that a date be set for hearing on the said petition with notice of said hearing to all interested parties;

It further appearing that the lawfulness of the commutation fares of numerous railroads in northern New Jersey are in issue in Dockets Nos. 31663, 31474, 31107, and Investigation and Suspension Docket No. 6260, the latter proceeding dealing with the interstate commutation fares of this petitioner between points in New Jersey and New York, N. Y., which proceedings are now set for oral argument before the entire Commission on June 14, 1955;

It further appearing that on November 10, 1954, a joint hearing was held by this Commission and the New Jersey Board in I. & S. Docket No. 6260 and related State proceedings dealing, respectively, with the interstate and intrastate commutation fares of this petitioner, at which all interested parties were given an opportunity to be heard;

And it further appearing that Docket No. 31107, which deals with the lawfulness of the intrastate commutation fares of certain other railroads in northern New Jersey, was submitted on further hearing on the record made in No. 31663:

It is ordered, That, in response to said petition, an investigation be, and it is hereby, instituted, for the purpose of giving all interested persons an opportunity to present evidence to determine whether the said intrastate commutation fares of this petitioner cause or will cause undue or unreasonable advantage, preference, or prejudice as between persons or localities in intrastate commerce, on the one hand, and interstate commerce, on the other hand, or any undue, unreasonable, or unjust discrimination against interstate commerce, and to determine what commutation fares, if any, or what maximum or minimum or maximum and minimum fares should be prescribed to remove the unlawful advantage, preference, prejudice, or discrimination, if any, as may be found to exist;

It is further ordered, That The Delaware, Lackawanna and Western Railroad Company be, and it is hereby, made respondent to this proceeding; that a copy of this order be served upon respondent; and that the State of New Jersey be notified of this proceeding by sending copies of this order and of the said petition by registered mail to the Governor of said State and to the Board of Public Utility Commissioners at Trenton, N. J.;

It is further ordered, That a copy of the order be sent to all parties of record in Investigation and Suspension Docket No. 6260 and related State proceeding, and notice given to the general public by depositing a copy of this order in the office of the Secretary of the Commission at Washington, D. C., and by filing a copy with the Director, Division of the Federal Register, Washington, D. C.

And it is further ordered, That this proceeding be, and it is hereby, assigned for hearing at the office of the Board of Public Utility Commissioners of the State of New Jersey, 1060 Broad Street, Newark, N. J., on June 20, 1955, at 11:00 o'clock, a. m., U. S. Standard Time, or 11:00 a. m., Daylight Saving Time, if that time is observed, before Examiner Fuller: *Provided, however*, That if parties of record in I. & S. No. 6260, Commutation Fares Between New York and New Jersey, (and the related State case) who may be parties in interest in the instant investigation, notify this Commission, on or before June 3, 1955, that they are willing to submit the issues herein on the record hertofore made in those proceedings; and that no objection to such procedure, and no request for an opportunity to present evidence by any other persons, is received by the Commission, on or before that date, such oral hearing will be dispensed with, and the matter will stand submitted on the record made in I. & S. No. 6260 (and the related State proceeding); and will be assigned for oral argument with that proceeding, docket No. 31663, and the proceedings consolidated therewith.

By the Commission, Division 1.

[SEAL] HAROLD D. McCOY,
Secretary.

[F. D. Doc. 55-4260; Filed, May 25, 1955; 8:49 a. m.]

[Rev. S. O. 562, Taylor's I. C. C. Order 50]

ST. LOUIS-SAN FRANCISCO RAILWAY CO.

REROUTING OR DIVERSION OF TRAFFIC

In the opinion of Charles W. Taylor, Agent, the St. Louis-San Francisco Railway Company, due to high water, washouts and bridge out of service, between Oklahoma City, Oklahoma, and Quannah, Texas, and between Vernon, Texas, and Snyder, Oklahoma, is unable to transport traffic routed over its lines between these points.

It is ordered, That:

(a) Rerouting traffic: The St. Louis-San Francisco Railway Company is hereby authorized to reroute or divert traffic moving over its lines between Oklahoma City, Oklahoma, and Quannah, Texas, and between Vernon, Texas, and Snyder, Oklahoma, due to high water, washouts and bridge out of service, over any available route to expedite the movement.

(b) Concurrence of receiving roads to be obtained: The railroad desiring to divert or reroute traffic under this order shall confer with the proper transportation officer of the railroad or railroads to which such traffic is to be diverted or rerouted, and shall receive the concurrence of such other railroads before the rerouting or diversion is ordered.

(c) Notification to shippers: Each carrier rerouting cars in accordance with this order shall notify each shipper at the time each car is rerouted or diverted and shall furnish to such shipper the new routing provided under this order.

(d) Inasmuch as the diversion or rerouting of traffic by said Agent is deemed to be due to carrier's disability, the rates applicable to traffic diverted or rerouted by said Agent shall be the rates which were applicable at the time of shipment on the shipments as originally routed.

(e) In executing the directions of the Commission and of such Agent provided for in this order, the common carriers involved shall proceed even though no contracts, agreements, or arrangements now exist between them with reference to the divisions of the rates of transportation applicable to such traffic; divisions shall be, during the time this order remains in force, those voluntarily agreed upon by and between said carriers; or upon failure of the carriers to so agree, said divisions shall be those hereafter fixed by the Commission in accordance with pertinent authority conferred upon it by the Interstate Commerce Act.

(f) Effective date: This order shall become effective at 9:00 a. m., May 20, 1955.

(g) Expiration date: This order shall expire at 11:59 p. m., May 31, 1955, unless otherwise modified, changed, suspended or annulled.

It is further ordered, That this order shall be served upon the Association of American Railroads, Car Service Division, as agent of all railroads subscribing to the car service and per diem agreement under the terms of that agreement and by filing it with the Director, Division of the Federal Register.

Issued at Washington, D. C., May 20, 1955.

INTERSTATE COMMERCE COMMISSION,
CHARLES W. TAYLOR,
Agent.

[F. R. Doc. 55-4261; Filed, May 25, 1955; 8:49 a. m.]

CIVIL AERONAUTICS BOARD

[Docket No. 7173]

OFF-ROUTE CHARTER RIGHTS FOR FOREIGN AIR CARRIERS

ORDER INSTITUTING INVESTIGATION

In the matter of a proceeding to amend the permits held by various for-

eign air carriers so as to provide that said carriers may make charter trips without regard to points named in their permits, under regulations prescribed by the Board; Docket No. 7173.

Adopted by the Civil Aeronautics Board at its office in Washington, D. C., on the 19th day of May 1955.

Section 401 (f) of the act provides that any United States air carrier may make charter trips without regard to the points named in its certificate under regulations prescribed by the Board. Pursuant thereto the Board has established in Part 207 of the Economic Regulations the general framework under which charter trips might be encouraged and wasteful practices therein curtailed so as to fulfill the basic policy of the Act as set forth in section 2 thereof.

There is no comparable provision in the Civil Aeronautics Act for foreign air carriers. At the present time, a foreign air carrier desiring to make a charter flight without regard to the points named in its permit (issued under section 402 of the act) must secure a permit from the Board under section 6 (b) of the Air Commerce Act of 1926, as amended, if the proposed flight does not fall within the definition of "foreign air transportation" as set forth in section 1 (21) of the act. On the other hand, if the proposed flight is deemed to be "foreign air transportation", the foreign air carrier must secure an amendment by the Board of its permit which can be done only after notice and hearing, and approval by the President of the United States. See sections 402 (g) and 801 of the act.

Recently, the Board has been in receipt from foreign air carriers of a number of applications for permits under section 6 (b) of the Air Commerce Act of 1926, as amended, to conduct charter flights without regard to the points named in their section 402 permits, where the flights appeared to involve "foreign air transportation" as defined in section 1 (21) of the act. Since the Air Commerce Act does not empower the Board to grant permits for such purposes, the Board has been constrained to deny these applications and to require the applicants to comply with the provisions of sections 402 (g) and 801 of the act (relating to the amendment of permits held by foreign air carriers), even though it was apparent that to subject the applicants to those requirements would be an undue burden upon them. However, the Board has no power, as is the case with United States carriers under section 416 (b) of the act, to exempt foreign air carriers from the requirements of Title IV of the act.

Upon further consideration of the problem, we are convinced that, in most instances, it may not be in the public interest to subject foreign air carriers to the hardship, expense and delays incident to a permit amendment proceeding whenever they desire to operate an off-route charter flight which is deemed to be "foreign air transportation". Also, it has been suggested that we should be in a position to grant expeditiously off-route charter authorizations to any foreign air carrier whose government affords similar consideration to United States air carriers. Accordingly, we have concluded that the soundest way to resolve these matters is to institute an investigation with a view to amending the section 402 permit held by each foreign air carrier so as to provide that the carrier named in such permit may make charter trips without regard to the points named in its permit under regulations prescribed by the Board. We also contemplate that upon the record made in this proceeding we will be enabled to promulgate regulations concurrently with the amendment of the permits, covering the performance of charter trips by foreign air carriers.

The Board, acting pursuant to sections 205 (a), 402 (g), and 1002 (b) of the act:

It is ordered, That:

1. An investigation be and it hereby is instituted to determine (a) whether it is in the public interest to alter, modify or amend, and whether the Board should order the alteration, modification or amendment of, the section 402 permits now held by foreign air carriers and the section 402 permits which may be issued to those foreign air carriers made respondents herein by ordering paragraph 2, so as to provide that the foreign air carrier named in such permit (now held, or to be issued, as the case may be) may make charter trips, without regard to the points named in its permit, under regulations prescribed by the Board; (b) whether the public interest requires, and whether the Board should order the promulgation of regulations to govern the performance of charter trips by foreign air carriers;

2. The following be and they hereby are made parties to this proceeding: (a) every holder of a permit under section 402 of the act as of the date of the prehearing conference herein; (b) every applicant for a permit under section 402 of the act whose application, as of the date of the prehearing conference herein, has progressed procedurally beyond the prehearing conference;

3. This proceeding be set down for hearing before an Examiner of the Board at a time and place hereafter to be designated.

By the Civil Aeronautics Board.

[SEAL] M. C. MULLIGAN,
Secretary.

FEDERAL COMMUNICATIONS COMMISSION

[Docket Nos. 10722, 11395; FCC 55-587]

ALVARADO BROADCASTING CO., INC. (KOAT)

MEMORANDUM OPINION AND ORDER DESIGNATING APPLICATIONS FOR CONSOLIDATED HEARING ON STATED ISSUES

In re application of Alvarado Broadcasting Company, Inc. (KOAT), Albuquerque, New Mexico, Docket No. 10722, File No. BP-8782, for construction permit; Alvarado Broadcasting Company, Inc. (KOAT), Albuquerque, New Mexico, Docket No. 11395, File No. BL-5399, for license to cover construction permit.

1. The Commission has before it (1) a protest filed on March 8, 1954, pursuant to section 309 (c) of the Communications Act, as amended, by Metropolitan Television Company, licensee of Station KOA, Denver, Colorado (850 kc, 50 kw, unlimited time), directed against the Commission's action of February 4, 1954 (released February 5, 1954), granting the above-entitled application of Alvarado Broadcasting Company, Inc., licensee of Station KOAT, Albuquerque, New Mexico, to change the facilities of Station KOAT from 1240 kc to 860 kc and increase power from 250 watts unlimited time to 1 kw day and 500 watts night with a directional antenna at night; and (2) an opposition to said protest filed by the applicant, Alvarado Broadcasting Company, Inc., on March 12, 1954.

2. In a Memorandum Opinion and Order adopted on March 18, 1954, the Commission concluded that KOA was not a party in interest within the meaning of section 309 (c) of the Communications Act and dismissed KOA's protest (10 RR 382 (a)). KOA appealed the Commission's Opinion and Order to the United States Court of Appeals for the District of Columbia Circuit and, in an opinion rendered on April 14, 1955, that Court reversed the Commission. Metropolitan Television Company v. Federal Communications Commission, —— U. S. App. D. C. ——, —— F. 2d ——, 12 RR 2001.

3. KOA in its protest had specified the following issues on which it asked for an opportunity to present evidence:

1. To determine the areas and populations which will receive primary service from the operation of Station KOAT, as proposed, and the other primary service available to those areas and populations.

2. To determine whether the proposed operation would involve interference to the primary and secondary service areas of Station KOA, Denver, Colorado, and, if so, the areas and population affected thereby and the other services available to those areas and populations.

3. To determine the nature of the program service provided by KOA to the areas of interference, if any, the nature of the program service provided by other stations to such areas, and, in light thereof, to determine whether the public interest would be served by the destruction of KOA service in the areas affected.

4. To determine whether the operation of Station KOAT, as proposed, would be in compliance with the Commission's rules and Standards of Good Engineering Practice, with particular reference to the interference which would be received by such operation and to the coverage which would be provided to the City of Albuquerque.

4. Issues 1 and 2 pertain to the coverage and interference areas of the proposed KOAT operation in question. In its protest KOA alleges, and the Commission agrees, that the proposed KOAT operation will cause interference to KOA in an area beyond KOA's protected contour as defined by the Commission's Engineering Standards. Since this interference area is beyond KOA's normally protected contour the significance of this interference area, with respect to the grant in question, is something that will be determined first by the Examiner and then by the Commission in light of the evidence adduced at the hearing. Thus KOA has specified facts, matters and things relied upon so as to warrant the designation of the KOAT application for hearing, upon the issues of coverage and interference.

5. With respect to Issue 3, we believe it necessary, in view of Issues 1 and 2 that evidence also be taken on the program service being rendered by Station KOA and the other stations serving the interference areas. See Democrat Printing Company v. Federal Communications Commission, 91 U. S. App. D. C. 72; 202 F. 2d 298.

6. With respect to Issue 4, KOA claims that the KOAT nighttime limitation would be 14.5 mv/m rather than 12 mv/m as assumed by KOAT. In its opposition, KOAT did not dispute KOA's allegation as to KOAT's nighttime limiting contour. The exact placement of KOAT's interference-free nighttime contour is pertinent in this case because it seriously affects KOAT's ability to comply with the provisions of the Commission's "10 Per Cent Rule" that was in effect at the time, February 4, 1954, the Commission granted the construction permit in issue and to provide the required coverage to the City of Albuquerque as specified by the Commission's Engineering Standards. Thus KOA has specified facts, matters and things relied upon so as to warrant the designation of the KOAT application for hearing upon the issue of compliance with the Commission's rules and Standards of Good Engineering Practice.

7. Moreover, since Station KOAT was not an existing facility on 860 kilocycles at the time when the above-entitled application was granted by the Commission on February 4, 1954, the stay of the effective date of the 860 kilocycle grant as ordered below will make it necessary for Station KOAT to return to its licensed facility, i. e., 1240 kilocycles with 250 watts power, unlimited time. In order, however, that KOAT's listening audience be not completely deprived of KOAT's program service for any substantial period, some time within which to resume operations on 1240 kilocycles should be provided.

8. One further matter remains to be disposed of. While KOA was perfecting its appeal from the Commission's order dismissing its protest of the KOAT grant, KOAT constructed the facility in question and on July 27, 1954, filed an application for license to cover the 860 kilocycle construction permit. Simultaneously, KOAT requested authority to commence program tests. On August 5, 1954, KOAT was granted program test authority. On August 6, 1954, KOA filed a petition to designate the KOAT application for license for hearing and to deny the request for program test authority. On August 9, 1954, KOA filed a petition for reconsideration of the Commission's action in granting KOAT program test authority. On August 17, 1954, KOAT filed oppositions to the KOA pleadings of August 6 and August 9, 1954. On December 17, 1954 KOA filed a petition requesting the Commission to dismiss the KOAT license application. A reply thereto was filed by KOAT on December 27, 1954. Action on all these petitions has been withheld pending the Court's decision on KOA's appeal from the Commission's action in dismissing KOA's protest of March 8, 1954.

9. In addition to the engineering considerations raised by KOA in its protest, KOA claims, in its various pleadings filed with respect to the KOAT license application, that KOAT prematurely constructed a portion of its 860 kilocycle facility in violation of section 319 (a) of the Communications Act and that KOAT made certain misrepresentations of material facts concerning the financing of the proposed 860 kilocycle operation. Since allegations as to premature construction and possible misrepresentations were not included in KOA's March 1954 protest, KOA is not entitled to a hearing on KOAT's license on these issues as a matter of right. Benton Broadcasting Service, 9 RR 586. However, because of the conflicting allegations by KOA and KOAT concerning these charges, the Commission, in the interest of the proper dispatch of its business, is including these two issues in the hearing ordered below. In doing so, the Commission will have full and complete facts concerning these matters and thus will be able to take final action on the protest and license application at the same time.

10. In view of the foregoing: *It is ordered*, That the subject KOA protest is granted and that pursuant to section 309 (c) of the Communications Act, as amended, effective midnight, May 31, 1955, the effective date of the grant of the above-entitled application for construction permit is postponed pending a final determination by the Commission with respect to the hearing ordered below, and that the above-entitled applications are designated for hearing at the offices of the Commission in Washington, D. C., on the following issues:

1. To determine the areas and populations which will receive primary service from the operation of Station KOAT, as proposed, and the other primary service available to those areas and populations.

2. To determine whether the proposed operation would involve interference to the primary and secondary service areas of Station KOA, Denver, Colorado, and, if so, the areas and population affected thereby and the other services available to those areas and populations.

3. To determine the nature of the program service provided by KOA to the areas of interference, if any, the nature of the program service provided by other stations to such areas, and, in the light thereof, to determine whether the public interest would be served by the destruction of KOA service in the areas affected.

4. To determine whether the operation of Station KOAT, as proposed would be in compliance with the Commission's rules and Standards of Good Engineering Practice, with particular reference to the interference which would be received by such operation and to the coverage which would be provided to the City of Albuquerque.

5. To determine whether construction of the 860 kilocycle facility proposed by Alvarado Broadcasting Company had begun, within the meaning of section 319 of the Communications Act of 1934, as amended, before the Commission on February 4, 1954, granted Alvarado Broadcasting Company a construction permit for the 860 kilocycle facility.

6. To determine whether Alvarado Broadcasting Company made any misrepresentations of material facts in its application for construction permit, File No. BP-8782 and application for license to cover construction permit BL-5399.

11. The burden of proof as to Issues 1 and 4 is placed on Alvarado Broadcasting Company, Inc. The burden of proof on Issues 2 and 3 is placed on Metropolitan Television Company because the interference alleged by KOA is not normally protected against under the Commission's Rules and Engineering Standards. The burden of proof on Issues 5 and 6 is placed on Metropolitan Television Company because the matters raised by these issues are ones we might not set for hearing at all, except for the convenience of disposing of them as part of the hearing already ordered on the protest.

It is further ordered, That Metropolitan Television Company and the Chief, Broadcast Bureau are made parties to the proceeding herein and that; (a) the hearing of the above issues will commence at 10:00 a. m. on June 23, 1955, before an examiner to be specified by the Commission; and (b) the parties to the proceeding shall have fifteen (15) days after the issuance of the Examiner's decision to file exceptions thereto and seven (7) days thereafter to file replies to any such exception; and (c) the appearance by the parties intending to participate in the above hearing shall be filed not later than June 13, 1955.

It is further ordered, That Station KOAT cease operation on 860 kilocycles as of midnight June 17, 1955, and that Station KOAT resume operation on its regularly licensed facilities of 1240 kilocycles with 250 watts power, unlimited time on or after June 18, 1955.

Adopted: May 18, 1955.

Released: May 23, 1955.

[Docket No. 11394; FCC 55-586]

IREDELL BROADCASTING CO. (WDBM)

MEMORANDUM OPINION AND ORDER DESIGNATING APPLICATION FOR HEARING ON STATED ISSUES

In re application of Walter A. Duke, d/b as Iredell Broadcasting Company (WDBM), Statesville, North Carolina, Docket No. 11394, File No. BP-9527; for construction permit.

1. The Commission has before it a protest filed on April 22, 1955, by the Statesville Broadcasting Company, licensee of Station WSIC, Statesville, North Carolina (1400 kc, 250 w, Unl.) pursuant to section 309 (c) of the Communications Act of 1934, as amended, protesting the Commission's action of March 23, 1955 (released March 23, 1955), granting without hearing the above-entitled application of the Iredell Broadcasting Company for a new standard broadcast station (WDBM) to operate on 550 kilocycles with a power of 500 watts, daytime only, at Statesville, North Carolina; and an opposition to the said protest filed by WDBM on May 9, 1955.

2. In support of its protest, WSIC alleges that it will suffer economic injury as a result of the Commission's action in granting the above-entitled application and, therefore, is a party in interest within the purview of section 309 (c) of the Communications Act of 1934, as amended. WSIC alleges that it will suffer economic injury because it is the only existing station in the same town where WDBM proposes to operate and that any revenue obtained by the new station will be at WSIC's expense; and because there is not sufficient advertising to support two radio stations in Statesville, according to an economic survey submitted with the WSIC protest. WSIC further alleges, as facts, matters and things relied upon, that the said economic survey, prepared by two professors of economics and market analysis at Lenoir Rhyne College, Hickory, North Carolina, "demonstrates that Statesville, North Carolina, cannot support a second radio station unless both stations conduct a marginal operation"; and that WSIC is entitled, therefore, to an evidentiary hearing as a matter of law in light of the Sanders Brothers Radio Station case,[1] in which the United States Supreme Court said, "• • • the unavailability of economic support has a bearing upon the ability of the applicant to adequately serve the public or when all stations, the existing and the proposed, would fail or would be compelled to render an inadequate service". It is averred by WSIC that "definite and absolute proof is not the criterion which the Supreme Court intended the Commission to use in such circumstances", that "reasonable probability can be the only true test". WSIC alleges that such a reasonable probability that both stations could not survive is amply demonstrated by the said economic survey. WSIC contends that under the Act, as now constituted, the Commission cannot determine ex parte or at an oral argument en banc the invalidity of WSIC's factual allegations that Statesville cannot support a second radio station. WSIC's protest also contained an affidavit by the station manager in which he stated that if a second station were established in Statesville, WSIC would be forced to render an inferior service. The protestant further specifies that WDBM is not financially qualified to construct and operate the proposed station and that it could not construct the station for the amount estimated by WDBM.

3. WSIC has specified the following issues on which it requests an opportunity to present evidence:

1. To determine whether the Statesville market area will provide sufficient revenue to the proposed station to enable it to adequately operate in the public interest.

2. To determine whether, because of the lack of advertising potential in the Statesville market, competition between the existing station and the proposed station may force one or both to fail for lack of financial support, with the result that the public of Statesville will be without a local radio outlet.

3. To determine whether the competition of a second station, which will operate daytime only, may force the existing full-time station to fail, thus depriving the public of Statesville of its only nighttime radio outlet.

4. To determine whether the advertising potential of the Statesville market is so inadequate that the operation of a second station may cause either or both stations to render an inadequate service to the people of Statesville.

5. To determine whether the applicant can build the proposed station for the sum of $13,400.

6. To determine whether the applicant is financially qualified to construct, own and operate the proposed station.

4. In view of the fact that the protestant is licensee of standard broadcast station WSIC, Statesville, North Carolina; that the grant herein protested establishes a second standard broadcast station in Statesville in direct competition with protestant's existing and operating station; and that protestant has alleged that it has been and will continue to be financially injured by the grant in question, we are constrained to conclude that protestant is a "party in interest" which may protest under section 309 (c). See T. E. Allen and Sons, 9 Pike and Fischer RR 197; Federal Communications Commission v. Sanders Brothers Radio Station, 309 U. S. 407 (9 RR 2008).

5. Issues 1, 2, 3, and 4 as specified by the protestant relate to economic injury. These issues, designed to show that the public interest would suffer by the establishment of a second station in Statesville, North Carolina, in all likelihood, are not pertinent because of considerations already set out by the Commission in In re Voice of Cullman, 6 RR 164 (1950).[2] However the Commission, in cases very similar to the subject case, recently afforded the protestants an oral argument on the legal and policy questions raised by protestants seeking hearing issues on the competitive aspects of new stations, In re Application of American Southern Broadcasters (WPWR), 11 RR 1054; and In re Application of Radio Tifton (WTIF), 11 RR 1167. Consequently, the instant protestant will be afforded a similar oral argument on the legal and policy questions raised by the requested economic injury issues.

6. With respect to Issue 5, protestant states that to "justify WDBM's estimated 'low' figure of $13,400 for cost of construction of the station, the Commission has been asked by WDBM to make three assumptions: (1) That a used transmitter can be obtained for $3,700; (2) that a combined studio and transmitter building can be constructed for $1,500; and (3) that certain unlisted equipment was already in the possession of the applicant." The protestant claims that no evidence was submitted to support (1) and (3) and that according to an attached affidavit of a Statesville contractor it cost $7.25 a square foot to construct a wooden building in the Statesville area and that for $1,500 WDBM would be limited to a studio and transmitter building approximately 20 x 10 feet, which would be inadequate. WDBM in its application stated that the cost of its transmitter would be $3,700, and in Exhibit No. 6 therewith, specified the type and stated that it is a used transmitter. The figure quoted appears reasonable for a used transmitter of this type. It is further stated in Exhibit No. 6 that a studio console has already been obtained. The above statements in the application of WDBM are under oath, and the application form does not require further evidence to support these sworn statements. Moreover, in another part of its application, WDBM states that the estimated cost of "Acquiring, remodeling, or constructing buildings" is $1,500. The protestant assumes that WDBM will construct a new building at $7.25 a square foot, rather than "acquiring" or "remodeling", in contending that this amount is inadequate. In view of the foregoing, the Commission is of the opinion that the information submitted by the protestant is not sufficient to warrant adoption as its own the issue as to whether the grantee can build the proposed station for $13,400. Therefore, the burden of proof upon this issue is being left with the protestant.

7. With respect to Issue 6, the protestant alleges that WDBM is not financially qualified to construct and operate the proposed station. This claim is based on grounds that the station cannot be constructed for the amount estimated, that the resources indicated are not available to WDBM, and that WDBM cannot show a profit the first year and to exist must have a total income of $20,000 the first year, which a survey submitted with the protest indicates cannot be obtained. The question of whether WDBM can be constructed for the amount estimated is treated in paragraph 6, above. WSIC claims that WDBM's estimated annual operating cost of $36,000 and WSIC's annual operating costs of $72,000, or a total of $108,000, are $16,000 more than the present income of WSIC; that the said survey shows there is no real expectation that the total advertising income from radio in Statesville can be increased; and that WDBM, therefore, cannot operate at a profit during the first year. This reasoning is based on the assumption that WSIC's revenues and expenses would remain static and that only WDBM would suffer. It is not impossible that a different situation would obtain and competition would reduce the total revenue or profit available to WSIC and the protest itself urges that WSIC would suffer economically. Since there is no assurance that it would not be WSIC which would falter in the competition between the two stations, it cannot be concluded that WDBM could not show a profit the first year of operation even if the Statesville radio advertising income is not increased.

8. WSIC further states that WDBM "estimates that it will cost $13,400 to construct the proposed station and $36,000 to operate it the first year, or a total expenditures of $49,000. In addition, payment on the deferred contract for equipment will exceed $4,000 a year, making a total cost of $53,400. The alleged resources available to the applicant are as follows:

Cash	$1,142.83
Bank Loan	15,000.00
Profits	3,000.00
Deferred payments	10,000.00
	29,142.83

Therefore, the applicant will have to secure a total income of $20,000 to exist for one year. The economic analysis attached hereto also shows that it is highly improbable that such revenue will be available to the applicant". In computing WDBM's cost of operation for the first year, the protestant has included the total cost of construction, whereas the deferred credit will extend the total cost of construction over approximately three years. Accordingly, the necessity of a total income of $20,000 the first year does not follow. Protestant further alleges that the $10,000 deferred credit was on an equipment order of $16,000, but that in Exhibit No. 6 of its application WDBM indicated that only $10,700 worth of equipment would be purchased, and that, therefore, "there is no showing that any deferred credit is available, or at most, only a substantially reduced credit". While the deferred credit arrangement for purchase of equipment amounting to $10,700 would be less than that for the estimated $16,000 purchase, this reduced credit is nonetheless an asset in the determination of WDBM's financial qualification.

9. WDBM shows other assets of $1,142.83 cash, $15,000 bank loan and $3,000 profits, or a total of $19,142.83. The estimated cost of construction of WDBM is $13,400, of which $10,700 in equipment will be purchased on deferred payments, leaving a total of $2,700 to be met the first year. Adding to that the payments on the deferred credit of approximately $4,000 the first year, the cost of construction would require an outlay of $6,700 the first year. WDBM's assets of $19,142.83 appear ample to meet the first year construction costs and maintain the early operation of the station. The protestant further alleges that WDBM's commitment for a bank loan of $15,000 expired on April 9, 1955. The subject application was granted on March 23, 1955. The commitment had not expired at the time of the grant, and the protestant makes no showing that the loan was not actually made before April 9, 1955, or that an extension was not granted. In view of the foregoing, the Commission is of the opinion that the information submitted by the protestant is not sufficient to warrant adoption as its own the issue as to whether the grantee is financially qualified to construct and operate the proposed station. Therefore, the burden of proof upon this issue is being left with the protestant.

10. In view of the foregoing: *It is ordered,* That, insofar as the subject protest requests reconsideration of the Commission's action of March 23, 1955, it is granted to the extent provided herein; that pursuant to section 309 (c) of the Communications Act of 1934, as amended, effective immediately, the effective date of the grant of the above-entitled application is postponed pending a final determination by the Commission with respect to the hearing described below, and that the above-entitled application is designated for hearing at the offices of the Commission in Washington, D. C., on the following issues:

1. To determine whether the Statesville market area will provide sufficient revenue to the proposed station to enable it to adequately operate in the public interest.

2. To determine whether, because of the lack of advertising potential in the Statesville market, competition between the existing station and the proposed station may force one or both to fail for lack of financial support, with the result that the public of Statesville will be without a local radio outlet.

3. To determine whether the competition of a second station, which will operate daytime only, may force the existing full-time station to fail, thus depriving the public of Statesville of its only nightime radio outlet.

4. To determine whether the advertising potential of the Statesville market is so inadequate that the operation of a second station may cause either or both stations to render an inadequate service to the people of Statesville.

It is further ordered, That the Statesville Broadcasting Company and the Chief, Broadcast Bureau, are made parties to the proceeding and that:

1. The hearing shall commence at 10:00 a. m., on June 7, 1955, and shall be held before the Commission en banc.

2. The hearing shall consist of oral argument, upon the basis that the facts alleged in the protest are true, to determine the legal and policy considerations presented by the above four issues.

3. The parties shall have fifteen days after the hearing to file proposed findings of fact and conclusions of law, and briefs as desired. Thereafter the Commission will issue a decision on each of the above issues, either dismissing it or designating it for evidentiary hearing before an Examiner together with issues to be designated at that time under paragraphs 6, 7, 8 and 9 of this opinion. The parties shall have fifteen days after the close of the evidentiary hearing to file proposed findings of fact and conclusions, and such briefs as are desired, and they shall have fifteen days after the issuance of the Examiner's decision to file exceptions thereto and to the Commission's decision made after the hearing before it en banc, and seven days thereafter to file replies to any such exceptions.

4. The parties intending to participate in this proceeding shall file their appearances not later than May 31, 1955.

Adopted: May 18, 1955.

Released: May 23, 1955.

FEDERAL POWER COMMISSION

[Docket No. G-6505]

DORCHESTER CORP.

ORDER FIXING DATE OF HEARING

Natural Gas Pipeline Company of America (Natural) on April 21, 1955, filed a petition requesting reconsideration of paragraph (D) of the Commission's order making effective proposed rate changes upon filing of bond to assure refund of excess charges in the above matter, issued April 7, 1955.

Paragraph (D) provides in pertinent part as follows:

By said corporate bond, Applicant, its surety, and their successors and assigns, jointly and severally, shall be held and firmly bound unto the Federal Power Commission, for the use and benefit of those entitled thereto, in the sum of $41,000; • • •

---

[1] Federal Communications Commission v. Sanders Brothers Radio Station, 309 U. S. 470, 476, 60 S. Ct. 693, 698 (1940).

[2] See also In re Van Curler Broadcasting Corporation, 11 RR 215, where the Commission states "there is grave doubt as to whether a showing of economic injury on the part of a protestant would entitle him to a hearing on an issue related to the competition which the protestant would suffer from the operation of another station in his community".

[3] Commissioner Hennock dissenting and voting for an evidentiary hearing.

Dorchester Corporation (Dorchester) on October 28, 1954, tendered for filing, pursuant to Order No. 174–A, the basic contract and certain supplements providing for the sale in interstate commerce to Natural of natural gas produced in the Guymon-Hugoton Field, Texas County, Oklahoma. The tendered filings were designated as Dorchester Corporation, FPC Gas Rate Schedule No. 2, and Supplement Nos. 1 through 3 thereto.

Gas Rate Schedule No. 2 is a contract dated December 1, 1946, (a) between Harrington & Marsh, a predecessor of Dorchester, and (b) Natural, providing a price of 7 cents per Mcf at 16.4 psia for gas purchased by Natural under the basic contract. Supplement No. 1 thereto is a letter dated February 25, 1948, from Natural to Harrington & Marsh agreeing to a modification of the basic contract. Supplement No. 2 is an amendment of the basic contract dated October 1, 1949, between Natural and Panoma Corporation (Panoma). Panoma is also a predecessor of Dorchester, having succeeded to the rights of Harrington & Marsh. Neither supplement, however, altered the basic contract price for the natural gas.

Supplement No. 3 is a copy of Order No. 26096 of the Corporation Commission of the State of Oklahoma entered July 29, 1952, in its Cause CD No. 3628 fixing a minimum price of 9.8262 cents per Mcf at the wellhead at pressure of 14.65 psia for gas produced from any well located in the Guymon-Hugoton Field.

In our order allowing the rate schedule and supplements to take effect, issued November 30, 1954, we stated as follows:

To protect the respective rights of both Dorchester and Natural, it is appropriate to carry out the provisions of the Natural Gas Act that we permit the filing by Dorchester of the tenders of October 28, 1954, subject to the express understanding and condition that such filing is proper only if Order No. 26096 is valid as to the sale by Dorchester to Natural covered by the filings, but not otherwise.

By our order issued December 29, 1954, we suspended until March 1, 1955 Supplement No. 4, to Dorchester's FPC Gas Rate Schedule No. 2 providing for an increase from 9.8262 cents per Mcf to 10¢ per Mcf, and by order issued April 7, 1955 we permitted the supplement to become effective as of March 1, 1955, subject to the filing of the $41,000 bond, referred to above.

On April 11, 1955, the Supreme Court of the United States, in a per curiam opinion entered in Causes Nos. 191 and 321, held Order No. 26096 of the Corporation Commission of the State of Oklahoma to be invalid insofar as it related to the sale of natural gas by Dorchester to Natural here in question.

In its petition for reconsideration Natural alleges that:

The Supreme Court of the United States having held that said order No. 26096 is not valid as applied to the sale by Dorchester (and its predecessor Panoma Corporation) to Natural, the lawful rate or charge for gas sold thereunder as of June 7, 1954, as contemplated by the Commission's Order No. 174–A, as amended, was that provided under the terms of said contract dated as of December 1, 1946; namely, 7 cents per Mcf at 16.4 psia (6.2 cents per Mcf at 14.65 psia) and, under the provisions of the Commission's order adopted November 24, 1954, such rate or charge was the only lawful rate or charge prior to March 1, 1955.

The Commission finds: It is necessary and appropriate in the public interest and for the purpose of carrying out the provisions of the Natural Gas Act, particularly sections 4, 14, 15, and 16 thereof that the Commission hold a public hearing, as hereinafter provided, on the issues presented in the petition for reconsideration filed by Natural in this matter on April 21, 1955.

The Commission orders:

(A) Pursuant to the authority contained in and subject to the authority conferred upon the Federal Power Commission by the Natural Gas Act, including particularly sections 4, 14, 15, and 16, a public hearing be held, commencing July 11, 1955, at 10:00 a. m., e. d. s. t., in a hearing room of the Federal Power Commission, 441 G Street NW., Washington, D. C., concerning the matters involved and the issues presented in the petition for reconsideration filed by Natural in this matter on April 21, 1955.

(B) Interested State commissions may participate as provided by §§ 1.8 and 1.37 (f) (18 CFR 1.8 and 1.37 (f)) of the Commission's rules of practice and procedure.

Adopted: May 19, 1955.

Issued: May 20, 1955.

By the Commission.

[Docket No. G–8678]

NORTHERN NATURAL GAS CO.

NOTICE OF APPLICATION AND DATE OF HEARING

MAY 20, 1955.

Take notice that Northern Natural Gas Company (Applicant), a Delaware corporation having its principal place of business at 2223 Dodge Street, Omaha, Nebraska, filed, on March 28, 1955, as supplemented April 11, 1955, an application for permission and approval pursuant to Section 7 (b) of the Natural Gas Act to abandon certain facilities, as hereinafter described.

The facilities which Applicant proposes to abandon consist of the following, located in Morton and Stevens Counties, Kansas: (a) Approximately 14.9 miles of 4½ inch pipeline; (b) approximately 4.1 miles of 2⅜ inch pipeline; and (c) the Rolla, Kansas, town border station. Applicant states that the above-described facilities were formerly used to provide natural-gas service to the communities of Rolla and Elkhart, Kansas, but that such facilities are no longer used or needed since the same service is being rendered by other facilities. Applicant proposes to remove all the above-described facilities and to re-use the 4½ inch pipe.

This matter is one that should be disposed of as promptly as possible under the applicable rules and regulations and to that end:

Take further notice that, pursuant to the authority contained in and subject to the jurisdiction conferred upon the Federal Power Commission by sections 7 and 15 of the Natural Gas Act, and the Commission's rules of practice and procedure, a hearing will be held on June 16, 1955, at 9:30 a. m., e. d. s. t., in a Hearing Room of the Federal Power Commission, 441 G Street NW., Washington, D. C., concerning the matters involved and the issues presented by such application: *Provided, however,* That the Commission may, after a noncontested hearing, dispose of the proceeding pursuant to the provisions of § 1.30 (c) (1) or (2) of the Commission's rules of practice and procedure. Failure of any party to appear at and participate in the hearing shall be construed as waiver of and concurrence in omission herein of the intermediate decision procedure in cases where a request therefor is made.

Protests or petitions to intervene may be filed with the Federal Power Commission, Washington, D. C., in accordance with the rules of practice and procedure (18 CFR 1.8 or 1.10) on or before the 13th day of June 1955. The application is on file with the Commission for public inspection.

[Project No. 78]

PACIFIC GAS AND ELECTRIC CO.

NOTICE OF POSTPONEMENT OF HEARING

MAY 19, 1955.

Upon consideration of requests of the Attorney General of California on behalf of California Department of Fish and Game, the Acting Regional Solicitor, Department of Interior and Pacific Gas and Electric Company, for postponement of the hearing in the above-designated matter now scheduled for June 1, 1955;

Notice is hereby given that the hearing now scheduled for June 1, 1955, is hereby postponed to 10:00 a. m. P. d. s t., June 20, 1955, in Room 539, Appraisers Building, 630 Sansome Street, San Francisco, California.

VOLUME 20 — 1934 — NUMBER 104

Washington, Friday, May 27, 1955

TITLE 3—THE PRESIDENT

EXECUTIVE ORDER 10614

REGULATIONS GOVERNING THE PAYMENT OF GENERAL-AVERAGE CONTRIBUTIONS IN CONNECTION WITH THE TRANSPORTATION OF CERTAIN BAGGAGE AND HOUSEHOLD GOODS AND EFFECTS OF MILITARY AND CIVILIAN PERSONNEL OF THE UNITED STATES

By virtue of the authority vested in me by section 4 of the act of June 4, 1954, 68 Stat. 176, I hereby prescribe the following regulations governing the payment of general-average contributions in connection with the transportation of certain baggage and household goods and effects of military and civilian personnel of the United States:

SECTION 1. *Definitions.* As used in these regulations:

(a) The term "military personnel" means members and former and deceased members of the uniformed services as defined in section 102 of the Career Compensation Act of 1949 (63 Stat. 804).

(b) The term "civilian employees" means civilian officers and employees of a department, including Foreign Service personnel, and former and deceased civilian officers and employees.

(c) The terms "military personnel" and "civilian employees" shall also include those individuals enumerated under the term "person" as defined in section 1 of the Missing Persons Act, as amended (50 U. S. C. App. 1001).

(d) The term "department" means an executive department, independent establishment, or other agency of the Federal Government, including wholly-owned or controlled Government corporations.

(e) The term "general-average contribution" means the contribution by all parties to a sea venture (1) to make good the loss sustained by any one of their number on account of voluntary sacrifices made of part of the ship or cargo to save the residue or the lives of those on board from impending peril, or (2) for extraordinary expenses necessarily incurred for the common benefit and safety of all.

(f) The term "household goods" means such baggage, household goods, and effects, including privately-owned automobiles and professional books, papers, and equipment, of military personnel and civilian employees as are authorized to be transported at Government expense by law or regulation pursuant to law.

SEC. 2. *Allowance of general-average contributions.* Whenever military personnel or civilian employees of a department are liable for general-average contributions arising out of shipments of household goods (as defined in section 1 (f) hereof), authorized or approved under law or regulations pursuant to law, disbursements shall be made, under rules and regulations prescribed by the head of the department concerned, from appropriations chargeable for the transportation of baggage and household goods and effects (a) for the payment of the general-average contributions for which such military personnel or civilian employees are liable, or (b) for the reimbursement of such military personnel or civilian employees in the amounts of their general-average liability paid by them and for which receipts are furnished, subject to the limitations set forth in section 3 hereof.

SEC. 3. *Limitations.* The provisions of section 2 hereof shall not apply:

(a) In case the shipment of household goods is made under law or regulation pursuant to law which provides for reimbursement to the military person or civilian employee concerned on a commuted basis in lieu of payment by the Government of the actual costs of the shipment; or

(b) In case the military person or civilian employee concerned has himself selected the means of shipment; or

(c) To quantities of household goods (excluding automobiles) shipped in excess of quantities authorized to be transported by law or regulation pursuant to law. In any case of such excess shipment, the liability of the Government for

RULES AND REGULATIONS

TITLE 43—PUBLIC LANDS: INTERIOR

Chapter I—Bureau of Land Management, Department of the Interior

Appendix C—Public Land Orders

[Public Land Order 1152]

NEW YORK

REVOCATION OF EXECUTIVE ORDER NO. 7941, OF AUGUST 2, 1938, ESTABLISHING THE FORT TYLER MIGRATORY BIRD REFUGE

By virtue of the authority vested in the President and pursuant to Executive Order No. 10355 of May 26, 1952, it is ordered as follows:

Executive Order No. 7941, of August 2, 1938, reserving the following-described area, on Gardiners Island, Suffolk County, New York, for use of the Department of Agriculture as a refuge and breeding ground for migratory birds and other wildlife, to be known as the Fort Tyler Migratory Bird Refuge, is hereby revoked:

The property known as the Fort Tyler Military reservation bounding on Gardiners Bay, and more definitely described as follows:

All that part of the north point of Gardiners Island lying northwest of a line described and running as follows: Starting from a stake on a sand ridge and running thence north 56 degrees east, and south 56 degrees west, to the waters on each side of said point, or beach, respectively, and bounded north, east, and west by the waters of Gardiners Bay, and southeasterly by the beach at the aforesaid line.

The area as described contains approximately 14 acres.

The land has been transferred by the General Services Administration to the Department of the Navy pursuant to the Federal Property and Administrative Services Act of 1949 (63 Stat. 377, 41 U. S. C. sup. 211) as amended.

FRED G. AANDAHL,
Assistant Secretary of the Interior.

MAY 23, 1955.

[F. R. Doc. 55-4288; Filed, May 26, 1955; 8:46 a. m.]

[Public Land Order 1153]

ALASKA

WITHDRAWING PUBLIC LANDS FOR USE OF THE DEPARTMENT OF THE ARMY FOR MILITARY PURPOSES

By virtue of the authority vested in the President and pursuant to Executive Order No. 10355 of May 26, 1952, it is ordered as follows:

Subject to valid existing rights, the following-described public lands in Alaska are hereby withdrawn from all forms of appropriaton under the public-land laws, including the mining and the mineral-leasing laws, and reserved for the use of the Department of the Army in connection with the lands withdrawn by Public Land Order No. 255 of December 15, 1944:

Beginning at U. S. C. & G. S. Station "Big Delta Airport"; thence N. 4° 55' 47.300" E., 11,997.64 feet; thence East 10,560.00 feet; thence South 18,680.00 feet to the True Point of beginning, thence, east 1,000 feet; south 7,000 feet; west 1,000 feet; north 7,000 feet.

The tract described contains 160 acres.

FRED G. AANDAHL,
Assistant Secretary of the Interior.

MAY 23, 1955.

TITLE 49—TRANSPORTATION

Chapter I—Interstate Commerce Commission

PART 1—GENERAL RULES OF PRACTICE

SPECIAL RULES OF PRACTICE GOVERNING PROCEDURE OF BOARD OF SUSPENSION AND FOURTH SECTION BOARD

At a general session of the Interstate Commerce Commission, held at its office in Washington, D. C., on the 16th day of May A. D. 1955.

There being under consideration § 1.200 *Special rules of practice governing the procedure of the Board of Suspension and Fourth Section Board:* It is ordered, that said section be amended as follows:

1. After the first sentence of § 1.200 (b) add the following sentence: "The original and six copies of every pleading, document, or paper permitted or required to be filed under this section shall be furnished for the use of the Commission."

2. As amended, § 1.200 (b) will read as follows:

(b) Petitions for reconsideration of the action of the Board of Suspension when tariffs or schedules have been suspended, and petitions for reconsideration of any action taken by the Fourth Section Board, may be filed by any interested party with the Commission for the attention of the designated appellate division within 30 days following receipt of notice of such action. The original and six copies of every pleading, document, or paper permitted or required to be filed under this section shall be furnished for the use of the Commission. In all other respects, such petitions and the answers thereto will be governed by the Commission's general rules of practice.

Notice of this order shall be given to the general public by depositing a copy thereof in the office of the Secretary of the Commission, Washington, D. C., and by filing a copy with the Director, Division of the Federal Register.

(Secs. 12, 17, 24 Stat. 383, as amended, 385, as amended, 49 Stat. 546, as amended, 548, as amended, sec. 201, 54 Stat. 933, sec. 1, 56 Stat. 285; 49 U. S. C. 12, 17, 304, 305, 904, 1003)

By the Commission.

[SEAL] HAROLD D. MCCOY,
Secretary.

TITLE 6—AGRICULTURAL CREDIT

Chapter IV—Commodity Stabilization Service and Commodity Credit Corporation, Department of Agriculture

Subchapter B—Loans, Purchases, and Other Operations

[1955 C. C. C. Grain Price Support Bulletin 1, Supp. 1, Grain Sorghums]

PART 421—GRAINS AND RELATED COMMODITIES

SUBPART—1955-CROP GRAIN SORGHUMS LOAN AND PURCHASE AGREEMENT PROGRAM

A price support program has been announced for the 1955 crop of grain sorghums. The 1955 C. C. C. Grain Price Support Bulletin 1 (20 F. R. 3017), issued by the Commodity Credit Corporation and containing the regulations of a general nature with respect to price support operations for grains and certain other commodities produced in 1955 is supplemented as follows:

Sec.
421.1226 Purpose.
421.1227 Availability of price support.
421.1228 Eligible grain sorghums.
421.1229 Warehouse receipts.
421.1230 Determination of quantity.
421.1231 Determination of quality.
421.1232 Maturity of loans.
421.1233 Support rates.
421.1234 Warehouse charges.
421.1235 Settlement.

AUTHORITY: §§ 421.126 to 421.1235 issued under sec. 4, 62 Stat. 1070, as amended; 15 U. S. C. 714b. Interpret or apply sec. 5, 62 Stat. 1072; secs. 301, 401, 63 Stat. 1053; 15 U. S. C. 714; 7 U. S. C. 1447, 1421.

§ 421.1226 *Purpose.* Sections 421.1226 to 421.1235 state additional specific regulations which, together with the general regulations contained in the 1955 C. C. C. Grain Price Support Bulletin 1, apply to loans and purchase agreements under the 1955 Crop Grain Sorghums Price Support Program.

§ 421.1227 *Availability of price support—(a) Method of support.* Price support will be made available through farm-storage and warehouse-storage loans and through purchase agreements.

(b) *Area.* Farm-storage and warehouse-storage loans and purchase agreements will be available wherever grain sorghums are grown in the continental United States, except that farm-storage loans will not be available in areas where the State committee determines that grain sorghums cannot be safely stored on the farm.

(c) *Where to apply.* Application for price support should be made at the office of the county committee which keeps the farm-program record for the farm.

(d) *When to apply.* Loans and purchase agreements will be available from the time of harvest through January 31, 1956 and the applicable documents must be signed by the producer and delivered to the county committee not later than such date. Applicable documents include the Producer's Note and Loan Agreement for warehouse-storage loans, the Producer's Note and Supplemental Loan Agreement and the Commodity Chattel Mortgage for farm-storage loans, and the Purchase Agreement for purchase agreements.

(e) *Eligible producer.* An eligible producer shall be an individual, partnership, association, corporation, estate, trust, or other business enterprise, or legal entity, and wherever applicable, a State, political subdivision of a State, or any agency thereof producing grain sorghums in 1955 as landowner, landlord, tenant, or sharecropper.

§ 421.1228 *Eligible grain sorghums.* At the time the grain sorghums are placed under loan or delivered under a purchase agreement, they must meet the following requirements:

(a) The grain sorghums must have been produced in the continental United States in 1955 by an eligible producer.

(b) (1) The beneficial interest in the grain sorghums must be in the eligible producer tendering the grain sorghums for loan or for delivery under a purchase agreement, and must always have been in him, or must have been in him and a former producer whom he succeeded before the grain sorghums were harvested.

(2) To meet the requirements of succession to a former producer, the rights, responsibilities and interest of the former producer with respect to the farming unit on which the grain sorghums were produced shall have been substantially assumed by the person claiming succession. Mere purchase of the crop prior to harvest, without acquisition of any additional interest in the farming unit, shall not constitute succession. The county committee shall determine whether the requirements with respect to succession have been met.

(c) Grain sorghums of any class grading No. 4 or better, or No. 4 "Smutty" or better, and containing not in excess of 13 percent moisture shall be eligible.

(d) Grain sorghums represented by warehouse receipts which indicate that the grain sorghums are ineligible because of moisture content only, will be eligible if the warehouseman certifies on the supplemental certificate or on a statement attached to the warehouse receipt that "the grain sorghums have been processed at the request of the eligible producer, and delivery will be made of eligible grain sorghums containing not in excess of 13 percent moisture content and no lien for processing will be claimed by the warehouseman from Commodity Credit Corporation or any subsequent holder of said warehouse receipt."

(e) The grain sorghums must not grade discolored, or weevily.

(f) If offered as security for a farm-storage loan, the grain sorghums must have been stored in the bin or granary at least 30 days prior to inspection for measurement, sampling, and sealing unless otherwise approved by the ASC State committee.

§ 421.1229 *Warehouse receipts.* Warehouse receipts, representing grain sorghums in approved warehouse storage to be placed under loan or delivered under a purchase agreement, must meet the following requirements:

(a) Warehouse receipts must be issued in the name of the producer, must be properly endorsed in blank so as to vest title in the holder and must be receipts issued on a warehouse approved by CCC under the Uniform Grain Storage Agreement which indicate that the grain sorghums are insured, or must be receipts issued on warehouses operated by Eastern common carriers under tariffs approved by the Interstate Commerce Commission for which custodian agreements are in effect.

(b) (1) Each warehouse receipt or the warehouseman's supplemental certificate (in duplicate) properly identified with the warehouse receipt must show (i) gross weight, (ii) class, (iii) grade (including special grades), (iv) test weight, (v) moisture, (vi) dockage, and (vii) any other grading factor(s) when such factor(s) and not test weight, determine the grade.

(2) The warehouse receipt or the warehouseman's supplemental certificate also must show whether the grain sorghums arrived by rail, truck or barge. In the case of warehouse receipts issued for grain sorghums delivered by rail or barge, the grading factors on the warehouse receipt must agree with the inbound inspection certificate for the car or barge when such certificate is issued.

(c) A separate warehouse receipt must be submitted for each grade, class, and subclass of grain sorghums.

(d) The warehouse receipt may be subject to liens for warehouse charges only to the extent indicated in § 421.1234.

(e) Warehouse receipts representing grain sorghums which have been shipped by rail or water from a country shipping point to a designated terminal point, or shipped by rail or water from a country shipping point and stored in transit to a designated terminal point must be accompanied by registered freight bills, or by a certificate containing similar information in a form prescribed by the CSS Commodity office which shall be signed by the warehousemen and which may be a part of the supplemental certificate.

(f) If the warehouseman has processed the grain sorghums as provided in § 421.1228 (d), the supplemental certificate must show the numerical grade and grading factors changed because of the grain sorghums being processed. When the grade and grading factors shown on the supplemental certificate do not agree with the warehouse receipt, the factors shown on the supplemental certificate shall take precedence.

§ 421.1230 *Determination of quantity.* (a) The quantity of grain sorghums placed under farm-storage loan may be determined either by weight or by measurement. The quantity of grain sorghums placed under a warehouse storage loan or delivered under a farm-storage loan or under a purchase agreement shall be determined by weight.

(b) When a quantity is determined by weight, a unit of 100 pounds shall be determined to be 100 pounds of grain sorghums free of dockage. In determining the quantity of sacked grain sorghums by weight, a deduction of three-fourths of a pound for each sack shall be made.

(c) When the quantity of grain sorghums is determined by measurement, 100 pounds shall be 2.25 cubic feet of grain sorghums testing 56 pounds per bushel. The quantity determined by measurement of grain sorghums having a test weight of less than 56 pounds per bushel shall be adjusted by applying the applicable percentage as shown in the following table:

For grain sorghums testing:	Percent
56 pounds or over	100
55 pounds or over, but less than 56 pounds	98
54 pounds or over, but less than 55 pounds	96
53 pounds or over, but less than 54 pounds	95
52 pounds or over, but less than 53 pounds	93
51 pounds or over, but less than 52 pounds	91
50 pounds or over, but less than 51 pounds	89
49 pounds or over, but less than 50 pounds	87

(d) The percentage of dockage shall be determined and the weight of such dockage shall be deducted from the gross weight of the grain sorghums in determining the net quantity available for loan or purchase.

§ 421.1231 *Determination of quality.* The class, subclass, grade, grading factors, and all other quality factors shall be determined in accordance with the methods set forth in the Official Grain Standards of the United States for Grain Sorghums, whether or not such determinations are made on the basis of an official inspection.

§ 421.1232 *Maturity of loans.* Loans mature on demand but not later than March 31, 1956.

§ 421.1233 *Support rates.* Basic support rates for grain sorghums placed under loan or delivered under a purchase agreement will be as set forth in this section.

(a) *Basic support rates at designated terminal markets.* (1) Basic support rates per 100 pounds for grain sorghums of the Classes I to IV inclusive, grading No. 2 or better, and containing not in excess of 13 percent moisture, stored in approved warehouses at the terminal markets listed below are as follows:

Terminal market:	Rate per 100 pounds
Omaha, Nebr.	$2.14
Sioux City, Iowa	2.14
Kansas City, Mo.	2.22
St. Joseph, Mo.	2.22
Corpus Christi, Tex.	2.29
Galveston, Tex.	2.29
Houston, Tex.	2.29
New Orleans, La.	2.29
Port Arthur, Tex.	2.29
St. Louis, Mo.	2.43
Memphis, Tenn.	2.48
Los Angeles, Calif.	2.63
San Francisco, Calif.	2.63

(2) Grain sorghums eligible for loan or purchase at the support rates shown in the above schedule must have been shipped on a domestic interstate freight rate basis. On any grain sorghums shipped at other than the domestic interstate freight rate, the support rate at the designated terminal market shall be reduced by the difference between the rate of the freight paid (plus tax) and the domestic interstate freight rate (plus tax).

(3) The support rates established for designated terminal markets apply to grain sorghums which have been shipped by rail or water from a country shipping point to one of the designated terminal markets, as evidenced by paid freight bills duly registered for transit privileges: *Provided*, That in the event the amount of paid-in freight is insufficient to guarantee the minimum proportional domestic interstate freight rate from the terminal market, there shall be deducted from the applicable terminal support rate the difference between the amount of freight actually paid in and the amount required to be paid in to guarantee outbound movement at the minimum proportional domestic interstate freight rate.

(4) When shipped by rail or water and stored at any designated terminal market, grain sorghums for which neither registered freight bills nor registered freight certificates are presented to guarantee outbound movement at the minimum proportional domestic interstate freight rate, shall have a support rate equal to the terminal rate minus 14 cents per 100 pounds.

(5) For grain sorghums received by truck and stored at any designated terminal market, the support rate shall be determined by making a deduction from the terminal rate as follows:

Terminal market:	Amount of deduction (cents per 100 pounds)
Los Angeles, Calif., San Francisco, Calif.	22
Omaha, Nebr., Sioux City, Iowa, Kansas City, Mo., St. Louis, Mo., Saint Joseph, Mo.	23
Corpus Christi, Tex., Galveston, Tex., Houston, Tex., Port Arthur, Tex., New Orleans, La., Memphis, Tenn.	25

(b) *Support rates for grain sorghums in approved warehouse storage at other than designated terminal markets.* (1) The support rates for grain sorghums stored in approved warehouses (other than those situated in the designated terminal markets) which are shipped by rail or water, shall be determined by deducting from the appropriate designated terminal market rate an amount equal to the transit balance, if any (plus tax) of the through-freight rate from point of origin for such grain sorghums to such terminal market: *Provided*, That on any grain sorghums shipped at other than the domestic interstate freight rate, the support rate shall be further reduced by the difference between the rate of freight paid (plus tax) and the domestic interstate freight rate (plus tax) from the point of origin of such grain sorghums to the point of storage: *And provided further*, That in the case of grain sorghums stored at any railroad transit point taking a penalty by reason of out-of-line movement, oar or any other reason to the appropriate designated market, there shall be added to such transit balance an amount equal to any out-of-line costs or other costs incurred in storing grain sorghums in such position.

(2) The warehouse receipts must be accompanied by the original paid freight bills or certificates of the warehouseman and other required documents as set forth in § 421.1229.

(c) *Basic county support rates.* (1) (i) The following basic county support rates are established per 100 pounds of grain sorghums of the Classes I to IV, inclusive, grading No. 2 or better and containing not in excess of 13 percent moisture. Both farm-storage and country warehouse-storage loans, except as otherwise provided in paragraph (b) of this section, will be based on the support rate established for the county in which the grain sorghums are stored.

(ii) If two or more warehouses are located in the same or adjoining towns, villages, or cities having the same domestic interstate freight rate, such towns, villages, or cities shall be deemed to constitute one shipping point, and the same support rate shall apply even though such warehouses are not all located in the same county. Such support rate shall be the highest support rate of the counties involved.

(2) Where the State committee determines that State or district weed control laws affect the grain sorghums crop the support rate will be 15 cents per cwt. below the applicable county support rate set forth in the schedule in subparagraph (1) of this paragraph. If upon delivery of the grain sorghums to CCC, the producer supplies a certificate indicating that the grain sorghums comply with the weed control laws, the producer will be credited with the amount of the differential in determining the settlement value.

(d) *Discounts.* (1) The discount for grain sorghums which grade No. 3 and contain not in excess of 13 percent moisture shall be 8 cents per 100 pounds; and for grain sorghums which grade No. 4 and contain not in excess of 13 percent moisture, 16 cents per 100 pounds.

(2) Grain sorghums which grade "smutty" shall be discounted 5 cents per 100 pounds.

(3) The support rates for mixed grain sorghums (Class V) shall be 3 cents per 100 pounds less than the support rates for grain sorghums of the classes I to IV inclusive.

(4) The discounts in this paragraph shall be cumulative.

§ 421.1234 *Warehouses charges.* (a) Warehouses receipts and the grain sorghums represented thereby stored in approved warehouses operating under the Uniform Grain Storage Agreement may be subject to liens for warehouse handling and storage charges at not to exceed the Uniform Grain Storage Agreement rates from the date the grain is deposited in the warehouse for storage. Where the date of deposit (the date of the warehouse receipt if the date of deposit is not shown) on warehouse receipts representing grain sorghums stored in warehouses operating under the Uniform Grain Storage Agreement is on or before March 31, 1956 there shall be deducted in computing the amount of the loan or purchase price the storage charges per hundredweight as shown in the following table unless written evidence is submitted with the warehouse receipt that all warehouse charges, except receiving and loading out charges have been prepaid through March 31, 1956:

Amount of deduction (cents per hundred weight)	Date of deposit (all dates inclusive)				
	Area I [1]	Area II [2]	Area III [3]	Area IV [4]	Area V [5]
27		Prior to Apr. 16, 1955	Prior to May 1, 1955	Prior to May 11, 1955	Prior to May 21, 1955.

[1] Area I includes: Arizona, California, Idaho, Nevada, Oregon, Utah, Washington.
[2] Area II includes: Minnesota, Montana, North Dakota, South Dakota (also Superior, Wisconsin).
[3] Area III includes: Colorado, Illinois, Iowa, Kansas, Missouri, Nebraska, Wyoming, Wisconsin (except Superior).
[4] Area IV includes: Arkansas, Connecticut, Delaware, Indiana, Kentucky, Louisiana, Maine, Maryland, Massachusetts, Michigan, New Hampshire, New Jersey, New Mexico, New York, Ohio, Oklahoma, Pennsylvania, Rhode Island, Texas, Vermont, Virginia, West Virginia.
[5] Area V includes: Alabama, Florida, Georgia, Mississippi, North Carolina, South Carolina, Tennessee.

(b) Warehouse receipts and the grain sorghums represented thereby stored in approved warehouses operated by Eastern common carriers may be subject to liens for warehouse elevation (receiving and delivering) and storage charges from the date of deposit at rates approved by the Interstate Commerce Commission. There shall be deducted in computing the loan or purchase price, the amount of the approved tariff rate for storage (not including elevation), which will accumulate from the date of deposit through March 31, 1956 unless written evidence is submitted with the warehouse receipt that the storage charges have been prepaid. The county committee shall request the CSS commodity office to determine the amount of such charges. Where the producer presents evidence showing that elevation charges have been prepaid, the amount of the storage charges to be deducted shall be reduced by the amount of the elevation charges prepaid by the producer.

§ 421.1235 *Settlement*—(a) *Settlement value.* (1) (i) In the case of eligible grain sorghums delivered to CCC from farm-storage under the loan program, settlement shall be made at the applicable support rate determined in accordance with §§ 421.1233 and 421.1018 (e). The support rate shall be for the grade and quality of the total quantity of grain sorghums eligible for delivery.

(ii) If, upon delivery, the grain sorghums under farm-storage loans are of a grade and/or quality for which no support rate has been established, the settlement value shall be computed at the support rate established for the

grade and/or quality of the grain sorghums placed under loan, less the difference, if any, at the time of delivery, between the market price for the grade and/or quality placed under loan and the market price of the grain sorghums delivered, as determined by CCC: *Provided, however,* That if such grain sorghums are sold by CCC in order to determine their market price the settlement value shall not be less than such sales price.

(2) In the case of eligible grain sorghums delivered to CCC under purchase agreement, settlement shall be made at the applicable support rate determined in accordance with §§ 421.1233 and 421.1018 (e).

(b) *Storage deduction for early delivery.* Whenever farm-stored grain sorghums under loan or purchase agreement are delivered to CCC prior to March 31, 1956, a deduction for storage shall be made in accordance with the schedule of deductions for warehouse charges (§421.1234), except that no such deduction shall be made if such early delivery is made because the loan is called solely for the convenience of CCC, or if it is determined by CCC at the time of delivery that the grain sorghums will be sold rather than stored, or if CCC requires early delivery on an area basis.

(c) *Refund of prepaid handling charge.* In case a warehouseman charges the producer for the receiving or the receiving and loading out charges on grain sorghums under loan or purchase agreement stored in a warehouse under the Uniform Grain Storage Agreement, the producer shall, upon delivery of the grain sorghums to CCC be reimbursed or given credit by the county office for such prepaid charges in an amount not to exceed the charges authorized under the Uniform Grain Storage Agreement provided, the producer furnishes to the county committee written evidence signed by the warehouseman that such charges have been paid.

(d) *Track-loading.* A track-loading payment of 6 cents per 100 pounds will be made to the producer on grain sorghums delivered to CCC on track at a country point.

Issued this 19th day of May 1955.

[SEAL] WALTER C. BERGER,
Acting Executive Vice President,
Commodity Credit Corporation.

TITLE 20—EMPLOYEES' BENEFITS

Chapter II—Railroad Retirement Board

MISCELLANEOUS AMENDMENTS TO CHAPTERS

Pursuant to the general authority contained in section 10 of the act of June 24, 1937 (sec. 10 (b) 4, 50 Stat. 315; 45 U. S. C. 228j) §§ 203.6, 204.11, 208.1 (a), 208.7 (a), 208.27, 208.29, 208.31, 209.1 (k), 209.3, 209.12, 210.2 (a), 214.1, 214.2, 214.4, 214.6, 217.1, 217.2, 220.2, 220.3 (d), (e), (f), (g), (h), (i), 222.1, 222.3, 222.4, 225.1, 225.5, 225.6, 225.7, 225.8, 225.9, 234.2, 236.2, 237.101, 237.102 (a), (d), 237.103, 237.201, 237.202 (b), 237.203, 237.301, 237.302, 237.303, 237.304, 237.305, 237.306, 237.307, 237.308, 237.401, 237.501, 237.502 (a), (c), 237.503 (a), (b), 237.504 (a), 237.601, 237.603, 237.604, 237.701 237.702, 237.801, 237.806, 237.808, 237.901, 237.904, 237.905, 238.1, 238.2 (a), (d), 238.4, 239.1, 239.2, 239.2 (b), 239.3 (a), 239.5 (a), 239.6, 239.7, 239.8, 239.9, 239.10, 240.1, 240.3, 262.12, 262.15, 262.16 (c), (d), (f), (g), (j), 266.6 are amended; former §§ 237.402, 237.403, 237.404, 237.405 and 237.406 are redesignated §§ 237.406, 237.408, 237.409, 237.410 and 237.411, respectively, and amended; Part 232 and the following sections are added: §§ 209.13, 210.6, 225.11, 237.104, 237.204, 237.205, 237.404, 237.405, 237.407, 237.607, 262.6, 262.7; and §§ 262.22 and 262.24 are repealed by Board Order 55-89, dated March 16, 1955. The above amendments to the regulations of the Railroad Retirement Board under such act (4 F. R. 1477; 5 F. R. 297; 5 F. R. 772; 5 F. R. 3392; 5 F. R. 1194; 5 F. R. 4330; 5 F. R. 4735; 6 F. R. 298; 6 F. R. 5871; 7 F. R. 2811; 7 F. R. 5266; 8 F. R. 5701; 10 F. R. 7159; 10 F. R. 11284; 11 F. R. 6820; 11 F. R. 13866; 12 F. R. 466; 12 F. R. 859; 12 F. R. 1133; 12 F. R. 2017; 12 F. R. 2907; 13 F. R. 264; 13 F. R. 7239; 15 F. R. 796; 19 F. R. 2160; 20 F. R. 422) are as follows:

PART 203—EMPLOYEES UNDER THE ACT

§ 203.6 *Age, citizenship, and other factors.* The age, citizenship, or residence of an individual, or his designation as other than an "employee" shall not be controlling in determing whether or not such individual is an employee within the meaning of the act, except that an individual not a citizen or resident of the United States shall not be deemed to be in the service of an employer when rendering service outside the United States to an employer who is required by the laws of the place where the service is performed to employ, in whole or in part, citizens or residents thereof and the laws in force therein on August 29, 1935, shall be deemed to have been in force at all times prior to that date.

(Sec. 10, 49 Stat. 973, as amended; 45 U. S. C. 228j. Interprets or applies sec. 1, 49 Stat. 967, as amended; 45 U. S. C. 228a)

PART 204—EMPLOYMENT RELATION

§ 204.11 *Evidence of disability.* The term "physical or mental disability" as used in this part relates to the ability of the individual to perform the duties of his regular occupation in accordance with the standards customarily recognized within the industry. Determinations of disability will be made on the basis of medical evidence furnished by the employer and by the employee as well as by other circumstances which are indicative of the individual's ability to render service in his usual occupation.

(Sec. 10, 49 Stat. 973, as amended; 45 U. S. C. 228j)

PART 208—ELIGIBILITY FOR AN ANNUITY

§ 208.1 *Statutory provisions.*

(a) The following-described individuals, if they shall have been employees on or after the enactment date, and shall have completed ten years of service, shall, subject to the conditions set forth in subsections (b), (c), and (d), be eligible for annuities after they shall have ceased to render compensated service to any person, whether or not an employer as defined in section 1 (a) (but with the right to engage in other employment to the extent not prohibited by subsection (d)):

* * * * * *

(5) Individuals whose permanent physical or mental condition is such that they are unable to engage in any regular employment.

Such satisfactory proof shall be made from time to time as prescribed by the Board, of the disability provided for in paragraph 4 or 5 and of the continuance of such disability (according to the standards applied in the establishment of such disability) until the employee attains the age of sixty-five. If the individual fails to comply with the requirements prescribed by the Board as to proof of the continuance of the disability until he attains the age of sixty-five years, his right to an annuity by reason of such disability shall, except for good cause shown to the Board, cease, but without prejudice to his rights to any subsequent annuity to which he may be entitled. If before attaining the age of sixty-five an employee in receipt of an annuity under paragraph 4 or 5 is found by the Board to be no longer disabled as provided in said paragraphs his annuity shall cease upon the last day of the month in which he ceases to be so disabled. If after cessation of his disability annuity the employee will have acquired additional years of service, such additional years of service may be credited to him with the same effect as if no annuity had previously been awarded to him.

(b) An annuity shall be paid only if the applicant shall have relinquished such rights as he may have to return to the service of an employer and of the person by whom he was last employed; but this requirement shall not apply to the individuals mentioned in subdivision 4 and subdivision 5 of subsection (a) prior to attaining age sixty-five.

(c) * * *

(2) Not more than twelve months before the filing of the application. (Sec. 2, 50 Stat. 309, 310, as amended; 45 U. S. C. 228b.)

§ 208.7 *Annuities for employees.* (a) Subject to the provisions of paragraphs (b) and (c) of this section, an individual who has been an employee on or after August 29, 1935, has completed 10 years of service, and has ceased to render service for compensation to any person, whether or not an employer under the act, is eligible for an annuity if:

* * * * * *

(4) The physical or mental condition of the individual is such that he is unable to engage in any regular employment.

(b) No annuity shall be certified for payment to an individual until such time as he has filed with the Board a duly executed application form, has established by proof satisfactory to the Board that he possesses all the qualifications therefor, and, except for an individual whose eligibility for an annuity is determined in accordance with paragraph (a) (3) or (4) of this section, has relinquished rights to return to service as required by Part 216 of this chapter. In no case shall an annuity begin to accrue earlier than (1) twelve months prior to the date upon which the application therefor was filed with the Board, or (2) the day following the last day of the applicant's compensated service: *Provided, however,* That where such date falls on the thirty-first day of any month the annuity shall begin to accrue on the first day of the following month. An individual whose eligibility for an annuity is determined in accordance with paragraph (a) (3) or (4) of this section, shall relinquish rights to return to service as required by Part 216 of this chapter upon his attainment of age 65.

(c) Except as provided in § 208.31 and in section 407 of the 1946 amendments to the Railroad Retirement Act, enacted as Public Law 572, 79th Cong., after an annuity has been awarded to an individual, he shall not be eligible for a new or additional annuity, by reason of acquiring, after the annuity awarded him began to accrue, any additional eligibility qualifications.

§ 208.27 *Disability annuitant to notify of recovery from disability, and of performance of service for hire and of self-employment.* It shall be the duty of an individual awarded an annuity upon the basis of total and permanent disability for regular employment for hire, or upon the basis of permanent disability for work in his regular occupation, to notify the Board before he attains age 65 of his recovery from such disability and of any service for hire and self-employment in a period and to the extent described in § 208.29 (c).

§ 208.29 *Cessation or non-payment of disability annuities.* (a) An annuity awarded to an individual upon the basis of his having become totally and permanently disabled for regular employment for hire, or upon the basis of his having become permanently disabled for work in his regular occupation, shall cease before the individual attains age 65 as of the last day of:

(1) The month in which he recovers from such disability; or

(2) The month preceding the month in which he dies, regardless of his age; or

(3) The month following the month in which a notice was mailed to him requiring him to furnish additional proof of the continuance of his disability, if he failed to comply with such notice; or

(4) The month in which the Board receives notice of his failure to appear for, or submit to, a required examination; or

(5) The month in which he was required to furnish the Board with any information relating to employment, earnings and his physical or mental condition, if he failed to furnish such information.

(b) The annuity of an individual, based upon either the disability described in § 208.7 (a) (3) or (4) who fails to relinquish rights to return to service in accordance with Part 216 of this chapter shall be suspended as of the end of the month in which he attains age 65. Annuity payments which ceased by reason of noncompliance with the provisions of one or more of paragraph (a) (3) to (5) of this section shall be restored if within a reasonable time the annuitant shows good cause for such noncompliance.

(c) The annuity of an individual based upon either the disability described in § 208.7 (a) (3) or (4) shall not be paid with respect to any month in which the individual is under age 65 and is paid more than $100 in earnings from employment and self-employment of any form. Any such individual under the age of 65 shall report to the Board any such payment of earnings for such employment and self-employment before receipt and acceptance of an annuity for the second month following the month of such payment: *Provided,* That the Board may at any time require compliance with § 208.25.

§ 208.31 *Cessation or non-payment of disability annuity not prejudicial to further eligibility.* The cessation or non-payment pursuant to § 208.29 of a disability annuity shall not prejudice any rights of the individual, formerly in receipt of such annuity, to any annuity to which he may thereafter become entitled; and for such purpose, years of service acquired by such an individual whose annuity shall have so ceased or shall not have been paid prior to age 65 may be credited with the same effect as if no annuity had previously been awarded.

(Sec. 10, 49 Stat. 973, as amended; 45 U. S. C. 228j. Interpret or apply sec. 2, 49 Stat. 968, as amended; 45 U. S. C. 228b)

PART 209—MILITARY SERVICE

§ 209.1 *Statutory provisions.* * * *

(k) No person shall be entitled to an annuity, or to an increase in an annuity, based on military service unless a specific claim for credit for military service is filed with the Board by the individual who rendered such military service, and in no case shall an annuity, or an increase in an annuity, based on military service begin to accrue earlier than six months prior to the date on which such claim for credit for military service was filed with the Board nor before October 8, 1940: *Provided,* That this subsection shall not be construed to prevent payment of annuities with respect to accruals, not based on military service, prior to the date on which an annuity based on military service began to accrue.

* * * * * *

§ 209.3 *Application for annuities based on military service.* No individual shall be entitled to an annuity, or to an increase in an annuity, based on military service unless he has in the manner provided in Part 210 of this chapter, filed an application claiming credit for military service, in such form as the Board may prescribe. The application shall be filed within twelve months from the date on which such annuity or increase in an annuity is to begin to accrue, and may be filed by any individual, including individuals whose claims for annuities not based on military service have theretofore been granted or denied. In no event shall an annuity or increase in an annuity based on military service begin to accrue before October 8, 1940.

§ 209.12 *War service period.* A war service period includes, with respect to any individual:

(a) Any period during which the individual was required by call of the President, or by any act of Congress or regulation, order, or proclamation pursuant thereto, to enter and continue in military service, and

(b) Any period of military service in a war period, providing the individual entered military service in such war period, and

(c) Any period of military service immediately following a war period, whether or not such service was entered upon voluntarily, and prior to discharge from such service or reenlistment therein, providing the individual entered military service in such war period, and

(d) Any period after September 7, 1939, with respect to which a state of national emergency was duly declared to exist which requires a strengthening of the national defense.

§ 209.13 *War period.* A war period begins on the date on which the Congress of the United States declared war, or on the date as of which the Congress of the United States declared a state of war to have existed, or on the date on which war was declared by one or more foreign states against the United States, or on the date on which any part of the United States or any territory under its jurisdiction was invaded or attacked by any armed force of one or more foreign states, or on the date on which the United States engaged in armed hostilities for the purpose of preserving the Union or of maintaining in any State of the Union a republican form of government, whichever date is the earliest. A war period ends on the date on which hostilities shall have ceased.

(a) *Spanish-American War.* The war period of the Spanish-American War began April 21, 1898, and ended August 13, 1898.

(b) *Philippine Insurrection.* The war period of the Philippine Insurrection began February 4, 1899, and ended April 27, 1902.

(c) *World War I.* The war period of the World War began April 6, 1917, and ended November 11, 1918.

(d) *World War II.* The war period of World War II began December 7, 1941, and ended December 31, 1946.

(Sec. 10, 49 Stat. 973, as amended; 45 U. S. C. 228j. Interpret or apply sec. 3, 49 Stat. 969, as amended; 45 U. S. C. 228c)

PART 210—EXECUTION AND FILING OF AN APPLICATION FOR AN ANNUITY

§ 210.2 *Application to be filed.* (a) No individual, irrespective of his qualifications, shall receive an annuity unless he has, on or before the date of his death, either (1) filed with an office of the Board a duly executed application, upon such form as the Board may from time to time prescribe, or (2) delivered for the purpose of transmission to the Board's main office in Chicago, Ill., such a duly executed application to any field agent of the Board specifically authorized by a regional director to receive custody thereof in the district where

delivery is made: *Provided, however,* That a claim or application filed with the Social Security Administration, whether before or after the adoption of this section, for a lump-sum payment under section 204 (a) of Title II of the Social Security Act, as approved August 14, 1935, or for old-age insurance benefits under section 202 (a) of the Social Security Act, as amended to September 1, 1950, based in whole or in part on service with an employer under the Railroad Retirement Act, shall be considered an application for an annuity duly filed with the Railroad Retirement Board.

* * * * * *

§ 210.6 *Application filed with the Social Security Administration.* The date on which an individual files a claim or application with the Social Security Administration for old-age insurance benefits based on less than ten years (120 months) of railroad service shall be considered the date on which an application is filed with the Railroad Retirement Board if the individual subsequently acquires 120 months of railroad service. In any such case, receipt of the following information from the Social Security Administration shall denote the filing of an application under the Railroad Retirement Act: the name and address of the applicant; the name of each employer involved who may be covered by the Railroad Retirement Act; the amount of benefits, if any, paid by the Social Security Administration on the basis of service with such employers; and the date the claim or application was filed with the Social Security Administration. In determining the date on which a claim or application was filed with the Social Security Administration, the provisions of the proviso in § 210.3 shall be applied. The payments made by the Social Security Administration on the basis of compensation which had been used as wages are not erroneous for months prior to the time the individual acquired his 120th month of railroad service; such payments, however, if any, made for and subsequent to the individual's 120th month of railroad service are to be recovered from accrued annuities under the Railroad Retirement Act.

(Sec. 10, 49 Stat. 973, as amended; 45 U. S. C. 228j. Interpret or apply sec. 2, 49 Stat. 968, as amended; 45 U. S. C. 228b)

PART 214—ANNUITY BEGINNING DATE

§ 214.1 *Statutory provisions.*

An annuity shall begin to accrue as of a date to be specified in a written application (to be made in such manner and form as may be prescribed by the Board and to be signed by the individual entitled thereto), but—

(1) Not before the date following the last day of compensated service of the applicant, and

(2) Not more than twelve months before the filing of the application. (Section 2 (c), 50 Stat. 310, as amended; 45 U. S. C. 228b).

Any individual who, prior to the date of the enactment of this Act, relinquished all rights to return to the service of a carrier as defined in the Railroad Retirement Act of 1935 or ceased to be an employee representative as defined in such Act, and who is not eligible for an annuity under that Act but who would have been eligible for an annuity under the Railroad Retirement Act of 1937 had such Act been in force from and after August 29, 1935, shall have his right to an annuity adjudicated under the Railroad Retirement Act of 1937: *Provided, however,* That no such annuity shall begin prior to the date of the enactment of this Act. (Section 203, 50 Stat. 318; 45 U. S. C. 215 Note.)

§ 214.2 *Annuity beginning date.* An annuity shall begin to accrue as of the date specified in the application: *Provided,* That such date is not earlier than that permitted by sections 2 (c) (1), 2 (c) (2), and 203 of the act quoted in § 214.1, nor prior to the date upon which the applicant attains eligibility for an annuity: *Provided further,* That no joint and survivor annuity shall begin to accrue prior to the date on which a joint and survivor annuity election was made in accordance with Part 230 of this chapter. The filing of an application in accordance with the proviso contained in § 210.2 of this chapter shall be the specification, as an annuity beginning date, of the date following the last day of compensated service, or of the date twelve months prior to the filing date, whichever date is the later: *Provided, however,* That where such date falls on the thirty-first day of any month the annuity shall begin to accrue on the first day of the following month; and that where an application is filed on February 28 or 29 the annuity may begin as early as February 28 of the preceding year.

§ 214.4 *Clarification of beginning date.* In any case wherein an applicant has made an unintelligible designation of the beginning date of his annuity, he shall be notified of the earliest beginning date permitted by law. Non-action in response to the notification from the Board of the earliest permissible beginning date for a period of 30 days after the date of the notification shall operate to designate the earliest permissible date specified in such notification.

§ 214.6 *Beginning date following cancellation of application.* In the event an annuity beginning date is designated and, because of a cancellation of the application, such date becomes ineffective, the annuity thereafter cannot begin to accrue earlier than twelve months prior to the receipt of the request to renew the application, nor until the date following the last day of compensated service, whichever date is later: *Provided, however,* That the applicant may, in renewing such application, designate a later date.

(Sec. 10, 49 Stat. 973, as amended; 45 U. S. C. 228j)

PART 217—LOSS OF ANNUITY FOR ANY MONTH BY REASON OF COMPENSATED SERVICE

§ 217.1 *Statutory provisions.*

No annuity shall be paid with respect to any month in which an individual in receipt of an annuity hereunder shall render compensated service to an employer or to the last person by whom he was employed prior to the date on which the annuity began to accrue. Individuals receiving annuities shall report to the Board immediately all such compensated service. No annuity under paragraph 4 or 5 of subsection (a) of this section shall be paid to an individual with respect to any month in which the individual is under age sixty-five and is paid more than $100 in earnings from employment or self-employment of any form: *Provided,* That for purposes of this paragraph, if a payment in any one calendar month is for accruals in more than one calendar month, such payment shall be deemed to have been paid in each of the months in which accrued to the extent accrued in such month. Any such individual under the age of sixty-five shall report to the Board any such payment of earnings for such employment or self-employment before receipt and acceptance of an annuity for the second month following the month of such payment. A deduction shall be imposed, with respect to any such individual who fails to make such report, in the annuity or annuities otherwise due the individual, in an amount equal to the amount of the annuity for each month in which he is paid such earnings in such employment or self-employment, except that the first deduction imposed pursuant to this sentence shall in no case exceed an amount equal to the amount of the annuity otherwise due for the first month with respect to which the deduction is imposed. (Sec. 2 (d), 50 Stat. 310, as amended; 45 U. S. C. 228b)

§ 217.2 *Loss of annuity for month in which compensated service is rendered.* If an individual in receipt of an annuity renders compensated service, he shall not be paid an annuity with respect to any month in which such service is rendered to:

(a) An employer;

(b) Any person whether or not an employer by whom he was most recently employed when his annuity begins to accrue;

(c) Any person with whom he held, at the time the annuity begins to accrue, any rights to return to service;

(d) Any person with whom he ceased service in order to have his annuity begin to accrue.

(See also § 208.29 (c) of this chapter.)

(Sec. 10, 49 Stat. 973, as amended; 45 U. S. C. 228j. Interpret or apply sec. 2, 49 Stat. 968, as amended; 45 U. S. C. 228b)

PART 220—DEFINITION AND CREDITABILITY OF SERVICE

§ 220.2 *What constitutes a month and a year of service.* Any calendar month in which an individual renders service for compensation or for which he receives remuneration for time lost as an employee, constitutes a month of service, irrespective of the amount of such service or of the amount of time for which such remuneration is received. Twelve such months, consecutive or otherwise, shall be a year of service: *Provided, however,* That in totaling the service of an employee who has performed 126 months or more of creditable service, an ultimate fraction of 6 months or more shall constitute a year of service. In all other cases, ultimate fractions shall be taken at their actual value.

(Sec. 10, 49 Stat. 973, as amended; 45 U. S. C. 228j. Interprets or applies sec. 1, 45 U. S. C. 228a)

§ 220.3 *Creditability of service.* * * *

(d) *Service prior to January 1, 1937.* If an individual was not an employee on August 29, 1935, no service prior to January 1, 1937, shall be creditable.

(e) *Service prior to January 1, 1937, where individual was employee on August 29, 1935.* Service performed prior to January 1, 1937, by an individual who was an employee on August 29, 1935, shall be creditable in the manner and to the extent provided in paragraph (f) of this section but not so as to cause the total years of service to exceed 30: *Provided, however,* That with respect to any such individual who rendered service to any employer after January 1, 1937, and who on August 29, 1935, was not an employee of an employer conducting the principal part of its business in the United States no greater proportion of his service rendered prior to January 1, 1937, shall be included in his "years of service" than the proportion which his total compensation (without regard to any limitation on the amount of compensation otherwise provided in the act) for service after January 1, 1937, rendered anywhere to an employer conducting the principal part of its business in the United States or rendered in the United States to any other employer bears to his total compensation (without regard to any limitation on the amount of compensation otherwise provided in the act) for service rendered anywhere to an employer after January 1, 1937.

(f) *Service subsequent to December 31, 1936.* All service rendered as an employee after December 31, 1936, including service performed after age 65 is attained, shall be creditable even in excess of 30 years: *Provided, however,* That in any case in which both service prior to January 1, 1937, and service subsequent to December 31, 1936, are to be credited, all service subsequent to December 31, 1936, shall first be credited, and if it be less than 30 years, then service prior to January 1, 1937, shall be included, but only to an extent sufficient to bring the total of all years of service to 30: *Provided further,* That whenever service prior to January 1, 1937, is to be included it shall be taken in reverse order.

(g) *Service performed subsequent to the beginning date of an annuity.* Service rendered as an employee after the beginning date of an annuity shall be creditable toward any annuity under Part 208 of this chapter, and such annuity may be recomputed because of such additional service: *Provided,* That an application for recomputation is filed as prescribed in § 225.11 (a) of this chapter: *Provided further,* That such recomputation will not result in a decrease in such annuity. If such annuity was granted upon the basis of disability and the disability annuity ceased before the annuitant attained age 65, an application for recomputation shall not be required.

(h) *Service as employee representative.* Service rendered as an employee representative, as defined in § 205.2 of this chapter, shall be creditable in the same manner and to the same extent as though the organization by which he was employed were an employer.

(i) *Service after December 31, 1936, to a local lodge or division.* Service rendered in any month after December 31, 1936, to a local lodge or division of a railway-labor-organization employer with respect to which service an individual would be an employee within the meaning of § 203.7 of this chapter shall not be creditable unless rendered for compensation which is creditable within the provisions of Part 222 of this chapter, and particularly § 222.3 (d) of this chapter.

(Sec. 10, 49 Stat. 973, as amended; 15 U. S. C. 228j. Interprets or applies secs. 1, 3, 49 Stat. 967, 969, as amended; 45 U. S. C. 228a, 228c)

PART 222—DEFINITION AND CREDITABILITY OF COMPENSATION

§ 222.1 *Statutory provisions.*

The term "compensation" means any form of money remuneration paid to an individual for services rendered as an employee to one or more employers, or as an employee representative, including remuneration paid for time lost as an employee, but remuneration paid for time lost shall be deemed earned in the month in which such time is lost. Such term does not include tips, or the voluntary payment by an employer, without deduction from the remuneration of the employee, of any tax now or hereafter imposed with respect to the compensation of such employee. For the purposes of determining monthly compensation and years of service and for the purposes of subsections (a), (c), and (d) of section 2 and subsection (a) of section 5 of this Act, compensation earned in the service of a local lodge or division of a railway-labor-organization employer shall be disregarded with respect to any calendar month if the amount thereof is less than $3 and (1) such compensation is earned between December 31, 1936, and April 1, 1940, and taxes thereon pursuant to section 2 (a) and 3 (a) of the Carriers Taxing Act of 1937 or sections 1500 and 1520 of the Internal Revenue Code are not paid prior to July 1, 1940; or (2) such compensation is earned after March 31, 1940. A payment made by an employer to an individual through the employer's pay roll shall be presumed, in the absence of evidence to the contrary, to be compensation for service rendered by such individual as an employee of the employer in the period with respect to which the payment is made. An employee shall be deemed to be paid, "for time lost" the amount he is paid by an employer with respect to an identifiable period of absence from the active service of the employer, including absence on account of personal injury, and the amount he is paid by the employer for loss of earnings resulting from his displacement to a less remunerative position or occupation. If a payment is made by an employer with respect to a personal injury and includes pay for time lost, the total payment shall be deemed to be paid for time lost unless, at the time of payment, a part of such payment is specifically apportioned to factors other than time lost, in which event only such part of the payment as is not so apportioned shall be deemed to be paid for time lost. Compensation earned in any calendar month before 1947 shall be deemed paid in such month regardless of whether or when payment will have been in fact made, and compensation earned in any calendar year after 1946 but paid after the end of such calendar year shall be deemed to be compensation paid in the calendar year in which it will have been earned if it is so reported by the employer before February 1 of the next succeeding calendar year or, if the employee establishes, subject to the provisions of section 8, the period during which such compensation will have been earned. In determining the monthly compensation, the average monthly remuneration, and quarters of coverage of any employee, there shall be attributable as compensation paid to him in each calendar month in which he is in military service creditable under section 4 the amount of $160 in addition to the compensation, if any, paid to him with respect to such month. Compensation for service as a delegate to a national or international convention of a railway labor organization defined as an "employer" in subsection (a) of this section shall be disregarded for purposes of determining eligibility for and the amount of benefits pursuant to this Act if the individual rendering such service has not previously rendered service, other than as such a delegate, which may be included in his "years of service". (Section 1 (h), 50 Stat. 309, as amended; 45 U. S. C. 228a)

* * * In computing the monthly compensation, no part of any month's compensation in excess of $300 for any month before July 1, 1954, or in excess of $350 for any month after June 30, 1954, shall be recognized. If the employee earned compensation in service after June 30, 1937, and after the last day of the calendar year in which he attained age sixty-five, such compensation and service shall be disregarded in computing the monthly compensation if the result of taking such compensation into account in such computation would be to diminish his annuity. (Section 3 (c), 50 Stat. 311, as amended by 68 Stat. 1038; 45 U. S. C. 228c)

§ 222.3 *Creditability of compensation—*(a) *Maximum creditable compensation for one month.* In no case shall compensation in excess of $300 for any month of service before July 1, 1954, or in excess of $350 for any month of service after June 30, 1954, be recognized.

(b) *Compensation dependent upon creditability of service.* All compensation paid to an individual for service creditable in accordance with § 220.3 of this chapter, including compensation received for service performed after age 65, or after the beginning date of an annuity, shall be credited: *Provided, however,* That the crediting of such compensation shall be limited to the maximum prescribed in paragraph (a) of this section: *Provided further,* That if the individual earned compensation in service after June 30, 1937, and after the calendar year in which he attained age 65 such compensation and service shall be disregarded in computing the monthly compensation if the result of taking such compensation into account in such computation would be to diminish his annuity.

(c) *Employee representative compensation.* (1) If an individual occupies the position or office of employee representative as defined in section 1 (b) of the 1937 act and is paid remuneration in that position or office, all such remuneration is paid for services rendered as an employee representative within the meaning of section 1 (h) of the act, even though the individual performs either in connection with or outside of that position or office some services which are not related to the representation of employees in negotiations with employers regarding wages, hours, working conditions, etc. However, any other remuneration which the individual receives is not paid for service rendered as an employee representative within the meaning of section 1 (h).

(2) If an individual does not occupy the position or office of employees representative and is paid remuneration in another position or office, none of such remuneration is paid for services rendered as an employee representative

within the meaning of section 1 (h) of the 1937 act, even though the individual performs either in connection with or outside of the non-employee representative position some services which are related to the representation of employees in negotiations with employers regarding wages, hours, working conditions, etc. Likewise, if the individual does occupy the position or office of employee representative in addition to his other position or office, but is paid remuneration only in the non-employee representative position or office or for services not related to the representation of employees in negotiations with employers, none of such remuneration is paid for service rendered as an employee representative within the meaning of section 1 (h).

(d) *Compensation earned after December 31, 1936, for service rendered to a local lodge or division.* Compensation earned in any month after December 31, 1936, for service rendered to a local lodge or division of a railway-labor-organization employer shall be disregarded unless (1) it is $3.00 or more, or (2) if less than $3.00 it was earned prior to April 1, 1940, and with respect thereto the income and excise taxes prescribed in the Railroad Retirement Tax Act were paid prior to July 1, 1940.

(e) *Compensation for service as a delegate to a convention of a railway labor organization.* Compensation received on or after April 1, 1954, as a delegate to a national or international convention of a railway labor organization defined as an "employer" in section 1 (a) of the act shall be disregarded in determining an individual's eligibility for benefits and the amount of such benefits if the individual has not previousy rendered service, other than as such a delegate, which may be included in his "years of service."

(f) *When compensation earned will be deemed compensation paid.* Compensation earned in any calendar month before 1947 shall be deemed paid in such month regardless of whether or when payment will have been in fact made, and compensation earned in any calendar year after 1946 but paid after the end of such calendar year shall be deemed to be compensation paid in the calendar year in which it will have been earned if it is so reported by the employer before February 1 of the next succeeding calendar year or, if the employee establishes, subject to the provisions of section 8 of the act, the period during which such compensation will have been earned.

(g) *Compensation; payment.* Compensation is deemed to be paid:

(1) When it is actually paid; or

(2) When it is constructively paid, that is, credited to the account of or set apart for an employee without any substantial limitation or restriction as to the time or manner of payment or condition upon which payment is to be made, and made available to him so that it may be drawn upon at any time and its payment brought within his own control and disposition.

(h) *Allowances in lieu of vacation.* Compensation shall include allowances in lieu of vacations. If an employee dies, or ceases service for the purpose of receiving an annuity, and a vacation allowance is thereafter paid, the Board may, in the interest of the employee, credit the allowance to the last day of service or allocate the compensation to a period during his life following the last day of service equivalent to the entire vacation period.

(Sec. 10, 49 Stat. 973, as amended; 45 U. S. C. 228j. Interprets or applies sec. 1, 49 Stat. 967, as amended; 45 U. S. C. 228a)

§ 222.4 *Amount of compensation attributable to each calendar month of military service creditable.* In determining the "monthly compensation" of any employee who performed military service which is creditable under Part 209 of this chapter and section 4 of the act, there shall be attributable as compensation for each such month of creditable military service the amount of $160 in adition to the compensation, if any, paid him with respect to such month: *Provided, however,* That the compensation so credited shall not exceed the maximum prescribed in § 222.3 (a).

(Sec. 10, 49 Stat. 973, as amended; 45 U. S. C. 228j)

PART 225—COMPUTATION OF ANNUITY

§ 225.1 *Formula for computing annuity.* The annuity shall be computed by multiplying an individual's "years of service" by the following percentages of his "monthly compensation": 2.76 percent of the first $50; 2.07 percent of the next $100; and 1.38 percent of the next $200.

(Sec. 10, 49 Stat. 973, as amended; 45 U. S. C. 228j. Interprets or applies sec. 3, 49 Stat. 969, as amended; 45 U. S. C. 228c)

§ 225.5 *Minimum amount of annuity.* In the case of an individual having a current connection with the railroad industry as defined in section 1 (o) of the act and § 208.5 of this chapter, the minimum annuity payable for any month after October 1951 shall, except as provided in § 225.6 and prior to any reduction pursuant to §§ 225.7, 225.8, and 225.9, be whichever of the following is the least:

(a) $4.14 multiplied by the number of the individual's "years of service," or

(b) $69, or

(c) The individual's "monthly compensation" as determined under § 225.3.

(Sec. 10, 49 Stat. 973, as amended; 45 U. S. C. 228j. Interprets or applies sec. 3, 49 Stat. 969, as amended; 45 U. S. C. 228c)

§ 225.6 *Over-all minimum based on Social Security Act formula.* (a) When the total amount of annuity payable to an individual for an entire month, before any reduction under §§ 225.7 and 225.8, plus the amount, if any, of the spouse's annuity payable for such month to the spouse of such individual, is less than the amount, or the additional amount, which would have been payable for such month under the Social Security Act to the individual, his spouse, and his children, if any, the amount of the annuity or annuities shall be increased proportionately to such amount or additional amount.

(b) For the purpose of this section, (1) the individual's service as an employee after 1936 shall be deemed to have been "employment" as that term is defined in the Social Security Act, (2) quarters of coverage shall be determined in accordance with section 5 (1) (4) of the Railroad Retirement Act (see § 237.101 of this chapter), and (c) the amount of any possible deductions for failure to report an event causing a deduction as provided in subsections (f) and (g) (2) of section 203 of the Social Security Act shall be disregarded.

(Sec. 10, 49 Stat. 973, as amended; 45 U. S. C. 228j. Interprets or applies sec. 3, 49 Stat. 969, as amended; 45 U. S. C. 228c)

§ 225.7 *Annuities subject to reduction where individual is under age 65.* Where eligibility for an annuity is based on age 60 to 65 and service, the amount of the annuity, as computed under §§ 225.1 to 225.6, shall in the case of male applicants be reduced by one one-hundred-and-eightieth for each calendar month during all of which the individual is less than 65 years of age when the annuity begins to accrue.

§ 225.8 *Effect of election of joint and survivor annuity.* If a joint and survivor election is operative, the value of the annuity, as computed under §§ 225.1 to 225.7, shall be applied to the payment of two annuities, a joint and survivor annuity to the individual during life, and a survivor annuity to the surviving spouse during life; the amounts of both annuities shall be such that their combined actuarial value as determined by the Board shall be the same as the actuarial value of the annuity computed under §§ 225.1 to 225.7: *Provided, however,* That such joint and survivor annuity shall upon revocation of the election or death of the spouse be increased to the amount that would have been payable had an election not been made, such increased annuity to begin to accrue, subject to the provisions of § 214.1 of this chapter, on the first of the calendar month following the calendar month in which the election was revoked or the spouse died, but not before November 1, 1951.

(Sec. 10, 49 Stat. 973, as amended; 45 U. S. C. 228j. Interprets or applies sec. 2, 49 Stat. 968, as amended; 45 U. S. C. 228b)

§ 225.9 *Reduction because of military service used for other benefits.* When any other gratuitous benefit is payable on a periodic basis under another act of Congress on the basis of military service included in an individual's years of service, the annuity of such individual for all or part of a month for which such other benefit is payable, shall be reduced by

(a) The proportion that the number of years of service by which such military service increases the years of service bears to the total years of service, or

(b) The aggregate amount of such other benefit for that month, whichever results in the smaller reduction; however, where eligibility for the annuity exists without the crediting of the military service on the basis of which such other benefit is payable, the annuity shall not be reduced below the amount which would be payable without the crediting of the military service.

(Sec. 10, 49 Stat. 973, as amended; 45 U. S. C. 228j. Interprets or applies sec. 4, 49 Stat. 969, as amended; 45 U. S. C. 228c–1)

§ 225.10 [Reserved.]

§ 225.11 *Annuity subject to recomputation*—(a) *Recomputation of retirement annuity.* Subject to the provisions of paragraph (b) of this section, the retirement annuity of an individual shall be recomputed and recertified to include service rendered by such individual as an employee after such annuity began to accrue if the individual has, on or before the date of his death, filed with an office of the Board a duly executed application for such recomputation subject to the same conditions and limitations prescribed in § 210.2 of this chapter relating to the execution and filing of an application for an annuity. A recomputation under this section shall be made according to the provisions of section 3 of the act, as amended, and shall take into account all the individual's service rendered as an employee up to the date the application for recomputation is filed with the Board.

(b) *Cessation of service and relinquishment of rights as conditions for recomputation.* An individual shall be entitled to have his retirement annuity recomputed under paragraph (a) of this section only if he shall have ceased to render service for compensation to an employer as defined in Part 202 of this chapter, and shall have relinquished all rights which he may have had to return to the service of any such employer; but the requirement of relinquishment of rights shall not apply to an individual entitled to an annuity described in § 208.7 (a) (3) or (4) of this chapter, prior to attaining age 65.

(c) *Filing date of application for recomputation.* An application for recomputation of a retirement annuity, filed in the manner and form prescribed in paragraph (a) of this section and § 210.2 of this chapter, shall be considered filed as of the date prescribed in § 210.3 of this chapter.

(d) *Signature on application for recomputation.* An application for recomputation of a retirement annuity shall be signed in the manner prescribed in § 210.4 of this chapter. In addition, the conditions prescribed in that section with respect to re-executed or corrected applications shall also apply to such an application.

(e) *Presumptions from application; application where individual is incompetent; alteration; cancellation and effect of cancellation of application.* Sections 210.5, 210.7, 210.10, 210.11, and 210.12, respectively, of this chapter shall govern the presumptions which shall be made from a duly executed application for recomputation of a retirement annuity received on or prior to the date of death of the applicant, the execution and filing of such an application in the event the individual is mentally incompetent, the restrictions governing the alteration of such an application, the cancellation of such an application, and the effect of a cancellation.

(f) *Effective date of increase where retirement annuity is recomputed to include service rendered after annuity began to accrue.* Any increase in a retirement annuity resulting from a recomputation to include service rendered after the annuity has begun to accrue shall be effective as of the latest of the following dates: (1) twelve months before the filing date of the application for recomputation, or (2) the first day of the month following the last month in which the employee worked for an employer under the act: *Provided, however,* That no such increase in annuity shall be effective before November 1, 1951.

(Sec. 10, 49 Stat. 973, as amended; 45 U. S. C. 228j. Interprets or applies sec. 3, 49 Stat. 969, as amended; 45 U. S. C. 228c)

PART 232—SPOUSES' ANNUITIES

Subpart A—Definitions

Sec.
232.101 Statutory provisions.
232.102 Definition of "spouse".
232.103 Definition of "wife".
232.104 Definition of "husband".

Subpart B—Conditions of Entitlement

232.201 Statutory provisions.
232.202 Eligibility for an annuity.
232.203 Relinquishment of rights.
232.204 Filing of application.
232.205 Annuity beginning date.

Subpart C—Computation of Annuity

232.301 Statutory provisions.
232.302 Amount of annuity.
232.303 Reduction because of other benefits.

Subpart D—Payment of Annuities

232.401 Statutory provisions.
232.402 Loss of annuity with respect to any month.
232.403 Entitlement ends.

AUTHORITY: §§ 232.101 to 232.403 issued under sec. 10, 49 Stat. 753, as amended; 45 U. S. C. 228j.

SUBPART A—DEFINITIONS

§ 232.101 *Statutory provisions.*

For the purposes of this Act, the term "spouse" shall mean the wife or husband of a retirement annuitant or pensioner who (i) was married to such annuitant or pensioner for a period of not less than three years immediately preceding the day on which the application for a spouse's annuity is filed, or is the parent of such annuitant's or pensioner's son or daughter, if, as of the day on which the application for a spouse's annuity is filed, such wife or husband and such annuitant or pensioner were members of the same household, or such wife or husband was receiving regular contributions from such annuitant or pensioner toward her or his support, or such annuitant or pensioner has been ordered by any court to contribute to the support of such wife or husband; and (ii) in the case of a husband, was receiving at least one-half of his support from his wife at the time his wife's retirement annuity or pension began. (65 Stat. 684; 45 U. S. C. 228b)

§ 232.102 *Definition of "spouse."* The term "spouse" means a wife or husband of a retirement annuitant or pensioner as defined in section 2 of the act and in §§ 232.103 and 232.104.

§ 232.103 *Definition of "wife."* An individual is a "wife," as that term is used in section 2 of the act, when such an individual is the wife of a retirement annuitant or pensioner under the law of the state of his domicile and when:

(a) She has been married to such annuitant or pensioner for at least 3 years preceding the date on which an application for a spouse's annuity is filed, or is the natural mother of his son or daughter, and

(b) As of the date on which an application for a spouse's annuity is filed, she was a member of the same household as such annuitant or pensioner, or he was contributing toward her support regularly, or he had been ordered by any court to contribute to the support of such wife.

§ 232.104 *Definition of "husband."* An individual is a "husband," as that term is used in section 2 of the act, when such individual is the husband of a retirement annuitant or pensioner under the law of the state of her domicile and when:

(a) He had been married to such annuitant or pensioner for at least 3 years preceding the date on which an application for a spouse's annuity is filed, or is the natural father of her son or daughter, and

(b) As of the date on which an application for a spouse's annuity is filed, he was a member of the same household as such annuitant or pensioner, or she was contributing toward his support regularly, or she had been ordered by any court to contribute to the support of such husband, and

(c) He was receiving at least one-half of his support from such annuitant or pensioner on the day her annuity or pension began to accrue.

SUBPART B—CONDITIONS OF ENTITLEMENT

§ 232.201 *Statutory provisions.*

The spouse of an individual, if—

(i) Such individual has been awarded an annuity under subsection (a) or a pension under section 6 and has attained the age of 65, and

(ii) Such spouse has attained the age of 65 or in the case of a wife, has in her care (individually or jointly with her husband) a child who, if her husband were then to die, would be entitled to a child's annuity under subsection (c) of section 5 of this Act,

Shall be entitled to a spouse's annuity • • •.

(65 Stat. 683; 45 U. S. C. 228b, 228f, 228e)

An annuity shall be paid only if the applicant shall have relinquished such rights as he may have to return to the service of an employer and of the person by whom he was last employed • • • (Sec. 2 (b), 50 Stat. 310; 45 U. S. C. 228b)

An annuity shall begin to accrue as of a date to be specified in a written application (to be made in such manner and form as may be prescribed by the Board and to be signed by the individual entitled thereto), but—

(1) Not before the date following the last day of compensated service of the applicant, and

(2) Not more than twelve months before the filing of the application.

(Sec. 2 (c), 50 Stat. 310, as amended; 45 U. S. C. 228b)

§ 232.202 *Eligibility for an annuity.* The spouse of a retirement annuitant or pensioner shall be eligible for a spouse's annuity when such annuitant or pensioner has attained the age of 65 if:

(a) The spouse has also attained the age of 65, or

(b) The spouse is a woman under age 65 who has in her care, individually or jointly with her husband, a child, who if the anuitant or pensioner were then to die, would be entitled to a child's insurance annuity under section 5 (c) of the act.

§ 232.203 *Relinquishment of rights.* A spouse's annuity may not be certified for payment until the applicant has established to the satisfaction of the Board that he or she has relinquished all rights which such applicant may have had to return to the service of:

(a) An employer;

(b) Any person whether or not an employer by whom he or she was most recently employed when the annuity begins to accrue;

(c) Any person with whom he or she held, at the time the annuity begins to accrue, any rights to return to service;

(d) Any person with whom he or she ceased service in order to have the annuity begin to accrue.

§ 232.204 *Filing of application.* (a) No spouse, irrespective of his or her qualifications, shall receive an annuity unless he or she has, on or before the date of his or her death, filed with an office of the Board a duly executed application, upon such form as the Board may from time to time prescribe.

(b) An application shall be considered filed with the Board as of the date that it is received at an office of the Board, or the date that it is delivered into the custody of a duly authorized field agent: *Provided, however,* That where it is determined that the applicant died on a Sunday or a day observed by the Board as a legal holiday and the application is received through the mails at an office of the Board on the first business day following such Sunday or such legal holiday, the application shall be deemed to have been filed with the Board on such Sunday or such legal holiday, if it is established to the satisfaction of the Board that the application was mailed in sufficient time to have been received by the Board in the ordinary course of the mails on such Sunday or such legal holiday had it been a business day.

§ 232.205 *Annuity beginning date.* (a) A spouse's annuity shall begin to accrue as of the date specified in the application: *Provided, however,* That such date is not earlier than the latest of the following dates:

(1) November 1, 1951.

(2) The date following the last day of compensated service.

(3) The date on which all eligibility requirements are met.

(4) Twelve months prior to the filing date of the application.

(5) September 1, 1954, if the entitlement of a wife is based on having in her care a disabled child 18 years of age or older.

(b) Where the date on which the annuity could otherwise begin falls on the thirty-first day of any month, the annuity shall begin to accrue on the first day of the following month.

SUBPART C—COMPUTATION OF ANNUITY

§ 232.301 *Statutory provisions.*

The spouse of an individual, • • • shall be entitled to a spouse's annuity equal to one-half of such individual's annuity or pension, but not more than $40: *Provided, however,* That if the annuity of the individual is awarded under paragraph 3 of subsection (a), the spouse's annuity shall be computed or recomputed as though such individual had been awarded the annuity to which he would have been entitled under paragraph 1 of said subsection: *Provided further,* That, if the annuity of the individual is awarded pursuant to a joint and survivor election, the spouse's annuity shall be computed or recomputed as though such individual had not made a joint and survivor election: *And provided further,* That any spouse's annuity shall be reduced by the amount of any annuity and the amount of any monthly insurance benefit, other than a wife's or husband's insurance benefit, to which such spouse is entitled, or on proper application would be entitled, under subsection (a) of this section or subsection (d) of section 5 of this Act or section 202 of the Social Security Act; except that if such spouse is disentitled to a wife's or husband's insurance benefit, or has had such benefit reduced, by reason of subsection (k) of section 202 of the Social Security Act, the reduction pursuant to this third proviso shall be only in the amount by which such spouse's monthly insurance benefit under said Act exceeds the wife's or husband's insurance benefit to which such spouse would have been entitled under that Act but for said subsection (k). (65 Stat. 683; 45 U. S. C. 228b)

§ 232.302 *Amount of annuity.* (a) A spouse's annuity for a month shall be equal to one-half of the annuity or pension of the retired employee up to a maximum of $40: *Provided, however,* That the maximum may be exceeded where the employee's annuity is computed as prescribed in § 225.6 of this chapter.

(b) Where the annuity of the retired employee was awarded on a reduced basis because such individual had not attained the age of 65, the spouse's annuity shall be computed as though the employee's annuity had been awarded under section 2 (a) 1 of the act after such annuitant had attained age 65.

(c) Where the annuity of the retired employee was awarded and reduced pursuant to a joint and survivor election, the spouse's annuity shall be computed as though such joint and survivor election had not been made.

§ 232.303 *Reduction because of other benefits.* The spouse's annuity of an individual who is entitled, or upon application would be entitled, to a retirement annuity or parent's insurance annuity under the Railroad Retirement Act, or to any benefit under the Social Security Act, other than a wife's or husband's benefit, shall be reduced by the amount of such other benefits: *Provided, however,* That where the entitlement to an old-age insurance benefit or to a parent's benefit under the Social Security Act causes disentitlement to a wife's or husband's benefit to which such individual would otherwise be entitled, the reduction shall be limited to the amount by which such old-age insurance benefit or parent's benefit exceeds the wife's or husband's benefit to which the spouse would otherwise be entitled.

SUBPART D—PAYMENT OF ANNUITIES

§ 232.401 *Statutory provisions.*

The sopuse's annuity provided in subsection (e) shall, with respect to any month, be subject to the same provisions of subsection (d) as the individual's annuity, and, in addition, the spouse's annuity shall not be payable for any month if the individual's annuity is not payable for such month (or, in the case of a pensioner, would not be payable if the pension were an annuity) by reason of the provisions of said subsection (d). Such spouse's annuity shall cease at the end of the month preceding the month in which (i) the spouse or the individual dies, (ii) the spouse and the individual are absolutely divorced, or (iii), in the case of a wife under age 65, she no longer has in her care a child who, if her husband were then to die, would be entitled to an annuity under subsection (c) of section 5 of this Act. (65 Stat. 684; 45 U. S. C. 228b)

§ 232.402 *Loss of annuity with respect to any month.* A spouse's annuity shall not be paid with respect to any month in which an individual in receipt of an annuity under section 2 (e) of the act shall:

(a) Render compensated service to an employer or to the last person by whom such spouse annuitant was employed prior to the date on which the annuity began to accrue, or

(b) The retirement annuity of the employee annuitant is not payable, or in the case of a pensioner such pension would not be payable if it were an annuity subject to the provisions of section 2 (d) of the act.

§ 232.403 *Entitlement ends.* Entitlement to a spouse's annuity awarded under section 2 (e) of the act shall cease at the end of the month preceding the month in which any of the following events occur:

(a) The spouse annuitant dies.

(b) The wife or husband of the spouse annuitant dies.

(c) The marriage of the spouse annuitant and the annuitant or pensioner is ended by absolute divorce.

(d) A spouse annuitant under age 65 no longer has in her care a child who, if her husband were then to die, would be entitled to an annuity under section 5 (c), of the act.

PART 234—ANNUITIES DUE BUT UNPAID AT DEATH

§ 234.2 *Annuities due but unpaid at death; to whom payable.* Employee annuities, survivor annuities, and insurance annuities which will have become due an individual but will not yet have been paid at death, if such death shall have occurred on or after January 1, 1947, shall be paid to the following person (or if more than one there shall be distributed among them) whose relationship to the deceased employee will have been determined by the Board, and who will have been living on the date of such determination: To the widow or widower; if no such widow or widower be then living, to any child or children and to any other person or persons who, under the intestacy law of the State where the deceased will have been domiciled, will have been entitled to share as distributees with such children, in such proportions as are provided by such law; if no such widow, widower, child or other person or parent be then living, to brothers and sisters in equal shares. If none of the persons described above be living on the date of such determination, accrued and unpaid employee annuities shall be paid to any person or persons, equitably entitled thereto, to the extent and in the proportions that he or they shall have paid the expenses of burial of the employee. If there be no individual to whom payment can thus be made, such accrued employee annuity payments shall escheat to the credit of the Railroad Retirement Account. Accrued spouse's annuities which will have become due a spouse but will not yet have been paid at death shall be paid to the employee if he or she is living on the date payment is to be made. If the employee is not living on the date payment is to be made, the accrued spouse's annuities shall be paid to the person or persons described above who would be entitled to any amount due but unpaid at the death of the employee. A person who has paid an employee's burial expenses is not equitably entitled to any accrued survivor and insurance annuities, and if no person or persons of the relationship described above to the employee were living on the date of such determination, any accrued survivor and insurance annuities shall escheat under the last sentence of section 3 (f) of the act.

(Sec. 10, 49 Stat. 753, as amended; 45 U. S. C. 228j. Interprets or applies sec. 3, 49 Stat. 969, as amended; 45 U. S. C. 228c)

PART 236—PAYMENTS OF BENEFITS OF $1,000 OR LESS

§ 236.2 *Waiver and release by creditor.* If, in the judgment of the Board, any creditor of the estate of the deceased possesses rights superior to those of his surviving spouse or kindred, payment shall not be made without formal administration unless and until such creditor has, on a form prescribed by the Board, waived and released his claim against such estate with the same effect as if it had heretofore been paid and fully satisfied: *Provided, however,* That payment may be made to a creditor or creditors, on a proportionate basis, for burial expenses or medical expenses of the last illness of the deceased in the order of priority under the applicable law: *Provided further,* That where several persons are creditors by virtue of having contributed small amounts of $25 or less each to a fund administered by a custodian for payment of the burial expenses of the deceased, payment may be made to such custodian without requiring formal assignments or waivers signed by each such person.

(Sec. 10, 49 Stat. 753, as amended; 45 U. S. C. 228j)

PART 237—INSURANCE ANNUITIES AND LUMP SUMS FOR SURVIVORS

SUBPART A—INSURED STATUS

§ 237.101 *Statutory provisions.*

An employee will have been "completely insured" if it appears to the satisfaction of the Board that at the time of his death, whether before or after the enactment of this section, he will have completed ten years of service and will have had the qualifications set forth in any one of the following paragraphs:

(i) A current connection with the railroad industry; and a number of quarters of coverage, not less than six, and at least equal to one-half of the number of quarters, elapsing in the period after 1936, or after the quarter in which he will have attained the age of twenty-one, whichever is later, and up to but excluding the quarter in which he will have attained the age of sixty-five years or died, whichever will first have occurred (excluding from the elapsed quarters any quarter which is not a quarter of coverage and during any part of which a retirement annuity will have been payable to him); and if the number of such elapsed quarters is an odd number such number shall be reduced by one; or

(ii) A current connection with the railroad industry, and forty or more quarters of coverage; or

(iii) A pension will have been payable to him; or a retirement annuity based on service of not less than ten years (as computed in awarding the annuity) will have begun to accrue to him before 1948. (60 Stat. 734; 45 U. S. C. 228e)

An individual shall be deemed to have "a current connection with the railroad industry" at the time an annuity begins to accrue to him and at death if, in any thirty consecutive calendar months before the month in which an annuity under section 2 begins to accrue to him (or the month in which he dies if that first occurs), he will have been in service as an employee in not less than twelve calendar months and, if such thirty calendar months do not immediately precede such month, he will not have been engaged in any regular employment other than employment for an employer in the period before such month and after the end of such thirty months. For the purposes of section 5 only, an individual shall be deemed also to have a "current connection with the railroad industry" if he is in all other respects completely insured but would not be fully insured under the Social Security Act, or if he is in all other respects partially insured but would be neither fully nor currently insured under the Social Security Act, or if he has no wage quarters of coverage. (60 Stat. 726; 45 U. S. C. 228a)

The term "quarter of coverage" shall mean a compensation quarter of coverage or a wage quarter of coverage, and the term "quarters of coverage" shall mean compensation quarters of coverage, or wage quarters of coverage, or both: *Provided,* That there shall be for a single employee no more than four quarters of coverage for a single calendar year. (60 Stat. 733; 45 U. S. C. 228e)

The term "compensation quarter of coverage" shall mean any quarter of coverage computed with respect to compensation paid to an employee after 1936 in accordance with the following table:

Months of service in a calendar year	Total compensation paid in the calendar year				
	Less than $50	$50 but less than $100	$100 but less than $150	$150 but less than $200	$200 or more
1–3	0	1	1	1	1
4–6	0	1	2	2	2
7–9	0	1	2	3	3
10–12	0	1	2	3	4

If upon computation of the compensation quarters of coverage in accordance with the above table an employee is found to lack a completely or partially insured status which he would have if compensation paid in a calendar year were presumed to have been paid in equal proportions with respect to all months in the year in which the employee will have been in service as an employee, such presumption shall be made. (60 Stat. 733; 45 U. S. C. 228e)

The term "wage quarter of coverage" shall mean any quarter of coverage determined in accordance with the provisions of title II of the Social Security Act. (60 Stat. 734; 45 U. S. C. 228e)

§ 237.102 *Completely insured status—(a) Payments based upon, and existence of, completely insured status.* (1) All insurance annuities and lump sums for survivors are conditioned upon an employee's insured status. This status is determined by his service, compensation, and wage history. Unless an employee was completely insured at death, his widow cannot become entitled to a widow's insurance annuity, her widower cannot become entitled to a widower's insurance annuity, and his surviving parent cannot become entitled to a parent's insurance annuity, on the basis of his earnings. For the purpose of determining whether an employee was completely insured at death, it is immaterial whether his death occurred before, on, or after the enactment date of section 5 of the act.

(2) An employee was completely insured at death if (i) he had completed 10 years of service, had acquired the number of quarters of coverage specified in paragraph (d) of this section and had a current connection with the railroad industry at the time of his death, or (ii) there had been payable to him a pension under section 6 of the act, or (iii) there had begun to accrue to him, before 1948, a retirement annuity based on not less than 10 years of service (as computed in awarding the annuity).

• • • • • •

(d) *Determination of completely insured status on basis of quarters of coverage and current connection.* An employee, whether or not he was completely insured at death by virtue of having been a pensioner or an annuitant, could have been completely insured at the time of his death if at that time he had completed 10 years of service, had a current connection with the railroad industry, and had at least 40 quarters of coverage. Even if he had less than 40 quarters of coverage, he could have been completely insured at the time of his death if at that time he had completed 10 years of service, had a current connection with

the railroad industry, and had a required number of quarters of coverage, not less than six, as provided in this paragraph. If such an employee did not have, at the time of his death, a current connection with the railroad industry, or if he had less than six quarters of coverage, he was not a completely insured employee under the provisions of this paragraph. In the case of an employee who, at the time of his death, had completed 10 years of service, had a current connection with the railroad industry, and had at least six, but less than 40, quarters of coverage, the determination of whether he had a completely insured status under the provisions of this paragraph is made as follows:

(1) *Elapsed quarters.* Take the number of calendar quarters which have elapsed after 1936, or after the quarter in which the employee attained the age of 21 if he attained such age after 1936, and up to but excluding the quarter in which the employee attained the age of 65 or died, whichever occurred first. Subtract from that number of elapsed quarters the number of such quarters which is not a wage quarter of coverage and during any part of which a retirement annuity was payable to the employee. If the resulting number of elapsed quarters is an odd number, subtract one. Take one-half of the number of elapsed quarters thus obtained, and the resulting number, if six or more, is the number of quarters of coverage required; if the resulting number is less than six, the number of quarters of coverage required is six.

* * * * *

§ 237.103 *Partially insured status—*(a) *Payments based upon partially insured status.* An employee who was not completely insured at death may nevertheless have had a service, compensation, and wage history which, upon his death, will give him the status of a partially insured employee. Unless he was either completely insured or partially insured at death, his widow cannot become entitled to a widow's current insurance annuity, his surviving child cannot become entitled to a child's insurance annuity, and no person can become entitled to a lump-sum payment under section 5 (f) (1) of the act, on the basis of his earnings. For the purpose of determining whether an employee was a partially insured employee at death it is immaterial whether his death occurred before, on, or after the enactment date of section 5 of the act.

(b) *Determination of partially insured status.* (1) An employee was a partially insured employee at death if he had completed 10 years of service, had a current connection with the railroad industry, and had at least six quarters of coverage in a prescribed period. That period consists of the three calendar years preceding the year in which the employee died or in which a retirement annuity will have begun to accrue to him, and those calendar quarters of the year in which such event occurs.

(2) Quarters of coverage need not be consecutive and no particular order of their acquisition is required.

§ 237.104 *Alternative method of determining insured status.* Where application of the table in section 5 (1) (4) of the act (see § 237.101) does not result in an employee's having a completely or partially insured status, it shall be presumed that the compensation paid him in a calendar year was paid in equal proportions with respect to all months in the year and at last line of the table applied to the result. This alternative method shall be applied to the most recent calendar year in which the employee received compensation and each preceding calendar year until an insured status is obtained, if at all, but not beyond 1937. This alternative method is to be applied only with respect to benefits accruing under the 1951 amendments, that is, in determining the insured status of a deceased employee and in determining whether a child would be otherwise entitled to a child's insurance annuity.

SUBPART B—BASIC COMPUTATION

§ 237.201 *Statutory provisions.*

The term "basic amount" shall mean—

(1) For an employee who will have been partially insured, or completely insured solely by virtue of paragraph (7) (i) or (7) (ii) or both: the sum of (A) 40 per centum of his average monthly remuneration, up to and including $75; plus (B) 10 per centum of such average monthly remuneration exceeding $75 and up to and including $350, plus (C) 1 per centum of the sum of (A) plus (B) multiplied by the number of years after 1936 in each of which the compensation, wages, or both, paid to him will have been equal to $200 or more; if the basic amount, thus computed, is less than $14 it shall be increased to $14;

(ii) For an employee who will have been completely insured solely by virtue of paragraph (7) (iii): the sum of 40 per centum of his monthly compensation if an annuity will have been payable to him, or, if a pension will have been payable to him, 40 per centum of the average monthly earnings on which such pension was computed, up to and including $75, plus 10 per centum of such compensation or earnings exceeding $75 and up to and including $300. If the average monthly earnings on which a pension payable to him was computed are not ascertainable from the records in the possession of the Board, the amount computed under this subdivision shall be $33.33, except that if the pension payable to him was less than $25, such amount shall be four-thirds of the amount of the pension or $13.33, whichever is greater. The term "monthly compensation" shall, for the purposes of this subdivision, mean the monthly compensation used in computing the annuity;

(iii) For an employee who will have been completely insured under paragraph (7) (iii) and either (7) (i) or 7 (ii): the higher of the two amounts computed in accordance with subdivisions (i) and (ii). (60 Stat. 734; 45 U. S. C. 228e)

An employee's "average monthly remuneration" shall mean the quotient obtained by dividing (A) the sum of (i) the compensation paid to him after 1936 and before the quarter in which he will have died, eliminating any excess over $300 for any calendar month before July 1, 1954, and any excess over $350 for any calendar month after June 30, 1954, and (ii) if such compensation for any calendar year is less than $3,600 and the average monthly remuneration computed on compensation alone is less than $350 and the employee has earned in such calendar year "wages" as defined in paragraph (6) hereof, such wages, in an amount not to exceed the difference between the compensation for such year and $4,200, by (B) three times the number of quarters elapsing after 1936 and before the quarter in which he will have died: *Provided,* That for the period prior to and including the calendar year in which he will have attained the age of twenty-two there shall be included in the divisor not more than three times the number of quarters of coverage in such period: *Provided, further,* That there shall be excluded from the divisor any calendar quarter which is not a quarter of coverage and during any part of which a retirement annuity will have been payable to him: *And provided further,* That if the exclusion from the divisor of all quarters beginning with the first quarter in which the employee was completely insured and had attained the age of sixty-five and the exclusion from the dividend of all compensation and wages with respect to such quarters would result in a higher average monthly remuneration, such quarters, compensation and wages shall be so excluded.

With respect to an employee who will have been awarded a retirement annuity, the term "compensation" shall, for the purposes of this paragraph, mean the compensation on which such annuity will have been based. (60 Stat. 734; 45 U. S. C. 228e)

The term "wages" shall mean wages as defined in section 209 of the Social Security Act (except that for the purposes of section 5 (1) (1) (ii) of this Act such wages shall be determined without regard to subsection (a) of said section 209). In addition, the term shall include (i) "self-employment income" as defined in section 211 (b) of the Social Security Act (and in determining "self-employment income" the "net earnings from self-employment" shall be determined as provided in section 211 (a) of such Act and charged to correspond with the provisions of section 203 (e) of such Act), and (ii) wages deemed to have been paid under section 217 (a) or (e) of the Social Security Act on account of military service which is not creditable under section 4 of this Act. (60 Stat. 734; 45 U. S. C. 228e. 64 Stat. 492, 42 U. S. C. 409)

§ 237.202 *Basic amount.* * * *

(b) *Computation of basic amount.* * * *

(1) *Employee partially insured, or completely insured solely because of current connection and quarters of coverage.* In these cases:

(i) If the employee's average monthly remuneration does not exceed $75, take 40 percent of such average monthly remuneration. If the average monthly remuneration exceeds $75, take 40 percent of $75 and add thereto 10 percent of the amount by which the average monthly remuneration exceeds $75 and does not exceed $350.

* * * * *

(iii) Add the figure computed under subdivision (i) of this subparagraph and the figure computed under subdivision (ii) of this subparagraph. The sum so obtained is the basic amount. If such sum is less than $14, it is increased to $14.

(2) *Employee completely insured solely because of being a pensioner.* In these cases:

(i) If the average monthly earnings on which the pension was computed are ascertainable from the records in the possession of the Board, and if such average monthly earnings do not exceed $75, take 40 percent of such average monthly earnings. If such average monthly earnings exceed $75, take 40 percent of $75 and add thereto 10 percent of the amount by which the average monthly earnings exceed $75 and do not exceed $300. This sum is the basic amount.

(ii) If the average monthly earnings on which the pension was computed are not ascertainable from the records in the possession of the Board, and if the pension was $25 or more, the basic amount is $33.33, but if the pension was less than $25, the basic amount is four-thirds of the amount of the pension which was payable before July 1948, or $13.33, whichever is greater.

(3) *Employee completely insured solely because of being an annuitant.* In these cases: If the employee's monthly compensation does not exceed $75, take 40 percent of such monthly compensation. If the monthly compensation exceeds $75, take 40 percent of $75 and add thereto 10 percent of the amount by which the monthly compensation exceeds $75 and does not exceed $300. This sum is the basic amount. For the purposes of this subparagraph, "monthly compensation" means the monthly compensation which was used in computing the employee's annuity.

* * * * *

§ 237.203 *Average monthly remuneration.* A deceased employee's average monthly remuneration is computed by dividing his total compensation and wages by three times the number of his divisor quarters. The total compensation and wages and the number of divisor quarters are determined as follows:

(a) *Total compensation and wages.* (1) All compensation paid to the employee, including compensation attributable to military service, after 1936 and before the quarter of computation, excluding any excess over $300 for any calendar month before July 1, 1954, and any excess over $350 for any calendar month after June 30, 1954.

(2) Where the compensation, including compensation attributable to military service, for any calendar year after 1936 and through 1954 and before the quarter of computation is less than $3,600, wages as defined in section 5 (1) (6) of the act in an amount not to exceed the difference between such compensation for a year and $3,600 are to be included. Where such compensation for any calendar year after 1954 and before the quarter of computation is less than $4,200, such wages in an amount not to exceed the difference between such compensation for a year and $4,200 are to be included.

(b) *Divisor quarters.* Take the number of calendar quarters which have elapsed after 1936 or after the year in which the employee attained age 22, whichever is later, and before the quarter of computation. Add to such elapsed quarters the number of quarters of coverage credited the employee before the year in which he attained age 23. Subtract from the number of quarters thus arrived at the number of such quarters which is not a wage quarter of coverage and during any part of which a retirement annuity was payable to the employee. The result is the divisor quarters. If the exclusion from the divisor of all quarters beginning with the first quarter in which the employee was completely insured and had attained the age of 65 and the exclusion from the dividend of all compensation and wages with respect to such quarters would result in a higher average monthly remuneration, such quarters, compensation, and wages shall be so excluded.

§ 237.204 *Quarter of computation.* (a) Where the employee attained age 65 and was completely insured before the quarter of death, the basic amount is computed as of:

(1) The first calendar quarter in which the employee was completely insured and had attained age 65, and

(2) The calendar quarter in which the employee died.

The award is based on the highest basic amount computed.

(b) Where the employee had not attained age 65 and/or was not completely insured prior to the quarter of death, the basic amount is computed as of the calendar quarter in which the employee died.

§ 237.205 *Reduction because of military service used for other benefits.* When any other gratuitous benefit is payable on a periodic basis under another act of Congress on the basis of military service which has been credited in determining the quarters of coverage of an individual, a survivor insurance annuity, based on the insured status of the individual, which is payable for all or part of a month for which such other benefit is payable, shall be reduced by

(a) The proportion which the increase, by reason of the inclusion of military service, in the quarters of coverage used in determining the amount of benefits bears to the total of such quarters, or

(b) The aggregate amount of such other benefit for that month, whichever results in the smaller reduction; however, where eligibility for the insurance annuity exists without the crediting of the military service on the basis of which such other benefit is payable, the insurance annuity shall not be reduced below the amount which would be payable without the crediting of the military service.

SUBPART C—FAMILY RELATIONSHIPS

§ 237.301 *Statutory provisions.*

For the purposes of this section * * *

(1) The qualifications for "widow," "widower," "child," and "parent" shall be, except for the purposes of subsection (f), those set forth in section 216 (c), (e), and (g), and section 202 (h) (3) of the Social Security Act, respectively; and in addition—

(i) A "widow" or "widower" shall have been living with the employee at the time of the employee's death; a widower shall have received at least one-half of his support from his wife employee at the time of her death or he shall have received at least one-half of his support from his wife employee at the time her retirement annuity or pension began. (60 Stat. 733, as amended; 45 U. S. C. 228e)

(ii) A "child" shall have been dependent upon its parent employee at the time of his death; shall not be adopted after such death by other than a step parent, grand parent, aunt, or uncle; shall be unmarried; and shall be less than eighteen years of age, or shall have a permanent physical or mental condition which is such that he is unable to engage in any regular employment: *Provided,* That such disability began before the child attains age eighteen; and (60 Stat. 733, as amended; 45 U. S. C. 228e)

(iii) A "parent" shall have received, at the time of the death of the employee to whom the relationship of parent is claimed, at least one-half of his support from such employee. (60 Stat. 733, as amended; 45 U. S. C. 228e)

A "widow" or "widower" shall be deemed to have been living with the employee if the conditions set forth in section 216 (h) (2) or (3), whichever is applicable, of the Social Security Act are fulfilled. A "child" shall be deemed to have been dependent upon a parent if the conditions set forth in section 202 (d) (3), (4), or (5) of the Social Security Act are fulfilled (a partially insured mother being deemed currently insured). In determining for purposes of this section and subsection (f) of section 2 whether an applicant is the wife, husband, widow, widower, child, or parent of an employee as claimed, the rules set forth in section 216 (h) (1) of the Social Security Act shall be applied. Such satisfactory proof shall be made from time to time, as prescribed by the Board, of the disability provided in clause (ii) of this paragraph and of the continuance, in accordance with regualtions prescribed by the Board, of such disability. If the individual fails to comply with the requirements prescribed by the Board as to the proof of the continuance of the disability his right to an annuity shall, except for good cause shown to the Board, cease. (60 Stat. 433, as amended; 45 U. S. C. 228e)

The term "widow" (except when used in section 202 (i)) means the surviving wife of an individual, but only if she (1) is the mother of his son or daughter, (2) legally adopted his son or daughter while she was married to him and while such son or daughter was under the age of eighteen, (3) was married to him at the time both of them legally adopted a child under the age of eighteen, or (4) was married to him for a period of not less than one year immediately prior to the day on which he died. (Section 216 (c), 64 Stat. 510; 42 U. S. C. 416)

The term "child" means (1) the child of an individual, and (2) in the case of a living individual, a stepchild or adopted child who has been such stepchild or adopted child for not less than three years immediately preceding the day on which application for child's benefits is filed, and (3) in the case of a deceased individual, (A) an adopted child, or (B) a stepchild who has been such stepchild for not less than one year immediately preceding the day on which such individual died. In determining whether an adopted child has met the length of time requirement in clause (2), time spent in the relationship of stepchild shall be counted as time spent in the relationship of adopted child. (Section 216 (e), 64 Stat. 511; 42 U. S. C. 416)

The term "widower" (except when used in section 202 (i)) means the surviving husband of an individual, but only if he (1) is the father of her son or daughter, (2) legally adopted her son or daughter while he was married to her and while such son or daughter was under the age of eighteen, (3) was married to her at the time both of them legally adopted a child under the age of eighteen, or (4) was married to her for a period of not less than one year immediately prior to the day on which she died. (Section 216 (g), 64 Stat. 511; 42 U. S. C. 416)

As used in this subsection, the term "parent" means the mother or father of an individual, a stepparent of an individual by a marriage contracted before such individual attained the age of sixteen, or an adopting parent by whom an individual was adopted before he attained the age of sixteen. (Section 202 (h) (3), 64 Stat. 487; 42 U. S. C. 402)

In determining whether an applicant is the wife, husband, widow, widower, child, or parent of a fully insured or currently insured individual for purposes of this title, the Administrator shall apply such law as would be applied in determining the devolution of intestate personal property by the courts of the State in which such insured individual is domiciled at the time such applicant files application, or, if such insured individual is dead, by the courts of the State in which he was domiciled at the time of his death, or if such insured individual is or was not so domiciled in any State, by the courts of the District of Columbia. Applicants who according to such law would have the same status relative to taking intestate personal property as a wife, husband, widow, widower, child, or parent shall be deemed such. (Section 216 (h) (1), 64 Stat. 511; 42 U. S. C. 416)

• • • a widow shall be deemed to have been living with her husband at the time of his death if they were both members of the same household on the date of his death, or she was receiving regular contributions from him toward her support on such date, or he had been ordered by any court to contribute to her support. (Section 216 (h) (2), 64 Stat. 511; 42 U. S. C. 416)

• • • a widower shall be deemed to have been living with his wife at the time of her death if they were both members of the same household on the date of her death, or he was receiving regular contributions from her toward his support on such date, or she had been ordered by any court to contribute to his support. (Section 216 (h) (3), 64 Stat. 512; 42 U. S. C. 416)

A child shall be deemed dependent upon his father or adopting father • • • unless • • • such individual was not living with or contributing to the support of such child and—

(A) such child is neither the legitimate nor adopted child of such individual, or

(B) such child had been adopted by some other individual, or

(C) such child was living with and was receiving more than one-half of his support from his stepfather. (Section 202 (d) (3), 64 Stat. 484; 42 U. S. C. 402)

A child shall be deemed dependent upon his stepfather • • • if • • • the child was living with or was receiving at least one-half of his support from such stepfather. (Section 202 (d) (4), 64 Stat. 484; 42 U. S. C. 402)

A child shall be deemed dependent upon his natural or adopting mother • • • if such mother or adopting mother was a currently insured individual. A child shall also be deemed dependent upon his natural or adopting mother, or upon his stepmother, • • • if • • • (A) she was living with or contributing to the support of such child, and (B) either (i) such child was neither living with nor receiving contributions from his father or adopting father, or (ii) such child was receiving at least one-half of his support from her. (Section 202 (d) (5), 64 Stat. 484; 42 U. S. C. 402)

§ 237.302 *Applicable state law and status*—(a) *Applicable state law defined.* "Applicable state law" is the law which the courts of the domicile of the deceased employee, on the basis of whose insured status an individual claims an insurance annuity or lump sum under this part, would apply in deciding who is a widow, widower, child, or parent, when determining the devolution of intestate personal property. The deceased employee's domicile is determined as of the time of his death. If the deceased employee was not domiciled in any state, applicable state law is the law which the courts of the District of Columbia would apply when determining the devolution of such property.

(b) *Status under applicable state law.* An individual who is not a widow, widower, child, or parent under applicable state law, but who is treated as such under such law for the purpose of determining the devolution of intestate personal property, has the same "status" as a widow, widower, child, or parent. For example, under the law of some states, an individual who is not a widow because her supposed marriage was void, may nevertheless be treated as a widow under such law, under certain strictly limited conditions. Such an individual has the "status" of a widow.

§ 237.303 *Definition of "widow."* An individual is the "widow" of an employee, as that term is used in section 5 of the act (except as stated in § 237.504 (b) under section 5 (f) of the act), if she meets the following requirements:

(a) She is the widow of the employee, or has the same status as a widow, under applicable state law, and

(b) She either (1) is the mother of the deceased employee's son or daughter, or (2) was married to the employee (became his wife, or acquired the status as such, under applicable state law) for a period of not less than 1 year immediately prior to the day on which he died, or (3) legally adopted the deceased employee's son or daughter while she was married to him and before the child attained age 18, or (4) was married to the deceased employee at the time both of them legally adopted a child under 18 (an individual is the mother of a deceased employee's son or daughter, within the meaning of this paragraph, if a son or daughter was born to her and such deceased employee, even though such son or daughter died before an application was filed which involved the determination of whether such individual is a "widow," and even though such son or daughter was born after the death of such employee), and

(c) She was living with her husband employee at the time of his death.

§ 237.304 *Definition of "widower."* An individual is the "widower" of an employee, as that term is used in section 5 of the act (except as stated in § 237.504 (b) under section 5 (f) of the act), if he meets the following requirements:

(a) He is the widower of the employee, or has the same status as a widower, under applicable state law, and

(b) He either (1) is the natural father of the deceased employee's son or daughter, or (2) was married to the employee (became her husband, or acquired the status as such, under applicable state law) for a period of not less than 1 year immediately prior to the day on which she died, or (3) legally adopted the deceased employee's son or daughter while he was married to her and before the child attained age 18, or (4) was married to the deceased employee at the time both of them legally adopted a child under 18 (an individual is the father of a deceased employee's son or daughter, within the meaning of this paragraph, if a son or daughter was born to him and such deceased employee, even though such son or daughter died before an application was filed which involved the determination of whether such individual is a "widower"), and

(c) He was living with his wife employee at the time of her death, and

(d) He was receiving at least one-half of his support from his wife employee at the time of her death or at the time her retirement annuity or pension began.

§ 237.305 *Definition of "living with."* A widow shall be deemed to have been living with her husband at the time of his death and a widower living with his wife at the time of her death if, at such time, any one of the three following conditions existed:

(a) If the husband and wife were at such time members of the same household.

A husband and wife were members of the same household if they were living together, and customarily lived together, in the same place of abode.

A husband and wife who customarily lived together in the same place of abode but who were not actually doing so at such time, may nevertheless be members of the same household, if they were apart only temporarily and intended to resume living together in the same place of abode.

(b) If, at such time, the wife was receiving regular contributions from her husband toward her support or the husband receiving regular contributions from his wife toward his support.

Contributions must be substantial, and may be made in cash or other medium. In determining the sufficiency of contributions under this paragraph, the surrounding circumstances with respect to both the time when contributions are made and the amount thereof shall be taken into consideration.

(c) If, at such time, the husband had been ordered by any court to contribute to his wife's support or the wife ordered by any court to contribute to her husband's support.

This condition is met if the husband was legally obligated to contribute to the support of his wife or the wife to the support of her husband at such time by virtue of any order, judgment, or decree of a court of competent jurisdiction, regardless of whether he or she actually made any such contribution. In determining the existence of such a legal obligation, any such order, judgment, or decree shall be considered as in full force and effect unless it had expired or had been vacated.

§ 237.306 *Definition of "child."* An individual is a "child," as that term is used in section 5 of the act (except as stated in § 237.504 (b) under section 5 (f) of the act), if he falls in one of the three classes described in paragraph (a) of this section, and if he meets all four of the requirements set out in paragraph (b) of this section.

(a) *Classes.* For the purposes of this section, individuals are classified as follows:

(1) *Children.* A son or daughter (by blood) of a deceased employee, who is the child of such deceased employee, or has the same status as a child, under applicable state law, is a "child" of such employee.

(2) *Stepchildren.* An individual who is the stepchild of a deceased employee by virtue of a marriage valid under applicable state law, which was contracted not less than 1 year immediately preceding the day on which the employee died, is a "child" of such employee.

(3) *Adopted children.* An individual who was legally adopted by a deceased employee, in accordance with applicable state law, is a "child" of such employee.

(b) *Requirements.* An individual must meet all four of the following requirements in order to be a "child" for the purposes of this section:

(1) The individual must have been dependent upon his parent employee at the time of the employee's death.

(2) The individual shall not have been adopted after the employee's death by other than a stepparent, grandparent, aunt, or uncle.

(3) The individual shall be unmarried.

(4) The individual shall be less than 18 years of age, or shall have a permanent physical or mental condition which is such that he is unable to engage in any regular employment: *Provided,* That such disability began before the child attains age 18.

§ 237.307 *Definition of "dependent upon"*—(a) *Dependency upon a father or adopting father.* (1) An individual who has filed an application for a child's insurance annuity based on the insured status of a deceased father or adopting father, who was an employee, is deemed to have been dependent upon such employee at the time of the employee's death if, at such time, such employee was either living with or contributing to the support of such individual.

(2) Even though the employee was not living with or contributing to the support of the individual at the time of the employee's death, the individual is deemed to have been dependent upon such employee at such time if the individual:

(i) Was either the legitimate or adopted child of such employee; and

(ii) Was not then the adopted child of someone else; and

(iii) Was not living with and receiving more than one-half his support from his stepfather.

(b) *Dependency upon a mother, adopting mother, or stepmother.* An individual who has filed an application for a child's insurance annuity based on the insured status of a deceased mother, adopting mother, or stepmother, who was an employee, is deemed to have been dependent upon such employee at the time of the employee's death if, at such time:

(1) The employee contributed one-half of the child's support; or

(2) The employee was living with or contributing to the support of the child and the child was neither living with nor receiving contributions from his natural or adopting father; or

(3) The employee, if the child's natural or adopting mother, was a partially insured individual.

(c) *Dependency upon a stepfather.* An individual who has filed an application for a child's insurance annuity based on the insured status of a deceased stepfather, who was an employee, is deemed to have been dependent upon such employee at the time of the employee's death if, at such time, the individual was either living with or receiving at least one-half of his support from such employee.

§ 237.308 *Definition of "parent."* An individual is a "parent," as that term is used in section 5 of the act (except as stated in § 237.504 (b) under section 5 (f) of the act), if he falls in one of the three classes described in paragraph (a) of this section, and if he meets the requirement set out in paragraph (b) of this section.

(a) *Classes.* For the purposes of this section, individuals are classified as follows:

(1) *Parents.* A mother or father (by blood) of a deceased employee, who is the parent of such employee, or has the same status as a parent, under applicable state law, is a "parent" of such employee.

(2) *Stepparents.* An individual who is a stepparent of a deceased employee by reason of a marriage valid under applicable state law, which was contracted before such employee attained the age of 16, is a "parent" of such employee.

(3) *Adopting parents.* An individual by whom a deceased employee was legally adopted, in accordance with applicable state law, before the employee attained the age of 16, is a "parent" of such employee.

(b) *Requirement.* An individual, to be entitled to parent's insurance annuity payments, must have received, at the time of the employee's death, at least one-half of his support from such employee.

SUBPART D—INSURANCE ANNUITY PAYMENTS TO SURVIVORS

§ 237.401 *Statutory provisions.*

Widow's and widower's insurance annuity. A widow or widower of a completely insured employee, who will have attained the age of sixty, shall be entitled during the remainder of her or his life or, if she or he remarries, then until remarriage to an annuity for each month equal to such employee's basic amount: *Provided, however,* That if in the month preceding the employee's death the spouse of such employee was entitled to a spouse's annuity under subsection (e) of section 2 in an amount greater than the widow's or widower's insurance annuity, the widow's or widower's insurance annuity shall be increased to such greater amount. (60 Stat. 729, as amended; 45 U. S. C. 228e)

Widow's current insurance annuity. A widow of a completely or partially insured employee, who is not entitled to an annuity under subsection (a) and who at the time of filing an application for an annuity under this subsection will have in her care a child of such employee entitled to receive an annuity under subsection (c) shall be entitled to an annuity for each month equal to the employee's basic amount. Such annuity shall cease upon her death, upon her remarriage, when she becomes entitled to an annuity under subsection (a), or when no child of the deceased employee is entitled to receive an annuity under subsection (c), whichever occurs first: *Provided, however,* That if in the month preceding the employee's death the spouse of such employee was entitled to a spouse's annuity under subsection (e) of section 2 in an amount greater than the widow's current insurance annuity, the widow's current insurance annuity shall be increased to such greater amount. (60 Stat. 729, as amended; 45 U. S. C. 228e.)

Child's insurance annuity. Every child of an employee who will have died completely or partially insured shall be entitled, for so long as such child lives and meets the qualifications set forth in paragraph (1) of subsection (1), to an annuity for each month equal to two-thirds of the employee's basic amount. (60 Stat. 729, as amended; 45 U. S. C. 228e)

Parent's insurance annuity. Each parent, sixty years of age or over, of a completely insured employee, who will have died leaving no widow, no widower, and no child, shall be entitled, for life, or, if such parent remarries after the employee's death, then until such remarriage, to an annuity for each month equal to two-thirds of the employee's basic amount. (60 Stat. 729, as amended, 45 U. S. C. 228e)

When there is more than one employee with respect to whose death a parent or child is entitled to an annuity for a month, such annuity shall be two-thirds of whichever employee's basic amount is greatest. (60 Stat. 729, as amended; 45 U. S. C. 228e)

Correlation of payments. (1) An individual, entitled on applying therefor to receive for a month before January 1, 1947, an insurance benefit under the Social Security Act on the basis of an employee's wages, which benefit is greater in amount than would be an annuity for such individual under this section with respect to the death of such employee, shall not be entitled to such annuity. An individual, entitled on applying therefor to any annuity or lump sum under this section with respect to the death of an employee, shall not be entitled to a lump-sum death payment or, for a month beginning on or after January 1, 1947, to any insurance benefits under the Social Security Act on the basis of the wages of the same employee.

(2) If an individual is entitled to more than one annuity for a month under this section, such individual shall be entitled only to that one of such annuities for a month which is equal to or exceeds any other such annuity. If an individual is entitled to an annuity for a month under this section and is entitled, or would be so entitled on proper application therefor, for such month to an insurance benefit under section 202 of the Social Security Act, the annuity of such individual for such month under this section shall be only in the amount by which it exceeds such insurance benefit.

(3) In the case of any individual receiving or entitled to receive an annuity under this section on the day prior to the date of enactment of the provisions of this paragraph, the application of paragraph (2) of this subsection to such individual shall not operate to reduce the sum of (A) the annuity under this section of such individual, (B) the retirement annuity, if any, of such individual, and (C) the benefits under the Social Security Act which such individual receives or is entitled to receive, to an amount less than such sum was before the enactment of the provisions of this paragraph. (60 Stat. 730; 45 U. S. C. 228e)

When annuities begin and end. No individual shall be entitled to receive an annuity under this section for any month before January 1, 1947. An application for any payment under this section shall be made and filed in such manner and form as the Board prescribes. An annuity under this section for an individual otherwise entitled thereto shall begin with the month in which eligibility therefor was otherwise acquired, but not earlier than the first day of the twelfth month before the month in which the application was filed. No application for an annuity under this section filed prior to three months before the first month for which the applicant becomes otherwise

entitled to receive such annuity shall be accepted. No annuity shall be payable for the month in which the recipient thereof ceases to be qualified therefor. (60 Stat. 732; 45 U. S. C. 228e)

§ 237.404 *Only one insurance annuity to an individual.* If an individual is entitled to more than one kind of insurance annuity for a month, he shall be entitled to only one of such annuities. The amount of the annuity to which such individual is entitled shall not be less than any other insurance annuity to which he would be entitled except for this section.

§ 237.405 *Where individual is entitled to an insurance benefit.* (a) If an individual is entitled to an insurance annuity and is or upon application would be entitled to an insurance benefit under the Social Security Act for the same month or months, such insurance annuity shall be only in the amount, if any, by which it exceeds such insurance benefit.

(b) Where an individual was receiving or entitled to receive on October 29, 1951, an insurance annuity, retirement annuity, if any, and insurance benefit, paragraph (a) of this section shall not operate to reduce the sum of such annuities and benefit to an amount less than such sum was before October 30, 1951. For this purpose, a survivor is considered "entitled to receive" an insurance annuity, retirement annuity, or insurance benefit on October 29, 1951, if (1) an actual payment thereof is made for that day or month, or would be made except for the work restriction or other circumstances requiring a temporary suspension of payments, and (2) an application therefor was filed before October 30, 1951.

§ 237.406 *Widow's insurance annuity*—(a) *Conditions of entitlement.* Subject to the provisions of § 237.411, an individual is entitled to a widow's insurance annuity if she:

(1) Is the widow, as defined in § 237.303, of an employee who, at the time of his death, was completely insured; and

(2) Was not entitled, and would not have been entitled even if she had applied therefor, to receive, for a month before January 1, 1947, an insurance benefit under the Social Security Act based on the deceased employee's wages and in an amount greater than the widow's insurance annuity would be; and

(3) Has attained the age of 60; and

(4) Has not remarried.

(b) *Duration of annuity.* Subject to the provisions of § 237.411, an individual is entitled to a widow's insurance annuity for each month beginning with the first month after December 1946 in which all of the conditions of entitlement are satisfied. The last month for which she is entitled to such annuity is the month immediately preceding the first month in which either of the following events occurs:

(1) She remarries; or

(2) She dies.

(c) *Rate of annuity.* A widow's insurance annuity for a month is equal to the basic amount of the deceased employee, except that if in the month preceding the employee's death she was entitled to a spouse's annuity which, before any increase under § 225.6 of this chapter, was in an amount greater than her insurance annuity, her insurance annuity shall be increased to such greater amount. The rate shall be adjusted as provided in §§ 237.205 and 237.404 and Subpart F of this part.

§ 237.407 *Widower's insurance annuity*—(a) *Conditions of entitlement.* Subject to the provisions of § 237.411, an individual is entitled to a widower's insurance annuity if he:

(1) Is the widower, as defined in § 237.304, of an employee who, at the time of her death, was completely insured; and

(2) Has attained the age of 60; and

(3) Has not remarried.

(b) *Duration of annuity.* Subject to the provisions of § 237.411, an individual is entitled to a widower's insurance annuity for each month beginning with the first month after October 1951 in which all of the conditions of entitlement are satisfied. The last month for which he is entitled to such annuity is the month immediately preceding the first month in which either of the following events occurs:

(1) He remarries; or

(2) He dies.

(c) *Rate of annuity.* A widower's insurance annuity for a month is equal to the basic amount of the deceased employee, except that if in the month preceding the employee's death he was entitled to a spouse's annuity which, before any increase under § 225.6 of this chapter, was in an amount greater than his insurance annuity, his insurance annuity shall be increased to such greater amount. The rate shall be adjusted as provided in §§ 237.205 and 237.404 and Subpart F of this part.

§ 237.408 *Widow's current insurance annuity*—(a) *Conditions of entitlement.* Subject to the provisions of § 237.411, an individual is entitled to a widow's current insurance annuity if she:

(1) Is the widow, as defined in § 237.303, of an employee who, at the time of his death, was completely insured or partially insured; and

(2) Was not entitled, and would not have been entitled even if she had applied therefor, to receive, for a month before January 1, 1947, an insurance benefit under the Social Security Act based on the deceased employee's wages and in an amount greater than the widow's current insurance annuity would be; and

(3) Has not remarried; and

(4) Is not entitled to a widow's insurance annuity; and

(5) Has in her care, at the time of filing her application, a child of her deceased husband entitled to receive a child's insurance annuity.

(b) *Duration of annuity.* Subject to the provisions of § 237.411, an individual is entitled to a widow's current insurance annuity for each month beginning with the first month after December 1946 in which all of the conditions of entitlement are satisfied. The last month for which she is entitled to such annuity is the month immediately preceding the first month in which any of the following events occurs:

(1) No child or her deceased husband is entitled to a child's insurance annuity; or

(2) She becomes entitled to a widow's insurance annuity; or

(3) She remarries; or

(4) She dies.

(c) *Rate of annuity.* A widow's current insurance annuity for a month is equal to the basic amount of the deceased employee, except that if in the month preceding the employee's death she was entitled to a spouse's annuity which, before any increase under § 225.6 of this chapter, was in an amount greater than her insurance annuity, her insurance annuity shall be increased to such greater amount. The rate shall be adjusted as provided in §§ 237.205 and 237.404 and Subpart F of this part.

(d) *Meaning of "in her care."* A widow has a child "in her care" within the meaning of paragraph (a) (5) of this section if she takes parental responsibility for the welfare and care of such child, even though she does not live in the same home with the child.

§ 237.409 *Child's insurance annuity*—(a) *Conditions of entitlement.* Subject to the provisions of § 237.411, an individual is entitled to a child's insurance annuity if he:

(1) Is a child, as defined in § 237.306, of an employee who, at the time of his death, was completely insured or partially insured; and

(2) Was not entitled, and would not have been entitled even if he had applied therefor, to receive, for a month before January 1, 1947, an insurance benefit under the Social Security Act based on the deceased employee's wages and in an amount greater than the child's insurance annuity would be.

(b) *Duration of annuity.* Subject to the provisions of § 237.411, an individual is entitled to a child's insurance annuity for each month beginning with the first month after December 1946 in which all of the conditions of entitlement are satisfied. If the child is born after the death of the employee on whose insured status the child's insurance annuity is based, the first for which the child may be entitled to such an annuity is the month in which such child is born. The last month for which an individual is entitled to a child's insurance annuity is the month immediately preceding the first month in which any of the following events occur:

(1) He marries; or

(2) He is adopted by other than a stepparent, grandparent, aunt, or uncle; or

(3) He attains age 18, unless he shall have a permanent physical or mental condition which is such that he is unable to engage in any regular employment and which condition began before he became age 18; or

(4) He dies.

(c) *Rate of annuity.* A child's insurance annuity for a month is equal to two-thirds of the basic amount of the deceased employee. If the child is entitled to a child's insurance annuity with respect to more than one deceased employee, his child's insurance annuity shall be two-thirds of the basic amount of whichever employee's basic amount is greatest. The rate shall be adjusted in accordance with §§ 237.205 and 237.404 and Subpart F of this part.

§ 237.410 *Parent's insurance annuity*—(a) *Conditions of entitlement.* Subject to the provisions of § 237.411, an individual is entitled to a parent's insurance annuity if such individual:

(1) Is the parent, as defined in § 237.308, of an employee who, at the time of his death, was completely insured and was not survived by a widow, a widower, or a child as defined in §§ 237.303, 237.304, 237.306, respectively; and

(2) Was not entitled, and would not have been entitled even if he had applied therefor, to receive, for a month before January 1, 1947, an insurance benefit under the Social Security Act based on the deceased employee's wages and in an amount greater than the parent's insurance annuity would be; and

(3) Has attained the age of 60; and

(4) Has not remarried since the death of the deceased employee.

Each parent of a deceased employee who had a completely insured status may become entitled to insurance annuities under this section.

(b) *Duration of annuity.* Subject to the provisions of § 237.411, an individual is entitled to a parent's insurance annuity for each month beginning with the first month after December 1946 in which all of the conditions of entitlement are satisfied. The last month for which such individual is entitled to such annuity is the month immediately preceding the first month in which either of the following events occurs:

(1) He remarries; or

(2) He dies.

(c) *Rate of annuity.* A parent's insurance annuity for a month is equal to two-thirds of the basic amount of the deceased employee. If the parent is entitled to a parent's insurance annuity with respect to more than one deceased employee, his parent's insurance annuity shall be two-thirds of whichever employee's basic amount is greatest. The rate shall be adjusted in accordance with §§ 237.205 and 237.404 and Subpart F of this part.

§ 237.411 *Beginning and ending of insurance annuities*—(a) *Beginning.* An insurance annuity under this subpart shall begin with the first month after December 1946, or in the case of a widower's insurance annuity with the first month after October 1951, with respect to which all of the conditions of entitlement for such annuity, as set out in the preceding sections of this subpart, are satisfied, if the individual shall have filed an application for such annuity, as prescribed in Subpart H of this part:

(1) In such month; or

(2) In the 3 months immediately preceding such month; or

(3) In the 12 months immedately succeeding such month.

Otherwise, such annuity shall begin with the month after December 1946, or after October 1951 in the case of a widower's insurance annuity, in which the individual files an application therefor, as prescribed in Subpart H of this part, and with respect to which month all the conditions of entitlement for such annuity, as set out in the preceding sections of this subpart, are satisfied.

(b) *Ending.* No insurance annuity under this subpart shall be payable for the month in which the conditions of entitlement for such annuity, as set out in the preceding sections of this subpart, cease to be satisfied.

SUBPART E—LUMP-SUM DEATH PAYMENTS

§ 237.501 *Statutory provisions.*

Lump-sum payment. Upon the death, on or after January 1, 1947, of a completely or partially insured employee who will have died leaving no widow, widower, child, or parent who would on proper application therefor be entitled to receive an annuity under this section for the month in which such death occurred, there shall be paid a lump sum of ten times the employee's basic amount to the following person (or if more than one there shall be distributed among them) whose relationship to the deceased employee will have been determind by the Board, and who will have been living on the date of such determination: to the widow or widower of the deceased; or, if no such widow or widower be then living, to any child or children of the deceased and to any other person or persons who, under the intestacy law of the State where the deceased will have been domiciled, will have been entitled to share as distributees with such children of the deceased, in such proportions as is provided by such law; or, if no widow or widower and no such child and no such other person be then living, to the parent or parents of the deceased, in equal shares. A person who is entitled to share as distributed with an above-named relative of the deceased shall not be precluded from receiving a payment under this paragraph by reason of the fact that no such named relative will have survived the deceased or of the fact that no such named relative of the deceased will have been living on the date of such determination. If none of the persons described in this paragraph be living on the date of such determination such amount shall be paid to any person or persons, equitably entitled thereto, to the extent and in the proportions that he or they shall have paid the expenses of burial of the deceased. If a lump sum would be payable to a widow, widower, child, or parent under this paragraph except for the fact that a survivor will have been entitled to receive an annuity for the month in which the employee will have died, but within one year after the employee's death there will not have accrued to survivors of the employee, by reason of his death annuities which, after all deductions pursuant to paragraph (1) of subsection (1) will have been made, are equal to such lump, a payment to any then surviving widow, widower, children, or parents shall nevertheless be made under this paragraph equal to the amount by which such lump sum exceeds such annuities so accrued after such deductions. No payment shall be made to any person under this paragraph, unless application therefor shall have been filed, by or on behalf of any such person (whether or not legally competent), prior to the expiration of two years after the date of death of the deceased employee, except that if the deceased employee is a person to whom section 2 of the Act of March 7, 1942 (56 Stat. 143, 144), is applicable such two years shall run from the date on which the deceased employee, pursuant to said Act, is determined to be dead, and for all other purposes of this section such employee, so long as it does not appear that he is in fact alive, shall be deemed to have died on the date determined pursuant to said Act to be the date or presumptive date of death. (60 Stat. 312, as amended; 45 U. S. C. 228e)

§ 237.502 *Lump-sum death payments*—(a) *Conditions of payment.* • • •

(2) Such deceased employee was not survived by a widow, widower, child, or parent (see § 237.504 (a)), who, upon application therefor, would be entitled to receive a widow's insurance annuity, a widower's insurance annuity, a widow's current insurance annuity, a child's insurance annuity, or a parent's insurance annuity, upon the basis of the insured status of such employee, for the month in which such employee died; and

• • • • •

(c) *Amount of payment.* The lump sum to which a widow, widower, child (or distributee with a child), or parent, is entitled under paragraph (b) of this section is an amount equal to ten times the basic amount of the deceased employee. Where there is more than one child or person entitled to share as distributee with a child, the lump sum shall be divided among them in the proportions provided by the intestacy laws of the state where the deceased employee was domiciled. Where there is more than one parent the lump sum shall be divided equally between such parents.

Where an applicant (other than a person named in paragraph (b) (1) of this section) is equitably entitled to a lump sum under paragraph (b) (2) of this section, the amount payable to him will be determined as follows:

(1) If no person other than such applicant is, or becomes, equitably entitled under paragraph (b) (2) of this section, the amount payable will be an amount equal to the amount of burial expenses paid by the applicant, or ten times the basic amount of the deceased, whichever is less.

(2) If two or more persons are, or become, equitably entitled under paragraph (b) (2) of this section, the amount payable to any such applicant is an amount equal to that proportion of ten times the basic amount of the deceased which the amount of burial expenses paid by such applicant bears to the total amount of burial expenses paid by all persons equitably entitled, but in no event shall the amount paid to such applicant exceed the amount of burial expenses paid by him.

§ 237.503 *Payment when lump sum exceeds insurance annuities accrued*—(a) *Conditions of payment.* • • •

(1) A lump sum would have been payable to a widow, widower, child, or parent (see § 237.504 (b)) under § 237.502, except for the fact that a survivor was entitled to receive an insurance annuity for the month in which the employee died (see § 237.502 (a) (2)); and

• • • • •

(b) *Persons entitled to receive payment.* The payment provided for in this section shall be made to the widow, widower, children, or parents of the deceased employee surviving at the expiration of 1 year after the employee's death.

• • • • •

§ 237.504 *Meaning of terms.* (a) The terms "widow," "widower," "child," and "parent" as they first appear in section 5 (f) of the act (see § 237.502 (a) (2)), are used as defined in §§ 237.303, 237.304, 237.306, and 237.308, respectively.

• • • • •

SUBPART F—MAXIMUM AND MINIMUM INSURANCE ANNUITY TOTALS

§ 237.601 *Statutory provisions.*

Maximum and minimum annuity totals. Whenever according to the provisions of this section as to annuities, payable for a month with respect to the death of an employee, the total of annuities is more than $30 and exceeds either (a) $160, or (b) an amount equal to two and two-thirds times such employee's basic amount, whichever of such amounts is the lesser, such total of annuities shall, prior to any deductions under subsection (i), be reduced to such lesser amount or to $30, whichever is greater. Whenever such total of annuities is less than $14, such total shall, prior to any deductions under subsection (i), be increased to $14. (60 Stat. 731, as amended; 45 U. S. C. 228e)

In the case of an individual having a current connection with the railroad industry, • • • if for any entire month • • • the total of survivor annuities under this Act deriving from the same employee, is less than the amount, or the additional amount, which would have been payable to all persons for such month under the Social Security Act (deeming completely and partially insured individuals to be fully and currently insured, respectively, individuals entitled to insurance annuities under subsections (a) and (d) of section 5 to have attained age sixty-five, and individuals entitled to insurance annuities under subsection (c) of section 5 on the basis of disability to be less than eighteen years of age, and disregarding any possible deductions under subsections (f) and (g) (2) of section 203 of the Social Security Act) if such employee's service as an employee after December 31, 1936, were included in the term "employment" as defined in that Act and quarters of coverage were determined in accordance with section 5 (i) (4) of this Act, such annuity or annuities, shall be increased proportionately to a total of such amount or such additional amount. (Section 3 (e), 50 Stat. 311, as amended; 45 U. S. C. 228c)

§ 237.603 *Reduction*—(a) *Conditions requiring reduction.* Reductions are made only when there are two or more insurance annuities for a month based upon the insured status of a deceased employee, and when the total amount of such annuities for such month, as calculated under Subpart D of this part, is more than $30 and exceeds either (1) $160, or (2) an amount equal to two and two-thirds times the basic amount of the employee.

(b) *Amount of reduction.* If the conditions described in paragraph (a) of this section exist, each of the insurance annuities must be proportionately reduced so that the total of the insurance annuities will be whichever is the least of the amounts stated in paragraph (a) (1) and (2) of this section. If, however, such least amount is under $30, the total is reduced only to $30.

§ 237.604 *Increase*—(a) *Conditions requiring increase.* An increase is made when the insurance annuity or total of insurance annuities for a month calculated under Subpart D of this part on the basis of the insured status of a deceased employee is less than $14.

(b) *Amount of increase.* If the condition described in paragraph (a) of this section exists, the insurance annuity or total of insurance annuities is increased to $14.

§ 237.607 *Over-all minimum based on the Social Security Act formula.* (a) When the total amount of insurance annuities payable for an entire month, based on the insured status of a deceased individual, is less than the total amount of insurance benefits which would be payable for that month under the Social Security Act if the individual's service as an employee after 1936 were included with "employment" as defined in the Social Security Act, the amount of such insurance annuities shall be increased proportionately to the total of such greater amount.

(b) In making determinations under this section, (1) quarters of coverage shall be determined in accordance with section 5 (1) (4) of the Railroad Retirement Act (see § 237.101); (2) completely an partially insured individuals shall be deemed to be fully and currently insured, respectively, under the Social Security Act; (3) an individual who has attained the age of 60 but not the age of 65 and is entitled to a widow's, widower's or parent's insurance annuity shall be deemed to have attained the age of 65; (4) an individual entitled to a child's insurance annuity when 18 years of age or over shall be deemed to be less than 18 years of age; and (5) the amount of any deduction which would be applied under subsections (f) and (g) (2) of section 203 of the Social Security Act for failure to report an event which would cause a deduction under that act shall be disregarded.

SUBPART G—DEDUCTIONS

§ 237.701 *Statutory provisions.*

Deductions from annuities. (1) Deductions shall be made from any payments under this section to which an individual is entitled, until the total of such deductions equals such individual's annuity or annuities under this section for any month in which such individual—

(i) Will have rendered compensated service within or without the United States to an employer;

(ii) Will have been under the age of seventy-two and for which month he is charged with any earnings under section 203 (e) of the Social Security Act or in which month he engaged on seven or more different calendar days in noncovered remunerative activity outside the United States (as defined in section 203 (k) of the Social Security Act); and for purposes of this subdivision the Board shall have the authority to make such determinations and such suspensions of payment of benefits in the manner and to the extent that the Secretary of Health, Education, and Welfare would be authorized to do so under section 203 (g) (3) of the Social Security Act if the individuals to whom this subdivision applies were entitled to benefits under section 202 of such Act; or

(iii) if a widow otherwise entitled to an annuity under subsection (b) will not have had in her care a child of the deceased employee entitled to receive an annuity under subsection (c);

(2) The total of deductions for all events described in paragraph (1) occurring in the same month shall be limited to the amount of such individual's annuity or annuities for that month. Such individual (or anyone in receipt of an annuity in his behalf) shall report to the Board the occurrence of any event described in paragraph (1).

(3) Deductions shall also be made from any payments under this section with respect to the death of an employee until such deductions total—

(i) any death benefit, paid with respect to the death of such employee, under sections 5 of the Retirement Acts (other than a survivor annuity pursuant to an election);

(ii) any lump sum paid, with respect to the death of such employee, under title II of the Social Security Act, or under section 203 of the Social Security Act in force prior to the date of the Social Security Act Amendments of 1939;

(iii) any lump sum paid to such employee under section 204 of the Social Security Act in force prior to the date of the enactment of the Social Security Act Amendments of 1939, provided such lump sum will not previously have been deducted from any insurance benefit paid under the Social Security Act; and

(iv) an amount equal to 1 per centum of any wages paid to such employee for services performed in 1939, and subsequent to his attaining age sixty-five, with respect to which the taxes imposed by section 1400 of the Internal Revenue Code will not have been deducted by his employer from his wages or paid by such employer, provided such amount will not previously have been deducted from any insurance benefit paid under the Social Security Act.

(4) The deductions provided in this subsection shall be made in such amounts and at such time or times as the Board shall determine. Decreases or increases in the total of annuities payable for a month with respect to the death of an employee shall be equally apportioned among all annuities in such total. • • •

(60 Stat. 731; 45 U. S. C. 228e)

§ 237.702 *Deductions because an individual works or a widow fails to have a child in her care.* Section 5 (i) (1) of the act provides for deductions from an individual's insurance annuity or annuities upon the occurrence of certain events, which are enumerated in paragraphs (a), (b), and (c) of this section.

(a) *Employer service.* Deductions are to be made from any annuity or annuities payable to an individual under this part for any month in which such individual renders compensated service (see Parts 220 and 222 of this chapter) within or without the United States to an "employer" (see Part 202 of this chapter). The amount to be deducted is equal to the amount of such individual's insurance annuity or annuities for the month in which the compensated service was rendered.

(b) *Work other than employer service*—(1) *When deductions imposed.* Deductions are to be made from any annuity or annuities payable to an individual under this part for any month:

(i) After October 1951 and prior to September 1952, in which such individual renders services for wages, as defined in section 209 of the Social Security Act, of not less than $50; or

(ii) After August 1952 and prior to the first month of the individual's first taxable year beginning after 1954, in which such individual renders services for wages, as defined in section 209 of the Social Security Act, of more than $75; or

(iii) In which such individual is charged, in accordance with the provisions of subparagraph (3) of this paragraph, with net earnings from self-employment of more than $50 or $75, as the case may be; or

(iv) In which such individual is charged, in accordance with the provisions of subparagraph (3) of this paragraph, with earnings; or

(v) After December 1954, in which such individual is under age 72 and on seven or more different calendar days in which he is engaged in noncovered remunerative activity outside the United States (see subparagraph (7) of this paragraph).

For the purposes of determining whether under subdivision (i) or (ii) of this subparagraph an individual has rendered services for wages of not less than $50 or more than $75, whichever is applicable, the provisions of section 209 of the Social Security Act which, for other purposes, limits the wages in a calendar year prior to 1951 to $3,000, after 1950 and prior to 1955 to $3,600, and after 1954 to $4,200, do not apply.

(2) *Amount of deductions.* The amount to be deducted shall be equal to the annuity or total of annuities payable to the individual in the month in which the event specified in any of the subdivisions of subparagraph (1) of this paragraph occurred.

(3) *Charging of earnings and net earnings from self-employment.* Prior to the amendment of section 5 (i) (1) (ii) of the Railroad Retirement Act by section 401 (d) of Public Law 761, 83d Congress, an individual was charged only on the basis of his "net earnings from self-employment" as that term is defined in section 211 (a) of the Social Security Act. Enactment of such amendment eliminated such charging and provided for charging on the basis of his "earnings" which term is defined in subparagraph (6) of this paragraph.

Subdivisions (i), (ii), and (iii) of this subparagraph provide the method by which an individual will be charged with either earnings or net earnings from self-employment, as the case may be.

(i) *For taxable years ending prior to September 1952.* The following rules will apply in determining the amount of an individual's net earnings from self-employment that are to be charged to a particular month for purposes of deductions under this section with respect to taxable years ending prior to September 1952:

(*a*) If the individual's net earnings from self-employment for the taxable year are not more than $50 times the number of months in such taxable year, each month in such year shall be charged with $50 or less; or

(*b*) If his net earnings from self-employment exceed that amount, each month of such year is first charged with $50. The first $50 of the excess (or the whole of the excess if it is less than $50) is charged to the latest month of the taxable year. The next $50 of the excess, if any (or the whole of the excess if it is less than $50), is charged to the next preceding month and so forth until all of the excess is charged or every month to which a portion of the excess is chargeable has been charged with a part of such excess.

(ii) *For taxable years ending after August 1952 and prior to the beginning of the individual's first taxable year after 1954.* The rules for charging net earnings from self-employment appearing in subdivision (i) of this subparagraph shall apply with respect to taxable years ending after August 1952 and prior to the beginning of the first taxable year after 1954, except that such charging shall be on the basis of $75 per month rather than $50 per month. Where an individual's taxable year ends in 1955 (other than the taxable year ending on December 31, 1955) and he has net earnings from self-employment by reason of section 101 (g) (1), (2), or (4) or section 101 (d) of the Social Security Amendments of 1954, his net earnings from self-employment for his taxable year ending in 1955 shall be credited equally to the last quarter of such taxable year and the three preceding quarters. Only that amount of net earnings from self-employment credited to quarters after 1954 shall be chargeable under this subdivision, but in no event will such net earnings from self-employment be charged to months prior to 1955.

(iii) *For taxable years beginning after 1954.* With respect to taxable years beginning after 1954 and for purposes of deductions under this section an individual will be charged only on the basis of his earnings and then only if such earnings in his taxable year exceed $100 times the number of months in such year. Where there is such an excess, the first $80 of such excess (or the whole of the excess if it is less than $80) is charged to the latest month in the taxable year. The next $80 of the excess, if any (or the whole of the excess if it is less than $80), is charged to the next preceding month and so forth until all of the excess is charged or every month to which a portion of the excess is chargeable has been charged with a part of such excess.

(4) *Months to which earnings and net earnings from self-employment cannot be charged*—(i) *Net earnings from self-employment.* Notwithstanding the provisions of subparagraph (3) of this paragraph, net earnings from self-employment in excess of $50 times the number of months in the taxable year, if such taxable year ended prior to September 1952, or $75 times the number of months in the taxable year, if such taxable year ended after August 1952 and prior to the individual's first taxable year beginning after 1954 shall not be charged to any month:

(*a*) In which the individual was not entitled to an annuity;

(*b*) In which the individual performed employer service for which he suffered deductions under paragraph (a) of this section;

(*c*) In which the individual performed services for wages for which he suffered deductions under subparagraph (1) of this paragraph;

(*d*) In which the individual is a widow who suffered a deduction because of the occurrence of the event specified in paragraph (c) of this section;

(*e*) In which the individual was 72 years of age or over with respect to months after 1954; or

(*f*) In which the individual did not engage in self-employment.

(ii) *Earnings.* Notwithstanding the provisions of subparagraph (3) of this paragraph, earnings in excess of $100 times the number of months in the individual's taxable year beginning after 1954 shall not be charged to any month:

(*a*) In which the individual was not entitled to an annuity;

(*b*) In which the individual performed employer service for which he suffered a deduction under subparagraph (a) of this section;

(*c*) In which the individual was engaged in noncovered remunerative activity outside the United States for which he suffered a deduction under subparagraph (1) of this paragraph;

(*d*) In which the individual is a widow who suffered a deduction because of the occurrence of the event specified in paragraph (c) of this section;

(*e*) In which the individual was 72 years of age or over; or

(*f*) In which the individual did not engage in self-employment and did not render services for wages, as defined in subparagraph (6) (ii) of this paragraph, of more than $80.

An individual shall be deemed to have engaged in self-employment in any month if in such month he renders substantial services, as defined in subparagraph (5) of this paragraph, in operating a trade or business as owner or partner, even though there may be no earnings or net earnings from self-employment attributable to his services for such month. For purposes of subdivision (ii) (*f*) of this subparagraph, an individual will be presumed with respect to any month to have rendered services for wages, as defined in subparagraph (6) (ii) of this paragraph, of more than $80 until it is shown to the satisfaction of the Board that such individual did not render services in such month for more than such amount.

(5) *Definition of "substantial services."* For the purposes of subparagraph (4) of this paragraph, an individual is presumed to have rendered substantial services in each month in his taxable year. However, he may submit evidence to establish that in any month in such taxable year he did not render substantial services with respect to any trade or business the net income or loss of which is includible in computing his net earnings from self-employment for any taxable year if such taxable year ends prior to his first taxable year beginning after 1954, or in computing his earnings (but without regard to subparagraph (6) (ii) of this paragraph) for any taxable year if such taxable year begins after 1954. In determining whether an individual has rendered such substantial services in a month, the particular facts in his case will be examined. The following factors, among others, will be considered in making the determination:

(i) The amount of time devoted to the trade or business;

(ii) The amount of capital invested in the trade or business;

(iii) The nature of the services rendered by the individual;

(iv) The seasonal nature of the trade or business;

(v) The presence or absence of a paid manager, a partner, or a family member who manages the business; and

(vi) The type of business establishment that is involved.

(6) *Definition of earnings.* When the term "earnings" is used in this paragraph and not as a part of the phrase "net earnings from self-employment," it shall mean an individual's earnings with respect to a taxable year beginning after 1954 and includes the sum of his wages, as defined in subdivision (ii) of this subparagraph, for services rendered in such year and his net earnings from self-employment, as defined in subdivision (i) of this subparagraph, for such year minus any net loss from self-employment, as defined in subdivision (i) of this subparagraph, for such year.

(i) *Net earnings from self-employment and net loss from self-employment.* An individual's net earnings from self-employment and his net loss from self-employment for the purposes of this subparagraph and subparagraph (5), shall be determined under the provisions of section 211 of the Social Security Act (but without regard to the provisions in paragraphs (1), (4), and (5) of subsections (c) of such section); any excess of income over deductions so resulting from such computation shall be his net earnings from self-employment and any excess of deductions over income so resulting shall be his net loss from self-employment.

(ii) *Wages.* For purposes of this subparagraph, and subparagraph (4) (ii) of this paragraph, an individual's wages shall be determined under section 209 of the Social Security Act (but without regard to the limitations as to amounts of remuneration specified in subsections (a), (g) (2), (g) (3), (h) (2) and (j) of such section); and in making such computation, services which do not constitute "employment" as that term is defined in section 210 of the Social Security Act performed within the United States by an individual as an employee shall be deemed to be employment as so defined if the remuneration for such services is not includible in computing his net earnings from self-employment or net loss from self-employment, as defined in subdivision (i) of this subparagraph.

(iii) *Presumptions concerning wages.* For purposes of this subparagraph, wages, as determined under subdivision (ii) of this subparagraph, which according to reports received by the Board are paid to an individual during a taxable year shall be presumed to have been paid to him for services rendered in such year until it is shown to the satisfaction of the Board that they were paid for services rendered in another taxable year. If such reports with respect to an individual show his wages for a calendar year, such individual's taxable year shall be presumed to be a calendar year for purposes of this section until it is shown to the satisfaction of the Board that his taxable year is not a calendar year.

(7) *Definition of noncovered remunerative activity outside the United States.* An individual shall be considered to be engaged in noncovered remunerative activity outside the United States if he performs services outside the United States as an employee and such services do not constitute "employment" as that term is defined in section 210 of the Social Security Act, or if he carries on a trade or business outside the United States (other than the performance of his services as an employee) the net income or loss of which is not includible in computing his net earnings from self-employment, as defined in section 211 (a) of the Social Security Act, for a taxable year and would not be excluded from net earnings from self-employment, if carried on in the United States by any of the numbered paragraphs of such section 211 (a). When used in the preceding sentence with respect to a trade or business (other than the performance of services as an employee) the term "United States" does not include Puerto Rico or the Virgin Islands in the case of an alien who is not a resident of the United States (including Puerto Rico and the Virgin Islands); and the term "trade or business" shall have the same meaning as when used in section 162 of the Internal Revenue Code of 1954.

(c) *Failure of widow to have a child in her care.* (1) Deductions are to be made from any annuity or anuities payable to a widow under this part for any month in which such widow does not have in her care a child of her deceased husband entitled to a child's insurance annuity for such month. The amount to be deducted is equal to the amount of the widow's curent insurance annuity to which she was entitled for the month in which she did not have such a child in her care.

(2) The fact that a child's insurance annuity for a particular month is withheld to effect a deduction under any of the other paragraphs of this section, or under § 237.703, or an adjustment under Part 255 of this chapter, does not affect the right of a widow, who has the child in her care, to a widow's current insurance annuity, since the child is nevertheless "entitled" to a child's insurance annuity.

(d) *Manner of making deductions.* (1) Deductions as provided for in this section are made by withholding insurance annuities in whole or in part, depending upon the amount to be deducted. If the amount to be deducted is not withheld from the insurance annuity or annuities for the month in which the event occurred which occasioned the deduction (if, for example, the occurrence has not been brought to the attention of the Board), such amount will be withheld from the insurance annuity or annuities for one or more subsequent months. The total amount to be deducted may, therefore, at the time of withholding, be greater or less than any insurance annuity or annuities for a month from which such amount is to be withheld.

(2) When it is determined that a deduction is required under paragraph (a), (b), or (c) of this section, no insurance annuity to which the individual in question is entitled for any month will be paid until a total amount equal to the amount to be deducted has been withheld. If the amount of the required deduction is less than any such insurance annuity, or the total of such insurance annuities, for a month, the amount to be deducted will be withheld from such insurance annuity or annuities.

(e) *Deductions where more than one deduction event in a month occurs.* Section 5 (i) (2) of the act prevents duplication of deductions described in paragraphs (a), (b) and (c) of this section, by reason of the occurrence of more than one of the events enumerated in such paragraphs in a particular month. If more than one such event occurs in a month, the total amount of the deduction is the same as if only one such event had occurred. Section 5 (i) (2) of the act has no application to any other deductions or adjustments under the act (see paragraph (h) of this section).

(f) *Total amount to be deducted.* If, however, any of the events occasioning the deduction under paragraphs (a), (b), or (c) of this section occurs in more than one month, the total amount to be deducted is equal to the sum of the deductions for all months in which any such event occurred. With respect to net earnings from self-employment under paragraph (b) (1) (iii) of this section and earnings under paragraph (b) (1) (iv) of this section, a deduction event is deemed to have occurred in any month to which any excess of net earnings from self-employment or earnings, as the case may be, is charged (see paragraph (b) (3) of this section).

(g) *Relation to maximum and minimum insurance annuity totals.* In effecting a deduction, no amount can be considered as having been withheld from an insurance annuity for a particular month which is in excess of the amount of such insurance annuity as reduced or increased (if required) under section 5 (h) of the act (see Subpart F of this part). Likewise, the amount of an insurance annuity by which a deduction is measured (i. e., an insurance annuity for the month in which the event occasioning the deduction occurred) is the amount of such insurance annuity as so reduced or increased.

(h) *Relation to other provisions for deductions and adjustments.* A deduction required under section 5 (i) (1) of the act is made prior to and in addition to any deductions under section 5 (i) (3) of the act (see § 237.703), and prior to and in addition to any adjustments under Part 255 of this chapter.

(i) *Reports to the Board of certain events occasioning deductions.* Section 5 (i) (2) of the act imposes upon an individual the obligation to report to the Board the occurrence of any of the events enumerated in paragraph (a), (b), or (c) of this section if such individual is in receipt of an insurance annuity or annuities (on his own behalf or on behalf of another) from which a deduction is to be made under such paragraphs.

SUBPART H—APPLICATION FOR INSURANCE ANNUITIES AND LUMP SUMS FOR SURVIVORS

§ 237.801 *Statutory provisions.* (See section 5 (j) of the act, quoted in §237.401, and the last sentence of section 5 (f) (1) of the act, quoted in § 237.501.)

§ 237.806 *Filing of application—(a) With Social Security Administration.* The claim or application of an individual, filed with the Social Security Administration on or after October 1, 1946, for an insurance benefit or a lump-sum death payment under subsection (c), (d), (e), (f), or (g) of section 202 of Title II of the Social Security Act, as amended August 10, 1946, based upon the death of an individual who has had service covered under the Railroad Retirement Act, as amended July 31, 1946, shall be deemed to be an application for the corresponding survivor benefit under subsection (a), (b), (c), (d), or (f) of section 5 of the Railroad Retirement Act, and shall be deemed filed with the Railroad Retirement Board on the date as of which the Social Security Administration certifies that such application is deemed filed with that agency.

(b) *At foreign service office.* Applications or written requests from individuals outside the United States will be given effect as of the time they are received in a United States foreign service office. The time of filing will be shown by a date-stamp or similar evidence of receipt in the foreign service office. If the claims material is not sent via a foreign service office, the date received by the Railroad Retirement Board will be the filing date.

§ 237.808 *Application by individual who was in receipt of a spouse's annuity or a widow's current insurance annuity.* The widow or widower of an employee shall be deemed to have filed an acceptable application for an annuity under §§ 237.406, 237.407, or 237.408, as the case may be, in accordance with §§ 237.802, 237.803, and 237.805, in the month in which the employee died, or, in the case of a widow in receipt of an annuity under § 237.408, in the month in which such widow attained age 60, if for the month next preceding such month the widow or widower will have been, on the basis of the employee's employment, in receipt of an annuity under Part 232 of this chapter or § 237.408 (disregarding the application of § 232.402 of this chapter or § 237.702): *Provided, however,* That the annuity shall not continue to be paid to the widow or widower for more than 6 months by reason of this section and her or his receipt of a spouse's annuity for the month preceding the employee's death.

SUBPART I—MISCELLANEOUS

§ 237.901 *Statutory provisions.* (See last sentence of section 5 (f) (1) of the act, quoted in § 237.501.)

• • • An annuity under this section which is not in excess of $5 may, in the discretion of the Board, be paid in a lump sum equal to its commuted value as the Board shall determine. (60 Stat. 732; 45 U. S. C. 228e)

§ 237.904 *Meaning of "retirement annuity."* As used in this part, the term "retirement annuity" means an annuity under section 2 of the act awarded before or after its amendment, but not including an annuity to a survivor pursuant to an election of a joint and survivor annuity.

§ 237.905 *Proof of continuance of disability of child age 18 or over.* (a) A child age 18 or over whose entitlement to a child's insurance annuity is based, in part, on his having a permanent physical or mental condition which is such that he is unable to engage in any regular employment, which disability began before he attained age 18, shall, as and whenever notified by the Board, submit additional proof of the continuance of his disability.

(b) The Board may at any time or times, while the child is in receipt of such an annuity, require that he submit to an examination to be made by a physican, or physicians, or a board of physicians, designated by the Board.

(c) The Board may also at any time or times, while the child is in receipt of such an annuity, require that he submit information relating to his employment, including self-employment, and earnings therefrom.

(d) If, while in receipt of an annuity, such individual fails to comply with the requirements prescribed in paragraphs (a) and (b) of this section, his right to an annuity shall, except for good cause shown to the Board, cease.

(Sec. 10, 49 Stat. 923, as amended; 45 U. S. C. 228j. Interpret or apply sec. 3, 49 Stat. 969, as amended; 45 U. S. C. 228c)

PART 238—RESIDUAL LUMP-SUM PAYMENTS

§ 238.1 *Statutory provisions.*

Whenever it shall appear, with respect to the death of an employee on or after January 1, 1947, that no benefits, or no further benefits, other than benefits payable to a widow, widower, or parent upon attaining age sixty at a future date, will be payable under this section or, pursuant to subsection (k) of this section, upon attaining age sixty-five at a future date, will be payable under section 202 of the Social Security Act, as amended, there shall be paid to such person or persons as the deceased employee may have designated by a writing filed with the Board prior to his or her death, or if there be no designation, to the person or persons in the order provided in paragraph (1) of this subsection or, in the absence of such person or persons, to his or her estate, a lump sum in an amount equal to the sum of 4 per centum of his or her compensation paid after December 31, 1936, and prior to January 1, 1947, and 7 per centum of his or her compensation after December 31, 1946 (exclusive in both cases of compensation in excess of $300 for any month before July 1, 1954, and in the latter case in excess of $350 for any month after June 30, 1954), minus the sum of all benefits paid to him or her, and to others deriving from him or her, during his or her life, or to others by reason of his or her death, under this Act, and pursuant to subsection (k) of this section, under section 202 of the Social Security Act, as amended: *Provided, however,* That if the employee is survived by a widow, widower, or parent who may upon attaining age sixty be entitled to further benefits under this section, or pursuant to subsection (k) of this section, upon attaining age sixty-five be entitled to further benefits under section 202 of the Social Security Act, as amended, such lump sum shall not be paid unless such widow, widower, or parent makes and files with the Board an irrevocable election, in such form as the Board may prescribe, to have such lump sum paid in lieu of all benefits to which such widow, widower, or parent might otherwise become entitled under this section or, pursuant to subsection (k) of this section, under section 202 of the Social Security Act, as amended. Such election shall be legally effective according to its terms. Nothing in this section shall operate to deprive a widow, widower, or parent making such election of any insurance benefits under section 202 of the Social Security Act, as amended, to which such widow, widower, or parent would have been entitled had this section not been enacted. The term "benefits" as used in this paragraph includes all annuities payable under this Act, lump sums payable under paragraph (1) of this subsection, and insurance benefits and lump-sum payments under section 202 of the Social Security Act, as amended, pursuant to subsection (k) of this section, except that the deductions of the benefits which, pursuant to subsection (k) (1) of this section, are paid under section 202 of the Social Security Act, during the life of the employee to him or to her and to others deriving from him or her, shall be limited to such portions of such benefits as are payable solely by reason of the inclusion of service as an employee in "employment" pursuant to said subsection (k) (1). (62 Stat. 577; 45 U. S. C. 228e)

§ 238.2 *Residual lump-sum payments—(a) Conditions of payment.*

• • •

(2) No benefits, or no further benefits, will, by reason of the employee's death, be payable (i) under Part 237 of this chapter, or (ii) under section 202 of the Social Security Act, as amended, on the basis of combined credits: *Provided, however,* That if the employee is survived by a widow, widower, or parent who may be entitled to such benefits under the Railroad Retirement Act upon attaining age 60 or under the Social Security Act upon attaining age 65, the residual lump sum may nevertheless be paid if such widow, widower, or parent files an election in accordance with the provisions of § 238.4; and

• • • • • •

(d) *Meaning of terms.* As used in this section

(1) The term "percentage of compensation" means, with respect to an employee, the sum of the following:

(i) 4 percent of the compensation paid him after December 31, 1936, and prior to January 1, 1947, exclusive of compensation in excess of $300 for any month; and

(ii) 7 percent of the compensation paid him after December 31, 1946, exclusive of compensation in excess of $300 for any month before July 1, 1954, and in excess of $350 for any month after June 30, 1954.

(2) The term "benefits deductible" means, with respect to an employee, the sum of the following:

(i) All benefits paid to the deceased employee and to others deriving from him during his lifetime under the Railroad Retirement Act, and under the Social Security Act to the extent that such benefits are based on his service in the railroad industry; and

(ii) All annuities or parts of annuities waived by the employee and/or others deriving from him under the Railroad Retirement Act; and

(iii) All benefits paid to others on account of his death under the Railroad Retirement Act, whether or not on the basis of combined railroad and social security service, and under the Social

Security Act if based on combined railroad and social security service.

§ 238.4 *Election to have residual lump-sum payment awarded—(a) Conditions of filing.* If an employee is survived by a widow, widower, or parent who may, upon attaining age 60, be entitled, by reason of the employee's death, to benefits, or further benefits, (1) under Part 237 of this chapter, or (2) upon attaining age 65, under section 202 of the Social Security Act, as amended, on the basis of combined credits, such widow, widower, or parent may file with the Board an election to have the residual lump-sum payment awarded, except that an election cannot be made by the widower of an employee who died before October 30, 1951.

(b) *Form and contents.* An election to have the residual lump-sum payment awarded must be made on the form prescribed by the Board for that purpose, and must contain an irrevocable election to have the residual lump sum paid in lieu of all the benefits specified in paragraph (a) of this section to which the widow, widower, or parent might otherwise become entiled.

(c) *Time of filing.* An election to have the residual lump-sum payment awarded must be filed before the widow, widower, or parent attains age 60, except that if a widow, widower or parent would be entitled to future benefits under the Social Security Act at age 65, instead of under the Railroad Retirement Act at age 60, the election must be filed before attainment of age 65.

(d) *Deterred from filing election.* Where an individual has notified the Board in writing, prior to his attaining age 60 or age 65, whichever is applicable, of his intention or desire to file an election to have the residual lump sum awarded, but has been deterred to his detriment by action of the Board or of its employees from filing an election upon the form prescribed by the Board, such writing of the individual shall be considered by the Board as a proper and sufficient election: *Provided, however,* That the action of the Board or of its employees in deterring the individual shall have consisted of failure to advise properly as to the necessity for filing an election on such prescribed form, or failure to furnish such prescribed form: *Provided further,* That the individual, upon being correctly advised by the Board as to the necessity for filing an election on the prescribed form and/or upon being furnished with such prescribed form, shall file said form with the Board during his lifetime and within 3 months after the date on which such correct advice was given him and/or such form was mailed to him (whichever is the later), or within such additional time as the Board may deem reasonable.

(e) *Effect.* An election to have the residual lump-sum payment awarded, filed in accordance with the provisions of this section, is legally effective according to its terms, and is not subject to revocation or to change in any respect. It does not affect any right which the widow, widower, or parent may otherwise have to benefits under section 202 of the Social Security Act, as amended, not based on combined credits.

(Sec. 10, 49 Stat. 973, as amended; 45 U. S. C. 228j)

PART 239—PROOFS REQUIRED IN SUPPORT OF CLAIMS FOR BENEFITS

§ 239.1 *Proof of age.* (a) Except when the Board, on the basis of information in its records, is satisfied that the date of birth stated in the application is substantially correct, an applicant for an employee annuity shall file supporting evidence showing the date of his birth if his age is a condition of entitlement or is otherwise relevant to payment of benefits. Such evidence shall also be required by the Board as to the age of any other individual when such other individual's age is relevant to the determination of the applicant's entitlement. Evidence submitted to establish the age of a dependent (husband, wife and/or child as participants in a spouse's annuity) or of a survivor must have been recorded at least 5 years before the date of submission or the filing date of such dependent's or survivor's application, whichever occurred first, to be acceptable, except that evidence submitted to establish the age of a child under 5 years of age must have been recorded at or near the time of the child's birth to be acceptable.

(b) In determining the weight to be given to evidence offered to prove age, consideration shall be given to its general probative value and to its position in the following enumeration:

(1) Civil record of birth;
(2) Church record of birth or baptism;
(3) Notification of registration of birth;
(4) Hospital birth record or certificate;
(5) Physician's or midwife's birth record;
(6) Bible or other family record;
(7) Naturalization record;
(8) Immigration record;
(9) Military record;
(10) Passport;
(11) School record;
(12) Vaccination record;
(13) Insurance record;
(14) Labor union or fraternal record;
(15) Employer's record;
(16) Marriage record;
(17) Census age record; or
(18) Other evidence of probative value.

In lieu of the original of any record, except a Bible or other family record, there may be submitted a copy of such record or a statement as to the date of birth shown by such record, duly certified by the custodian of such record or by an individual designated by the Board. If the proof submitted is of recent origin or is not convincing, additional proof may be required.

If proof is not obtainable, the reason therefor should be stated and the applicant may submit the sworn statements of two other persons having knowledge of the age in question.

A date of birth may be fixed by the Board where proof to establish age or birth date cannot be obtained.

§ 239.2 *Proof of death.* An applicant for annuities due but unpaid at the death of an individual or for any benefit payable upon the death of an individual shall file proof of such individual's death and of the time and place of such death unless such proof has already been received by the Board. Such proof may also be required by the Board in the case of any other individual when such other individual's death is revelant to the determination of an applicant's entitlement. Such proof shall be of the following character:

* * * * * *

(b) A certified copy of an official report or finding of death made by any agency or department of the United States which is authorized or requested to make such report or finding in the administration of any law of the United States: *Provided, however,* That a finding of presumptive death made pursuant to section 5 of Public Law 490, 77th Congress, shall be accepted only as proof of the fact of death and not of the date of death; or

* * * * * *

§ 239.3 *Proof of marriage.* An applicant for any benefit as the spouse of a retirement annuitant or pensioner or as the widow or widower of a deceased employee, annuitant, or pensioner shall file proof as to marriage to such individual, and as to the time and place of marriage. Proof of marriage may also be required by the Board as to the marriage of any other individual when such a marriage is relevant to the determination of an applicant's entitlement.

(a) Proof of a ceremonial marriage shall be of the following character:

(1) A copy of the public record of marriage, duly certified by the custodian of such record; or

(2) A copy of the church record of marriage, duly certified by the custodian of such record; or

(3) The original certificate of marriage.

If none of the proofs described in subparagraphs (1), (2), and (3) of this paragraph is obtainable, the reason therefor should be stated and the applicant may submit:

(4) The sworn statement of the clergyman or official who performed the marriage ceremony; or

(5) Other evidence of probative value.

* * * * * *

§ 239.5 *Proof of relationship.* (a) An applicant for any benefit as the child of an individual shall submit proof of relationship as specified in this paragraph.

(1) If the relationship is by blood, one of the forms of documentary evidence described in § 239.1 (b) should be submitted (in the order of priority therein provided), showing the relationship between the parent and child in question: *Provided, however,* That a birth record which shows the name of the child but does not give the names of the parents and their relationship to the child may be accepted as supporting evidence of relationship if the surname of the child shown thereon is the same as that of the parent at the time of the birth of the child, and if none of the information available or furnished to the Board is inconsistent with the existence of the relationship.

If no documentary type of evidence is obtainable, the reason therefor should be stated and the applicant may submit the sworn statements of two disinterested persons showing the name of the child and the name of the parent in question, and that to their own knowledge such person is the child of such parent, and stating the source of their knowledge.

* * * * * *

(3) If the relationship is that of stepparent and stepchild and the child is the blood child of a parent to whom such a stepparent is married, one of the forms of documentary evidence described in § 239.1 (b) should be submitted (in the order of priority therein provided), showing the relationship between the child and such blood parent: *Provided, however,* That a birth record which shows the name of the child but does not give the names of the parents and their relationship to the child may be accepted as supporting evidence of relationship between the child and the child's blood parent to whom the stepparent is married if the surname of the child shown thereon is the same as that of the blood parent at the time of the birth of the child, and if none of the information available or furnished to the Board is inconsistent with the existence of the relationship. If the child is the adopted child of the parent to whom such stepparent is married, proof of adoption in accordance with subparagraph (2) of this paragraph shall be submitted. Proof shall be submitted as described in § 239.3 (in the order of priority therein provided) as to the marriage of the child's blood parent (or adopting parent) and such stepparent.

If no documentary proof of relationship of the applicant to the blood parent is available, the reason therefor should be stated and the applicant may submit the sworn statements of two disinterested persons showing the name of the child and the blood parent and that to their knowledge such person is the child of such parent, and stating the source of their knowledge.

* * * * * *

239.6 *Proof of "living with."* A widow or widower who applies for an insurance annuity shall file proof that she or he was living with the employee at the time of the employee's death and a wife or husband who applies for a spouse's annuity shall file proof that she or he was living with the retirement annuitant or pensioner as of the day on which her or his application was filed. The proof shall be of the following character:

(a) A signed statement by the applicant for an insurance annuity or a spouse's annuity that at the time of the employee's death or as of the date on which spouse's application was filed, they were living together at the same place of abode. If they were temporarily living apart, the statement should state the places of residence of each at such time or date, the reason for their separation, the length of time they had been separated, and the expected duration of the separation; or

(b) A signed statement by the applicant for an insurance annuity or a spouse's annuity that the deceased employee or retirement annuitant or pensioner was making regular contributions to her or his support, and describing the amount, time or times, and manner of making such contributions; or

(c) A certified copy of an order or decree of a court of competent jurisdiction directing the employee to contribute to his wife's or her husband's support and a certification by the proper official of the court that such order had not expired or had not been vacated prior to the death of the employee or prior to the date on which spouse's application was filed.

If any information required under paragraph (a) or (b) of this section, as the case may be, is not furnished in the application, it shall be submitted in the form of a sworn statement.

§ 239.7 *Proof of having the care of a child.* An applicant for a spouse's annuity who is under age 65 and an applicant for a widow's current insurance annuity shall file a signed statement as to whether she has in her care a child of the retirement annuitant or pensioner or of her deceased husband upon the basis of whose insured status she claims benefits. If such information is not furnished in the appliction, it shall be submitted in the form of a sworn statement. If the child is not living with the spouse or the widow, she shall also submit a sworn statement disclosing the reason for the separation, the present length and expected duration thereof, and how and to what extent she cares for the child, and upon request of the Board, a sworn statement by the individual with whom the child is living (or official of the institution where the child is living), which states the source of the child's support and how and to what extent the spouse or the widow has cared for the child.

§ 239.8 *Proof of dependency of a child.* An application for a child's insurance annuity shall be supported by proof as to the child's dependency upon the deceased employee, and an applicant under age 65 for a spouse's annuity shall submit proof of dependency of the child in her care upon the retirement annuitant or pensioner. Such proof shall be of the following character:

(a) If the deceased employee, retirement annuitant, or pensioner is the father or adopting father of such child, there shall be submitted a signed statement by a person having knowledge thereof, that at the time of the employee's death, or at the time application for a spouse's annuity was filed:

(1) The employee and the child were living together at a common place of abode, and giving the address of such place; or

(2) The employee was contributing to the support of the child, and describing the amount, time or times, and manner of making such contributions; or

(3) The child: (i) Was the legitimate or adopted child of such employee; and (ii) had not been adopted by another individual; and (iii) was not living with and receiving more than one-half his support from his stepfather.

(b) If the deceased employee is the mother or the adopting mother, and she is not partially insured, or if she is the stepmother of the child, there shall be submitted a signed statement by a person having knowledge thereof, that at the time of the employee's death, the employee (1) was providing one-half the child's support, or (2) was living with the child or contributing to its support and that the child was not living with its father or adopting father and that no contributions in any medium were being made for the support of the child by such child's father or adopting father. If any contributions were being made by the father or adopting father, the time, amount, and manner of making such contributions should be stated.

(c) If the deceased employee, retirement annuitant, or pensioner is the stepfather of the child, there shall be submitted a signed statement by a person having knowledge thereof, that at the time of the employee's death, or at the time application for a spouse's annuity was filed, the child was either living with or receiving at least one-half his support from such employee.

If any information required under paragraph (a), (b), or (c) of this section, as the case may be, is not furnished in the application, it shall be submitted in the form of a sworn statement.

If the proof designated in paragraph (a), (b), or (c) of this section, as the case may be, is not obtainable, the reason therefor should be stated and the applicant may submit other evidence of probative value.

§ 239.9 *Proof of support.* A husband who claims to have received at least one-half of his support from his spouse at the time her retirement annuity or pension began, and a widower who claims to have received at least one-half of his support from the employee at the time of her death or at the time her retirement annuity or pension began, shall file proof of such support. The information shall be submitted in the form of a signed statement.

§ 239.10 *Proof of the dependency of a parent.* A parent who claims to have received at least one-half of his support from a deceased employee shall file proof of such support. The information shall be submitted in the form of a signed statement. The statement shall also describe any other income (including contributions from other children and relatives) received by the parent and the amount and source of such income.

(Sec. 10, 49 Stat. 973, as amended; 45 U. S. C. 228j)

PART 240—PENSIONS

§ 240.1 *Statutory provisions.*

All pensions due in months following the first calendar month after the month of enactment hereof shall be increased by 15 per centum. (Public Law 234, 82nd Congress, 1st Session, approved October 30, 1951) (65 Stat. 691; 45 Stat. 228f)

Nothing in this Act or the Railroad Retirement Act of 1935 shall be taken as restricting or discouraging payment by employers to retired employees of pensions or

gratuities in addition to the annuities or pensions paid to such employees under such Acts, nor shall such Acts be taken as terminating any trust heretofore created for the payment of such pensions or gratuities. (50 Stat. 313; 45 U. S. C. 228g)

§ 240.3 *Rate and time at which pension is payable.* Any individual establishing the above qualifications shall be paid a monthly pension on the first day of July 1937, and on the first day of each calendar month thereafter during his lifetime, in the same amount as he was receiving, or would have received had he been on the pension or gratuity roll of his employer, on December 31, 1930, or on the earliest date that such rolls were commenced, whichever date shall be later: *Provided, however,* That if the pension or gratuity has been reduced by reason of a special (not general) reduction or readjustment made subsequent to December 31, 1930, the pension shall be at such reduced rate: *Provided further,* That a pension due in months after July 1948 and before December 1951 shall equal the amount of the pension paid on the first day of July 1937, plus 20 percent of such amount, and that a pension due in months after November 1951 shall equal the amount of the pension paid on the first day of August 1948, plus 15 percent of such amount: *And provided further,* That a pension payable under section 6 of the act shall in no case exceed $120 when due in months prior to August 1948, or $144 when due in months following July 1948 and prior to December 1951, or $165.60 when due in months following November 1951. A pension payment does not accrue or become payable until the first day of a month, and only if the pensioner be alive on that date.

(Sec. 10, 49 Stat. 973, as amended; 45 U. S. C. 228j)

PART 262—MISCELLANEOUS

§ 262.6 *Waiver; statutory provisions.* Any person awarded an annuity or pension under this Act may decline to accept all or any part of such annuity or pension by a waiver signed and filed with the Board. Such waiver may be revoked in writing at any time, but no payment of the annuity or pension waived shall be made covering the period during which such waiver was in effect. Such waiver shall have no effect on the amount of the spouse's annuity, or of a lump sum under section 5 (f) (2), which would otherwise be due, and it shall have no effect for purposes of the last sentence of section 5 (g) (1). (Section 20 of the act) (60 Stat. 1040; 45 U. S. C. 288s)

§ 262.7 *Waiver of annuity or pension payments.* (a) Any individual who has been awarded an annuity or pension under the act shall have the right to waive such annuity or pension in whole or in part by filing with the Board either a statement to that effect signed by him or a duly executed waiver form prescribed by the Board.

(b) Such a waiver shall be effective as of the date specified therein, but not before September 1, 1954: *Provided, however,* That if an annuity or pension has been awarded, a waiver shall not be effective before the first day of the month in which the waiver form is received at an office of the Board.

(c) Covering the period during which a waiver is in effect, no payment of the amount of the annuity or pension waived can ever be made to any person. Such waiver in such period shall not, however, have any effect on the amount of a spouse's annuity otherwise payable or on a lump sum under section 5 (f) (2) of the act otherwise due, nor shall it serve to make such individual eligible for a lump-sum death benefit or any insurance benefits under the Social Security Act on the basis of the wages of the same deceased employee.

(d) A waiver once made shall continue in effect until such time as of which, but not earlier than the month in which, the annuitant or pensioner requests in a writing signed by him and filed with the Board that it be terminated.

§ 262.12 *Representatives of claimants*—(a) *Power of attorney.* A claimant shall not be required to hire, retain or utilize the services of an attorney, agent, or other representative in any claim filed with the Board. In the event a claimant desires to be represented by another person, he shall file with the Board prior to the time of such representation a power of attorney signed by him and naming such other person as the person authorized to represent the claimant with respect to matters in connection with his claim: *Provided, however,* That without requiring such power of attorney the Board may recognize as the duly authorized representative of the claimant a member of Congress or a person designated by the claimant's railway labor organization to act in behalf of members of that organization on such matters when it appears that such recognition is in the interest of the claimant.

(b) *Payment of claim.* The Board will not certify payment of any awarded claim to or through any person other than the claimant for the reason that a power of attorney for such person to represent such claimant has been filed.

§ 262.15 *Offices of the Board.* The Board hereby establishes as offices of the Board its main office in Chicago, Ill., all regional offices, all district offices, all branch offices, and all other offices maintained by the Board as necessary for the proper discharge of its functions under the Railroad Retirement Acts and the Railroad Unemployment Insurance Act.

§ 262.16 *Records and other papers of the Board; disclosure; service of process.* * * *

(c) When any document described in paragraph (a) of this section is called for by a subpena duces tecum or other judicial order upon the Board for production, inspection, or disclosure thereof, issued by a court of competent jurisdiction in a proceeding in which such document is relevant, a copy of such document, certified by the Secretary of the Board as a true copy, will be produced, disclosed or delivered, unless the Board finds that such production, disclosure, or delivery would be prejudicial to the public interest. In determining whether such production, disclosure, or delivery would be prejudicial to the public interest, the Board will consider, together with such other considerations as it deems relevant, the probable effect of such production, disclosure, or delivery upon the furnishing of complete and accurate information requested by the Board.

(d) When pursuant to paragraph (c) of this section the Board determines that the production, disclosure, or delivery of any document described in paragraph (a) of this section would be prejudicial to the public interest, no member, officer, agent, or employee of the Board shall make any disclosure or testify with respect to such document. Refusal to make such disclosure or so to testify shall be based upon the authority of this section.

* * * * *

(f) No officer, agent, or employee of the Board is authorized to accept or receive service of subpenas, summons, or other judicial process addressed to the Board except as the Board may from time to time delegate such authority by power of attorney. The Board has issued such power of attorney to the General Counsel and to no one else.

(g) Subject to the limitation expressed in paragraph (j) of this section, disclosure of documents and information is hereby authorized, in such manner as the Board may by instructions prescribe, in the following cases:

(1) To any employer, employee, applicant or prospective applicant for an annuity, pension, or death benefit under the 1937 act or the 1935 act, or his duly authorized representative, as to matters directly concerning such employer, employee, applicant or prospective applicant in the administration of such acts.

(2) To any employer, employee, applicant or prospective applicant for benefits under the Railroad Unemployment Insurance Act, or his duly authorized representative, as to matters directly concerning such employer, employee, applicant or prospective applicant in the administration of such act.

(3) To any officer or employee of the United States lawfully charged with the administration of the Railroad Retirement Tax Act, the Social Security Act, or acts or executive orders administered by the Veterans Administration, and for the purpose of such administration only.

* * * * *

(6) To any officer or employee of any state of the United States lawfully charged with the administration of any law of such state concerning unemployment compensation, as to the amounts payable to payees or beneficiaries under the Railroad Retirement Acts and the Railroad Unemployment Insurance Act.

(7) To any court of competent jurisdiction in which proceedings are pending which relate to the care of the person or estate of an incompetent individual, as to amounts payable under the Railroad Retirement Acts to such incompetent individual but only for the purpose of such proceedings.

* * * * *

(j) Notwithstanding any other provision of this section, no disclosure of information may be made by the Board or any member, officer, agent, or employee of the Board, if the disclosure of such information is prohibited by law.

(Sec. 10, 49 Stat. 973, as amended; 45 U. S. C. 228j. Interprets or applies sec. 12, 52 Stat. 1107, as amended; 45 U. S. C. 362)

(Sec. 10, 49 Stat. 973, as amended; 45 U. S. C. 228j)

PART 266—INCOMPETENCE

§ 266.6 *Cases in which the Board shall recognize a person to act in behalf of another under section 19 (a) of the act.* In the absence of a written notice of the appointment of a guardian or other person legally vested with the care of the person or estate of an incompetent or minor, the Board shall, except where special circumstances appear, recognize a person to act in behalf of the incompetent or minor under the following circumstances: (a) When the individual has been adjudged mentally incompetent by a court having jurisdiction; (b) when the individual has been committed to a mental institution by a court having jurisdiction; (c) when the individual is an inmate of a mental institution; (d) when the individual has become physically or mentally disabled to handle his own affairs; (e) when the minor is less than 16 years of age; (f) when the minor is between 16 and 18 years of age and is in the care of any person and does not have capacity to act on his own behalf.

(Sec. 10, 49 Stat. 973, as amended; 45 U. S. C. 228j)

Dated: May 20, 1955.

By authority of the Board.

MARY B. LINKINS,
Secretary of the Board.

[F. R. Doc. 55-4252; Filed, May 23, 1955; 8:45 a. m.]

TITLE 32—NATIONAL DEFENSE

Chapter I—Office of the Secretary of Defense

Subchapter A—Armed Services Procurement Regulations

[Amdt. 4]

MISCELLANEOUS AMENDMENTS

This subchapter is amended as follows:

PART 3—PROCUREMENT BY NEGOTIATION

SUBPART C—DETERMINATIONS AND FINDINGS

The references in § 3.303 (b) and § 3.304 have been changed, as follows:

§ 3.303 *Determinations and findings by the head of a procuring activity signing as "a chief officer responsible for procurement".* * * *

(b) The determinations required by §§ 3.403-4, 3.404, 3.404-3 and 3.404-4 with respect to the use of a cost or a cost-plus-a-fixed-fee contract or an incentive-type contract.

§ 3.304 *Determinations and findings by a contracting officer.* To the extent that the authority has been or may be granted by procedures prescribed by each respective Department, the determinations required by §§ 3.403-4, 3.404, 3.404-3, and 3.404-4 with respect to the use of a cost or a cost-plus-a-fixed-fee contract or an incentive-type contract may be made by a contracting officer: *Provided,* That any such determination shall be based upon written findings made by the Contracting Officer. Any other determinations or findings called for by this subchapter, but not required by this subchapter to be made by higher authority, may be made by a Contracting Officer in accordance with procedures prescribed by each respective Department.

(R. S. 161; 5 U. S. C. 22)

2. The following subpart has been revised in its entirety. It describes and defines approved types of contracts for procurement by negotiation, defines the areas of applicability in which each type of contract may be used appropriately and sets forth considerations and policies governing the choice of type of contract, and imposes conditions on the use of certain of the available types of contracts.

SUBPART D—TYPES OF CONTRACTS

Sec.
3.400 Scope of subpart.
3.401 Types of contracts.
3.402 Selection of contract type.
3.403 Fixed-price-type contracts.
3.403-1 Firm fixed-price contract.
3.403-2 Fixed-price contract with escalation.
3.403-3 Fixed-price contract providing for the redetermination of price.
3.403-4 Fixed-price incentive contract.
3.404 Cost reimbursement-type contract.
3.404-1 Cost contract.
3.404-2 Cost-sharing contract.
3.404-3 Cost-plus-a-fixed-fee contract.
3.404-4 Cost-plus-incentive-fee contract.
3.405 Other types of contracts.
3.405-1 Time and materials contract.
3.405-2 Labor-hour contract.
3.405-3 Letter contract. [Reserved.]
3.405-4 Basic agreement.
3.405-5 Call contract. [Reserved.]
3.405-6 Open end contract. [Reserved.]

AUTHORITY: §§ 3.400 to 3.405-6 issued under R. S. 161; 5 U. S. C. 22. Interpret or apply 62 Stat. 21; 41 U. S. C. 151-161.

§ 3.400 *Scope of subpart.* This subpart (a) describes and defines approved types of contracts for procurement by negotiation, (b) defines the areas of applicability in which each type of contract may be used appropriately and sets forth considerations and policies governing the choice of type of contract, and (c) imposes conditions on the use of certain of the available types of contracts.

§ 3.401 *Types of contracts.* Pursuant to the authority of section 4 of the act, contracts negotiated under this part may be of any of the types or combination of types described herein, which will promote the best interests of the Government subject to the restrictions described below. The cost-plus-a-percentage-of-cost system of contracting shall not be used. In furtherance of this policy all prime cost-reimbursement type contracts, letter contracts, fixed-price type contracts providing for the redetermination of price and fixed-price incentive type contracts shall by an appropriate clause prohibit cost-plus-a-percentage-of-cost subcontracts.

§ 3.402 *Selection of contract type.* (a) The firm fixed-price contracts shall be used unless, under the Applications and Limitations contained in this subpart, the use of another type of contract is more appropriate. However, the selection of contract type is generally a matter for negotiation. The proper selection of an appropriate type of contract is of primary importance in obtaining fair and reasonable prices under all of the circumstances. The type of contract therefore has a direct effect upon the resulting price or cost to the Government. Type of contract and pricing are interrelated and should be so considered together in negotiation.

(b) In determining the type of contract to be utilized consideration should be given to such factors as (1) type and complexity of the item; (2) urgency of the requirement; (3) the period of contract performance and the length of the production run; (4) degree of competition present; (5) difficulty of estimating performance costs due to such factors as the lack of firm specifications, the lack of production experience, or the instability of design; (6) availability of comparative price data, or lack of firm market prices or wage levels; (7) prior experience with the contractor; (8) extent and nature of subcontracting contemplated; (9) assumption of business risk; (10) technical capability and financial responsibility of the contractor; and (11) administrative costs of both parties. Early agreement should be reached between the Government and the contractor on the type of contract best suited to the procurement.

(c) Except in the case of a firm fixed-price contract, contract files shall include documentation to show the reasons why the particular contract type was utilized.

§ 3.403 *Fixed-price-type contracts.* The fixed-price-type contract generally provides for a firm price, or under appropriate circumstances may provide for an adjustable price, for the supplies or services which are being procured. Fixed-price contracts are of several types so designed as to facilitate proper pricing under varying circumstances.

§ 3.403-1 *Firm fixed-price contract*—(a) *Description.* The firm fixed-price contract provides for a price which is not subject to any adjustment by reason of the cost experience of the contractor in the performance of the contract. This type of contract, when appropriately applied as set forth in paragraph (b) of this section, places the maximum risk and responsibility upon the contractor and affords him the greatest incentive for efficient performance with the resultant benefits in earnings. Utilization of the firm fixed-price contract imposes a minimum administrative burden on the contracting parties.

(b) *Applicability.* The firm fixed-price contract is suitable for use in procurements when stable and reasonably definite specifications are available and when fair and reasonable pricing can be achieved, such as where (1) adequate

competition has made initial quotations effective; (2) prior purchases of the same or similar supplies or services provide reasonable price comparison; (3) experienced cost information or sound estimates of the probable cost of performance are available in the negotiation of contract prices; or (4) any other reliable basis for proper pricing can be utilized consistent with the purpose of this type of contract. The firm fixed-price contract is particularly suitable in the purchase of standard commercial items, modified commercial items, or military items for which adequate information on production and cost is available.

(c) *Limitation.* The firm fixed-price contract shall not be used when contingencies proposed in the contract price are considered unreasonable.

§ 3.403–2 *Fixed-price contract with escalation*—(a) *Description.* The fixed-price contract with escalation provides for the upward and downward revision of the stated contract price upon the occurrence of certain contingencies which are specifically defined in the contract. These contingencies should be limited to those beyond the normal control of the contractor. The business risk of the contractor in a fixed-price contract is reduced by the inclusion of escalation provisions in which the Government agrees to revise the stated price upon the happening of the prescribed contingency. Where escalation is agreed upon, upward adjustments shall be limited by the establishment of a reasonable ceiling, and provisions will be included for downward adjustments in those instances where the prices or rates fall below the base levels provided in the contract. In the establishment of the base levels from which escalation will operate, contingency allowances shall be eliminated from the base to be set forth in the contract to the extent that escalation is provided for any particular contingency. Generally, escalation provisions are of two broad types:

(1) Price escalation provides for adjustment of the contract price on the basis of increases or decreases from an agreed upon level in published or established prices of specific items or in price levels of the contract end items.

(2) Labor and material escalation provides for adjustment of the contract price on the basis of increases or decreases from agreed standards or indices in wage rates, specific material costs, or both.

(b) *Applicability.* Use of this type of contract is appropriate where serious doubt exists as to the stability of market and labor conditions which will exist during an extended period of production and contingencies which would otherwise be included in a firm fixed-price contract are identifiable and can be covered separately by escalation. Its usefulness is limited by the difficulties inherent in its administration.

(1) Price escalation may be used under the conditions stated above when the items to which escalation will be applied are standard materials or articles normally sold at "established" or "published" prices in a competitive commercial market or are modifications thereof the prices of which can be reasonably related to the prices of such standard materials or articles.

(2) Labor and material escalation generally is suitable for use when the types and kinds of labor and material that the contractor intends to use in the performance of a contract that covers an extended period of time prevents him from accepting the full risk of possible cost increases and the Government is unwilling to accept the proposed contingency factors.

(c) *Limitation.* Escalation shall not be used to provide protection against contingencies arising from the lack of accurate estimates of the quantities of labor or material required for performance of the contract.

§ 3.403.3 *Fixed-price contract providing for the redetermination of price*—(a) *General*—(1) *Description.* The fixed-price contract providing for the redetermination of price calls for the subsequent negotiated adjustment, in whole or in part, of the initially negotiated (base) price. Consistent with the particular form of price redetermination clause selected, the contract price should be adjusted upward or downward at times prescribed in the contract or at the demand of either party either during or after the period of contract performance and such adjusted price may be prospective, retroactive, or both. Price redetermination clauses provide a contractual method for shifting certain risks from the contractor to the Government in order to eliminate or minimize the inclusion of contingency allowances in the price. Five types of redetermination clauses are available in accordance with the criteria for their use set forth in paragraph (b) of this section.

(2) *Applicability.* These price redetermination clauses are suitable for use in varying degrees in negotiated contracts where (i) adequate estimates of quantities of material and labor are not initially available; (ii) specifications adequate for a firm fixed-price are not initially available; (iii) sound initial estimates of total cost of performance cannot be made; (iv) effective competition or other reasonable justification of price is not available; or (v) where the use of price redetermination would otherwise materially assist in effecting fair and reasonable pricing.

(3) *Limitations.* This type of contract should not be used unless—

(i) It has been determined through negotiation that the particular type price redetermination contract fulfills more completely than any other type of contract the requirements established by the conditions surrounding the procurement.

(ii) There is at the outset, or will be available at a point early in contract performance, sufficient pricing information available to negotiate a prospective fixed or target price.

(iii) The initial price is substantially free of contingency allowances.

(iv) A firm fixed price can be established at a point substantially in advance of contract completion, except as to retroactive adjustment as provided in paragraph (b) (5) of this section.

(v) Reasonable assurance exists that contract price redetermination can be accomplished on a timely basis.

(vi) The contractor's accounting system is adequate for contract price redetermination purposes.

(vii) Cost of administration is not prohibitive.

(b) *Types of price redetermination clauses*—(1) *Prospective periodic price redeterminations at stated intervals*—(i) *Description.* This clause provides for a firm fixed price for an initial period of contract deliveries or performance and for prospective price redeterminations either upward or downward at stated intervals during the performance of the contract.

(ii) *Applicability.* This clause is appropriate for use in procurements calling for quantity production or services where it is possible to negotiate fair and reasonable firm fixed prices for the initial period but not for subsequent stated periods of contract performance. This initial period should be reasonably long so as to include the maximum deliveries and cover the longest period of contract performance for which it is possible to establish fair and reasonable prices at the time of original negotiation. The length of the prospective pricing periods should depend on the circumstances of each case and should generally range from 6 to 12 months each.

(iii) *Limitations.* This clause should be used only when the prospective pricing periods can be made to conform with the operation of the contractor's accounting system. A price ceiling may be established for this type of contract in accordance with the policy set forth in paragraph (c) of this section when appropriate.

(2) *Prospective price redeterminations on request*—(i) *Description.* This clause provides for a fixed price for the entire contract subject to limited demands by either party for prospective price redetermination either upward or downward.

(ii) *Applicability.* This clause is appropriate for use in procurements calling for quantity production or service where it is possible to negotiate fair and reasonable firm fixed prices for the entire contract but the length of contract performance makes it desirable for the parties to reserve the option to adjust price prospectively due to unforeseen causes beyond the normal risks inherent in a firm fixed-price contract.

(iii) *Limitations.* This clause should be used only when (*a*) the procurement is susceptible of being firm fixed priced for the entire contract except for contingencies due to the length of contract performance; (*b*) the initially negotiated price shall remain in effect without change for a substantial period of performance, but only in exceptional cases shall this period be less than 6 months; and (*c*) the first redetermined price and any subsequent redetermined prices shall remain in effect for a substantial portion of the remaining period of contract performance but only in exceptional cases shall price redetermination requests be provided for more frequently than every 6 months after the initial price redetermination. A price ceiling may be established for this type of contract in accordance with the policy set forth in paragraph (c) of this section when appropriate.

(3) *Retroactive and prospective price redetermination at a stated time prior to completion*—(i) *Description.* This clause provides for retroactive and prospective redetermination of prices either (*a*) upward or downward, or (*b*) downward only, at a designated time prior to completion of the contract, expressed in terms of deliveries, shop completion, a percentage of total contract performance on a cost incurred basis or any other reasonable basis. Generally, the time designated as the cutoff point for price redetermination purposes should be the earliest practicable and generally should not exceed 20 percent of deliveries, 20 percent of shop completion, or 40 percent of cost of performance on a cost incurred basis, as compared with the initial estimates. The redetermined price may apply to all supplies or services delivered under the contract.

(ii) *Applicability.* This clause is appropriate for use in contracts when it is impracticable to establish firm fixed prices at the time of contract negotiation but the contracting parties are reasonably certain that firm fixed prices can be negotiated prior to the performance of 60 percent of the contract on a cost incurred basis.

(iii) *Limitations.* This clause should be used only when (*a*) the initial negotiated price is a reasonable estimate sufficient to establish a billing price; (*b*) there is sufficient time of contract performance to accomplish the price redetermination prior to completion of 60 percent of the contract on a cost incurred basis, and (*c*) the estimated value of the procurement is in excess of $100,000. A price ceiling shall be established for this type of contract in accordance with the policy set forth in paragraph (c) of this section.

(4) *Retroactive and prospective price redetermination including further prospective redetermination on request*—(i) *Description.* This clause provides all the features and is subject to the same repricing limitations of the clause described in subparagraph (3) of this paragraph with the additional provision for limited further prospective price redetermination upon written demand by either contractual party. Such further price redetermination is applicable only to supplies or services furnished after the effective date as specified in the request or the date of receipt of the request which ever is later. This clause also provides a limitation on the frequency of these additional requests.

(ii) *Applicability.* This clause is appropriate for use when it is impracticable to establish firm fixed prices at the time of contract negotiation, but when the contracting parties are reasonably certain that fair and reasonable firm fixed prices can be negotiated for the entire contract prior to the performance of 60 percent of the contract on a cost incurred basis.

(iii) *Limitations.* Subject to the same limitations contained in subparagraph (3) (iii) of this paragraph this clause should be used only when subsequent prospective price redeterminations may occur no more frequently than every 6 months after the initial price redetermination. Under this type of contract a price ceiling shall be provided for the period covered by the initial (i. e., retroactive and prospective) repricing action. After the initial repricing action the use of a price ceiling is optional. Any price ceiling shall be in accordance with the policy set forth in paragraph (c) of this section.

(5) *Retroactive price redetermination after completion*—(i) *Description.* This clause provides for a ceiling price and retroactive price redetermination after completion of the contract.

(ii) *Applicability.* This clause is designed for use in contracts where, but for special or unusual circumstances, a cost reimbursement type contract would normally be used. This clause should ordinarily be used only where the amount involved is relatively small or the time for performance is relatively short and then only after negotiation of an initial price as fair and reasonable as circumstances of the particular procurement will then permit.

(iii) *Limitation.* This clause shall only be used upon the written approval of (*a*) Headquarters, Air Materiel Command, for the Air Force; (*b*) Office of the Deputy Chief of Staff for Logistics, for the Army; and (*c*) Office of Naval Material, for the Navy. The criteria for the use and submitting of requests for approval within each respective Department shall be the responsibility of the aforementioned offices. A price ceiling shall be established for this type of contract in accordance with the policy set forth in paragraph (c) of this section.

(c) *Ceiling price provisions.* (1) Ceiling prices should be established at levels which provide reasonable risk assumption by the contractor. The ceiling to be used should be determined for each individual contract after giving consideration to such factors as the state of the art of the item being contracted for and the ability or inability to estimate accurately the labor or material costs involved in performance.

(2) The ceiling price so established is not to be construed as applying to price changes or adjustments which arise solely from the operation of the Changes clause of the contract.

§ 3.403–4 *Fixed-price incentive contract*—(a) *Description.* The fixed-price incentive contract is a fixed-price type of contract with provision for the adjustment of profit and price by a formula based on the relationship which final negotiated total cost bears to negotiated target cost.

(1) *Initially firm target.* Under this type of contract there is negotiated initially a firm target cost, a target profit, a price ceiling and a final profit and price adjustment formula. The formula may also include a ceiling on final profit. After performance of the contract, final cost is negotiated and a final price is then established in accordance with the formula. Where the final negotiated cost is less than the firm target cost, the formula provides for an increase in final profit above target profit; conversely, where the final negotiated cost is more than the firm target cost, the formula provides for a decrease in final profit below target profit. This formula provides for a sharing between the contractor and the Government of both the cost savings below firm target cost and, within the total price ceiling, the excess of final negotiated cost above firm target cost. The increase or decrease in the actual profit included in the final price is thus designed to provide in advance a calculable incentive to the contractor for efficiency in performance.

(2) *Delayed firm target.* Under an alternate form of this type of contract there is negotiated at the outset an initial price, and a production point, generally prior to initial delivery or shop completion of the first item, at which time a firm target cost, target profit and a final profit-and-price adjustment formula and price ceiling will be negotiated.

(3) *Billing price.* In either of the above forms, provision is made for a billing price. The purpose of a billing price is to establish an interim basis for payment. This billing price may be adjusted within the ceiling limits upon request when it becomes apparent during the course of the performance that final negotiated costs will be substantially different from the target cost.

(b) *Applicabiilty.* The fixed-price incentive type contract is appropriate for use only in those circumstances where targets reasonably free of contingencies and providing a fair and reasonable incentive can be established (1) at the time of initial contract negotiation, or (2) at an early point in the performance of the contract and in either case there is a sufficiently long period of performance thereafter to permit achievement of substantial cost reductions.

(c) *Limitations.* This type of contract should not be used unless the contractor's accounting system is adequate for price redetermination purposes and permits satisfactory application of the profit-and-price adjustment formula. In no case should this type of contract be used when (i) reliable cost estimates are not available at the time of initial contract negotiation or at a very early point in the production, or (ii) the sole or principal purpose is to shift substantially all of the risk of performance to the Government. Neither the target profit nor the profit-and-price adjustment formula shall be established prior to the establishment of the firm target cost. The fixed-price incentive contract shall be used only after a determination, in accordance with the requirements of Subpart C of this part, that:

(1) Such method of contracting is likely to be less costly than other methods, or

(2) It is impractical to secure supplies or services of the kind or quality required without the use of such type of contract.

§ 3.404 *Cost reimbursement-type contract*—(a) *Description.* The cost-reimbursement type of contract provides for

payment to the contractor of allowable costs incurred in the performance of the contract, to the extent prescribed in the contract. This type of contract establishes an estimate of total cost for the purpose of (1) obligation of funds, and (2) establishing a ceiling which the contractor may not exceed (except at his own risk) without prior approval or subsequent ratification of the contracting officer. A cost-reimbursement type contract may also provide for predetermined fixed overhead rates, usually to be redetermined at stated intervals.

(b) *Applicability.* The cost-reimbursement type contract is suitable for use when the nature and complexity of the procurement is such that costs of performance cannot be estimated with reasonable accuracy. In addition, it is essential that (1) the contractor's cost accounting system is adequate for the determination of costs applicable to the contract and (2) appropriate surveillance by Government personnel during performance will give reasonable assurance that inefficient or wasteful methods are not being used. While cost-reimbursement contracts are particularly useful for procurements involving substantial amounts, i. e., estimated cost of $25,000 or more, the Contracting Officer may determine in a given case to utilize this type of contract to cover transactions in which the estimated costs are less than $25,000.

(c) *Limitations.* The cost-reimbursement type contract may be used only after a determination, in accordance with the requirements of Subpart C of this part, that:

(1) Such method of contracting is likely to be less costly than other methods, or

(2) It is impractical to secure supplies or services of the kind or quality required without the use of such type of contract.

§ 3.404–1 *Cost contract*—(a) *Description.* The cost contract is a cost-reimbursement type contract under which the contractor receives no fee.

(b) *Applicability.* The following are illustrative situations in which the use of this type of contract may be appropriate.

(1) Research and development work particularly with nonprofit educational institutions or other nonprofit organizations.

(2) Facilities contracts.

(3) Initial small quantity procurements of new items with anticipated subsequent large production runs.

§ 3.404–2 *Cost-sharing contract*—(a) *Description.* A cost-sharing contract is a cost-reimbursement type contract under which the contractor receives no fee but is reimbursed only for an agreed portion of its allowable costs.

(b) *Applicability.* A cost-sharing contract is suitable for use for those procurements which cover production or research projects which are jointly sponsored by the Government and the contractor with benefit to the contractor in lieu of full monetary reimbursement of costs. In consideration of this benefit, the contractor agrees to absorb a portion of the costs of performance. The following are illustrative situations in which this type of contract is generally desirable.

(1) Jointly sponsored research and development work with nonprofit educational institutions or other nonprofit organizations.

(2) Other research and development work where the results of the contract may have commercial benefit to the contractor.

§ 3.404–3 *Cost-plus-a-fixed-fee contract*—(a) *Description.* The cost-plus-a-fixed-fee contract is a cost reimbursement type of contract which provides for the payment of a fixed fee to the contractor. The fixed fee once negotiated does not vary with actual cost, but may be adjusted as a result of any subsequent changes in the work or services to be performed under the contract.

(b) *Applicability.* The cost-plus-a-fixed-fee contract is suitable for use when a cost-reimbursement type of contract is appropriate, as provided in § 3.404 (b), and when the parties agree that the procurement should be profit bearing in the form of a fixed fee. The following are illustrative situations in which this type of contract may be appropriate:

(1) Research and development work where the scope and nature thereof cannot be definitely specified.

(2) Definite specifications exist but the contractor lacks a valid basis for estimating costs because the supplies called for are not items regularly manufactured, or the services called for have not been previously performed, or partial experience will not reveal a proper pricing level for the remainder of the production.

(3) Production or construction contracts where the specifications are not complete or where major changes substantially affecting the scope of the work are expected.

(4) Work to be performed in a Government-owned plant with the use of Government-owned facilities.

(c) *Limitations.* Section 4 (b) of the act provides that in the case of a cost-plus-a-fixed-fee contract the fee shall not exceed 10 per centum of the estimated cost of the contract, exclusive of the fee, as determined by the Secretary of the Department concerned at the time of entering into such contract (except that a fee not in excess of 15 per centum of such estimated cost is authorized in any such contract for experimental, developmental, or research work and that a fee inclusive of the contractors cost and not in excess of 6 per centum of the estimated cost, exclusive of fees, as determined by the Secretary of the Department concerned at the time of entering into the contract, of the project to which such fee is applicable is authorized in contracts for architectural or engineering services relating to any public works or utility projects). The Head of a procuring activity in the Departments of the Army and Navy and the Director of Procurement and Production of a Major Command in the Department of the Air Force or their duly authorized representatives are authorized to approve fixed fees not in excess of (1) ten per centum (10) of the estimated costs, exclusive of fee, of any contract for experimental, developmental, or research work or (2) seven per centum (7) of the estimated cost, exclusive of fee, of any other contract except that in contracts for architectural or engineering services the fixed fee shall not exceed that authorized by the terms of the act as set forth above. In appropriate cases, fees above the prescribed limits in the authorizations granted herein but within the limitations of the Act may be authorized by the Secretary of the Department concerned or his designees.

§ 3.404–4 *Cost-plus-incentive-fee contract*—(a) *Description.* The cost-plus-incentive-fee contract is a cost-reimbursement-type contract with provision for a fee which is adjusted by formula in accordance with the relationship which total allowable costs bear to target costs. Under this type of contract, there is negotiated initially a target cost, a target fee, a minimum and maximum fee, and a fee adjustment formula. After performance of the contract, the fee payable to the contractor is determined in accordance with the formula. The formula provides, within limits, for increases in fee above target fee when total allowable costs are less than target costs, and decreases in fee below target fee when total allowable costs exceed target costs. The provision for increase or decrease in the fee is designed as an incentive to the contractor to increase the efficiency of performance.

(b) *Applicability.* The cost-plus-incentive-fee contract is suitable for use where a cost-reimbursement-type of contract is found necessary and where there is a probability that its use will result in lower costs to the Government than other forms of cost-reimbursement-type contracts through cost reduction incentive to the contractor.

(c) *Limitation.* The target and the maximum fee shall be subject to the administrative limitations stated in § 3.404–3 (c).

§ 3.405 *Other types of contracts.*

§ 3.405–1 *Time and materials contract*—(a) *Description.* The time and materials type of contract provides for the procurement of supplies or services on the basis of (1) direct labor hours at specified fixed hourly rates (which rates include direct and indirect labor, overhead, and profit) and (2) material at cost. Material handling costs may be included in the charge for "material at cost," to the extent they are clearly excluded from any factor of the charge computed against direct labor hours. This type of contract may establish either a price ceiling, or a ceiling amount which the contractor may not exceed (except at his own risk).

(b) *Applicability.* The time and materials contract is used only in those situations where it is not possible at the time of placing the contract to estimate the extent or duration of the work or to anticipate costs with any substantial accuracy. Particular care should be exercised in the use of this type contract since its nature does not encourage efficiency. Thus it is essential that this type of contract be used only where provision is made for adequate controls, including appropriate surveillance by Government personnel during performance, to give reasonable assurance that inefficient or wasteful methods are not being used. This type of contract may be used in the procurement of (1) engineering and design services in connection with the production of supplies; (2) the engineering, design and manufacture of dies, jigs, fixtures, gauges, and special machine tools; (3) repair, maintenance or overhaul work, and (4) work to be performed in emergency situations.

(c) *Limitation.* This type of contract may be used only after determination that no other type of contract will suitably serve.

§ 3.405–2 *Labor-hour contract*—(a) *Description.* The labor-hour type of contract is a variant of the time and materials type contract differing only in that materials are not involved in the contract or are not supplied by the contractor.

(b) *Applicability.* The labor-hour type of contract is applicable in those procurements described for the time and materials type contract, but in situations in which contractor-furnished materials are not involved.

(c) *Limitations.* This type of contract may be used only after determination that no other type of contract will suitably serve.

§ 3.405–3 *Letter contract.* [Reserved.]

§ 3.405–4 *Basic agreement*—(a) *Description.* A basic agreement is a written instrument of understanding executed between a Department or procuring activity and a contractor which sets forth the negotiated contract clauses which shall be applicable to future procurements entered into between the parties during the term of the basic agreement. The use of the basic agreement contemplates the coverage of a particular procurement by the execution of a formal contractual document which will provide for the scope of the work, price, delivery, and additional matters peculiar to the requirements of the specific procurement involved, and shall incorporate by reference or append the contract clauses agreed upon in the basic agreement, as required or applicable.

(b) *Applicability.* (1) Basic agreements are appropriate for use when (i) past experience and future plans indicate that a substantial number of separate contracts may be entered into with a contractor during the term of the basic agreement, and (ii) substantial recurring negotiating problems exist with a particular contractor.

(2) *Amendment or supersession.* A basic agreement shall be amended only by an amendment of the basic agreement itself and shall not be modified or superseded by individual contracts or purchase orders entered into under and subject to the terms of such basic agreement. To minimize amendments, revisions to this subchapter involving changes in authorized contract clauses utilized in basic agreements will provide appropriate direction with respect to any required amendments of basic agreements and to the extent possible, amendments will be required only in matters resulting from changes in statutes, or executive orders. As a minimum, basic agreements will be reviewed annually on the anniversary of their effective date and revised at that time to conform with the current requirements of this subchapter. Amendments shall not have retroactive effect.

(3) *Discontinuance of basic agreement.* Basic agreements shall provide for discontinuance of their future application upon 30 days written notice by either party. Discontinuance of basic agreement will not affect any individual contract referencing the basic agreement (or the clauses appended thereto) entered into prior to the effective date of discontinuance.

(c) *Limitations.* (1) Basic agreements shall neither cite appropriations to be charged nor be used alone for the purpose of obligating funds.

(2) Basic agreements shall not in any manner provide for or imply any agreement on the part of the Government to place future orders or contracts with the contractor involved. Basic agreements shall not be used in any manner to restrict competition.

(3) Basic agreements shall be utilized only in connection with negotiated contracts.

§ 3.405–5 *Call contract.* [Reserved.]

§ 3.405–6 *Open end contract.* [Reserved.]

PART 4—COORDINATED PROCUREMENT

SUBPART B—POLICIES AND GENERAL PRINCIPLES

1. Section 4.201 has been revised so as to clarify the application of procurement assignments outside of the continental limits of the United States. Single department procurement assignments in such areas will be determined by the respective Unified Commanders, irrespective of which funds may be utilized. Section 4.201, as revised, reads as follows:

§ 4.201 *Application of procurement assignment.* Single procurement in the form of single department, joint agency, or plant cognizance procurement shall be effected whenever it will result in net advantages to the Department of Defense as a whole, except so far as it can be demonstrated that use of such a procurement method will adversely affect military operations. Single department procurement assignments outside the continental limits of the United States, regardless of funds utilized, will be determined by the respective Unified Commanders. Implementation of such assignments will be effected within the unified commands under the direction of the Unified Commander.

2. In § 4.202–1, paragraphs (g) and (h) have been deleted in their entirety. The revised section reads as follows:

§ 4.202–1 *Single department procurement.* The Procuring Department is generally responsible for the following, under single department procurement (for specific assignment of procurement responsibilities, see DOD publication "Procurement Assignments, List of Commodities"):

(a) Operational phases of procurement planning (phasing the submission of requirements, consolidating requirements, analyzing the market, and determining patterns for the phased placement of orders in such a manner as to assure meeting the needs of the Departments at the lowest possible price to the Government, and at the same time avoiding unnecessary peaks and valleys of production).

(b) Purchasing.

(c) Contract Administration, including arrangements for followup and expediting.

(d) Acquisition of licenses under patents or other proprietary rights covering the subject matter of the procurement and the settlement of patent infringement claims arising out of the procurement. Approval of the Department or Departments whose funds are to be charged for the acquisition of licenses or settlement of claims will be obtained.

(e) Arrangement for inspection.

(f) Arrangement for transportation.

PART 5—INTERDEPARTMENTAL PROCUREMENT

SUBPART A—PROCUREMENT UNDER FEDERAL SUPPLY SCHEDULE CONTRACTS

The list of Federal Supply Contracts which are mandatory upon the Department of Defense has been brought up to date. Notwithstanding the correction made in § 5.103–2 (a) under the item "Class 35, Periodicals and Law Books", the section on Periodicals will remain mandatory upon the Department of Defense until 30 June 1955. The revised list follows:

§ 5.103–2 *List of Federal Supply schedule contracts which are mandatory upon the Department of Defense*—(a) *Mandatory nationally.*

Class	*Title of Schedule*
7, 14	Gasoline and Lubricating Oil—Service Station Deliveries.
8	Tires and Tubes (Other Than Aircraft), Part II (Commercial tires and tubes only).
8, 45, 60	Brake Lining, Clutch Facings, Oil Filter Elements, and Tire Chains, Etc., Part IV. (Selected items only are mandatory upon DOD.)
17	Spark Plugs, Part II.
17	Electric Lamps, Part VI.
17	Household and Quarters Lamps, Part VII.
18	Purchase, Maintenance, Repair, and Rental of Micro-Photographic Equipment, and Supplies, Part IV.
26	Household and Quarters Furniture, Part I; and Part I, Supplement A.
26	Household and Quarters Furniture, Part II.
26	Household and Quarters Furniture, Part III.
26	Household and Quarters Furniture, Part IV.
26	Office Furniture, Wood and Steel, Including Steel Insulated Filing Cabinets, Part V.

Class	Title of Schedule
27	Floor Coverings, Part I.
28	Marginally Punched Continuous Forms.
35	Books, Part I, Sections A and B. (Section A only is mandatory upon DOD.)
35	Periodicals and Law Books, Part II. (Law Books Section only is mandatory upon DOD.)
53	Drafting-Room and Office Supplies, Part I.
53	Envelopes, Printed and Plain, Part V.
54, 104	Typewriters (Manual and Electric); Purchase, Exchange, Allowances, and Repair Parts; Maintenance and Reconditioning of Electric Typewriters, Part I.
54	Office Equipment, Part III, Sections A and B.
54	Offset Duplicating Blankets and Plates, Direct Image and Photographic (Metal and Paper Type), Part IV.
66	Vacuum Cleaners and Repair Parts, Accessories and Attachments, Part II.
83	Aircraft Tires (Casings and tubes).
103	Recording and Transcription Service, Part I.

(b) *Mandatory in Washington, D. C., and contiguous area.*

Class	Title of Schedule
16, 17	Dry Batteries.
18, 51, 53	Photographic Paper and Film, and Other Sensitized Materials and Photographic Chemicals, Classes 18 and 51, Part II, and Class 53, Part III. (Class 51 and 53 items only are mandatory upon DOD.)
26	Executive Type Furniture, Class 26, Part VI. Also Class 25, Smoking Stands, Class 53, Desk Trays and Class 54, Baskets, Wastepaper.
27	Window Coverings, Part III.
42	Abrasives, Casters, Door Closers, Padlocks, Steel Strapping, etc.
51	Drugs, Medicinal, Laboratory, and Industrial Chemicals, Part I.
51	Gases, Industrial, Medicinal, and Refrigeration; Part III.
53	Rubber Stamps, Part IV.
56	Groceries and Other Provisions, Part II.
56	Ice, Part III.
57	Laboratories and Special Apparatus and Supplies, Section C.
58	Fire Extinguishers, Repair Parts, and Accessories.
67	Feed and Forage, Part I.
67	Seed, Part II.
70	Agricultural Materials (Fertilizers, peat, and soil conditioners).
103	Correct Time Service.
103	Regraining of Offset Duplicating Plates, Part III.
103	Wiping Cloth Service, Part IV.

PART 7—CONTRACT CLAUSES

SUBPART A—CLAUSES FOR FIXED-PRICE SUPPLY CONTRACTS

1. The references to §§ 3.402 and 3.404 have been deleted in § 7.102, and a new reference to § 3.403 substituted in lieu thereof, as follows:

§ 7.102 *Applicability.* As used throughout this subpart, the term "fixed-price supply contract" shall mean any contract (a) entered into either by formal advertising or by negotiation, other than (1) purchase orders for $5,000 or less, (2) letter contracts, (3) preliminary notices of award, and (4) amendments or modifications to contracts or purchase orders; (b) at a fixed price (with or without provisions for price redetermination, escalation or other form of price revision as covered by § 3.403 of this subchapter; and (c) for supplies other than (1) the construction, alteration, or repair of buildings, bridges, roads, or other kinds of real property, (2) experimental, developmental, or research work, or (3) facilities to be provided by the Government under a "Facilities Contract" as defined in Part 13 of this subchapter (but see §§ 7.104–15 and 7.104–16 with respect to purchase orders).

2. The contract clause relating to Bills of Materials has been revised and the paragraph in which it appears renumbered from § 7.105–7 to § 7.105–6. Revision of the clause is editorial in nature. However, the instructions now provide that the contractor shall not be required to obtain data for the Bill of Materials in greater detail from a subcontractor than he himself is required to furnish under the clause in the prime contract. It now reads as follows:

§ 7.105–6 *Bill of Materials.* A Bill of Materials consists of a report by a supplier which specifies the quantities of various materials required to produce a designated quantity of supplies of a particular kind. A Bill of Materials, with respect to all or part of the supplies to be furnished pursuant to a contract, shall be required only if the Contracting Officer, in accordance with the procedures of the Department concerned, shall determine that such bill is necessary to develop materials or components requirements for production and maintenance programs, for industrial mobilization purposes, or for other specified purposes. In such event, the contract shall specify, with respect to such bill, the following:

(a) The supplies or parts thereof to be covered by the Bill of Materials;

(b) The type of bill or bills (Detailed, Modified, Expanded Summary, or Abbreviated Summary) to be furnished, with applicable instructions;

(c) The compensation to be paid the contractor for furnishing such bill and any revisions thereto, or a statement that the price of the item to which the bill relates includes compensation for the furnishing of such bill;

(d) The number and kind of copies of such bill to be furnished; and,

(e) Delivery dates.

In such event, the contract shall also include the following clause:

BILL OF MATERIALS

(a) With respect to the supplies to be delivered pursuant to the contract, for which a Bill of Materials is required, the Contractor shall furnish a Bill of Materials in the required number of copies on Department of Defense Forms 346, and 347 if applicable, or authorized reproductions thereof, in accordance with the instructions specified in the Schedule.

(b) The Contractor shall furnish to the Government, at such intervals as designated in the Schedule, revised pages of the Bill of Materials incorporating the effect of any changes, pursuant to the clause hereof entitled "Changes," in the quantity of any material or part, or any other information contained in the Bill of Materials, or a statement that no revision is necessary. A final revision, or statement that no revision is necessary, shall be furnished upon completion of performance of the contract.

(c) The Bill of Materials and all revisions or statements subsequent thereto shall be subject to inspection and acceptance by the Government.

Where a Bill of Materials is procured by contract separate from the supplies to which such Bill of Materials relates, such contract shall include such of the terms mentioned above as may be appropriate and shall specify that the Bill of Materials shall be furnished on DD Forms 346, and 347 if applicable, or authorized reproductions thereof. The contractor shall not be required to obtain data for the Bill of Materials in greater detail from a subcontractor than he is to furnish under the terms of the above clause.

SUBPART B—CLAUSES FOR COST-REIMBURSEMENT TYPE SUPPLY CONTRACTS

The reference in § 7.202 to § 3.406 has been eliminated, as follows:

§ 7.202 *Applicability.* As used throughout this subpart, the term "cost-reimbursement type supply contract" shall mean any contract (other than a letter contract, letter of intent, preliminary notice of award, or amendment or modification to a contract) entered into on a cost or cost-plus-a-fixed-fee basis as covered in § 3.404 for supplies other than (a) the construction, alteration or repair of buildings, bridges, roads, or other kinds of real property, (b) experimental, developmental, or research work, or (c) facilities to be provided by the Government under a "facilities contract" as defined in Part 13 of this subchapter.

PART 8—TERMINATION OF CONTRACTS

SUBPART G—FORMS

The references in § 8.702 to §§ 3.405 and 3.406 have been deleted and a new reference to § 3.404 has been added in lieu thereof, as follows:

§ 8.702 *Termination clause for cost-type contracts.* The following standard clause shall be used in any cost-type contract, as defined in § 3.404, for supplies and experimental, developmental, or research work other than (a) construction, alterations, or repair of buildings, bridges, roads, or other kinds of real property, or (b) experimental, developmental, or research work with educational or nonprofit institutions, where no fee is contemplated.

* * * * * *

(R. S. 161; 5 U. S. C. 22)

T. P. PIKE,
Assistant Secretary of Defense
(Supply and Logistics).

TITLE 14—CIVIL AVIATION

Chapter II—Civil Aeronautics Administration, Department of Commerce

[Amdt. 144]

PART 609—STANDARD INSTRUMENT APPROACH PROCEDURES

PROCEDURE ALTERATIONS

The standard instrument approach procedure alterations appearing hereinafter are adopted to become effective when indicated in order to promote safety. Compliance with the notice, procedures, and effective date provisions of section 4 of the Administrative Procedure Act would be impracticable and contrary to the public interest, and therefore is not required.

Part 609 is amended as follows:

NOTE: Where the general classification (LFR, VAR, ADF, ILS, GCA, or VOR), location, and procedure number (if any) of any procedure in the amendments which follow, are identical with an existing procedure, that procedure is to be substituted for the existing one. Where the new procedure is to be placed in appropriate alphabetical sequence within the section amended, where a procedure is canceled, the existing procedure is revoked; new procedures are to be placed in appropriate alphabetical sequence within the section amended.

1. The low frequency range procedures prescribed in § 609.6 are amended to read in part:

LFR STANDARD INSTRUMENT APPROACH PROCEDURE

Bearings, headings, and courses are magnetic. Distances are in statute miles unless otherwise indicated. Elevations and altitudes are in feet, MSL. Ceilings are in feet above airport elevation. If an LFR instrument approach is conducted at the below named airport, it shall be in accordance with the following instrument approach procedure, unless an approach is conducted in accordance with a different procedure authorized by the Administrator for Civil Aeronautics for such airport. Initial approaches shall be made over specified routes. Minimum altitude(s) shall correspond with those established for en route operation in the particular area or as set forth below.

City and State; airport name, elevation; facility; class and identification; procedure No.; effective date	Initial approach to facility from—	Course and distance	Minimum altitude (ft.)	Procedure turn (—) side of final approach course (outbound and inbound); altitudes; limiting distances	Ceiling and visibility minimums: Condition	Ceiling and visibility minimums: Type aircraft: 75 m. p. h. or less	Ceiling and visibility minimums: Type aircraft: More than 75 m. p. h.	If visual contact not established at authorized landing minimums after passing facility within distance specified, or if landing not accomplished
	1	2	3	4	5	6	7	8
HONOLULU, HAWAII. Honolulu International Airport, 10	Barbers Point FM (final).....	055–8	600	8 side of SW course: 235° outbound. 055° inbound. 2,000' within 10 miles.	2 engines or less: •T–dn	400–1	400–1	Within 2.6 miles, climb to 2,000' on 8 course (59R) and proceed to Southgate Intersection. •All takeoffs to NW (32) will be restricted to 600–2, with left hand turn recommended.
					C–dn	500–1	500–1	
					S–dn 8	400–1	400–1	
					A–dn	800–2	800–2	
					More than 2 engines: •T–dn	400–1	400–1	
					#C–dn	500–1½	500–1½	
					S–dn 8	400–1	400–1	
					A–dn	800–2	800–2	

AIR CARRIER NOTE: Sliding scale not authorized.
#Landings on runway 14 restricted to 600–2.

PART 72–FINL
Procedure No. 1
Amendment No. 0–8
Effective: June 25, 1955
Supersedes Amendment No. 0–7, dated November 1, 1953.
Major changes: New format. Lower minima.

LFR STANDARD INSTRUMENT APPROACH PROCEDURE—Continued

City and State; airport name, elevation; facility: class and identification; procedure No.; effective date	Initial approach to facility from—	Course and distance	Minimum altitude (ft.)	Procedure turn (—) side of final approach course (outbound and inbound); altitudes; limiting distances	Minimum altitude over facility on final approach course (ft.)	Course and distance, facility to airport	Ceiling and visibility minimums: Condition	Type aircraft: 75 m. p. h. or less	Type aircraft: More than 75 m. p. h. TONOPAH, NEV. Municipal, 5,426'. SBRAZ-DTV TPH. Procedure No. 1. Amendment No. 3. Effective: June 25, 1955. Supersedes Amendment No. 2, dated July 15, 1954. Major changes: New format; add required note for uncontrolled area.	----------	----------	----------	W side of N course: 348° outbound. 168° inbound. 9,500' within 10 miles.	8,000	168—2.6	All aircraft T-d T-n C-d C-n A-dn	 1,000-1 1,000-2 2,500-2 2,500-3 2,500-3	 1,000-1 1,000-2 2,500-2 2,500-3 2,500-3	Within 2.6 miles, climb to 10,000' on S course within 25 miles of LFR. CAUTION: No control area. Pilots using this facility shall, as soon as practicable, advise TPH INSAC of position, altitude, ETA, and intentions, and thereafter determine that adequate separation exists from other reported users of navigational facilities in the area. When other aircraft have previously contacted TPH INSAC, hold between facility and a point 2 minutes out on final approach course at least 1,000' above procedure turn altitude and 1,000' above previously reported traffic until advised that aircraft making approach has landed. Keep TPH INSAC advised at all times of changes in altitude and position in order that other aircraft may also receive this information.

2. The very high frequency omnirange procedures prescribed in § 609.9 (a) are amended to read in part:

VOR STANDARD INSTRUMENT APPROACH PROCEDURE

Bearings, headings, and courses are magnetic. Distances are in statute miles unless otherwise indicated. Elevations and altitudes are in feet, MSL. Ceilings are in feet above airport elevation.
If a VOR instrument approach is conducted at the below named airport, it shall be in accordance with the following instrument approach procedure, unless an approach is conducted in accordance with a different procedure authorized by the Administrator for Civil Aeronautics for such airport. Initial approaches shall be made over specified routes. Minimum altitude(s) shall correspond with those established for en route operation in the particular area or as set forth below.

City and State; airport name, elevation; facility: class and identification; procedure No.; effective date	Initial approach to facility from—	Course and distance	Minimum altitude (ft.)	Procedure turn (—) side of final approach course (outbound and inbound); altitudes; limiting distances	Minimum altitude over facility on final approach course (ft.) 4. The ground controlled approach procedures prescribed in § 609.13 are amended to read in part:

GCA STANDARD INSTRUMENT APPROACH PROCEDURE

Bearings, headings, and courses are magnetic. Distances are in statute miles unless otherwise indicated. Elevations and altitudes are in feet, MSL. Ceilings are in feet above airport elevation.

If a GCA instrument approach is conducted at the below named airport, it shall be in accordance with the following instrument procedure, unless an approach is conducted in accordance with a different procedure authorized by the Administrator for Civil Aeronautics for such airport. Initial approaches shall be made over specified routes. Minimum altitude(s) shall correspond with those established for en route operation in the particular area or as set forth below. Positive identification must be established with the ground controller. From initial contact with GCA to final authorized landing minimums, the instructions of the GCA controller are mandatory except when (A) visual reference with ground is established on final approach at or before descent to the authorized landing minimums, or (B) at pilot's discretion if it appears desirable to discontinue the approach.

TITLE 25—INDIANS

Chapter I—Bureau of Indian Affairs, Department of the Interior

Subchapter G—Enrollment and Reallotment of Indians

PART 57—ENROLLMENT OF CONFEDERATED TRIBES OF SILETZ INDIANS

Sec.
57.1 Definitions.
57.2 Purpose.
57.3 Eligibility.
57.4 Proposed roll.
57.5 Appeals.
57.6 Final roll.
57.7 Special instructions.

AUTHORITY: §§ 57.1 to 57.7 issued under sec. 3, 68 Stat. 724.

§ 57.1 *Definitions.* As used in this part:

(a) "Secretary" means "Secretary of the Interior or his authorized representative".

(b) "Commissioner" means "Commissioner of Indian Affairs."

(c) "Director" means "Area Director, Portland Area Office."

(d) "Tribe" means "Confederated Tribes of Siletz Indians."

§ 57.2 *Purpose.* The regulations in this part are to govern the compilation of the membership roll of the Tribe pursuant to the act of August 13, 1954 (68 Stat. 724; 25 U. S. C. 691 et seq.).

§ 57.3 *Eligibility.* (a) There shall be eligible for enrollment in the Tribe any Indian, living on August 13, 1954:

(1) Whose name appears on the Tribe's per capita payment roll as of July 15, 1949; or

(2) Who is of one-eighth or more Indian blood and is a descendant of an Indian whose name appears on the Tribe's per capita payment roll as of July 15, 1949; or

(3) Who has been allotted on the Siletz Indian Reservation; or

(4) Who is of one-eighth or more Indian blood and is a descendant of an Indian allotted on the Siletz Indian Reservation; or

(5) Who is of one-sixteenth or more Indian blood and was adopted into membership in the Tribe subsequent to July 15, 1949, and prior to August 14, 1954.

(b) Indians enrolled with any Indian tribe or band other than the Confederated Tribes of Siletz Indians shall not be eligible for enrollment under this section, except that the enrollment of an Indian on one of the payment rolls prepared pursuant to the act of August 30, 1954 (68 Stat. 979; 25 U. S. C. 771 et seq.), and 25 CFR 56 (20 F. R. 1552; March 15, 1955) shall not render such Indian ineligible for enrollment under this section.

§ 57.4 *Proposed roll.* The Secretary, after consultation with the Tribe, will prepare a proposed roll of members of the Tribe comprising the names of those Indians who are eligible for enrollment pursuant to § 57.3. Said names shall be listed on the roll in alphabetical order, and the roll shall set forth the following information with respect to each such name: Old and new roll numbers, sex, date of birth, marital status, degree of Indian blood, provision or provisions of § 57.3 (a) pursuant to which the Indian is enrolled, and, if enrollment is pursuant to § 57.3 (a) (2) or (4) the name of the descendant's enrolled or allotted ancestor. The Secretary will publish the proposed roll in the FEDERAL REGISTER.

§ 57.5 *Appeals.* Within 90 days from the date of publication of the proposed roll in the FEDERAL REGISTER, appeals may be filed in protest against the inclusion or omission of the name of any person on or from the proposed roll. Regulations governing the filing and disposing of such appeals are set forth in Part 55 of this subchapter (20 F. R. 336; January 14, 1955). The Secretary will designate a representative to file appeals in accordance with § 55.6 of this subchapter.

§ 57.6 *Final roll.* Upon the disposition of all appeals, the Secretary will prepare a final roll of the members of the Tribe, which shall comprise the names of the persons on the proposed roll published pursuant to § 57.4, with the exception of the names of such persons whom the Secretary has, on the basis of such appeals, stricken therefrom, and with the addition of the names of such persons whom the Secretary has, on the basis of such appeals, added thereto. The names on the final roll shall be listed in alphabetical order, and said roll shall also contain the information prescribed by § 57.4. The Secretary will publish the final roll in the FEDERAL REGISTER.

§ 57.7 *Special instructions.* To facilitate the work incident to the compilation of the above rolls the Commissioner may issue special instructions not inconsistent with this part.

DOUGLAS MCKAY,
Secretary of the Interior.

MAY 23, 1955.

PROPOSED RULE MAKING

DEPARTMENT OF THE TREASURY

Internal Revenue Service

[26 CFR (1954) Parts 1, 36]

CONTRACT COVERAGE OF EMPLOYEES OF FOREIGN SUBSIDIARIES

NOTICE OF PROPOSED RULE MAKING

Notice is hereby given, pursuant to the Administrative Procedure Act, approved June 11, 1946, that the regulations set forth in tentative form below are proposed to be prescribed by the Commissioner of Internal Revenue, with the approval of the Secretary of the Treasury. Prior to the final adoption of such regulations, consideration will be given to any data, views, or arguments pertaining thereto which are submitted in writing, in duplicate, to the Commissioner of Internal Revenue, Attention: T:P, Washington 25, D. C., within the period of 30 days from the date of publication of this notice in the FEDERAL REGISTER. The proposed regulations are to be issued under the authority contained in sections 3121 (l) and 7805 of the Internal Revenue Code of 1954, as amended (68 Stat. 1094; 68A Stat. 917; 26 U. S. C. 3121 (l), 7805).

[SEAL] O. GORDON DELK,
Acting Commissioner of Internal Revenue.

The following regulations are hereby prescribed under section 176 and section 3121 (l) of the Internal Revenue Code of 1954, as added by Public Law 761, 83d Congress, approved September 1, 1954:

INCOME TAX REGULATIONS

§ 1.176 *Statutory provisions; payments with respect to employees of certain foreign corporations.*

SEC. 176. *Payments with respect to employees of certain foreign corporations.* In the case of a domestic corporation, there shall be allowed as a deduction amounts (to the extent not compensated for) paid or incurred pursuant to an agreement entered into under section 3121 (l) with respect to services performed by United States citizens employed by foreign subsidiary corporations. Any reimbursement of any amount previously allowed as a deduction under this section shall be included in gross income for the taxable year in which received.

(Sec. 176 as added by sec. 210, Social Security Amendments 1954)

PART 36—CONTRACT COVERAGE OF EMPLOYEES OF FOREIGN SUBSIDIARIES

Sec.
36.3121 (l)–0 Introduction.
36.3121 (l) (1) Statutory provisions; agreements entered into by domestic corporations with respect to foreign subsidiaries.
36.3121 (l) (1)–1 Agreements entered into by domestic corporations with respect to foreign subsidiaries.
36.3121 (l) (1)–2 Amendment of agreement.
36.3121 (l) (1)–3 Effect of agreement.
36.3121 (l) (2) Statutory provisions; effective period of agreement.
36.3121 (l) (2)–1 Effective period of agreement.
36.3121 (l) (3) Statutory provisions; termination of period by a domestic corporation.
36.3121 (l) (3)–1 Termination of agreement by domestic corporation or by reason of change in stock ownership.

Sec.
36.3121 (l) (4) Statutory provisions; termination of period by Secretary.
36.3121 (l) (4)–1 Termination of agreement by Commissioner.
36.3121 (l) (5) Statutory provisions; no renewal of agreement.
36.3121 (l) (5)–1 Effect of termination.
36.3121 (l) (6) Statutory provisions; deposits in trust fund.
36.3121 (l) (7) Statutory provisions; overpayments and underpayments.
36.3121 (l) (7)–1 Overpayments and underpayments.
36.3121 (l) (8) Statutory provisions; definition of foreign subsidiary.
36.3121 (l) (8)–1 Definition of foreign subsidiary.
36.3121 (l) (9) Statutory provisions; domestic corporation as separate entity.
36.3121 (l) (9)–1 Domestic corporation as separate entity.
36.3121 (l) (10) Statutory provisions; regulations.
36.3121 (l) (10)–1 Requirements in respect of liability under agreement.
36.3121 (l) (10)–2 Identification.
36.3121 (l) (10)–3 Returns.
36.3121 (l) (10)–4 Payment of amounts equivalent to tax.

§ 36.3121 (l)–0 *Introduction.* (a) The regulations in this part deal with the circumstances under which a domestic corporation may enter into an agreement with the district director for the purpose of extending the insurance system established by title II of the Social Security Act to certain services performed outside the United States by citizens of the United States as employees of a foreign subsidiary of the domestic corporation, and with the obligations of a domestic corporation which enters into such an agreement. The provisions of the Internal Revenue Code of 1954, as amended, to which the regulations in this part pertain are contained in section 3121 (l). The liabilities assumed under an agreement entered into pursuant to such section are based on the remuneration for services covered by the agreement. Such agreement may not be effective prior to January 1, 1955.

(b) Although the obligations incurred under an agreement entered into pursuant to section 3121 (l) of the Internal Revenue Code of 1954, as amended, must be distinguished from the obligations imposed on employers with respect to the taxes under the Federal Insurance Contributions Act, the two are similar in many respects. Accordingly, the regulations in this part are prescribed as a supplement to the regulation (26 CFR (1954), Part 31, Subpart B) relating to the employee tax and the employer tax imposed by the Federal Insurance Contributions Act. The terms used in the regulations in this part have the same meaning, unless otherwise provided, as when used in the regulations relating to the taxes imposed by such act.

(c) The regulations in this part constitute Part 36 of Title 26 of the Code of Federal Regulations. As used in the regulations in this part, the word "Code" means the Internal Revenue Code of 1954, as amended, and the term "Federal Insurance Contributions Act" means chapter 21 of such Code. Each section of the regulations is preceded by the provision of the Code which it interprets. All references to sections of law are references to the Code unless otherwise indicated. The number of each section of the regulations begins with 36 followed by a decimal point (36.). Numbers which do not begin with 36 followed by a decimal point are numbers of sections of law unless otherwise indicated. In identifying sections of regulations, the symbol "§" is used.

§ 36.3121 (l) (1) *Statutory provisions; agreements entered into by domestic corporations with respect to foreign subsidiaries.*

SEC. 3121. *Definitions.* • • •

(l) *Agreements entered into by domestic corporations with respect to foreign subsidiaries*—(1) *Agreement with respect to certain employees of foreign subsidiaries.* The Secretary or his delegate shall, at the request of any domestic corporation, enter into an agreement (in such form and manner as may be prescribed by the Secretary or his delegate) with any such corporation which desires to have the insurance system established by title II of the Social Security Act extended to service performed outside the United States in the employ of any one or more of its foreign subsidiaries (as defined in paragraph (8)) by all employees who are citizens of the United States, except that the agreement shall not be applicable to any service performed by, or remuneration paid to, an employee if such service or remuneration would be excluded from the term "employment" or "wages", as defined in this section, had the service been performed in the United States. Such agreement may be amended at any time so as to be made applicable, in the same manner and under the same conditions, with respect to any other foreign subsidiary of such domestic corporation. Such agreement shall be applicable with respect to citizens of the United States who, on or after the effective date of the agreement, are employees of and perform services outside the United States for any foreign subsidiary specified in the agreement. Such agreement shall provide—

(A) That the domestic corporation shall pay to the Secretary or his delegate, at such time or times as the Secretary or his delegate may by regulations prescribe, amounts equivalent to the sum of the taxes which would be imposed by sections 3101 and 3111 (including amounts equivalent to the interest, additions to the taxes, additional amounts, and penalties which would be applicable) with respect to the remuneration which would be wages if the services covered by the agreement constituted employment as defined in this section; and

(B) That the domestic corporation will comply with such regulations relating to payments and reports as the Secretary or his delegate may prescribe to carry out the purposes of this subsection.

(Sec. 3121 (l) (1) as added by sec. 209, Social Security Amendments 1954)

§ 36.3121 (l) (1)–1 *Agreements entered into by domestic corporations with respect to foreign subsidiaries*—(a) *In general.* (1) Any domestic corporation having one or more foreign subsidiaries may request the district director to enter into an agreement for the purpose of extending the Federal old-age and survivors insurance system established by title II of the Social Security Act to certain services performed outside the United States by all citizens of the United States who are employees of any such foreign subsidiary. See § 36.3121 (l) (8)–1, relating to the definition of foreign subsidiary. Except as provided in § 36.3121 (l) (5)–1, relating to the effect of the termination of an agreement entered into pursuant to the provisions of section 3121 (l), the district director shall, at the request of a domestic corporation, enter into such an agreement on Form 2032 in any case where a Form 2032 is executed, and submitted to the district director, by the domestic corporation in the manner prescribed in this section. A domestic corporation may not have in effect at the same moment of time more than one agreement on Form 2032.

(2) An agreement authorized in section 3121 (l) (1) may not be made applicable to any services performed outside the United States which would not constitute employment, for purposes of the taxes imposed under the Federal Insurance Contributions Act, if the services were performed within the United States. Thus, such an agreement shall have no application with respect to any services performed outside the United States which, if performed within the United States, would be specifically excepted from employment under any of the numbered paragraphs of section 3121 (b), or which, although not so excepted, would be deemed not to be employment by application of section 3121 (c), relating to included and excluded services. Further, an agreement may not be made applicable with respect to any services performed outside the United States which constitute employment, as defined in section 3121 (b). Thus, an agreement may not be made applicable to services for any employer performed by any employee on or in connection with an American vessel or American aircraft when outside the United States, if (i) performed under a contract of service which is entered into within the United States or (ii) during the performance of which and while the employee is employed on the vessel or aircraft it touches at a port in the United States, because such services constitute employment as defined in section 3121 (b). An agreement may not be made applicable to remuneration which would not constitute wages, as defined in section 3121 (a), even if the services to which such remuneration is attributable had constituted employment.

(3) The terms "corporation", "domestic", and "foreign", as used in the regulations in this part, have the meaning assigned by paragraphs (3), (4), and (5), respectively, of section 7701 (a). Section 7701 (a) (3), (4), and (5) provides as follows:

SEC. 7701. *Definitions.* (a) When used in this title [Internal Revenue Code of 1954], where not otherwise distinctly expressed or manifestly incompatible with the intent thereof—

• • • • • •

(3) *Corporation.* The term "corporation" includes associations, joint-stock companies, and insurance companies.

(4) *Domestic.* The term "domestic" when applied to a corporation • • • means created or organized in the United States or under the law of the United States or of any State or Territory.

(5) *Foreign.* The term "foreign" when applied to a corporation * * * means a corporation * * * which is not domestic.

(b) *Form and contents of agreement.* Form 2032 is the form prescribed for the agreement authorized in section 3121 (l) (1). The agreement shall include provisions substantially as follows:

(1) That the agreement shall apply to all services performed outside the United States by all citizens of the United States who are in the employ of the foreign subsidiary or subsidiaries to which the agreement is made applicable, but only to the extent that the remuneration paid each employee for such services would constitute wages if paid by one employer for services performed in the United States;

(2) That the agreement shall not apply to any services which constitute employment within the meaning of section 3121;

(3) That the agreement shall become effective on the first day of the calendar quarter in which the Form 2032 is signed by the district director or on the first day of the next succeeding calendar quarter, whichever is specified in the agreement;

(4) That the domestic corporation will pay, as required by the regulations in this part, amounts equivalent to the sum of the taxes which would be imposed by sections 3101 and 3111, respectively, if the remuneration for the services covered by the agreement constituted wages;

(5) That the domestic corporation will pay, in accordance with written notification and demand therefor to the domestic corporation, amounts equivalent to the interest, additions to the taxes, additional amounts, and penalties which would be applicable if the remuneration for services covered by the agreement constituted wages; and

(6) That the domestic corporation will comply with all provisions of the regulations in this part.

(c) *Execution and filing of Form 2032.* The request of any domestic corporation that the district director enter into an agreement with the corporation on Form 2032 shall be signified by the corporation by executing and filing Form 2032 in triplicate with the district director for the district in which is located the principal place of business in the United States of the domestic corporation. Such form shall be executed in accordance with the regulations in this part and the instructions relating to the form. Each copy of the form shall be signed and dated by the officer of the corporation authorized to enter into the agreement, shall show the title of such officer, and shall have the corporate seal affixed thereto. A certified copy of the minutes of the meeting of the board of directors of the domestic corporation, or other evidence, showing the authority of such officer so to act shall accompany the form. Form 2032 executed and filed as provided in this paragraph shall be signed and dated by the district director and, upon such signing, the Form 2032 so executed and filed will constitute the agreement authorized in section 3121 (l) (1). The district director will return one copy of the agreement to the domestic corporation, will transmit one copy to the Department of Health, Education, and Welfare, and will retain one copy (together with all related papers).

§ 36.3121 (l) (1)–2 *Amendment of agreement.* (a) An agreement entered into by a domestic corporation as provided in § 36.3121 (l) (1)–1 may be amended so as to be made applicable, in the same manner and under the same conditions, with respect to any one or more of the foreign subsidiaries of the domestic corporation not previously named in the agreement. See paragraph (b) of § 36.3121 (l) (2)–1, relating to the effective period of an amendment of an agreement.

(b) Form 2032 Supplement is the form prescribed for use in amending an agreement entered into by a domestic corporation as provided in § 36.3121 (l) (1)–1.

(c) A domestic corporation shall signify its desire to amend an agreement entered into by the corporation as provided in § 36.3121 (l) (1)–1 by executing and filing Form 2032 Supplement in triplicate with the district director for the district in which is located the principal place of business in the United States of the domestic corporation.

(d) Form 2032 Supplement shall be executed and filed in the manner and in conformity with the requirements prescribed in paragraph (c) of § 36.3121 (l) (1)–1 in respect of an agreement on Form 2032. Form 2032 Supplement executed and filed as provided in this paragraph shall be signed and dated by the district director, and, upon such signing, the Form 2032 Supplement so executed and filed will constitute an amendment of the agreement entered into on Form 2032. The district director will return one copy of the amendment to the domestic corporation, will transmit one copy to the Department of Health, Education, and Welfare, and will retain one copy (together with all related papers).

§ 36.3121 (l) (1)–3 *Effect of agreement*—(a) *Liability for amounts equivalent to tax*—(1) *In general.* A domestic corporation which has entered into an agreement (as provided in § 36.3121 (l) (1)–1), or any amendment thereof (as provided in § 36.3121 (l) (1)–2), incurs liability under the agreement in respect of certain remuneration paid by each foreign subsidiary named in the agreement, or any amendment thereof. Liability is incurred in respect of the remuneration paid to all those employees of the foreign subsidiaries who are citizens of the United States and who perform services outside the United States (other than services which constitute employment) for the foreign subsidiaries. However, liability is incurred only with respect to that portion of such remuneration paid by the foreign subsidiary which is attributable to services performed during the period for which the agreement is in effect with respect to such subsidiary, and then only to the extent that the remuneration would constitute wages if the services to which the remuneration is attributable were performed in the United States. Liability with respect to such remuneration is incurred in an amount equivalent to the sum of the employee and employer taxes which would be imposed by sections 3101 and 3111, respectively, if such remuneration constituted wages. If an individual performs services for more than one of the foreign subsidiaries named in an agreement, including any amendment thereof, such services are regarded as being performed in the employ of a single employer for purposes of determining the amount of the remuneration for such services which would constitue wages if the services were performed in the United States. See § 36.3121 (l) (9)–1, relating to the treatment of a domestic corporation as a separate entity in its capacity as a party to an agreement.

(2) *Examples.* The application of subparagraph (1) of this paragraph may be illustrated by the following examples:

Example (1). P, a domestic corporation, has entered into an agreement as provided in § 36.3121 (l) (1)–1, effective with respect to services performed on and after January 1, 1955. Three foreign subsidiaries, S–1, S–2, and S–3 are named in the agreement. A, a citizen of the United States, is employed during 1955 by S–1, S–2, and S–3, for the performance outside the United States of services covered by the agreement. In 1955 A is paid remuneration of $2,500 for such services by each of the foreign subsidiaries. The circumstances are such that the entire $7,500 would constitute wages if the services had been performed in the United States. However, only $4,200 of such remuneration would constitute wages if the services had been performed in the United States for a single employer, and it is with respect to this amount only that P incurs liability under its agreement.

Example (2). On August 1, 1955, P, the domestic corporation in the preceding example, amends its agreement to include therein its foreign subsidiary S–4. The amendment is in effect with respect to S–4 for the period beginning with October 1, 1955. B, a citizen of the United States, is employed by S–4 throughout 1955 for the performance of services outside the United States. B is paid remuneration of $500 in each month of 1955 for these services. The circumstances are such that the first $4,200 of such remuneration would constitute wages if the services had been performed in the United States, and, except for the $4,200 limitation, the remainder of such remuneration would constitute wages if the services had been so performed. P incurs no liability with respect to remuneration paid B for services performed for S–4 prior to October 1, 1955. However, P incurs liability under its agreement with respect to the $1,500 paid B in October, November, and December 1955, for services performed in these months. Since the remuneration paid to B for services performed during the first nine months of 1955 is not covered by the agreement, such remuneration is not taken into account in computing the $4,200 limitation or the liability under the agreement.

Example (3). Assume the same facts as in example (2) except that B's services for S–4 during December 1955 are performed in connection with the production or harvesting of crude gum (oleoresin) and that such services if performed within the United States would be excepted from employment. See section 3121 (b) (1) (A). Accordingly, P incurs no liability under the agreement with respect to the $500 paid in December 1955 for such services.

(3) *Determination of liability.* The amount of the liability referred to in subparagraph (1) of this paragraph incurred by a domestic corporation for any period shall be determined in the same manner as liability for the employee tax and for the employer tax imposed by the Federal Insurance Contributions Act is determined, pursuant to regulations relating to the taxes under such act as in effect for the same period, with respect to wages paid by an employer to an employee.

(b) *Liability for amounts equivalent to interest or penalties.* A domestic corporation which has entered into an agreement as provided in § 36.3121 (l) (1)–1 also incurs liability under the agreement for amounts equivalent to the amount of interest, additions to the taxes, additional amounts, and penalties which would be applicable if the remuneration for services covered by the agreement constituted wages.

(c) *Deductions from employees' remuneration.* There is no obligation to deduct, or cause to be deducted, from the remuneration of any employee of a foreign subsidiary any part of the amount due from a domestic corporation under its agreement. Whether such deduction shall be made is a matter for settlement between the employee and the domestic corporation or such other person as may be concerned.

(d) *Cross reference.* For other obligations of a domestic corporation under an agreement, see § 36.3121 (l) (10)–1.

§ 36.3121 (l) (2) *Statutory provisions; effective period of agreement.*

SEC. 3121. *Definitions.* * * *

(l) *Agreements entered into by domestic corporations with respect to foreign subsidiaries.* * * *

(2) *Effective period of agreement.* An agreement entered into pursuant to paragraph (1) shall be in effect for the period beginning with the first day of the calendar quarter in which such agreement is entered into or the first day of the succeeding calendar quarter, as may be specified in the agreement, but in no case prior to January 1, 1955; except that in case such agreement is amended to include the services performed for any other subsidiary and such amendment is executed after the first month following the first calendar quarter for which the agreement is in effect, the agreement shall be in effect with respect to service performed for such other subsidiary only after the calendar quarter in which such amendment is executed.

(Sec. 3121 (l) (2) as added by sec. 209, Social Security Amendments 1954)

§ 36.3121 (l) (2)–1 *Effective period of agreement*—(a) *In general.* An agreement entered into as provided in § 36.3121 (l) (1)–1 shall be in effect for the period beginning with the first day of the calendar quarter in which the agreement is signed by the district director, or the first day of the calendar quarter following the calendar quarter in which the agreement is signed by the district director, whichever is specified in the agreement. In no case, however, shall the agreement be effective for any calendar quarter which begins prior to January 1, 1955.

(b) *Amendment of agreement.* If an amendment on Form 2032 Supplement (filed by a domestic corporation to include in its agreement services performed for a foreign subsidiary not previously named therein) is signed by the district director within the quarter for which the agreement is first effective or within the first calendar month following such quarter, the agreement shall be effective with respect to the subsidiary named in the amendment as of the date such agreement first became effective. However, if the amendment is signed by the district director after the last day of the fourth month for which the agreement is in effect, such agreement shall be in effect with respect to the subsidiary named in the amendment for the period beginning with the first day of the calendar quarter following the calendar quarter in which the amendment is signed by the district director.

§ 36.3121 (l) (3) *Statutory provisions; termination of period by a domestic corporation.*

SEC. 3121. *Definitions.* * * *

(l) *Agreements entered into by domestic corporations with respect to foreign subsidiaries.* * * *

(3) *Termination of period by a domestic corporation.* The period for which an agreement entered into pursuant to paragraph (1) of this subsection is effective may be terminated with respect to any one or more of its foreign subsidiaries by the domestic corporation, effective at the end of a calendar quarter, upon giving two years' advance notice in writing, but only if, at the time of the receipt of such notice, the agreement has been in effect for a period of not less than eight years. The notice of termination may be revoked by the domestic corporation by giving, prior to the close of the calendar quarter specified in the notice of termination, a written notice of such revocation. Notice of termination or revocation thereof shall be filed in such form and manner as may be prescribed by regulations. Notwithstanding any other provision of this subsection, the period for which any such agreement is effective with respect to any foreign corporation shall terminate at the end of any calendar quarter in which the foreign corporation, at any time in such quarter, ceases to be a foreign subsidiary as defined in paragraph (8).

(Sec. 3121 (l) (3) as added by sec. 209, Social Security Amendments 1954)

§ 36.3121 (l) (3)–1 *Termination of agreement by domestic corporation or by reason of change in stock ownership*—(a) *Termination by domestic corporation.* (1) A domestic corporation which has entered into an agreement under section 3121 (l) (1) with respect to one or more of its foreign subsidiaries may terminate such agreement in part or in its entirety by giving (to the district director for the district in which is located the principal place of business in the United States of the domestic corporation) 2 years' advance notice in writing of its desire so to terminate the agreement at the end of a specified calendar quarter: *Provided*, That, at the time of the receipt of such notice by the district director, the agreement has been in effect with respect to the subsidiary or subsidiaries covered by the notice for at least 8 years. The notice of termination shall be signed and dated and shall show (i) the title of the officer authorized to sign the notice, (ii) the name, address, and identification number of the domestic corporation, (iii) the district director with whom the agreement was entered into, (iv) the name and address of each foreign subsidiary with respect to which the agreement is to be terminated, (v) the date on which the agreement became effective with respect to each such foreign subsidiary, and (vi) the date on which the agreement is to be terminated with respect to each such foreign subsidiary. The notice shall be submitted in duplicate and shall be accompanied by a certified copy of the minutes of the meeting of the board of directors of the domestic corporation, or other evidence, showing authorization for the notice of termination. No particular form is prescribed for the notice of termination. The district director will transmit one copy of the notice of termination to the Department of Health, Education, and Welfare.

(2) A notice of termination given by a domestic corporation in respect of any one or more of its foreign subsidiaries may be revoked by the corporation with respect to any such subsidiary or subsidiaries by giving, prior to the close of the calendar quarter specified in the notice of termination, written notice of revocation. The notice of revocation shall be filed with the district director with whom the notice of termination was filed. Such notice of revocation shall be signed and dated and shall show (i) the title of the officer authorized to sign the notice of revocation, (ii) the name, address, and identification number of the domestic corporation, (iii) the name and address of each foreign subsidiary with respect to which the notice of termination is revoked, and (iv) the date of the notice of termination to be revoked. The notice shall be submitted in duplicate and shall be accompanied by a certified copy of the minutes of the meeting of the board of directors of the domestic corporation, or other evidence, showing authorization for the notice of revocation. No particular form is prescribed for the notice of revocation. The district director will transmit one copy of the notice of revocation to the Department of Health, Education, and Welfare.

(b) *Termination by reason of change in stock ownership.* (1) The period for which an agreement entered into by a domestic corporation as provided in § 36.3121 (l) (1)–1 is in effect with respect to a foreign corporation is automatically terminated at the end of the calendar quarter in which the foreign corporation ceases, at any time in such quarter, to be a foreign subsidiary of the domestic corporation. See § 36.3121 (l) (8)–1, relating to definition of foreign subsidiary.

(2) A domestic corporation which has entered into an agreement as provided in § 36.3121 (l) (1)–1 shall furnish to the district director for the district in which is located its principal place of business in the United States written notification in the event that a foreign corporation named in the agreement, including any amendment thereof, as a foreign subsidiary of the domestic corporation ceases to be its foreign subsidiary. The written notification shall be furnished in duplicate on or before the last day

of the first month following the close of the calendar quarter in which the foreign corporation ceases, at any time in such quarter, to be a foreign subsidiary of the domestic corporation. Such notification shall be signed and dated by the president or other principal officer of the domestic corporation. The written notification shall show (i) the title of the officer signing the notice, (ii) the name, address, and identification number of the domestic corporation, (iii) the district director with whom the agreement was entered into, (iv) the date on which the agreement was entered into, (v) the name and address of the foreign corporation with respect to which the notification is furnished, and (vi) the date on which the foreign corporation ceased to be a foreign subsidiary of the domestic corporation. No particular form is prescribed for the written notification. The district director will transmit one copy of the written notification to the Department of Health, Education, and Welfare.

§ 36.3121 (l) (4) *Statutory provisions; termination of period by Secretary.*

SEC. 3121. *Definitions.* • • •

(l) *Agreements entered into by domestic corporations with respect to foreign subsidiaries.* • • •

(4) *Termination of period by Secretary.* If the Secretary or his delegate finds that any domestic corporation which entered into an agreement pursuant to this subsection has failed to comply substantially with the terms of such agreement, the Secretary or his delegate shall give such domestic corporation not less than sixty days' advance notice in writing that the period covered by such agreement will terminate at the end of the calendar quarter specified in such notice. Such notice of termination may be revoked by the Secretary or his delegate by giving, prior to the close of the calendar quarter specified in the notice of termination, written notice of such revocation to the domestic corporation. No notice of termination or of revocation thereof shall be given under this paragraph to a domestic corporation without the prior concurrence of the Secretary of Health, Education, and Welfare.

(Sec. 3121 (l) (4) as added by sec. 209, Social Security Amendments 1954)

§ 36.3121 (l) (4)–1 *Termination of agreement by Commissioner*—(a) *Notice of termination.* The period for which an agreement entered into with a domestic corporation as provided in § 36.3121 (l) (1)–1 is in effect may be terminated by the Commissioner, with the prior concurrence of the Secretary of Health, Education, and Welfare, upon a finding by the Commissioner that the domestic corporation has failed to comply substantially with the terms of the agreement. The Commissioner shall give the corporation not less than 60 days' advance notice in writing that the period for which the agreement is in effect will terminate at the end of the calendar quarter specified in the notice of termination.

(b) *Revocation of notice of termination.* A notice of termination given to a domestic corporation by the Commissioner may be revoked by the Commissioner, with the prior concurrence of the Secretary of Health, Education, and Welfare, by giving written notice of revocation to the corporation prior to the close of the calendar quarter specified in the notice of termination.

§ 36.3121 (l) (5) *Statutory provisions; no renewal of agreement.*

SEC. 3121. *Definitions.* • • •

(l) *Agreements entered into by domestic corporations with respect to foreign subsidiaries.* • • •

(5) *No renewal of agreement.* If any agreement entered into pursuant to paragraph (1) of this subsection is terminated in its entirety (A) by a notice of termination filed by the domestic corporation pursuant to paragraph (3), or (B) by a notice of termination given by the Secretary or his delegate pursuant to paragraph (4), the domestic corporation may not again enter into an agreement pursuant to paragraph (1). If any such agreement is terminated with respect to any foreign subsidiary, such agreement may not thereafter be amended so as again to make it applicable with respect to such subsidiary.

(Sec. 3121 (l) (5) as added by sec. 209, Social Security Amendments 1954)

§ 36.3121 (l) (5)–1 *Effect of termination*—(a) *Termination of entire agreement.* (1) If the effective period of an agreement entered into by a domestic corporation as provided in § 36.3121 (l) (1)–1 is terminated by the domestic corporation, pursuant to paragraph (a) of § 36.3121 (l) (3)–1, with respect to all foreign subsidiaries named in the agreement, including any amendment thereof, an agreement may not again be entered into by the domestic corporation under the provisions of section 3121 (l) (1).

(2) If the effective period of an agreement entered into by a domestic corporation as provided in § 36.3121 (l) (1)–1 is terminated by the Commissioner, pursuant to paragraph (a) of § 36.3121 (l) (4)–1, an agreement may not again be entered into by the domestic corporation under the provisions of section 3121 (l) (1).

(3) If the effective period of an agreement entered into by a domestic corporation as provided in § 36.3121 (l) (1)–1 is terminated automatically by reason of a change in stock ownership (see paragraph (b) of § 36.3121 (l) (3)–1) with respect to all foreign corporations named in the agreement, including any amendment thereof, a new agreement may be entered into by the domestic corporation, as provided in § 36.3121 (l) (1)–1, with respect to any foreign corporation which is a foreign subsidiary of the domestic corporation.

(b) *Partial termination of agreement.* (1) If the effective period of an agreement entered into by a domestic corporation as provided in § 36.3121 (l) (1)–1 is terminated by the domestic corporation, pursuant to paragraph (a) of § 36.3121 (l) (3)–1, with respect to one or more foreign subsidiaries named in the agreement, including any amendment thereof, the period for which the agreement is in effect will continue with respect to any other foreign subsidiary or subsidiaries named in the agreement (or amendment). However, the agreement may not thereafter be amended to include any foreign subsidiary with respect to which the effective period of the agreement has been terminated.

(2) If the effective period of an agreement entered into by a domestic corporation as provided in § 36.3121 (l) (1)–1 is terminated automatically by reason of a change in stock ownership (see paragraph (b) of § 36.3121 (l) (3)–1) with respect to a foreign corporation which has ceased to be a foreign subsidiary of the domestic corporation, but the period for which the agreement is in effect continues with respect to one or more other foreign subsidiaries, the agreement may not thereafter be amended to include such foreign corporation even though the foreign corporation may again become a foreign subsidiary of the domestic corporation.

§ 36.3121 (l) (6) *Statutory provisions; deposits in trust fund.*

SEC. 3121. *Definitions.* • • •

(l) *Agreements entered into by domestic corporations with respect to foreign subsidiaries.* • • •

(6) *Deposits in trust fund.* For purposes of section 201 of the Social Security Act, relating to appropriations to the Federal Old-Age and Survivors Insurance Trust Fund, such remuneration—

(A) Paid for services covered by an agreement entered into pursuant to paragraph (l) as would be wages if the services constituted employment, and

(B) As is reported to the Secretary or his delegate pursuant to the provisions of such agreement or of the regulations issued under this subsection, shall be considered wages subject to the taxes imposed by this chapter [chapter 21, I. R. C. 1954].

(Sec. 3121 (l) (6) as added by sec. 209, Social Security Amendments 1954)

§ 36.3121 (l) (7) *Statutory provisions; overpayments and underpayments.*

SEC. 3121. *Definitions.* • • •

(l) *Agreements entered into by domestic corporations with respect to foreign subsidiaries.* • • •

(7) *Overpayments and underpayments.* (A) If more or less than the correct amount due under an agreement entered into pursuant to this subsection is paid with respect to any payment of remuneration, proper adjustments with respect to the amounts due under such agreement shall be made, without interest, in such manner and at such times as may be required by regulations prescribed by the Secretary or his delegate.

(B) If an overpayment cannot be adjusted under subparagraph (A), the amount thereof shall be paid by the Secretary or his delegate, through the Fiscal Service of the Treasury Department, but only if a claim for such overpayment is filed with the Secretary or his delegate within two years from the time such overpayment was made.

(Sec. 3121 (l) (7) as added by sec. 209, Social Security Amendments 1954)

§ 36.3121 (l) (7)–1 *Overpayments and underpayments*—(a) *Adjustments*—(1) *In general.* Errors in the payment of amounts for which liability equivalent to the employee and employer taxes with respect to any payment of remuneration is incurred by a domestic corporation pursuant to its agreement are adjustable by the domestic corporation in certain cases without interest. However, not all corrections made under this section constitute adjustments within the meaning of the regulations in this part. The various situations in which such corrections constitute adjustments are set forth in subparagraphs (2) and (3) of this paragraph. All corrections in respect of underpayments and all adjustments or credits in respect of overpayments made under this section must be reported on a return filed by the domestic corporation under the regulations in this part and not on a return filed with respect to the employee and employer taxes imposed by sections 3101 and 3111, respectively. Every return on which such a correction (by adjustment, credit, or otherwise) is reported pursuant to this section must have securely attached as a part thereof a statement explaining the error in respect of which the correction is made, designating the calendar quarter in which the error was ascertained, and setting forth such other information as would be required if the correction were in respect of an overpayment or underpayment of taxes under the Federal Insurance Contributions Act. An error is ascertained when the domestic corporation has sufficient knowledge of the error to be able to correct it. An underpayment may not be corrected under this section after receipt from the district director of written notification of the amount due and demand for payment thereof, but the amount shall be paid in accordance with such notification.

(2) *Underpayments.* If a domestic corporation fails to report, on a return filed under the regulations in this part, all or any part of the amount for which liability equivalent to the employee and employer taxes is incurred under its agreement with respect to any payment of remuneration, the domestic corporation shall adjust the underpayment by reporting the additional amount due as an adjustment on a return or supplemental return filed on or before the last day on which the return for the return period in which the error is ascertained is required to be filed. The amount of each underpayment adjusted in accordance with this subparagraph shall be paid to the district director, without interest, at the time fixed for reporting the adjustment. If an adjustment is reported pursuant to this subparagraph but the amount thereof is not paid when due, interest thereafter accrues.

(3) *Overpayments.* If a domestic corporation pays more than the amount for which liability equivalent to the employee and employer taxes is incurred under its agreement with respect to any payment of remuneration, the domestic corporation may correct the error, subject to the requirements and under the conditions stated in this paragraph, by deducting the amount of the overpayment from the amount of liability reported on a return filed by the domestic corporation, except that—

(i) A correction may not be made in respect of any part of an overpayment which was collected from an individual by reason of the agreement unless the domestic corporation (*a*) has repaid the amount so collected to the individual, has secured the written receipt of the individual showing the date and amount of the repayment, and retains such receipt as a part of its records, or (*b*) has reimbursed the individual by reducing the amounts which otherwise should have been deducted from his remuneration by reason of the agreement; and

(ii) A correction may not be made in one calendar year in respect of any part of an overpayment which was collected from an individual in a prior calendar year unless the domestic corporation has secured the written statement of the individual showing that he has not claimed and will not claim refund or credit of the amount so collected, and retains such receipt as a part of its records. See § 31.6413 (c)–1 of this chapter, relating to claims for special credit or refund.

The correction constitutes an adjustment under this subparagraph only if it is reported on the return for the period in which the error is ascertained or on the return for the next following period, and then only if the correction is reported within the statutory period of limitation upon refund or credit of overpayments of amounts due under the agreement. See paragraph (b) (2) (iii) of this section relating to such statutory period. A claim for credit or refund may be filed in accordance with the provisions of paragraph (b) (2) of this section for any overpayment of an amount due under the agreement which is not adjusted under this subparagraph.

(b) *Errors not adjustable*—(1) *Underpayments.* If a domestic corporation fails to report all or any part of the amount for which liability equivalent to the employee and employer taxes is incurred under its agreement with respect to any payment of remuneration, and such underpayment is not reported as an adjustment within the time prescribed by paragraph (a) (2) of this section, the amount of such underpayment shall be reported on the domestic corporation's next return, or shall be reported immediately on a supplemental return for the return period in which such payment of remuneration was made. The reporting of an underpayment under this subparagraph does not constitute an adjustment without interest.

(2) *Overpayments.* (i) If more than the correct amount due from a domestic corporation pursuant to its agreement (including the amount of any interest or addition) is paid to the district director and the amount of the overpayment is not adjusted under paragraph (a) (3) of this section, the domestic corporation may file a claim for refund or credit. Except as otherwise provided in this subparagraph, such claim shall be made in the same manner and subject to the same conditions as to allowance of the claim as would be the case if the claim were in respect of an overpayment of taxes under the Federal Insurance Contributions Act. Refund or credit of an amount erroneously paid by a domestic corporation under its agreement may be allowed only to the domestic corporation.

(ii) Any claim filed under this subparagraph shall be plainly marked "Claim under section 3121 (l)."

(iii) No refund or credit of an overpayment of the amount due from a domestic corporation under its agreement will be allowed after the expiration of 2 years after the date of payment to the district director of such overpayment, except upon one or more of the grounds set forth in a claim filed prior to the expiration of such 2-year period.

(c) *Deductions from employees' remuneration.* If a domestic corporation deducts, or causes to be deducted, from the remuneration of an individual for services covered by the agreement amounts which are more or less than the employee tax which would be deductible therefrom if such remuneration constituted wages, any repayment to the individual (except to the extent otherwise provided in this section), or further collection from the individual, in respect of such deduction is a matter for settlement between the individual and the domestic corporation or such other person as may be concerned.

§ 36.3121 (l) (8) *Statutory provisions; definition of foreign subsidiary.*

SEC. 3121. *Definitions.* • • •

(l) *Agreements entered into by domestic corporations with respect to foreign subsidiaries.* • • •

(8) *Definition of foreign subsidiary.* For purposes of this subsection • • • a foreign subsidiary of a domestic corporation is—

(A) A foreign corporation more than 50 percent of the voting stock of which is owned by such domestic corporation; or

(B) A foreign corporation more than 50 percent of the voting stock of which is owned by the foreign corporation described in subparagraph (A).

(Sec. 3121 (l) (8) as added by sec. 209, Social Security Amendments 1954)

§ 36.3121 (l) (8)–1 *Definition of foreign subsidiary.* (a) A foreign corporation is a foreign subsidiary of a domestic corporation, within the meaning of the regulations in this part, if—

(1) More than 50 percent of the voting stock of the foreign corporation is owned by the domestic corporation; or

(2) More than 50 percent of the voting stock of the foreign corporation is owned by a second foreign corporation and more than 50 percent of the voting stock of the second foreign corporation is owned by the domestic corporation.

(b) The application of paragraph (a) of this section may be illustrated by the following examples:

Example (1). P, a domestic corporation, owns 51 percent of the voting stock of S–1, a foreign corporation. S–1 owns 51 percent of the voting stock of S–2, a foreign corporation. S–2 owns 51 percent of the voting stock of S–3, a foreign corporation. S–1 and S–2 are foreign subsidiaries of P for purposes of the regulations in this part. Since neither P nor S–1 owns more than 50 percent of the voting stock of S–3, S–3 is not a foreign subsidiary of P within the meaning of these regulations.

Example (2). Assume the same facts as those stated in example (1) except that S–1 transfers to P one-half of its ownership of the voting stock of S–2, P owns no other voting stock of S–2. Accordingly, after the transfer, P and S–1 together own more than 50 percent of the voting stock of S–2, but neither P nor S–1 alone owns more than 50 percent of such stock. S–2 ceases to be a foreign subsidiary of P when such transfer is effected.

(c) The term "stock", as used in the regulations in this part, has the meaning assigned by paragraph (7) of section

7701 (a). Section 7701 (a) (7) provides as follows:

SEC. 7701. *Definitions.* (a) When used in this title [Internal Revenue Code of 1954], where not otherwise distinctly expressed or manifestly incompatible with the intent thereof—

• • • • • •

(7) *Stock.* The term "stock" includes shares in an association, joint-stock company, or insurance company.

(d) Ownership of the voting stock of a foreign corporation which is a foreign subsidiary of a domestic corporation may be transferred from the domestic corporation to another foreign subsidiary of the domestic corporation, from one foreign subsidiary of the domestic corporation to another, or from a foreign subsidiary of the domestic corporation to the domestic corporation itself without affecting the status of the foreign corporation as a foreign subsidiary of the domestic corporation, provided that more than 50 percent of the voting stock of such foreign corporation is at all times owned either (1) by the domestic corporation, or (2) by a foreign corporation more than 50 percent of the voting stock of which is owned by the domestic corporation.

§ 36.3121 (l) (9) *Statutory provisions; domestic corporation as separate entity.*

SEC. 3121. *Definitions.* • • •

(l) *Agreements entered into by domestic corporations with respect to foreign subsidiaries.* • • •

(9) *Domestic corporation as separate entity.* Each domestic corporation which enters into an agreement pursuant to paragraph (1) of this subsection shall, for purposes of this subsection and section 6413 (c) (2) (C), relating to special refunds in the case of employees of certain foreign corporations, be considered an employer in its capacity as a party to such agreement separate and distinct from its identity as a person employing individuals on its own account.

(Sec. 3121 (l) (9) as added by sec. 209, Social Security Amendments 1954)

§ 36.3121 (l) (9)–1 *Domestic corporation as separate entity.* A domestic corporation which enters into an agreement as provided in § 36.3121 (l) (1)–1 shall, for purposes of the regulations in this part and for purposes of section 6413 (c) (2) (C), relating to special credits or refunds, be considered an employer in its capacity as a party to such agreement separate and apart from its identity as an employer incurring liability for the employee tax and employer tax on the wages of its own employees. Thus, if a citizen of the United States performs services in employment for the domestic corporation and at any time within the same calendar year performs services covered by the agreement as an employee of one or more foreign subsidiaries named therein, the limitation on wages provided in section 3121 (a) (1) has application separately as to the wages for employment performed in the employ of the domestic corporation and as to the remuneration for services covered by the agreement performed in the employ of such foreign subsidiary or subsidiaries. All services covered by the agreement whether performed in the employ of one or more than one such foreign subsidiary are regarded for purposes of the wage limitation as having been performed in the employ of the domestic corporation in its separate capacity as a party to the agreement. Similarly, any remuneration for such services which, if the services were performed in the United States, would be excluded from wages unless a certain amount of such remuneration is paid by a single employer within a specified period (for example, remuneration for agricultural labor) is regarded, for purposes of determining whether the domestic corporation incurs liability under its agreement with respect to such remuneration, as having been paid by the domestic corporation in its separate capacity as a party to the agreement. All remuneration received by an employee for services covered by the agreement is deemed, for purposes of the special credit or refund provisions contained in section 6413 (c), to have been received from the domestic corporation as an employer in its separate capacity as a party to the agreement.

§ 36.3121 (l) (10) *Statutory provisions; regulations.*

SEC. 3121. *Definitions.* • • •

(l) *Agreements entered into by domestic corporations with respect to foreign subsidiaries.* • • •

(10) *Regulations.* Regulations of the Secretary or his delegate to carry out the purposes of this subsection shall be designed to make the requirements imposed on domestic corporations with respect to services covered by an agreement entered into pursuant to this subsection the same, so far as practicable, as those imposed upon employers pursuant to this title [Internal Revenue Code of 1954] with respect to the taxes imposed by this chapter [chapter 21, I. R. C. 1954].

(Sec. 3121 (l) (10) as added by sec. 209, Social Security Amendments, 1954)

§ 36.3121.(l) (10)–1 *Requirements in respect of liability under agreement.* To the extent not inconsistent with, or otherwise provided in, the regulations in this part, the requirements and duties (relating to identification number, account numbers, wage information statements to employees, record keeping, etc.) imposed on an employer for any period with respect to the taxes imposed by the Federal Insurance Contributions Act are hereby made applicable to a domestic corporation with respect to its obligations and liabilities, for the same period, under an agreement entered into as provided in § 36.3121 (l) (1)–1.

§ 36.3121 (l) (10)–2 *Identification*—(a) *Domestic corporation.* A domestic corporation which has secured, or is required to secure, an identification number as an employer having in its employ one or more individuals in employment for wages is not required to secure an identification number under the regulations in this part.

(b) *Employees.* Every employee performing services covered by an agreement shall have the same duties in respect of an account number as would be the case if the employee were performing services in employment for the domestic corporation.

§ 36.3121 (l) (10)–3 *Returns.* (a) The forms prescribed for use in making returns of the taxes imposed by the Federal Insurance Contributions Act (except any forms particularly prescribed for use by household employers or by employers filing returns in Puerto Rico or the Virgin Islands) shall be used by a domestic corporation in making returns of its liability under an agreement entered into as provided in § 36.3121 (l) (1)–1. Returns of such liability shall be made separate and apart from any returns required of the domestic corporation in respect of the taxes imposed by the Federal Insurance Contributions Act. The domestic corporation shall plainly mark "3121 (l) Agreement" at the top of each return, each detachable schedule thereof, and each paper or document constituting a part of the return, filed by the domestic corporation pursuant to the regulations in this part. Returns required under the regulations in this part shall be made by the domestic corporation as if all services covered by the agreement, whether performed in the employ of one or more than one foreign subsidiary, were performed in the employ of the domestic corporation as an employer in its separate capacity as a party to the agreement.

(b) Each return required under the regulations in this part must be filed on or before the last day of the month following the period for which the return is made.

§ 36.3121 (l) (10)–4 *Payment of amounts equivalent to tax.* A domestic corporation which has entered into an agreement as provided in § 36.3121 (l) (1)–1 is not required to make deposits with a Federal Reserve bank or authorized commercial bank of any amount for which liability is incurred under its agreement.

[F. R. Doc. 55–4296; Filed, May 26, 1955; 8:48 a. m.]

Office of the Secretary

[31 CFR Part 54]

GOLD REGULATIONS

RECORD RETENTION REQUIREMENT

Notice is hereby given that the Secretary of the Treasury proposes to amend the Gold Regulations as hereinafter set forth.

Interested persons may participate in the making of the proposed rules by submitting their views and data or arguments in writing to the Director of the Mint, Treasury Department, Washington 25, D. C., prior to June 27, 1955. All communications should be submitted in quadruplicate.

The amendment will provide that persons holding licenses or acquiring, holding, or disposing of gold, pursuant to the general authorizations in §§ 54.18 and 54.21 of the Gold Regulations, shall retain the records which they are required to keep for five years instead of three years as is presently the requirement. This amendment will conform the regulations to the act of September

14, 1954, which extended the general statute of limitations, which is applicable to offenses resulting from violations of the Gold Regulations, from three years to five years. The amendment is as follows:

The first sentence of § 54.26 (b) of the Gold Regulations as amended effective July 14, 1954, is amended to read as follows:

(b) Every person holding a license issued under § 54.25 (a), or acquiring, holding or disposing of gold pursuant to the authorizations in §§ 54.18 and 54.21, shall keep full and accurate records of all his operations and transactions with respect to gold, and such records shall be available for examination by a representative of the Treasury Department until the end of the fifth calendar year (or if such person's accounts are kept on a fiscal year basis, until the end of the fifth fiscal year) following such operations or transactions. • • •

Dated: May 23, 1955.

[SEAL] H. CHAPMAN ROSE,
Acting Secretary of the Treasury.

[F. R. Doc. 55–4315; Filed, May 26, 1955; 8:51 a. m.]

DEPARTMENT OF AGRICULTURE

Agricultural Marketing Service

[7 CFR Part 201]

RULES AND REGULATIONS OF THE SECRETARY OF AGRICULTURE UNDER THE FEDERAL SEED ACT

NOTICE OF PUBLIC HEARINGS ON PROPOSED AMENDMENTS

Pursuant to the provisions of section 402 of the Federal Seed Act approved August 9, 1939 (53 Stat. 1275), notice is hereby given of intention to promulgate amendments to the rules and regulations of the Secretary of Agriculture. There are under consideration amendments proposed by the United States Department of Agriculture and amendments proposed by the American Seed Trade Association. Public hearings with reference thereto will be held on June 20, 1955, in the conference room, fourth floor, Ross Building, 209 Southwest Fifth Avenue, Portland, Oregon; June 24, 1955, in room 200, Hotel Peabody, Memphis, Tennessee; and July 8, 1955, in the auditorium of the South Building, United States Department of Agriculture, Fourteenth and Independence Avenue SW., Washington, D. C., beginning at 9:30 in the morning of these days.

Interested persons are invited to attend these hearings and to offer comments or suggestions with reference to said proposals. Any comments or suggestions bearing on the proposals which cannot be made or presented in person at the hearings may be transmitted by mail, addressed to the Seed Branch, Grain Division, Agricultural Marketing Service, United States Department of Agriculture, Washington 25, D. C., and will be considered if received on or before the 15th day of July 1955.

Mr. W. A. Davidson, Seed Branch, Grain Division, Agricultural Marketing Service, is hereby designated as the presiding officer who shall conduct the aforesaid hearings in the place and stead of the Secretary, with power to do all things necessary and appropriate to the proper conduct of such hearings, and Mr. Clyve Jackson, Grain Division, Agricultural Marketing Service, will serve as his alternate.

Amendments proposed by the United States Department of Agriculture:

1. Section 201.2 *Terms defined* is amended in the following respects:

a. Paragraph (h) is amended to read as follows:

(h) *Agricultural seeds.* The term "agricultural seeds" means the following kinds of grass, forage, and field crop seeds:

Alfalfa—Medicago sativa L.
Alfilerla—Erodium cicutarium (L.) L'her.
Alyceclover—Alsycarpus vaginalis (L.) DC.
Bahiagrass—Paspalum notatum Fluegge.
Barley—Hordeum vulgare L.
Bean, adzuki—Phaseolus angularis Willd.
Bean, field—Phaseolus vulgaris L.
Bean, mung—Phaseolus aureus Roxb.
Bean—(see Velvetbean).
Beet, field excluding sugar beet—Beta vulgaris L.
Beggarweed—desmodium tortuosum (Sev.) DC.
Bentgrass or
Bentgrass, colonial—Agrostis tenuis Sibth.
Bentgrass, creeping—Agrostis palustris Huds.
Bentgrass, velvet—Agrostis canina L.
Bermuda-grass—Cynodon dactylon (L.) Pers.
Bluegrass, annual—Poa annua L.
Bluegrass, bulbous—Poa bulbosa L.
Bluegrass, Canada—Poa compressa L.
Bluegrass, Kentucky—Poa pratensis L.
Bluegrass, Nevada—Poa nevadensis Vasey.
Bluegrass, rough—Poa trivialis L.
Bluegrass, Texas—Poa arachnifera Torr.
Bluegrass, wood—Poa nemoralis L.
Bluestem, big—Andropogon furcatus Muhl.
Bluestem, little—Andropogon scoparius Michx.
Bluestem, sand—Andropogon hallii Hack.
Bluestem, yellow—Andropogon ischaemum.
Brome, mountain—Bromus marginatus Nees.
Brome, smooth—Bromus inermis Leyss.
Broomcorn—Sorghum vulgare var. technicum (Koern.) Jav.
Buckwheat — Fagopyrum esculentum Moench (F. culgare Hill.).
Buffalograss—Buchloe dactyloides (Nutt.) Engl.
Buffelgrass—Pennisetum ciliare (L.) Link.
Bur-clover, California—Medicago hispida Gaertn.
Bur-clover, spotted—Medicago arabica (L.) DC.
Burnet, little—Sanguisorba minor Scop.
Buttonclover—Medicago orbicularis (L.) All.
Canarygrass—Phalaris canariensis L.
Canarygrass, reed—Phalaris arundinacea L.
Carpetgrass—Axonopus affinis Chase.
Castorbean—Ricinum communis (L.)
Chickpea—Cicer arietinum L.
Clover, alsike—Trifolium hybridum L.
Clover, berseem—Trifolium alexandrinum L.
Clover, cluster—Trifolium glomeratum L.
Clover, crimson—Trifolium incarnatum L.
Clover, large hop—Trifolium procumbens L.
Clover, small hop (suckling)—Trifolium dubium Sibth.
Clover, ladino—Trifolium repens L.
Clover, lappa—Trifolium lappaceum L.
Clover, Persian—Trifolium resupinatum L.
Clover, red or
Red clover, mammoth—Trifolium pratense L.
Red clover, medium—Trifolium pratense L.
Clover, rose—Trifolium hirtum All.
Clover, strawberry—Trifolium fragigerum L.
Clover, sub (subterranean)—Trifolium subterraneum L.
Clover, white—Trifolium repens L. (also see Clover, ladino).
Clover, (also see Alyceclover, Bur-clover, Buttonclover, Sourclover, Sweetclover).
Corn, field—Zea mays L.
Corn, pop—Zea mays var. everta (Sturt.) Bailey.
Cotton—Gossypium spp.
Cowpea—Vigna sinensis (Torner) Savi.
Crested dogtail—Cynosurus cristatus L.
Crotalaria, lance—Crotalaria lanceolata E. Mey.
Crotolaria, showy—Crotalaria spectabilis Roth.
Crotalaria, slenderleaf—Crotolaria intermedia Kotschy.
Crotalaria, striped—Crotalaria striata DC.
Crotalaria, Sunn—Crotalaria juncea L.
Dallisgrass—Paspalum dilatatum Poir.
Dichondra repens Forst.
Dropseed, sand—Sporobolus cryptandrus (Torr.) A. Gray.
Emmer—Triticum dicoccum Schrank.
Fescue, Chewings—Festuca rubra var. commutata Gaud.
Fescue, hair—Festuca capillata Lam.
Fescue, meadow—Festuca elatior L.
Fescue, red—Festuca rubra L.
Fescue, sheep—Festuca ovina L.
Fescue, tall—Festuca arundinacea Schreb.
Flax—Linum usitatissimum L.
Grama, blue—Bouteloua gracilis (H. B. K.) Lag.
Grama, side-oats—Bouteloua curtipendula (Michx.) Torr.
Guineagrass—Panicum maximum Jacq.
Hardinggrass—Phalaris tuberosa var. stenoptera (Hack.) Hitche.
Hemp—Cannabis sativa L.
Indiangrass, yellow—Sorghastrum nutans (L.) Nash.
Indigo, hairy—Indigofera hirsuta (L.)
Japanese lawngrass—Zoysia japonica Steud.
Johnsongrass—Sorghum halepense (L.) Pers.
Kudzu—Pueraria thunbergiana (Sieb. and Zucc.) Benth.
Lespedeza, Korean—Lespedeza stipulacea Maxim.
Lespedeza, sericea or Chinese—Lespedeza cuneata Dumont) D. Don. [L. sericea (Thunb.) Miq.]
Lespedeza, Siberian—Lespedeza hedysaroides (Pallas) Ricker.
Lespedeza, striate—Lespedeza striata (Thunb.) Hook. and Arn.
Lovegrass, sand—Eragrostis trichodes (Nutt.) Wood.
Lovegrass, weeping—Eragrostis curvula (Schrad.) Nees.
Lupine, blue—Lupinus angustifolius L.
Lupine, white—Lupinus albus L.
Lupine, yellow—Lupinus luteus L.
Manilagrass—Zoysia matrella (L.) Merr.
Meadow foxtail—Alopecurus pratensis L.
Medick, black—Medicago lupulina L.
Millet, browntop—Panicum ramosum L.
Millet, foxtail—Setaria italica (L.) Beauv.
Millet, Japanese—Echinochloa crusgalli var. frumentacea (Roxb.) Wight.
Millet, pearl—Pennisetum glaucum (L.) R. Br.
Millet, proso—Panicum miliaceum L.
Molassesgrass—Melinis minutiflora Beauv.
Mustard, black—Brassica nigra Koch.
Mustard, white—Brassica hirta Moench.
Napiergrass—Pennisetum purpureum Schumach.
Oat—Avena spp.
Oatgrass, tall—Arrhenatherum elatius (L.) Mert. and Koch.
Orchardgrass—Dactylis glomerata L.
Panicgrass, blue—Panicum antidotale Retz.
Peanut—Arachis hypogaea L.
Pea, field—Pisum sativum var. arvense (L.) Poir.
Poa trivialis—(see Bluegrass, rough).
Rape, annual—Brassica napus var. annua Koch.
Rape, bird—Brassica campestris L.

Rape, turnip—Brassica campestris vars. L.
Rape, winter—Brassica napus var. biennis (Schubl. and Mart.) Reichb.
Redtop—Agrostis alba L.
Rescuegrass—Bromus catharticus Vahl.
Rhodesgrass—Chloris gayana Kunth.
Rice—Oryza sativa L.
Ricegrass, Indian—Oryzopsis hymenoides (Roem. and Schult.) Ricker.
Roughpea—Lathyrus hirstus L.
Rye—Secale cereale L.
Ryegrass or
Ryegrass, Italian—Lolium multiflorum Lam.
Ryegrass, perennial—Lolium perenne L.
Safflower—Carthamus tinctorius L.
Sainfoin—Onobrychis viciaefolia Scop.
Sesame—Sesamum orientale L.
Sesbania—Sesbania exaltata (Raf.) Torr.
Smilo—Oryzopsis miliacea (L.) Benth. and Hook.
Sorghum—Sorghum vulgare Pers.
Sourclover—Melilotus indica (L.) All.
Soybean—Glycine max (L.) Merrill [Soja max (L.) Piper].
Spelt—Triticum spelta L.
Sudangrass—Sorghum vulgare var. sudanense (Piper) Hitchc.
Sunflower—Helianthus annuus L.
Sweetclover or
Sweetclover, white—Melilotus alba Desr.
Sweetclover, yellow—Melilotus officinalis (L.) Lam.
Sweet vernalgrass—Anthoxanthum odoratum L.
Switchgrass—Panicum virgatum L.
Timothy—Phleum pratense L.
Trefoil, big—Lotus uliginosus Schkuhr.
Trefoil, birdsfoot—Lotus corniculatus L.
Vaseygrass—Paspalum urvillei Steud.
Veldtgrass—Ehrharta calycina J. E. Smith.
Velvetbean—Stizolobium deeringianum Bort.
Velvetgrass—Holcus lanatus L.
Vetch or
Vetch, common—Vicia sativa L.
Vetch, hairy—Vicia villosa Roth.
Vetch, Hungarian—Vicia pannonica Grantz.
Vetch, monantha—Vicia articulata Hornem. (V. monantha Desf.)
Vetch, narrowleaf—Vicia angustifolia (L.) Reich.
Vetch, purple—Vicia athopurpurea Desf.
Vetch, woolypod—Vicia dasycarpa Ten.
Wheat or
Wheat, common—Triticum aestivum L. (T. vulgare Vill.)
Wheat, club—Triticum compactum Host.
Wheat, durum—Triticum durum Desf.
Wheat, Polish—Triticum polonicum L.
Wheat, poulard—Triticum turgidum L.
Wheatgrass, crested or fairway crested—Agropyron cristatum (L.) Gaertn.
Wheatgrass, crested or standard crested—Agropyron desertorum (Fisch.) Schult.
Wheatgrass, intermediate—Agropyron intermedium (Host) Beauv.
Wheatgrass, pubescent—Agropyron trichophorum (Link) Richt.
Wheatgrass, slender—Agropyron pauciflorum (Schwein.) Hitchc. (A. Trachycaulum Steud.).
Wheatgrass, tall—Agropyron elongatum (Host) Beauv.
Wheatgrass, western—Agropyron smithii Rydb.
Wild-rye, Canada—Elymus canadensis L.
Wild-rye, Russian—Elymus junceus Fisch.
Zoysia japonica—(see Japanese lawngrass)
Zoysia matrella—(see Manila grass)

b. Paragraph (i) is amended to read as follows:

(i) *Vegetable seeds.* The term "vegetable seeds" means the seeds of the following kinds that are or may be grown in gardens or on truck farms and are or may be generally known and sold under the name of vegetable seeds:

Artichoke—Cynara scolymus L.
Asparagus—Asparagus officinalis L.
Asparagusbean—Vigna sesquipedalis (L.) Fruwirth.
Bean—Phaseolus vulgaris L.
Bean, lima—Phaseolus lunatus var. macrocarpus Van Eseltine.
Bean, runner—Phaseolus coccineus L.
Beet—Beta vulgaris L.
Broadbean—Vicia faba L.
Broccoli—Brassica oleraca var. botrytis L.
Brussels sprouts—Brassica oleracea var. gemmifera Zenker.
Cabbage—Brassica olearacea var. capitata L.
Cantaloupe—(see muskmelon)
Cardoon—Cynara cardunculus L.
Carrot—Daucus carota L.
Cauliflower—Brassica oleracea var. botrytis L.
Celeriac—Apium graviolens var. rapaceum DC.
Celery—Apium graveolens var. dulce (Mill.) Pers.
Chard, Swiss—Beta vulgaris var. cicla L.
Chicory—Cichorium intybus L.
Chinese cabbage—Brassica pekinensis (Lour.) Rupr.
Citron—Citrullus vulgaris Schrad.
Collards—Brassica oleracea var. acephala DC.
Corn, sweet—Zea mays L.
Cornsalad—Valerianella locusta var. olitoria Pall.
Cowpea—Vigna sinensis (Torner) Savi.
Cress, garden—Lepidium sativum L.
Cress, water—Rorippa nasturtium-aquaticum (L.) Britt. and Rendle.
Cucumber—Cucumis sativus L.
Dandelion—Taraxacum officinale Weber.
Eggplant—Solanum melongena var. esculentum Nees.
Endive—Cichorium endivia L.
Kale—Brassica oleracea var. acephala DC.
Kale, Chinese—Brassica oleracea var. alboglabra (Bailey) Musil.
Kohlrabi—Brassica oleracea var. gongylodes L.
Leek—Allium porrum L.
Lettuce—Lactuca sativa L.
Muskmelon—Cucumis melo L.
Mustard—Brassica juncea (L.) Coss.
Mustard, spinach—Brassica perviridis Bailey.
Okra—Hibiscus esculentus L.
Onion—Allium cepa L.
Onion, Welsh—Allium fistulosum L.
Pak-choi—Brassica chinensis L.
Parsley—Petroselinum hortense Hoffm.
Parsnip—Pastinaca sativa L.
Pea—Pisum sativum L.
Pepper—Capsicum spp.
Pumpkin—Cucurbita pepo L., C. maschota Duchesne and C. maxima Duchesne.
Radish—Raphanus sativus L.
Rhubarb—Rheum rhaponticum L.
Rutabaga—Brassica napus var. napobrassica (L.) Reichb.
Salsify—Tragopogon porrifolius L.
Sorrel—Rumex acetosa L.
Soybean—Glycine max (L.) Merrill [Soja max (L.) Piper].
Spinach—Spinacia oleracea L.
Spinach, New Zealand—Tetragonia expansa Thunb.
Squash—Cucurbita Pepo L., C. moschata Duchesne and C. maxima Duchesne.
Tomato—Lycopersicon asculentum Mill.
Tomato, husk—Physalis pubescens L.
Turnip—Brassica rapa L.
Watermelon—Citrullus vulgaris Schrad.

c. Paragraph (y) is amended to read as follows:

(y) *Hybrid.* The term "hybrid" means the first generation seed of a cross produced by controlling the pollination and by combining (1) two, three, or four inbred lines; (2) one inbred or a single cross with an open-pollinated variety; or (3) two varieties or species, except open-pollinated varieties of corn (Zea mays). The second generation and subsequent generations from such crosses shall not be regarded as hybrids. Hybrid designations shall be treated as variety names.

2a. In § 201.5 (a) insert "orchardgrass," after "alfalfa," and insert "white clover," after "red clover,".

b. Delete paragraph (c) thereof.

3. In § 201.7 delete the phrase "received from the grower" from the first sentence and the phrase "and the sample" from the last sentence, and add the following additional sentence: "A copy of the grower's declaration and a sample of the seed shall be retained by the grower."

4. Amend § 201.12 to read as follows:

§ 201.12 *Name of kind and variety.* The representation of kind or kind and variety shall be confined to the name of the kind or kind and variety determined in accordance with § 201.34. The name shall not have affixed thereto words or terms that create a misleading impression as to the history or characteristics of the kind or variety.

5. In § 201.14 (a) insert "orchardgrass," after "alfalfa," and insert "white clover," after "red clover,".

6. Amend § 201.16 by adding at the end of the section the following sentence: "If in the course of such transportation, or thereafter, the seed is diverted to another State of destination, the person or persons responsible for such diversion shall cause the seed to be relabeled with respect to noxious-weed seed content, if necessary, to conform to the laws and regulations of the State to which the seed is diverted."

7. Amend § 201.20 by adding at the end of the section the following proviso: "*Provided,* That this shall not apply to the seed of Kentucky bluegrass during the months of August and September of the year in which the seed is produced."

8. Amend § 201.26 to read as follows:

§ 201.26 *Kind and variety.* The label shall bear the name of the kind and variety determined in accordance with § 201.34. The name shall not have affixed thereto words or terms that create a misleading impression as to the history or characteristics of the kind or variety.

9. In § 201.31 rearrange the names of kinds of vegetable seeds in the list in alphabetical order in accordance with § 201.2 (i) and insert in proper alphabetical order the following additional kinds and germination standards:

Kale, Chinese	75
Onion, Welsh	75

10. Amend § 201.34 to read as follows:

§ 201.34 *Kind and variety; designation as hybrid*—(a) *Indistinguishable seed.* Proper precautions to insure that the kind or variety or type of indistinguishable agricultural or vegetable seeds is properly stated shall include the maintaining of the records described in § 201.7. The examination of the seed and any pertinent facts may be taken into consideration in determining whether proper precautions have been taken to insure the kind, variety, or type to be that which is shown.

(b) *Name of kind.* The name of each kind of agricultural or vegetable seed is the name listed in § 201.2 (h) or (i), respectively.

(c) *Hybrid designation.* Seed shall not be designated in labeling as "hybrid" seed unless it comes within the definition of "hybrid" in § 201.2 (y).

(d) *Name of variety.* The name of each variety of agricultural or vegetable seed is the name determined in accordance with the following considerations:

(1) The variety name shall represent a subdivision of a kind, which is characterized by growth, plant, fruit, seed, or other characters by which it can be differentiated from other sorts of the same kind.

(2) Except as otherwise provided in this section, the name of a new variety shall be the name given by the originator or discoverer of the variety, except that in the event the originator or discoverer of a new unnamed variety, at the time seed of the variety is first introduced into channels of commerce of the United States for sale to the public, can not or chooses not to name the variety, the name of the variety shall be the first name under which the seed is introduced into such commerce. However if the variety name so provided is in a language not using the Roman alphabet, the variety shall be given a name, by the person authorized under this paragraph to name the variety, in a language using the Roman alphabet.

(3) The variety name shall not be misleading.

(4) The status under the Federal Seed Act of a variety name is not modified by the registration of such name as a trademark.

(5) Names of varieties which through broad general usage prior to the effective date of this section were recognized variety names, except for hybrid seed corn, shall be considered variety names without regard to the principles stated in paragraph (b) of this section.

(6) The variety name for any variety of hybrid seed corn first introduced into commercial channels in the United States for sale prior to October 20, 1951, shall be any name used for such variety in such channels prior to that date. The variety name for any variety of hybrid seed corn first introduced into commercial channels of the United States for sale on or after October 20, 1951, shall be the name assigned in accordance with this section.

(e) *List of variety names.* Variety names for the kinds listed include the following: (Names enclosed in parentheses are synonyms.

(1) *Beans (vegetable snapbeams).*

Asgrow Black Valentine (Stringless Black Valentine; Black Valentine Stringless).
Bountiful (Improved Six Weeks).
Brittle Wax (Burpee's Brittle Wax; Round Pod Kidney Wax).

11. Amend § 201.36b to read as follows:

§ 201.36b *Name of kind and variety; designation as hybrid.* (a) The representation of the name of a kind or kind and variety of seed in any advertisement subject to the act shall be confined to the name of the kind or kind and variety determined in accordance with § 201.34. The name shall not have associated therewith words or terms that create a misleading impression as to the history or characteristics of the kind or kind and variety. Descriptive terms and firm names may be used in kind or variety names provided the descriptive terms or firm names are a part of the name of the kind or variety of seed; for example, Stringless Green Pod, Detroit Dark Red, Black Seeded Simpson and Henderson Bush Lima. Seed shall not be designated as hybrid seed in any advertisement subject to the act unless it comes within the definition of "hybrid" in § 201.2 (y).

(b) Terms descriptive as to color, shape, size, habit of growth, disease-resistance, or other characteristics of the kind or variety may be associated with the name of the kind or variety provided it is done in a maner which clearly indicates the descriptive term is not a part of the name of the kind or variety; for example, Oshkosh pepper (yellow), Copenhagen Market (round head) cabbage, and Kentucky Wonder pole bean.

(c) Terms descriptive of quality or origin, terms descriptive of the basis for representations made, and terms taken from trade-marks may be associated with the name of the kind or variety of seed provided the terms are clearly identified as being other than part of the name of the kind or variety; for example, Fancy quality redtop, Idaho origin alfalfa, Growers' affidavit of variety Atlas sorgo, and Ox brand Golden Cross corn.

(d) Terms descriptive of the manner or method of production or processing the seed (for example, certified, registered, delinted, scarified, treated, and hulled), may be associated with the name of the kind or variety of seed, provided such terms are not misleading.

12. Amend § 201.42 to read as follows:

§ 201.42 *Small containers.* In Sampling seed in small containers which it is not practical to sample as required in § 201.41, entire unopened containers may be taken in sufficient number to supply a minimum size sample as required in § 201.43. The sample may consist of the contents of one container, or two or more containers when combined.

13. Amend § 201.45 (b) to read as follows:

(b) The sample shall be repeatedly divided to the weight to be used for the working sample. Some form of efficient mechanical divider should be used. In case the proper mechanical divider cannot be used or is not available, the sample shall be thoroughly mixed and placed in a pile and the pile shall be repeatedly divided into halves until a sample of the desired weight remains.

14. Amend § 201.46 as follows:

a. Change the introductory paragraph to read:

For the detailed purity analysis and noxious-weed seed examination the working samples shall be at least the weights set forth in table 1. In mixtures the weight of the sample for purity analysis and the weight of the sample for noxious-weed seed examination shall be determined by the kind (or group of kinds of similar size) which comprises the major proportion of the sample.

b. In table 1 make the necessary changes and amendments in the names for the indicated kinds of seed so the names will be the same as those appearing in table 2, § 201.58. Also arrange the order of the kinds of seeds in table 1 to correspond with the order in which they are listed in table 2.

c. In table 1 change the existing information in the various columns for the indicated kinds to read as follows:

Bahia grass—Paspalum notatum:			
Var. Pensacola	5	50	----
All other varieties	10	50	366
Flax—Linum usitatissimum	15	100	178
Oatgrass, tall meadow—Arrhenatherum elatius	5	50	330
Cornsalad (Fetticus)—Valerianella locusta var. olitoria:			
Vars. Full Hearted and Dark Green Fullhearted	5	50	----
All other varieties	10	50	380

d. In all instances where the figure in the column "Minimum weight for purity analysis" in table 1 is 2 grams, change the corresponding figure in the column "Minimum weight for noxious-weed seed examination" from 50 to 35.

e. Amend table 1 by inserting the following kinds and information in their appropriate alphabetical position:

Name of seed	Minimum weight for purity analysis	Minimum weight for noxious-weed seed examination	Approximate number of seeds per gram
	Gm	*Gm*	
Bluestem, yellow—Andropogon ischaemum	2	35	--------
Buffel grass—Pennisetum ciliare	10	50	--------
Burnet, little—Sanguisorba minor	25	150	108
Buttonclover—Medicago orbicularis	10	50	337
Castor bean—Ricinus communis	500	500	5
Dichondra—Dichondra repens	5	50	472
Indigo, hairy—Indigofera hirsuta	10	50	437
Lovegrass, sand—Eragrostis trichodes	1	25	3,550
Rose clover—Trifolium hirtum	5	50	358
Safflower—Carthamus tinctorius	100	500	29
Sesame—Sesamum indicum	10	50	360
Veldtgrass—Ehrharta calycina	2	35	655
Wheatgrass, pubescent—Agropyron tricophorum	10	50	180
Wheatgrass, intermediate—Agropyron intermedium	10	50	230
Wheatgrass, tall—Agropyron elongatum	10	50	140
Wild-rye, Russian—Elymus junceus	10	50	400
Chinese kale—Brassica oleracea var. alboglabra	10	50	--------
Onion, Welsh—Allium fistulysum	10	50	--------

f. In table 1, delete footnotes 1, 2, and 4, including the reference designations in the table, and renumber footnote No. 3 as No. 1.

15. Amend § 201.47 to read as follows:

§ 201.47 *Separation.* (a) The working sample shall be weighed in grams to four significant figures, and shall then be separated into four parts: (1) Kind or variety to be considered pure seed; (2) other crop seed; (3) weed seed; and (4) inert matter. Each of these four component parts shall be weighed in grams to four significant figures, and the percentage by weight of each part (based on the sum of the weights of the component parts and not on the original weight) shall be determined. The sum of the weights of the component parts shall be compared with the original weight of the working sample as a check against loss of material or other error.

(b) In the case of other crop seed and weed seed, the seeds of each species shall be separated when possible and the number or the weight of each kind determined. The separation of the seed of the kind or variety considered pure seed must be on such a basis that the separation can be made definitely by seed characteristics.

(c) When samples of seed contain two or more similar kinds of seeds the separation of which in the entire working sample would be very difficult, it is permissible to separate and weigh the similar seeds as a group. From the purity working sample at least 400 seeds are to be taken indiscriminately and the separation made on this portion. The proportion of each kind is then determined by weight or, if the seeds are of similar weight, the proportion may be determined by count, and from this the percentage in the entire sample is calculated.

(d) With reference to classification of pure seed, other crop seed, and inert matter, applicable methods of determination may include visual examination, use of reflected light or specific gravity. This has reference particularly to insect-damaged, broken or diseased seeds, or sterile grass florets.

16. Following § 201.47 insert two new undesignated sections to read as follows:

§ 201.— *Seed unit.* The seed unit is the structure usually regarded as a seed in agricultural practices and in commercial channels. The seed unit may consist of one or more of the following structures:

(a) True seeds;

(b) Caryopses and florets in the grass family. In this family the pure seed unit also includes the following structures for the indicated kinds:

(1) Spikelet or paired spikelets with at least one caryopsis in the bluestems (Andropogon) and yellow Indiangrass (Sorghastrum nutans),

(2) Spikelet with at least one caryopsis in the gramas (Bouteloua), or spike with at least one caryopsis in side-oats grama (B. curtipendula),

(3) Bur or fertile floret of buffalo grass (Buchloe dactyloides),

(4) Fascicle of buffel grass (Pennisetum ciliare),

(5) Bulblet of bulbous bluegrass (Poa bulbosa);

(c) Dry indehiscent fruits in the following plant families: Buckwheat (Polygonaceae), sunflower (Compositae), geranium (Geraniaceae), goosefoot (Chenopodiaceae), and valerian (Valerianaceae);

(d) One- and two-seeded pods of small-seeded legumes, burs of the bur clovers, and pods of peanuts. (This does not preclude the shelling of small-seeded legumes for purposes of identification);

(e) Fruits or half fruits in the carrot family (Umbelliferae);

(f) Nutlets in the following plant families: Borage (Boraginaceae), mint (Labiateae), vervain (Verbenaceae);

(g) "Seed balls" or portions thereof in beets (Beta), and fruits with accessory structures such as occur in New Zealand spinach (Tetragonia expansa).

§ 201.— *Working samples.* The purity working sample is the sample on which the purity analysis is made. The noxious-weed seed working sample is the sample on which the noxious-weed seed examination is made.

17. Amend § 201.48 to read as follows:

§ 201.48 *Kind or variety considered pure seed.* The pure seed shall include all seeds of each kind or each kind and variety under consideration present in excess of 5 percent of the whole, and may include kinds and varieties present to an extent of 5 percent or less of the whole. The following shall be included with the pure seed:

(a) Seeds that are immature, shriveled, cracked, insect-damaged or otherwise injured. (Seeds of legumes and crucifers with the seedcoat entirely removed shall be classified as inert matter. See § 201.51);

(b) Pieces of broken seeds that are larger than one-half the original size;

(c) Seeds that have started to germinate;

(d) Seeds of Cucurbitaceae and Solanaceae consisting principally of seedcoat (usually referred to as empty seed);

(e) Empty fruits (seed units) of species belonging to the following families: Sunflower (Compositae), buckwheat (Polygonaceae), carrot (Umbelliferae), valerian (Valerianaceae), mint (Labiateae), and other families in which the seed unit may be a dry, indehiscent, one-seeded fruit;

(f) All seed units of grasses in which a caryopsis can be detected either by light pressure or by reflected light;

(g) Multiple florets, or spikelets, of the following kinds of seeds when one or more of the florets contain a caryopsis: Bluegrass (Poa), tall meadow oatgrass (Arrhenatherum elatius), Rhodes grass (Chloris gayana), bluestems (Andropogon), gramas (Bouteloua), and oats (Avena), and spikes of side-oats grama (Bouteloua curtipendula) that contain one or more caryopses; in the case of orchard grass (Dactylis glomerata) all empty florets may be removed and classed as inert matter; or alternatively, all multiple florets may be weighed without detaching the empty florets in which case four-fifths (⅘) of the weight is added to the pure seed and one-fifth (⅕) to the inert matter;

(h) Diseased seeds, except ergots, smut balls, and other fungus bodies which are to be classed as inert matter. (See § 201.51);

(i) Insect-damaged seeds, except (1) broken pieces that are one-half or less than the orginal size and (2) chalcid-damaged seeds of alfalfa, red clover, and similar kinds of small-seeded legumes;

(j) Seed units of New Zealand spinach and beets regardless of whether they contain true seeds: *Provided,* That in the case of segmented beet balls, small fragments which obviously do not contain true seeds shall be classified as inert matter.

18. Amend § 201.49 to read as follows:

§ 201.49 *Other crop seed.* Seeds of plants grown as crops (other than the kind or variety included in the pure seed) shall be considered other crop seeds, unless recognized as weed seeds by applicable laws, or regulations, or by general usage. All interpretations and definitions for "pure seed" in § 201.48 shall also apply in determining whether seeds are other crop seed or inert matter.

19. Amend § 201.50 to read as follows:

§ 201.50 *Weed seed.* Seeds, bulblets, or tubers of plants recognized as weeds by applicable laws or regulations, or general usage shall be considered weed seeds. Badly injured weed seeds and empty, seedlike structures, including those of noxious-weed seeds, as described in § 201.51, shall be considered inert matter and not weed seeds. When seeds of Juncus tenuis, or other species of Juncus having seeds of a similar size, are present they may be included with the inert matter. However, clusters of Juncus seeds shall be included with the weed seeds.

20. Amend § 201.51 to read as follows:

§ 201.51 *Inert matter.* Inert matter shall include seeds and seedlike structures from both crop and weed plants and other material not seeds as follows:

(a) Crop plants—

(1) Broken seeds: Pieces of broken seeds one-half the original size or less;

(2) Seeds of legumes and crucifers with the seedcoats entirely removed;

(3) Glumes and empty florets except when considered pure seed or other crop seed under §§ 201.48 and 201.49;

(b) Weed plants—

(1) Damaged seeds (other than caryopses of grasses) with over one-half of the embryo missing;

(2) Damaged caryopses of grasses, with over one-half of the root shoot axis missing (the scutellum excluded); and glumes and empty florets of grasses;

(3) Seeds of legumes and species of Brassica with the seedcoats entirely removed;

(4) Empty fruits (seeds) such as occur in the following plant families: Sedge (Cyperaceae), buckwheat (Polygonaceae), morning-glory (Convolvulacreae), and sunflower (Compositae). (This is to be determined by visual examination, which may include dissection or the use of reflected light);

(5) Bulblets of wild onion and wild garlic (Allium) which are devoid of the husk and pass through a 10 x 10 mesh screen (10 mesh per inch) made of 26 gage (0.020 inch diameter) stainless steel wire; bulblets which are devoid of the husks and are retained on 10 x 10 mesh screen, but which show injury to the basal end; bulblets which show evident damage to the basal end and have part of the husk removed;

(6) Immature florets of quackgrass (Agropyron repens) in which the caryopses are less than one-third the length of the palea;

(7) Dodder (Cuscuta): Seeds which are either (i) fragile, (ii) ashy gray to creamy white in color, or (iii) badly shriveled;

(8) Buckhorn (Plantago lanceolata): Black seeds, with no brown color evident, whether shriveled or plump; (The color of questionable seeds should be determined under a magnification of approximately 10 X with strong light);

(9) Ragweed (Ambrosia): Seed with both the involucre and pericarp absent;

(c) Other matter—

(1) Nematode galls, including galls enveloped by the lemma and palea of grass florets;

(2) Fungus bodies, such as ergot and other sclerotia, and smut balls;

(3) All inert matter such as soil particles, sand, stones, chaff, stems, and leaves.

21. Amend § 201.52 to read as follows:

§ 201.52 *Noxious-weed seeds.* The determination of the number of seeds, bulblets, or tubers of individual noxious weeds present per unit weight should be made on at least the minimum quantities listed in table 1: *Provided,* That if the following indicated numbers of a single kind of seed, bulblet, or tuber are found in the pure-seed analysis (or noxious-weed seed examination of a like amount) the occurrence of that species in the remainder of the bulk examined for noxious-weed seeds need not be noted: ½-gram purity working sample, 16 or more seeds; 1-gram purity working sample, 23 or more seeds; 2-gram purity working sample or larger, 30 or more seeds.

22. In § 201.53 change paragraph "(c)" to read as follows:

(c) When only a germination test is required and the pure seed is found to be less than 98 percent, the seed for the test shall be obtained by separating the sample into two components as follows: (1) Pure seed and (2) other crop seed, weed seed, and inert matter. In making this separation at least ¼ of the quantity required for a regular purity analysis shall be used. The whole sample must be well mixed and divided in such a manner as to get a completely representative subsample.

23. Amend § 201.55 to read as follows:

§ 201.55 *Retests.* (a) In considering whether a retest is required a difference of 10 percent between any two 100-seed replicates is permitted when the average is 80 percent or above, and a difference of 15 percent when the average is below 80 percent. When all 4 replicates are in agreement (i. e., do not exceed the 10 and 15 percent limits) the average shall be used and a retest is not required. If three replicates are in agreement the median of the four replicates shall be used and a retest is not required. (The median of four replicates is the average of the two middle values). When no more than two replicates are in agreement, a retest is necessary. If, at the time of the prescribed final count there are indications that a satisfactory germination has not been obtained, such as the presence of firm ungerminated seeds, a retest should be made.

(b) Samples showing injury as a result of chemical treatments shall be retested in soil. The result of the soil test will be regarded as authentic.

(c) When one or more retests, or concurrent tests, are made in the same laboratory in accordance with this part by either (1) the same method, or (2) alternate methods, the results of all tests within tolerance shall be averaged. When the results obtained by different methods are not within tolerance of each other, the higher result shall be used.

24. Following § 201.55, insert a new undesignated section to read as follows:

§ 201.— *Moisture and aeration of substratum.* (a) The substratum must be moist enough to supply the needed moisture to the seeds at all times. Excessive moisture which will restrict aeration of the seeds should be avoided. Except as provided for those kinds of seeds requiring high moisture levels of the germination media, the substrata should never be so wet that a film of water is formed around the seeds. For most kinds of seeds blotters or other paper substrata should not be so wet that by pressing, a film of water forms around the finger.

(b) The following formula may be used as a guide in the preparation of sand for germination tests:

$$\frac{118.3 \text{ cc. (1 gill) sand}}{\text{Its weight in grams}} \times 20.2 - 8.0 = \text{The number of cc. of water to add to each 100 grams of air-dry sand.}$$

(c) The amount of water provided by this formula is satisfactory for seeds the size of clovers and will have to be modified slightly, depending on the kind of seed being tested and the kind of sand used. For example, slightly more moisture should be added when the larger seeds are to be tested.

(d) In preparing soil tests water should be added to the soil until it can be formed into a ball when squeezed in the palm of the hand but will break freely when pressed between two fingers. After the soil has been moistened it should be rubbed through a sieve and put in the seed containers without packing.

(e) The addition of water subsequent to placing the seed in test will depend on the evaporation from the substrata in the germination chambers. Since the rate of evaporation will depend upon the relative humidity of the air, it is desirable to keep water in the germination chambers or to provide other means of supplying a relative humidity of approximately 95 percent. Germination tests should be observed at frequent intervals to insure an adequate moisture supply of the substrata at all times.

25. Amend § 201.56 to read as follows:

§ 201.56 *Interpretation.* (a) A seed shall be considered to have germinated when it has developed those essential structures which, for the kind of seed under consideration, are indicative of its ability to produce a normal plant under favorable conditions. Seedlings possessing those essential structures are referred to as normal seedlings. Abnormal seedlings, consisting of those which are broken, devoid of roots, malformed, or weak, and other types not possessing essential structures, shall not be considered to have germinated.

(b) Sand and/or soil tests may be used as a guide in determining the classification of questionable seedlings and the evaluation of germination tests made on approved artificial media. This is intended to provide a method of checking the reliability of tests made on artificial substrata when there may be doubt as to the proper evaluation of such tests.

(c) Seedlings infected with fungi or bacteria should be regarded as normal if all essential structures are present. A seedling that has been seriously damaged by bacteria or fungi from any source other than the specific seed should be regarded as normal if it is determined that all essential structures were present before the injury or damage occurred. Germination counts should be made on samples where contamination and decay are present at approximately 2-day intervals between the usual first count and the final count. During the progress of the germination test, seeds which are obviously dead and moldy and which may be a source of contamination of healthy seeds should be removed at each count and the number of such dead seeds should be recorded. When symptoms of certain diseases develop which can be readily recognized and identified, their presence should be noted.

(d) Seed units containing more than one seed or embryo, such as New Zealand spinach seed, Beta seed, and seed units of grasses consisting of multiple florets, shall be tested as a single seed and shall be regarded as having germinated if they produce one or more normal seedlings.

(e) Standard guides for seedling interpretation shall include the photographs of normal and abnormal seedlings[1] identified by photo numbers in table 2 in § 201.58 and the following descriptions for specific kinds and groups.

26. Following § 201.56, insert 11 new sections to read, respectively, as follows:

§ 201.56–1 *Goosefoot family (Chenopodiaceae) and Carpetweed family (Aizoaceae).* (a) Kinds of seed: Beet, swiss chard, mangel, spinach, and New Zealand spinach.

(b) A completely normal seedling of the kinds specified in paragraph (a) of this section should have a long, slender root with root hairs, a long, well-developed hypocotyl, two attached leaflike cotyledons and an intact but small epicotyl. Normal seedlings shall include those that have: (1) A well-developed, long, slender root with root hairs; (2) a stubby primary root provided the secondary roots are strong and the hypocotyl is near normal length, as in spinach; (3) at least one attached cotyledon, provided the seedling is otherwise normal; (4) slight infection by fungi, provided none of the essential seedling structures have been damaged; (5) normal seedlings structures of Beta that have been discolored from toxic substances in the seed balls or other causes; or (6) at least one normal seedling from a seed ball, regardless of whether abnormal seedlings also emerge from the same fruit.

(c) Abnormal seedlings include those that have: (1) No root or a stubby primary root with poor secondary root development, usually associated with a shortened hypocotyl; (2) a malformed, shortened, twisted, watery, or stubby hypocotyl, usually associated with a stubby root but not necessarily so; (3) deep grainy lesions or cracks in the hypocotyl if they appear to interfere with the conducting tissues; (4) both cotyledons absent as in samples of "sheared" beets and occasional samples of spinach; (5) two large cotyledons, but a malformed, short hypocotyl, usually with a stubby root; (6) decayed cotyledons or hypocotyl, provided they are not the result of improper test conditions (if there is decay of beet seedlings in blotter tests the results from a properly conducted soil or sand test should be accepted as correct); or (7) various combinations of the above-described abnormalities.

[1] These photographs may be purchased from the Office of Information, United States Department of Agriculture, Washington 25, D. C.

§ 201.56–2 *Sunflower family (Compositae).* Kinds of seed: Artichoke, cardoon, chicory, dandelion, endive, lettuce, safflower, salisfy, and sunflower.

By the end of the germination test, a perfectly normal seedling belonging to the sunflower family should have a well-developed root with root hairs, a long and well-developed hypocotyl, two leaflike cotyledons, and a small but visible epicotyl.

(a) Lettuce: The interpretations of lettuce seedlings are made only at the end of the test period.

(1) Normal seedlings include those that have: (i) A well-developed, long, slender root with root hairs; (ii) a well-developed long hypocotyl with no deep lesions which might interfere with the conducting tissues; (iii) two green cotyledons with some blackened or reddish brown areas, provided the hypocotyl and roots have developed normally or approximately so; or (iv) slight inflections by fungi, provided none of the essential seedling structures have been damaged.

(2) Abnormal seedlings include those that have: (i) No roots or very stubby or shortened roots, which are usually associated with a shortened hypocotyl; (ii) shortened hypocotyl which are usually associated with stubby roots; (iii) a malformed hypocotyl, severely twisted or having grainy areas or cracks extending into the conducting tissues; (iv) cotyledons with large areas of blackish or reddish brown tissue, usually appearing along the midrib, associated with a short hypocotyl and root (the seedcoats are often attached to the cotyledons, adhering to the darkened areas and can be easily removed if lightly sprinkled with water); (v) cotyledons with a gray cast over their entire area, usually darker at the midrib section (hypocotyl and roots invariably shortened and seedcoats usually attached to the cotyledons); (vi) swollen, blackened cotyledons with only vestiges of hypocotyl and root, the seedcoats usually remaining attached to the cotyledons; (vii) decayed cotyledons; or (viii) various combinations of the above-described abnormalities.

(b) Other kinds in the sunflower family: This group includes artichoke, cardoon, sunflower, safflower, salsify, dandelion, chicory, and endive.

(1) Normal seedlings include those that have: (i) A well-developed, long, slender primary root with root hairs; (ii) a stubby root if there are one or more strong secondary roots, provided the seedling is otherwise normal; (iii) a well-developed, long hypocotyl with no prominent breaks or deep lesions which might interfere with the conducting tissues; (iv) at least one uninjured cotyledon, provided the epicotyl is also present; or (v) slight infection of the roots or hypocotyl with fungi, provided none of the essential seedling structures have been damaged.

(2) Abnormal seedlings include those that have: (i) No root or a stubby root with weak secondary roots, usually associated with a shortened hypocotyl; (ii) a malformed hypocotyl, which may be curled, shortened, or thickened, usually associated with a stubby root; (iii) deep, unhealed cracks or grainy areas on the hypocotyl, extending into the conducting tissues; (iv) both cotyledons entirely broken off; (v) one cotyledon broken off, provided the epicotyl is also absent; (vi) two normal cotyledons with a short malformed hyopcotyl, usually with a stubby root; (vii) decayed cotyledons, provided the infection is not caused by improper test conditions; or (viii) various combinations of the above-described abnormalities.

§ 201.56–3 *Mustard family (Cruciferae).* Kinds of seed: Broccoli, brussels sprouts, cabbage, Chinese cabbage, cauliflower, collards, garden cress, water cress, kale, Chinese kale, kohlrabi, mustard, pakchoi, radish, rape, rutabaga, and turnip.

By the end of the germination test, a perfectly normal cruciferious seedling should have a well-developed root, usually with root hairs, a long hypocotyl, two intact green leaflike cotyledons and a small but visible epicotyl or growing point.

(a) *Radish and brassica.* (1) Normal seedlings include those that have: (i) A well-developed, long, slender primary root with root hairs; (ii) a well-developed, long hypocotyl with no prominent breaks or deep lesions which might interfere with the conducting tissues; (iii) one or two cotyledons not decayed at the point of attachment to the hypocotyl, provided the epicotyl is also present; (iv) slight decay at the base of one cotyledon, provided the epicotyl is not infected; (v) less than 50 percent of the area of the cotyledons covered with spots or darkened areas; or (vi) slight infection of roots or hypocotyl with fungi, provided none of the essential seedling structures have been damaged.

(2) Abnormal seedlings include those that have: (i) No root or a stubby root, usually associated with a shortened hypocotyl; (ii) a malformed hypocotyl, which may be curled, shortened, or thickened and usually associated with a stubby root; (iii) deep, unhealed cracks or lesions (often grainy) on the hypocotyl, extending into the conducting tissues; (iv) decay at the point of attachment of both cotyledons to the hypocotyl which may or may not involve the terminal bud; (v) decay at the point of attachment of one cotyledon to the hypocotyl, provided the terminal bud is also decayed; (vi) 50 percent or more of the area of the cotyledons covered with spots or darkened areas; (vii) decayed roots or hypocotyl, provided the infection was not caused by improper test conditions; (viii) watery hypocotyl (usually associated with some other abnormality of the seedlings) provided this condition is not caused by excessive moisture of the substratum; or (ix) various combinations of the abnormalities described in this subparagraph.

(b) *Garden cress and water cress.* (1) Normal seedlings include those that have: (i) A well-developed, slender root with root hairs; (ii) a long, well-developed hypocotyl with no prominent breaks

or deep lesions which might interfere with the conducting tissues; (iii) intact cotyledons; or (iv) slight infection with fungi, provided none of the essential seedling structures have been damaged.

(2) Abnormal seedlings include those that have: (i) No root, or a stubby root, usually associated with a shortened hypocotyl; (ii) a malformed hypocotyl, which may be curled, twisted, shortened, or thickened and frequently associated with a stubby root; (iii) deep, unhealed cracks or grainy lesions on the hypocotyl, extending into the conducting tissues; (iv) watery hypocotyls, usually associated with stubby roots or decayed cotyledons; (v) cotyledons entirely broken off; (vi) decayed cotyledons, provided the infection was not caused by improper test conditions; or (vii) various combinations of the above-described abnormalities.

§ 201.56–4 *Cucurbit family (Cucurbitaceae).* (a) Kinds of seed: Citron, cucumber, muskmelon or cantaloup, pumpkin, squash, and watermelon.

(b) By the end of the germination test a perfectly normal seedling should have a well-developed primary root with several secondary roots, a long hypocotyl, two intact cotyledons, and an epicotyl or terminal growing bud.

(1) Normal seedlings include those that have: (i) A well-developed primary root with or without secondary roots; (ii) a stubby primary root with at least two strong and vigorous adventitious roots, provided the hypocotyl is not shortened very much; (iii) a long well-developed hypocotyl; (iv) two intact cotyledons; or (v) slight infection by fungi, provided none of the essential seedling structures have been damaged.

(2) Abnormal seedlings include those that have: (i) No primary root, a stubby primary root only, or a stubby primary root with weak secondard roots which are usually associated with a short hypocotyl; (ii) a malformed hypocotyl which may be shortened or thickened; (iii) a thickened and shortened hypocotyl and roots owing to injury from chemical treatment, provided the injury is still apparent in a soil or sand check test; (iv) decayed cotyledons or other essential seedling structures, provided the decay was not the result of improper test conditions; or (v) various combinations of the above-described abnormalities.

§ 201.56–5 *Grass family (Gramineae).* Kinds of seed: Bentgrasses, bluegrasses, bluestems, bromes, cereals, fescues, millets, orchard grass, redtop, ryegrass, sorghum, timothy, wheatgrass, and all other grasses listed in § 201.1 (h).

In the grass family a perfect seedling should have a well-developed primary root system, an intact cotyledon or scutellum, seed free from serious decay and long, well-developed green leaves within the coleoptile. One or more leaves may have broken through the coleoptile by the end of the test period.

(a) *Barley, oats, rye, and wheat.* (1) Normal seedlings include those that have: (i) At least one primary or seminal root, but preferably two or three seminal roots, provided the shoot is well-developed and the grain is not badly decayed; (ii) well-developed leaves, green in color, and long enough to extend more than half way up into the sheath or coleoptile at the time the seedling is evaluated; (iii) spiral twisting or bending of the shoot, provided it is green in color, has normal length, and is not frost damaged; or (iv) slight infection by fungi, provided none of the essential seedling structures have been damaged.

(2) Abnormal seedlings include those that have: (i) No primary root, (ii) only one or two short or spindly seminal roots which are usually accompanied by weakened shoots and decayed grains; (iii) no green leaves, but only the white sheath or coleoptile formed, which may or may not be grainy, spirally twisted, split, or shortened; (iv) a shortened shoot, extending no more than one-half the way up through the coleoptile; (v) a thin, spindly, or watery shoot usually accompanied by weak root development and decayed grains; (vi) badly shattered or longitudinally split leaves, with or without splitting of the coleoptile; (vii) thickened and shortened shoot (leaves and coleoptile) often the result of overtreatment of seed with chemicals; (viii) decayed shoots (usually weak and show decay near the point of attachment to the grain which has often decayed) provided the decay is not the result of improper test conditions; (ix) bad frost-damage characterized by grainy coleoptiles and spirally twisted leaves and coleoptiles; (x) coleoptiles developed without the leaves (in soil tests, some of the longest of the spirally twisted seedlings will appear fairly strong but most of them break off just above the attachment of the plumule and coleoptile to the grain; the shortest of the seedlings do not emerge in soil tests); or (xi) various combinations of the abnormalities described in this subparagraph.

(b) *Rice.* (1) Normal seedlings include those that have: (i) One primary root, usually with numerous lateral roots (several permanent roots arising from the first node should be present if seedlings are not removed until the end of the test); (ii) well-developed green leaves which ordinarily should have broken through the coleoptile at the time the seedling is evaluated; or (iii) slight infection by fungi, provided none of the essential seedling structures have been damaged.

(2) Abnormal seedlings include those that have: (i) No roots; (ii) a spindly primary root with very little or no branching or secondary development; (iii) no green leaves, but only the white sheath or coleoptile; (iv) a spindly and sometimes watery shoot which is usually associated with decay of the rice grain; (v) a short leaf, extending no more than one-half the distance up through the coleoptile; (vi) shattered or longitudinally split plumules with or without splitting of the coleoptile; (vii) decayed plumules (usually appear weak and show decay near the point of attachment to the grain) provided the decay is not the result of improper test conditions; or (viii) various combinations of the above-described abnormalities.

(c) *Corn.* (1) Normal seedlings include those that have: (i) One primary root, usually with secondary roots present; (ii) no primary root, but with at least two vigorous secondary roots, provided the grain is not badly decayed, and the shoot is well-developed; (iii) well-developed green leaves, usually broken through the coleoptile by the end of the test period; (iv) twisted and curled shoots bound by the tough seedcoat, provided the shoot is not decayed; or (v) slight infection by fungi, provided none of the essential seedling structures have been damaged.

(2) Abnormal seedlings include those that have: (i) No primary or secondary roots; (ii) no primary roots but small and weak secondary roots; (iii) no plumule, but only the white sheath or coleoptile; (iv) a shortened plumule, extending no more than one-half the way up through the coleoptile; (v) a thickened and shortened shoot, often the result of overtreatment of seed with chemicals; (vi) a spindly and pale shoot usually associated with moldy seeds; (vii) albino (entirely white) seedlings, which will not develop into plants because of lack of chlorophyll; (viii) shattered or longitudinally split leaves, with or without splitting of the coleoptile; (ix) decayed shoots of which the plumules usually appear weak and show decay near the point of attachment to the grain and the scutellum is usually rotten, provided the decay is not the result of improper test conditions; or (x) various combinations of the abnormalities described in this subparagraph.

(d) *Sorghum and Sudan grass.* (1) Normal seedlings include those that have: (i) One primary root, usually with well-developed secondary roots and root hairs if left for final counts in soil tests; (ii) well-developed, green leaves, usually broken through the coleoptile by the end of the test period; (iii) slight infection by fungi, provided none of the essential seedling structures have been damaged; or (iv) red coloration on the roots and on the coleoptile of the shoot, caused by natural pigments, provided the seedling is otherwise normal.

(2) Abnormal seedlings include those that have: (i) No roots; (ii) a weak, spindly, and usually shortened primary root, which is often associated with decay of the grain; (iii) no plumule, but only the white sheath or coleoptile; (iv) a shortened plumule, extending no more than one-half the way up through the coleoptile; (v) a spindly and pale plumule, usually associated with moldy seeds; (vi) shattered and longitudinally split plumules, with or without splitting of the coleoptile; (vii) decayed plumules, provided the decay is not the result of improper test conditions (the plumules usually appear weak and show decay near the point of attachment to the grain which is usually rotten); or (viii) various combinations of the abnormalities described in this subparagraph.

(e) *Grasses and millets.* (1) Normal seedlings include those that have: (i) A well-developed primary root, usually with root hairs; (ii) a well-developed green plumule which has usually broken through the coleoptile by the end of the test period; (iii) slight infection by fungi, provided none of the essential seedling structures have been damaged; (iv) spirally coiled roots held within the tightly enveloping glumes as in certain samples of Bermuda grass; or (v) poor root development resulting from injury caused by use of a potassium nitrate solution (if many roots are so affected, a retest should be made on top of soil in closed Petri dishes).

(2) Abnormal seedlings include those that have: (i) No root; (ii) a weak, stubby, or spindly root, usually short and watery, associated with a decayed seed; (iii) no plumule, but only the white sheath or coleoptile which is often short and thick; (iv) a shortened plumule, extending only one-half the distance up through the coleoptile; (v) a spindly plumule, usually pale and watery; (vi) a shattered longitudinally split plumule with or without splitting of the coleoptile; (vii) decayed plumules, provided the decay is not the result of improper test conditions (the plumules usually appear weak and show decay near the point of attachment to the seed, which is usually rotten); or (viii) various combinations of the abnormalities described in this subparagraph.

§ 201.56–6 *Legume or pea family (Leguminosae).* Kinds of seed: Alfalfa, alyceclover, asparagusbean, beans (Phaseolus spp.), beggarweed, black medic, broadbean, bur-clovers, button-clover, chickpea, clovers (Trifolium spp.), cowpea, crotalarias, hairy indigo, kudzu, lespedezas, lupines, peas, peanut, rough pea, sainfoin, sesbania, sourclover, soybean, sweetclover, trefoils, velvetbean, and vetches.

(a) *Beans; adzuki, field, garden, lima, mung, and asparagusbean.* Seedling interpretation for all these beans is similar as they all have the same type of development.

(1) Normal seedlings include those that have: (i) a terminal bud or epicotyl, and at least one primary leaf, even though one or both cotyledons may be present; (ii) a primary root or adventitious or secondary roots sufficient to anchor the seedling when grown in soil or sand, provided the hypocotyl is approximately of normal length; (iii) a fairly well-developed hypocotyl with no prominent breaks or deep lesions (Healed breaks, sometimes referred to as knees, are to be considered as normal, provided the seedling is not spindly); (iv) spirally twisted and curled roots and hypocotyl held within the tough seedcoat, causing delayed development, but are otherwise normal; (v) slight infection caused by fungi or bacteria, provided the essential structures have not been seriously damaged and appear to be able to carry on their normal functions at the time of evaluation. (If a few seedlings with total or partial decay of the plumule are found, they may be counted as normal, provided the hypocotyl and root are well-developed. The plumules on such seedlings usually do not decay when grown under greenhouse conditions where the cotyledons open up naturally and are exposed to a dry environment and sunlight. However, if there are many seedlings with decayed plumules in a test, a retest should be made and such seedlings evaluated cautiously).

(2) Abnormal seedlings include those that have: (i) No primary leaves or terminal bud (baldheads); (ii) no primary leaves, but with a terminal bud (snakeheads or partial baldheads); (iii) no primary leaves, but terminal bud present and axillary buds in one or both of the cotyledons (partial baldheads); (iv) a malformed hypocotyl, which may be characterized by open splits, or one that appears curled, shortened, or thickened; (v) no primary root or well-developed set of adventitious or secondary roots; or various combinations of the abnormalities described in this subparagraph.

(b) *Broadbean, runner bean, velvetbean, chickpea, field pea, garden pea, roughpea, and vetches.* In this group a perfectly normal seedling should have a well-formed root, with or without secondary or adventitious development, a strong epicotyl with fairly long stem, a well-developed epicotyl with the leaves and terminal bud intact, and attached cotyledons.

(1) Normal seedlings include those that have: (i) A primary root or a set of secondary or adventitious roots sufficient to anchor the seedling when grown in soil or sand, provided the stem is not badly shortened; (ii) a fairly well-developed stem with no prominent breaks or deep lesions which might interfere with the conducting tissues; (iii) a terminal bud with at least one first leaf and an intact growing point; (iv) two shoots, provided the seedling appears vigorous and at least one of the shoots has a normal epicotyl and root; or (v) slight infection by fungi, provided the essential seedling parts have not been seriously damaged and appear to be able to carry on their normal functions at the time of evaluation.

(2) Abnormal seedlings include those that have: (i) No primary root or well-developed secondary or adventitious roots; (ii) a malformed stem, which may be characterized by severe open splits, and curled, shortened, or thickened development; (iii) no epicotyl, or an epicotyl without the terminal bud; (iv) shoots both of which appear weak and spindly, often partially broken away from the cotyledons; (v) decay caused by the spread of organisms from the cotyledons of the developing seedling; or (vi) various combinations of the abnormalities described in this subparagraph.

(c) *Cowpeas, lupines, peanuts, and soybeans.* A completely normal seedling of the above-mentioned kinds should have a well-formed root with or without secondary or adventitious roots, a strong and fairly long hypocotyl with two attached and open cotyledons, two well-developed primary leaves, and an intact terminal bud or epicotyl.

(1) Normal seedlings include those that have: (i) A primary root or a set of secondary or adventitious roots sufficient to anchor the seedling when grown in soil or sand, provided the hypocotyl is normal; (ii) a fairly well-developed hypocotyl with no prominent breaks or deep lesions which might interfere with the conducting tissues; (iii) a plumule with at least one leaf and an intact growing point; or (iv) slight infection by fungi, provided the essential seedling parts have not been seriously damaged and appear to be able to carry on their normal functions at the time of evaluation.

(2) Abnormal seedlings include those that have: (i) No primary root or no well-developed secondary or adventitious roots; (ii) a malformed hypocotyl which may be curled, shortened, or thickened or have severe open splits; (iii) no epicotyl, or one without the growing point, with or without leaves; (iv) decayed epicotyl, provided the decay has spread from the rotted cotyledons of the developing seedling; or (vi) various combinations of the abnormalities described in this subparagraph.

(d) *Alfalfa, alyceclover, beggarweed, black medic, burclovers, buttonclover, clovers, crotalarias, hairy indigo, kudzu, lespedezas, sainfoin, sesbania, sourclover, sweetclovers, trefoils.* By the end of the germination test a perfectly normal seedling should have a long, slender root, usually with root hairs, a long hypocotyl, two attached cotyledons which have opened, and an intact epicotyl or growing point.

(1) Normal seedlings include those that have: (i) A long, slender root, usually with root hairs; (ii) slightly stubby roots on blotter tests of sweetclovers, provided the seedling is otherwise normal; (iii) roots slightly stubby from being held back by the attached seedcoat, provided the seedling is otherwise normal; (iv) short splits on the roots, provided the split does not extend into the central conducting tissues of the hypocotyl, and provided further that root hairs are present and the seedling is normal in other respects; (v) a long, well-developed hypocotyl which may have slight cracks or breaks, provided they do not extend into the conducting tissues; (vi) at least one cotyledon, provided the epicotyl is also present; or (vii) slight infection by fungi, provided none of the essential seedling structures have been damaged.

(2) Abnormal seedlings include those that have: (i) Stubby roots, usually associated with shortened hypocotyl; (ii) longitudinal, deep splits on the roots, extending into the conducting tissues of the hypocotyls; (iii) deep cracks or breaks in the hypocotyl which extend into the conducting tissues; (iv) both cotyledons broken off; (v) one cotyledon broken off if the epicotyl is also absent; (vi) rotted cotyledons, provided the decay did not spread to the seedling from an adjacent seed or was not the result of improper test conditions; (vii) A spindly, watery hypocotyl, provided it is not the result of excess moisture in the substrata (usually seedlings of this type have one or more abnormalities of the essential structures, such as broken cotyledons or deep splits in the hypocotyl); or (viii) various combinations of the abnormalities described in this subparagraph.

§ 201.56–7 *Lily family (Liliaceae).* Kinds of seed: Asparagus, leek, onion, and Welsh onion.

(a) *Onion, Welsh onion, and leek.* By the end of the test period a perfectly normal onion or leek seedling should have a long, slender root with a thickened area where it is joined to the base of the hypocotyl, a fairly long hypocotyl,

and a long, green cotyledon with a definite loop or bend, often referred to as the "knee."

(1) Normal seedlings include those that have: (i) A well-developed, long, slender root, with or without root hairs; (ii) a fairly long hypocotyl; (iii) a long, green, leaflike cotyledon, with a well-developed bend or "knee" or (iv) slight infection by fungi, provided none of the essential seedling structures have been damaged.

(2) Abnormal seedlings include those that have: (i) A thickened area at the base of the hypocotyl with no root, or a stubby root; (ii) a very short hypocotyl, usually associated with a poorly developed root and cotyledon; (iii) a poorly developed leaflike cotyledon without a definite bend or "knee"; (iv) a spindly, watery hypocotyl, often associated with slowness in sprouting, and one or more other abnormalities; (v) a rotted cotyledon, provided the decay is not the result of improper test conditions; or (vi) various combinations of the abnormalities described in this subparagraph.

(b) *Asparagus.* By the end of the test period a normal asparagus seedling should have a long, slender root, a fairly long epicotyl, an intact terminal bud, and the seedling should not be broken away from the cotyledon.

(1) Normal seedlings include those that have: (i) A long, slender root; (ii) a long, well-developed epicotyl with terminal growing point; (iii) the cotyledon attached to the seedling; or (iv) slight infestation by fungi, provided none of the essential seedling structures have been damaged.

(2) Abnormal seedlings include those that have: (i) No root, or a very stubby root with weak secondary root development; (ii) a malformed epicotyl, which may be thickened, shortened, or twisted; (iii) no terminal growing point or bud; (iv) cotyledon broken away from the seedling; (v) decayed epicotyl, provided the decay is not the result of improper test conditions; or (vi) various combinations of the abnormalities described in this subparagraph.

§ 201.56–8 *Flax family (Linaceae).* (a) Kind of seed: Flax.

(b) By the end of the germination test a normal flax seedling should have a well-developed primary root, a long hypocotyl, two intact cotyledons, and a small epicotyl.

(1) Normal seedlings include those that have: (i) A long, slender root, usually with root hairs; (ii) a short or stubby primary root, provided secondary root development is strong and the hypocotyl is of normal length or approximately so; (iii) a long, well-developed hypocotyl with no breaks or lesions extending into the conducting tissues; (iv) at least one attached cotyledon, provided the epicotyl is not injured; (v) variously broken or cracked cotyledons, provided the other seedling parts appear normal; or (vi) slight infection by fungi, provided none of the essential seedling structures have been damaged.

(2) Abnormal seedlings include those that have: (i) A stubby or no primary root, provided the secondary root development is weak, a condition usually associated with a shortened hypocotyl; (ii) a malformed hypocotyl, which may be twisted, thickened, or shortened; (iii) deep cracks or lesions on the hypocotyl, extending into the conducting tissues; (iv) both cotyledons broken off; (v) one cotyledon broken off if the epicotyl is also injured (vi) decayed cotyledons or other essential seedling structures, provided the decay is not the result of improper test conditions; or (vii) various combinations of the abnormalities described in this subparagraph.

§ 201.56–9 *Mallow family (Malvaceae).* (a) Kinds of seed: Cotton and okra.

(b) By the end of the germination test a perfectly normal seedling should have a long, well-developed root with root hairs, a long hypocotyl, two attached green leaflike cotyledons, and a small epicotyl.

(1) Normal seedlings include those that have: (i) A well-developed, long, slender root, usually with root hairs; (ii) no primary root but strong secondary roots, provided the hypocotyl is of normal or approximately normal length; (iii) a long, well-developed hypocotyl with no breaks or deep grainy lesions which might interfere with the conducting tissues; (iv) at least one cotyledon and intact epicotyl; (v) slight infection by fungi, provided none of the essential seedling structures have been damaged; or (vi) a yellowish hypocotyl or roots of cotton which may appear diseased, provided the cotyledons are free of infection (the seedcoat must be peeled back on young seedlings to determine this condition of the cotyledons).

(2) Abnormal seedlings include those that have: (i) No root or very stubby roots, usually associated with a shortened hypocotyl; (ii) stubby roots and a thickened hypocotyl resulting from chemical treatment of seed, such as often occurs on delinted cottonseed; (iii) malformed hypocotyl, which may be curled, thickened, or shortened; (iv) deep cracks or grainy lesions on the hypocotyl which appear to interfere with the conducting tissues; (v) epicotyl absent, even though one or both cotyledons are attached; (vi) decayed cotyledons and hypocotyl, provided the decay did not spread from another seed or was not the result of improper test conditions; or (vii) various combinations of the abnormalities, described in this subparagraph.

§ 201.56–10 *Spurge family (Euphorbiaceae).* Kind of seed: Caster bean.

(a) Normal seedlings include those that have: (1) A primary root or a set of secondary or adventitious roots sufficient to anchor the seedling when grown in soil or sand, provided the hypocotyl is not badly shortened; (2) a fairly well-developed hypocotyl with no prominent breaks or stem lesions which might interfere with the conducting tissues; (3) an epicotyl with terminal bud; or (4) slight infection by fungi or bacteria, provided the essential seedling parts have not been seriously damaged and appear to be able to carry on their normal functions at the time of evaluation.

(b) Abnormal seedlings include those that have: (1) No primary root or well-developed adventitious or secondary roots; (2) a malformed stem, which may be characterized by severe open splits, and curled, shortened or thickened hypocotyl; (3) no epicotyl, or an epicotyl without the terminal bud; (4) decay caused by microorganisms carried by the individual seed or seedling being evaluated; or (5) various combinations of the abnormalities described in this subparagraph.

§ 201.56–11 *Miscellaneous plant families.* Kinds of seed by families:

Benne family (Pedaliaceae)—Sesame.
Carrot family (Umbelliferae)—carrot, celery, celeriac, parsley, parsnip.
Dichondra family (Dichondraceae)—Dichondra.
Knotweed family (Polygonaceae)—Buckwheat, sorrel, rhubarb.
Nightshade family (Solanaceae)—Eggplant, pepper, tomato, husk tomato.
Geranium family (Geraniaceae)—Alfilaria.
Hemp family (Cannabiaceae)—Hemp.
Rose family (Rosaceae)—Little burnet.
Valerian family (Valerianaceae)—Cornsalad.

(a) In this group of plant families, normal seedlings include those that have: (1) A well-developed primary root, usually with root hairs; (2) a stubby root or no primary root, provided the secondary root development is strong and the hypocotyl is near normal length as is frequently encountered in tomato seedlings; (3) a long, well-formed hypocotyl, with no prominent breaks or lesions, extending into the conducting tissues; (4) at least one attached cotyledon, provided the epicotyl is intact and the seedling is otherwise normal (a tiny epicotyl may be observed in seedlings left in test for final evaluation); or (5) slight infection by fungi, provided none of the essential seedling structures have been damaged (infection is likely to occur in rhubarb in which case retests may be advisable).

(b) Abnormal seedlings include those that have: (1) A stubby root or no primary root, provided there is weak secondary root development; (2) a malformed hypocotyl, which may be twisted, thickened, or shortened; (3) deep cracks or lesions on the hypocotyl extending into the conducting tissues; (4) both cotyledons, or one cotyledon and epicotyl, broken off; (5) two enlarged cotyledons, but hypocotyl short and usually malformed; (6) decayed cotyledons or hypocotyl, provided they are not the result of improper test conditions; or (7) various combinations of the abnormalities described in this subparagraph.

27. In the second sentence of § 201.57 delete the words "and asparagus" and insert the words "cotton and dichondra."

28. Following § 201.57, insert a new undesignated section to read as follows:

§ 201.— *Dormant seeds; firm ungerminated seeds.* Dormant seeds means seeds, other than hard seeds, which fail to germinate when provided the specific germination conditions for the kind of seed in question. Firm ungerminated seeds means seeds, other than hard seeds, which neither germinate nor decay during the prescribed test period and under the prescribed test conditions.

29. Amend § 201.58 to read as follows:

§ 201.58 *Substrata, temperature, duration of test, and certain other specific directions for testing for germination and hard seed.* Specific germination requirements are set forth in table 2 to which the following paragraphs (a) and (b) are applicable:

(a) *Definitions and explanations applicable to table 2*—(1) *Duration of tests.* The following deviations are permitted from the specified duration of tests: Any test may be terminated prior to the number of days listed under "Final Count" if the germination of the sample has then been determined. The number of days stated for the first count is approximate and a deviation of 1 to 3 days is permitted. (Also, see subparagraph (5) of this paragraph and § 201.57.)

(2) *Light.* When light is required the intensity for nondormant seed may be as low as 25 foot-candles. In the case of dormant seed of grasses such as occur in Agrostis tenuis, Poa compressa, and Lolium multiflorum the light intensity should approximate 100 foot-candles.

(3) *Moisture-on-dry-side.* This term means that the moistened substratum should be pressed against a dry absorbent surface such as a dry paper towel or blotter to remove excess moisture. The moisture content thus obtained should be maintained throughout the germination test period.

(4) *Potassium nitrate* (KNO_3). These terms mean a two-tenths (0.2) percent solution of potassium nitrate (KNO_3) shall be used in moistening the substratum. Such solution is prepared by dissolving 2 grams of KNO_3 in 1,000 ml. of distilled water. The grade of the potassium nitrate shall meet A. C. S. specifications.

(5) *Prechill.* The term "prechill" means to place the seed on, or in, a moist substratum at a specified low temperature for a designated period of time. The prechilling period is not included in the duration of tests given in table 2, unless otherwise specified.

(6) *Predry.* The term "predry" means to place the seed in a shallow layer at a temperature of 35° to 40° C. for a period of 5 to 7 days, with provisions for circulation of the air.

(7) *Substrata* (Kinds). The symbols used for substrata are:

B= between blotters
TB= top of blotters
T= paper toweling, used either as folded towel tests or as roll towel tests in horizontal or vertical position
S= sand or soil
TS= top of sand or soil
P= covered Petri dishes: with two layers of blotters; with one layer of absorbent cotton; with five layers of paper toweling; with three thicknesses of filter paper; or with sand or soil
C= creped cellulose paper wadding (0.3-inch thick Kimpak or equivalent) covered with a single thickness of blotter through which holes are punched for the seed that are pressed for about one-half their thickness into the paper wadding
RB= blotters with raised covers, prepared by folding up the edges of the blotter to form a good support for the upper fold which serves as a cover, preventing the top from making direct contact with the seeds.

(8) *Temperature.* A single numeral indicates a constant temperature. Two numerals separated by a dash indicate an alternation of temperature, the test to be held at the first temperature for approximately 16 hours and at the second temperature for approximately 8 hours per day. If tests are not subjected to alternating temperatures over weekends and on holidays they are to be held at the lower temperature during this time. In cases where two temperatures are indicated (separated by a semicolon) the first temperature shall be regarded as the regular method and the second as an alternate method.

(9) *Toxicity of substrata.* If there is question as to whether a paper substratum is toxic to developing seedlings, check tests should be made on Whatman's No. 2 filter paper or its equivalent. Seeds of celery, celeriac, chicory, dandelion, endive, timothy, and Bermuda grass are particularly sensitive to toxic substrata. If root injury is evident on a substratum moistened with potassium nitrate, retests should be made on a substratum moistened with water or on soil.

(b) *Special procedures and alternate methods for germination referred to in table 2*—(1) *Alyce clover (Alysicarpus vaginalis); Swollen seeds.* At the conclusion of the 21-day test period carefully pierce the seedcoat with a sharp instrument and continue the test for 5 additional days.

Alternate method: The swollen seeds may be placed at 20° C. for 48 hours and then at 35° C. for 3 additional days.

(2) *Bahia grass (Paspalum notatum); removal of glumes*—(i) *Vars. Common and Argentine.* Remove the glumes with the aid of a sharp scalpel. If the seed is fresh or dormant scratch the surface of the caryopsis lightly and use potassium nitrate.

(ii) *Var. Pensacola.* The glumes shall not be removed for the germination test.

(3) *Beet, Swiss chard (Beta); preparation of seed for test.* Before placing the seeds on the germination substratum they shall be soaked in water for 2 hours, using at least 250 ml. of water per 100 seeds, then washed in running water and the excess water should be blotted off. Samples producing darkened radicles should be retested in soil or by washing in running water for 3 hours and tested on "Kimpak," keeping the seed covered with slightly moist blotters.

(4) *Buffel grass (Pennisetum ciliare); alternate method for dormant seed.* The caryopses shall be removed from the fascicles and placed on blotters moistened with a 0.2 percent potassium nitrate solution, in Petri dishes. The seeds from a fascicle should be arranged so they will not be confused with seeds from other fascicles during the test. The seeds are then prechilled at 50° C. for 7 days and tested at 30° C. in light for 21 additional days. Firm ungerminated seeds remaining at the conclusion of the test should be scratched lightly and left in test for 7 additional days.

(5) *Cotton (Gossypium spp.); dormant samples.* Samples of cottonseed which do not respond to the usual method should be placed in a closed container with water and shaken until the lint is thoroughly wet. The excess moisture should then be blotted off.

(6) *Endive (Cichorium endivia); dormant samples.* Add about ⅛ inch of tap water at the beginning of the test and remove excess water after 24 hours.

(7) *Lettuce (Lactuca sativa); light exposure.* All samples should be given at least ½ hour of light after being placed on the moist substratum. Additional light during the test period is desirable for dormant samples and facilitates seedling interpretation for samples of low vigor.

(8) *Fescue grass (Bromus catharticus); dormant samples.* Wash for 48 hours in running water, or soak for 48 hours, changing the water and rinsing each morning and night.

(9) *Rice (Oryza sativa); flood test.* The seed is planted in moist sand. On the seventh day of the test add water to a depth of ¼ inch above the sand level and leave for the remainder of the test. Only a final count is made.

(10) *Ryegrass (Lolium); fluorescence test.* The germination test for fluorescence of rye grass shall be conducted in light (not to exceed 100 foot-candles) with white filter paper as a substratum. The test shall be conducted in a manner that will prevent the contact of roots of different seedlings.

(11) *Trifolium, Nadicago, Melilotus,* and *Vicia faba; temperature requirements.* The temperature for Trifolium spp., Medicago spp., Melilotus spp., and Vicia faba should never exceed 20° C. and a temperature of 17° to 18° is desirable.

(c) *Table 2; germination requirements for indicated kinds.*

TABLE 2—GERMINATION REQUIREMENTS FOR INDICATED KINDS

Name of seed	Substrata	Temperature	First count	Final count	Additional directions	
					Specific requirements and photo numbers	Fresh and dormant seed
Agricultural seed		°C.	*Days*	*Days*		
Alfalfa—Medicago sativa	B, S	20	4	[1] 7	Photos 2481, 2486; see par. (b) (11)	
Alfilaria—Erodium cicutarium	B	20–30	3	14	Clip seeds	
Alyceclover—Alysicarpus vaginalis	B	35	4	[1] 21	See par. (b) (1) for swollen seeds	
Bahiagrass—Paspalum notatum:						
Var. Pensacola	P, S	30–35	7	[2] 28	Light; see par. (b) (2)	
All other vars	P	30–35	3	21	Light; remove glumes; see par. (b) (2).	Scratch caryopses; KNO_3.
Barley—Bordeum vulgare	B, T, S	20; 15	4	7		Prechill 5 days at 5° or 10° C. or predry.
Bean:						
Adzuki—Phaseolus angularis	T, S	20–30	4	[1] 10		
Field—Phaseolus vulgaris	T, S	20–30; 25	5	[1] 8		
Mung—Phaseolus aureus	T, S	20–30	3	[1] 7		
Beet, field—Beta vulgaris	B, S	20–30	3	14	Photos 19557, 19558; see par. (b) (3)	
Beggarweed, Florida—Desmodium tortuosum	B	30	5	[1] 28		
Bentgrass:						
Colonial (including Astoria and Highland)—Agrostis tenuis.	P	15–30; 10–30	7	28	Light; KNO_3	Prechill at 5° or 10° C. for 7 days; see par. (a) (2).
Creeping—Agrostis palustris	P	15–30; 10–30	7	28	Light; KNO_3	Prechill at 5° or 10° C. for 7 days.
Velvet—Agrostis canina	P	20–30	7	21	Light; KNO_3	
Bermuda grass—Cynodon dactylon	P	20–35	7	21	Light; KNO_3, photo 2518; see par. (a) (9).	
Bluegrass:						
Annual—Poa annua	P	20–30	7	21	Light	
Bulbous—Poa bulbosa	P, S	10	10	35	KNO_3 or soil	Prechill all samples at 5° C. for 7 days.
Canada—Poa compressa	P	15–30; 10–30	10	28	Light; KNO_3, see par. (a) (2).	
Kentucky (including var. Merion)—Poa pratensis.	P	15–30; 10–30	10	28	Light; KNO_3	Prechill at 10° C. for 5 days.
Nevada—Poa nevadensis	P	20–30	7	21	Light; KNO_3	
Rough—Poa trivialis	P	20–30	7	21	Light	
Texas—Poa arachnifera	P	20–30	7	28	Light; KNO_3	Prechill at 5° C. for 2 weeks.
Wood—Poa nemoralis	P	20–30	7	28	Light	
Bluestem:						
Big-Andropogon gerardi	P, TS	20–30	7	28	Light; KNO_3	Prechill at 5° C. for 2 weeks.
Little-Andropogon scoparius	P, TS	20–30	7	28	do	Do.
Sand—Andropogon hallii	P, TS	20–30	7	28	do	Do.
Yellow—Andropogon ischaemum	P, TS	20–30	5	21	do	Do.
Brome:						
Mountain—Bromus marginatus	P	20–30	6	14	Light	
Smooth—Bromus inermis	P, B, TB	20–30	6	14	Light optional	Prechill at 5° or 10° C. for 7 days.
Broomcorn—Sorghum vulgare var. technicum	B, S	20–30	3	10		
Buckwheat—Fagopyrum esculentum	B, T	20–30	3	6		
Buffalograss—Buchloe dactyloides:						
(Burs)	P, TB, TS	20–35	7	28	Light; KNO_3	Prechill at 5° C. for 6 weeks; test 14 additional days.
(Caryposes)	P	20–35	5	14	Light; KNO_3	
Buffalograss—Pennisetum ciliare	S	30	7	28	Light; press fascikes into well-packed soil and prechill at 5° C. for 7 days.	See par. (b) (4).
Bur-clover, California—Medicago hispida	B, T	20	4	[1] 14	Remove seeds from bur; see par. (b) (11).	
Bur-clover, spotted—Medicago arabica	B, T	20	4	[1] 14	do	
Burnet, little—Sanguisorba minor	B	15	5	14		
Buttonclover—Medicago orbicularis	B	20	4	[1] 10	See par. (b) (11)	15° C.
Canarygrass—Phalaris canariensis	B	20–30	3	7		
Canarygrass, reed—Phalaris arundinacea	P	20–30	5	21	Light	KNO_3.
Carpet grass—Axonopus affinis	P	20–35	10	21	Light	KNO_3.
Castorbean—Ricinus communis	T, S	20–30	7	14	Remove caruncle if mold interferes with test.	
Chickpea—Cicer arietinum	T, S	20–30	3	7		
Clover:						
Alsike—Trifolium hybridium	B, S	20	3	[1] 7	See par. (b) (11)	15° C.
Berseem—Trifolium alexandrinum	B, S	20	3	[1] 7	do	Do.
Cluster—Trifolium glomeratum	B	20	4	[1] 10	do	Do.
Crimson—Trifolium incarnatum	B, S	20	4	[1] 7	See par. (b) (11). Photos 2479, 2482	Do.
Ladino—Trifolium repens	B, S	20	3	[1] 7	See par. (b) (11)	Do.
Lappa—Trifolium lappaceum	B	20	3	[1] 7	do	Do.
Large hop—Trifolium procumbens (T. campestre).	B	20	4	[1] 14	do	Do.
Persian—Trifolium resupinatum	B	20	3	[1] 7	do	Do.
Red—Trifolium pratense	B, S	20	4	[1] 7	See par. (b) (11). Photos 2483, 2484	Do.
Rose—Trifolium hirtum	B	20	4	[1] 10	See par. (b) (11)	Do.
Small hop (Suckling)—Trifolium dubium	B	20	4	[1] 14	do	Do.
Strawberry—Trifolium fragiferum	B	20	3	[1] 7	do	Do.
Sub—Trifolium subterraneum	B	20	4	[1] 14	do	Do.
White—Trifolium repens	B, S	20	3	[1] 7	do	Do.
Corn:						
Field—Zea mays	T, S	20–30; 25	4	7	Photos 2510, 2511, 2512, 2514	
Pop—Zea mays var. everta	T, S	20–30; 25	4	7		
Cotton—Gossypium spp	T, S	20–30	4	[1] 12	Photos 19553, 19554	Test by alternate method; see par. (b) (5).
Cowpea—Vigna sinensis	T, S	20–30	5	[1] 8	Photos 1989, 1990, 2377.	
Crested dogtail—Cynosurus cristatus	P	20–30	10	21	Light	Prechill for 3 days at 5° or 10° C.
Crotalaria:						
Lance—Crotalaria lanceolata	B, S	20–30	4	[1] 10		
Showy—Crotalaria spectabilis	B, S	20–30	4	[1] 10	Photos 2496, 2497	
Slenderleaf—Crotalaria intermedia	B, S	20–30	4	[1] 10		
Striped—Crotalaria mucronata	B, S	20–30	4	[1] 10		
Sunn—Crotalaria juncea	B, S	20–30	4	[1] 10		
Dallis grass—Paspalum dilatatum	P	20–35	7	21	Light; KNO_3	
Dichondra—Dichondra repens	B	20–30	7	[2] 28		
Dropseed, and—Sporobolus cryptandrus	P	15–35	5	42	Light; ENO_3	Prechill at 5° C. for 4 to 8 weeks and test for 28 days.
Emmer—Triticum dicoccum	B. T. S	20, 15	4	7		Prechill at 5° C. or 10° C. for 5 days or predry.

[1] Hard seeds often present. [2] Firm ungerminated seeds frequently present.

TABLE 2—GERMINATION REQUIREMENTS FOR INDICATED KINDS—Continued

Name of seed	Substrata	Temperature	First count	Final count	Additional directions	
					Specific requirements and photo numbers	Fresh and dormant seed
Agricultural seed—Continued						
Fescue:		°C.	*Days*	*Days*		
Chewings—Festuca rubra var. commuta	P	15–25	7	21		
(Alternate method	P	20–30	7	28	Light)	
Hair—Festuca capillata	P	10–25	10	28	KNO_3	
Meadow—Festuca elatior	P	20–30	5	14	Light and KNO_3 optional	
(Alternate method	P	15–25	5	14)		
Red—Festuca rubra	P	15–25	7	21		
(Alternate method	P	20–30	7	28	Light)	
Sheep—Festuca ovina	P	15–25	7	21		
(Alternate method	P	20–30	7	28	Light)	
Tall—Festuca arundinacea	P	20–30	5	14	Light and KNO_3 optional	
(Alternate method	P	15–25	5	14)		
Flax—Linum usitatissimum	B, T, S	20–30	3	7	Photos 2003, 2008, 2485, 2487	
Grama:						
Blue—Bouteloua gracilis	P, TB	20–30	7	28	Light	KNO_3.
Side-oats—Bouteloua curtipendula	P	15–30	7	28	Light; KNO_3	
Guineagrass—Panicum maximum	P	20–30	10	28	Light	
Hardinggrass—Phalaris tuberosa var. stenoptera	P	10–30	7	28	Light	KNO_3.
Hemp—Cannabis sativa	B, T	20–30	3	7		
Indiangrass, yellow—Sorghastrum nutans	P, TS	20–30	7	28	Light; KNO_3	Prechill at 5° C. for 2 weeks.
Indigo, hairy—Indigofera hirsuta	B	20–30	5	[1] 14		
Japanese lawngrass—Zoysia japonica	P	35–20	10	28	Light; KNO_3	
Johnsongrass—Sorghum halepense	P	20–35	7	35	Light	KNO_3.
Kudzu—Pueraria thunbergiana	T	20–30	5	[1] 14		
Lespedeza:						
Korean—Lespedeza stipulacea	B, S	20–35	5	[1] 14		
Sericea or Chinese—Lespedeza cuneata (L. sericea).	B, S	20–35	7	[1] 28	Photo 2494	
Siberian—Lespedeza hedysaroides	B, S	20–35	7	[1] 21		
Striate (Common, Kobe, Tenn. 76)—Lespedeza striata.	B, S	20–35	7	[1] 14		
Lovegrass, sand—Eragrostis trichodes	P	20–35	5	14	Light, KNO_3	Prechill at 5° or 10° C. for 6 weeks.
Lovegrass, weeping—Eragrostis curvula	P	20–35	5	14	Light	KNO_3.
Lupine:						
Blue—Lupinus angustifolius	T, S	20	4	[1] 10	Photos 14535–14542	
White—Lupinus albus	T	20	3	[1] 10		
Yellow—Lupinus luteus	T	20	7	[1] 10		
Maniagrass—Zoysia matrella	P	35–20	10	28	Light; KNO_3	
Meadow foxtail—Alopecurus pratensis	P	20–30	7	14	Light	
Medick, black—Medicago lupulina	B, S	20	4	[1] 7	See par. (b) (11).	
Millet:						
Browntop—Panicum ramosum	B	20–30	4	14	Light; KNO_3	Predry at 35° or 40° C. for 7 days; or test at 30° C.
Foxtail—Such as common, white wonder, German, Hungarian, Siberian, or Golden—Setaria italica.	B	20–30	4	10		
Japanese—Echinochloa crusgalli var. frumentacea.	B	20–30	4	10		
Pearl—Pennisetum glaucum	B	20–30	3	7		
Proso—Panicum miliaceum	B	20–30	3	7		
Molassesgrass—Melinis minutiflora	P	20–30	7	21	Light	
Mustard:						
Black—Brassica nigra	P	20–30	3	7	Light	KNO_3 and prechill at 10° C. for 3 days.
White—Brassica hirta	P	20–30	3	5	Light	
Napiergrass—Pennisetum purpureum	B	20–30	3	10		
Oat—Avena spp	B, T, S.	20; 15	5	10	Photos 2407, 2408, 2524–2527, 19545, 19546.	Prechill at 5° or 10° C. for 5 days and conclude test on 7th day or predry.
Oatgrass, tall—Arrhenatherum elatius	P	20–30	6	14	Light	
Orchardgrass—Dactylis glomerata	P, TS	20–30	7	21	Light; germination more rapid on soil.	
Panicgrass, blue—Panicum antidotale	P, TS	20–30	7	28	Light	
Peanut—Arachis hypogaea	T, S	20–30	5	10	Remove shells; Photos 19541, 19542	Test at 30° C.
Pea, field—Pisum sativum var. arvense	T, S	20	3	[1] 8	Photos 2503, 2506, 14543–14547	
Rape:						
Annual—Brassica napus var. annua	B	20–30	3	7		
Bird—Brassica campestris	P	20–30	3	10	Light	KNO_3.
Turnip—Brassica campestris vars	B	20–30	3	7		
Winter—Brassica napus var. biennis	B	20–30	3	7		
Redtop—Agrostis alba	P, TB	20–30	5	10	Light	KNO_3.
Rescuegrass—Bromus catharticus	P, S	10–30	7	28	Light; see par. (b) (8) for alternate method.	In soil at 15° C.
Rhodesgrass—Chloris gayana	P	20–30	6	14	Light; KNO_3	
Rice—Oryza sativa	T, S	20–30	5	14	Photos 19549, 19550; see par. (b) (9) for alternate method.	
Ricegrass, Indian—Oryzopsis hymenoides	P	15	7	42		Prechill at 5° C. for 4 weeks and test for 21 additional days.
Roughpea—Lathyrus hirsutus	T	20	7	[1] 14		
Rye—Secale cereale	B, T, S	20; 15	4	7	Photos 2403, 2406, 2528–2531	Prechill at 5° or 10° C. for 5 days, or predry.
Ryegrass:						
Italian—Lolium multiflorum	P, TB	20–30; 10–30	5	14	Light; KNO_3; see par. (b) (10) for fluorescence test.	Prechill at 5° C. for 5 days; see par. (a) (2).
Perennial—Lolium perenne	P, TB	20–30; 10–30	5	14	do	Do.
Safflower—Carthamus tinctorius	T, S	20	4	8		
Sainfoin—Onobrychis viciaefolia	B, T	20–30	4	[1] 14		
Sesame—Sesamun orientale	P	20–30	3	6		
Sesbania—Sesbania exaltats	T	20–30	5	[1] 7		
Smilo—Oryzopsis miliacea	P	20–30	7	42	Light	Prechill at 5° C. for 2 weeks.
Sorghum:						
Grain and Sweet—Sorghum vulgare	B, T, S	20–30	4	10	Photos 2413–2416	Prechill at 5° or 10° C. for 5 days.
Sourclover—Melilotus indica	B	20	3	[1] 14	See paragraph (b) (11)	
Soybean—Glycinemax	T, S	20–30; 25	5	[1] 8	Photos 2371, 2372, 2378	
Spelt—Triticum spelta	B, T, S	20; 15	4	7		Prechill at 5° or 10° C. for 5 days, or predry.
Sudangrass—Sorghum sudanense	B, T, S	20–30	4	10	Photos 2449–2452	Prechill at 10° C. for 5 days.
Sunflower (Cult.)—Helianthus annuus	T, B	20–30	3	7		
Sweetclover:						
White—Melilotus alba	B, S	20	4	[1] 7	Photos 2374, 2375, 2376, 2381; see par. (b) (11).	
Yellow—Melilotus officinalis	B, S	20	4	[1] 7	do	
Sweet vernalgrass—Anthexzathum odoratum	P	20–30	6	14	Light	
witchgrass—Panicum virgatum	P, TS	15–30	7	28	Light; KNO_3	Prechill at 5° C. for 2 weeks.

[1] Hard seeds often present.

TABLE 2—GERMINATION REQUIREMENTS FOR INDICATED KINDS—Continued

Name of seed	Substrata	Temperature	First count	Final count	Additional directions: Specific requirements and photo numbers	Additional directions: Fresh and dormant seed
Agricultural seed—Continued		°C.	Days	Days		
Timothy—Phleum pratense	P, TH	20–30	5	10	Light; photo 2399; see par. (a) (9)	KNO_3.
Trefoil:						
Big—Lotus uliginosus (L. major)	B	20	5	[1] 10		
Birdsfoot—Lotus corriculatus	B	20	5	[1] 10	Photos 19531, 19532	
Vazeygrass—Paspalum urvillei	P	20–35	7	21	Light	KNO_3.
Veldtgrass—Ehrharta calycina	P	10–30	7	28	Light	
Velvetbean—Stizolabium deeringianum	T, S, C	20–30	3	[1] 14	Photos 19539, 19540	
Velvetgrass—Holcus lanatus	P	20–30	6	14	Light	
Vetch:						
Common—Vicia sativa	T	20	5	[1] 10		
Hairy—Vicia villosa	T	20	5	[1] 14		
Hungarian—Vicia pannonica	T	20	5	[1] 10		
Monantha—Vicia articulata (V. menantha)	T	20	5	[1] 10		
Narrowleaf—Vicia angustifolia	T	20	5	[1] 14		
Purple—Vicia atropurpurea	T	20	5	[1] 10		
Woollypod—Vicia dasycarpa	T	20	5	[1] 14		Prechill at 10° C. for 5 days and test at 15° C.
Wheat:						
Common—Triticum aestivum	B, T, S	20;15	4	7	Photos 2507, 2522	Prechill at 5° or 10° C. for 5 days, or predry.
Club—Triticum compactum	B, T, S	20;15	4	7	do	Do.
Durum—Triticum durum	B, T, S	20;15	4	10	do	Do.
Polish—Triticum polonicum	B, T, S	20;15	4	7	do	Do.
Poulard—Triticum turgidum	B, T, S	20;15	4	7	do	Do.
Wheatgrass:						
Fairway created—Agropyron cristatum	P, TB	20–30	5	14	do	KNO_3 and prechill at 5° or 10° C. for 7 days.
(Alternate method	P, TB	15–25	5	14	do	
Standard crested—Agropyron desertorum	P, TB	20–30	5	14	do	KNO_3 and prechill at 5° or 10° C. for 7 days.
(Alternate method	P, TB	15–25	5	14	do	
Intermediate—Agropyron intermedium	P	20–30	5	28	Light	
Pubescent—Agropyron tricophorum	P	20–30	5	28	do	
Slender—Agropyron trachycaulum	P, TB	20–30	5	14	do	
Tall—Agropyron elongatum	P	20–30	5	21	do	
Western—Agropyron smithii	P, B	15–30	7	28	Light optional	KNO_3 or soil.
Wild-rye:						
Canada—Elymus canadensis	P	15–30	7	21	Light	Prechill at 5° C. for 2 weeks.
Russian—Elymus junceus	P	20–30	5	14		
Vegetable seed						
Artichoke—Cynara scolymus	T	20–30	7	21	Photos 19533, 19534	
Asparagus—Asparagus officinalis	T, S	20–30	7	21		
Asparagusbean—Vigna sesquipedalis	T, S	20–30	5	[1] 8		
Beans:						
Garden—Phaseolus vulgaris	T, S	20–30;25	5	[1] 8	Photos 1834, 1835, 1846, 1854, 1855	
Lima—Phaseolus lunatus var. macrocarpus	T, C, S	20–30	5	[1] 9	Photos 2380, 2400, 2401	
Runner—Phaseolus coccineus	T, S	20–30	5	[1] 9		
Beet—Beta vulgaris	B, S	20–30	3	14	See par. (b) (3); photos 19557, 19558	Prechill at 10° C. for 3 days.
Broadbean—Vicia faba	S, C	20	4	14	See para. (b) (11)	Prechill at 5° or 10° C. for 3 days; KNO_3 and light.
Broccoli—Brassica oleracea var. botrytis	B, P	20–30	3	10		Do.
Brussels sprouts—Brassica oleracea var. gessifera	B, P	20–30	3	10		Do.
Cabbage—Brassica oleracea var. capitata	B, P	20–30	3	10	Photos 19551, 19552	
Cabbage, Chinese—Brassica pekinensis	B	20–30	3	7		
Cardoon—Cynara cardunculus	T	20–30	7	21	Photos 19547, 19548	
Carrot—Daucus carota	B	20–30	6	21	Photo 19561	
Cauliflower—Brassica oleracea var. botrytis	B, P	20–30	3	10		Prechill at 5° or 10° C. for 3 days; KNO_3 and light.
Celeriac—Apium graveolens var. rapacoum	P, TB	10–20;20	10	21	Light at 20° C. constant; see par. (a) (9).	
Celery—Apium graveolens var. dulce	P, TB	10–20;20	10	21	do	KNO_3 and prechill at 10° C. for 3 days.
Chard, Swiss—Beta vulgaris var. cicla	B, S	20–30	3	14	See par. (b) (3)	
Chicory—Cichorium intybus	P, TS	20–30	5	14	Light; KNO_3 or soil; photo 2504; see par. (a) (9).	
Citron—Citrullus vulgaris	T	20–30	7	14	Soak seeds 6 hours	Test at 30° C.
Collards—Brassica oleracea var. acephala	B, P	20–30	3	10		Prechill at 5° or 10° C. for 3 days; KNO_3 and light.
Corn, sweet—Zea mays	T, S	20–30; 25	4	7	Photos 2510–2512, 2514	
Cornsalad (Fetticus)—Valerianella locusta var. olitoria	B	20	7	28		Test at 10° or 15° C.
Cowpea—Vigna sinensis	T, S	20–30	5	[1] 8	Photos 1989, 1990, 2377	
Cress:						
Garden—Lepidium sativum	B, P	20	4	10		Test at 15° C. and light.
Water—Horippa nasturtium-aquaticum	P	20–30	4	14	Light	
Cucumber—Cucumis sativus	B, T, S	20–30	3	7	Keep substratum on dry side; see par. (a) (3); photos 19535, 19536.	
Dandelion—Taraxacum officinale	P, TB	20–30	7	21	Light; see par. (a) (9)	Light; KNO_3.[1]
Eggplant—Solanum melongena var. esculentum	P, TB, HB	20–30	7	14		See pars. (a) (9) and (b) (6).
Endive—Cichorium endivia	P, TS	20–30	5	14	Light; KNO_3 or soil	Prechill at 5° or 10° C. for 3 days; KNO_3 and light.
Kale—Brassica oleracea var. acephala	B, P	20–30	3	10		Light; KNO_3; Prechill at 5° or 10° C. for 3 days.
Kale, Chinese—Brassica oleracea var. alboglabra	P, B	20–30	3	10		Prechill at 5° or 10° C. for 3 days; KNO_3 and light.
Kohlrabi—Brassica oleracea var. gongylodes	B, P	20–30	3	10		
Leek—Allium porrum	B	20	6	14		
Lettuce—Lactuca sativa	P	20	none	7	Light for at least ½ hour [par. (b) (7)]; photos 2417, 2418, 19559, 19560.	Prechill at 10° C. for 3 days or test at 15° C.
Muskmelon (cantaloup)—Cucumis melo	B, T, S	20–30	4	10	Keep substratum on dry side [par. (a) (3)].	
Mustard—Brassica juncea	P	20–30	3	7	Light	Prechill at 10° C. for 7 days and test for 5 additional days; KNO_3.
Mustard, spinach—Brassica perviridis	B	20–30	3	7		
Okra—Hibiscus esculentus	T	20–30	4	[1] 14	Photos 19543, 19544	
Onion—Allium cepa	B	20	6	10	Photos 1962, 2253, 2254, 2328, 2330, 2340, 2341, 2469.	
(Alternate method	S	20	6	12)		
Onion, Welsh—Allium fistulosum	B	20	6	10		
Pak-choi—Brassica chinensis	B	20–30	3	7		
Parsley—Petroselinum hortense (P. crispum)	B, TS	20–30	11	28		

[1] Hard seeds often present.

TABLE 2—GERMINATION REQUIREMENTS FOR INDICATED KINDS—Continued

Name of seed	Substrata	Temperature	First count	Final count	Additional directions: Specific requirements and photo numbers	Additional directions: Fresh and dormant seed
Vegetable seed—Continued		°C.	Days	Days		
Parsnip—Pastinaca sativa	B, TS	20–30	6	28		
Pea—Pisum sativum	T, S	20	5	[1] 8	Photos 2492, 2498–2500	
Pepper—Capsicum spp	P, TB, RB	20–30	6	14		Light and KNO_3.
Pumpkin—Cucurbita pepo	T, S	20–30	4	7	Keep substratum on dry side [par. (a) (3)].	
Radish—Raphanus sativus	B	20	4	6	Photos 2554, 19555, 19556	
Rhubarb—Rheum rhaponticum	TB, TS	20–30	7	21	Light	
Rutabaga—Brassica napus var. napobrassica	B	20–30	3	14		Prechill at 10° C. for 3 days.
Salsify—Tragopogon porrifolius	T	20	5	10		Test at 15° C.
Sorrel—Rumex acetosa	P, TB, TS	20–30	3	14	Light	
Soybean—Glycine max	T, S	20–30; 25	5	[1] 8	Photos 2371, 2372, 2378	
Spinach—Spinacia oleracea	TB	15; 10	7	21	Keep substratum on dry side [par. (a) (3)].	
Spinach, New Zealand—Tetragonia expansa	TS	10–30	5	28	Keep substratum on dry side [par. (a) (3)].	
(Alternate method	B	15	5	21	Remove pulp from "seeds").	
Squash—Cucurbita moschata and C. maxima	T, S	20–30	4	7	Keep substratum on dry side [par. (a) (3)]; photos 19537, 19538.	
Tomato—Lycopersicon esculentum	B, P, RB	20–30	5	14	Photo 2513	Light; KNO_3.
Tomato, husk—Physalis pubescens	P, TB	20–30	7	28	Light; KNO_3	
Turnip—Brassica rapa	B	20–30	3	7		
Watermelon—Citrullus vulgaris	T, S	20–30; 15	4	14	Keep substratum on dry side [par. (a) (3)].	Test at 30° C.

[1] Hard seeds often present.

30. In § 201.59 delete the first two words in the first sentence and amend the second sentence to read: "Tolerances for purity percentages and germination percentages provided for in §§ 201.60 and 201.61 shall be determined from the mean of (a) the results being compared, or (b) the result found by test and the figures shown on a label, or (c) the result found by test and a standard. All other tolerances, including tolerances for pure-live seed, tolerances for pure seed based on 400- to 1000-seed tests, and tolerances for field and greenhouse tests for determination of kind, variety, or type shall be determined from the result or results found in the administration of the act."

31. Section 201.60 is amended as follows:

a. Change the first sentence in the second undesignated paragraph to read: "An additional tolerance shall be allowed for the following kinds of seeds (a) when any one kind constitutes the principal component of the sample, (b) in mixtures containing these kinds, singly or combined, in excess of 50 percent of the whole, and (c) in mixed and unmixed seeds wherein the chaffy seed plus the empty florets and/or spikelets exceed 50 percent of the sample."

b. Add to the list of subject kinds of seed the following: "Buffel grass, Hairy intermediate wheatgrass, Intermediate wheatgrass, Tall wheatgrass, and Veldtgrass."

32. In the list in § 201.61 delete the heading "Found by test" and insert therefor the following:

Mean (See § 201.59)

33. In § 201.64a change the section heading and the first sentence to read as follows:

§ 201.64a *Pure seed percentages based on 400- to 1000-seed tests.* Tolerances for pure seed percentages based on 400- to 1000-seed separations and fluorescence tests shall be: (a) Those set forth in the following table plus (b) one-half the regular pure seed tolerances determined in accordance with § 201.60. The sum of these two tolerances shall be applied to the result or results obtained in the administration of the act.

34. Following § 201.64a, insert a new undesignated section to read as follows:

§ 201.— *Field and greenhouse tests for determination of kind, variety, or type.* The following table of tolerances shall be used for field and greenhouse tests for determination of kind and variety:

[Tolerance]

Percentage purity found by test [1]	Number of plants—50–74	75–99	100–149	150–199	200–249	250–299	300–349	350–399	400–799	800 or more
	Tolerance in percent									
95–100	10.0	9.5	8.5	8.0	7.5	7.0	6.5	6.0	5.5	5.0
90–94	10.5	10.0	9.0	8.5	8.0	7.5	7.0	6.5	6.0	5.5
85–89	11.0	10.5	9.5	9.0	8.5	8.0	7.5	7.0	6.5	6.0
80–84	11.5	11.0	10.0	9.5	9.0	8.5	8.0	7.5	7.0	6.5
75–79	12.0	11.5	10.5	10.0	9.5	9.0	8.5	8.0	7.5	7.0
70–74	12.5	12.0	11.0	10.5	10.0	9.5	9.0	8.5	8.0	7.5
65–69	13.0	12.5	11.5	11.0	10.5	10.0	9.5	9.0	8.5	8.0
60–64	13.5	13.0	12.0	11.5	11.0	10.5	10.0	9.5	9.0	8.5
55–59	14.0	13.5	12.5	12.0	11.5	11.0	10.5	10.0	9.5	9.0
50–54	14.5	14.0	13.0	12.5	12.0	11.5	11.0	10.5	10.0	9.5

[1] The tolerance for any value below 50 percent is the tolerance on the difference between 100 percent and the figure for which the tolerance is being determined. Thus, the tolerance on 45 percent for 400 plants would be: 100−45=55; tolerance equals 9.5 percent.

35. Amend § 201.65 as follows:

a. In the formula for "percent perennial ryegrass," under paragraph (a), delete "percent fluorescence + percent nonfluorescence" and substitute therefor the words "percent germination."

b. Amend paragraph (b) *Sweetclover* to read as follows:

(b) *Sweetclover.* In determining the percentage of yellow blossom biennial sweetclover in a mixture of yellow and white blossom biennial sweetclover, at least 400 seeds shall be examined to determine the percentage of mottled seed. The percentage of mottled seed shall be multiplied by four and this product multiplied by the percentage of sweetclover in the sample. The product shall be construed as representing the percentage of yellow blossom sweetclover.

36. Renumber the sections of the regulations to the extent necessary to permit the insertion of new sections following §§ 201.47, 201.55, 201.57 and 201.65, as proposed above; the assignment to present section 201.64a of a full section number immediately after present § 201.60; and the insertion of present §§ 201.65 and 201.66 immediately before present § 201.59.

37. In the list in § 201.101 insert in the proper alphabetical order the following:

Castorbean.
Lettuce.
Rape, winter.
Safflower.
Sesame.

38. Amend § 201.102 by adding to the tabulation in proper alphabetical order the following names and percentages:

Bluestem, yellow	25
Buffelgrass	50
Lovegrass, sand	50
Veldtgrass	35
Wild-rye, Russian	60

39. Amend § 201.107 as follows:

a. In paragraph (a) add to the list of plant families in proper alphabetical order, the following:

Piperacoae—Pepper.

b. In paragraph (b) add to the list of incidental weed seeds in proper alphabetical order, the following:

Alfilleria—Erodium cicutarium (L.) L'Her.
Beggarweed—Desmodium tortuosum (Sev.) DC.
Bluegrass, annual—Poa, annua L.
Burnet, little—Sanguisorba minor Scop.
Dichondra—Dichondra repens Forst.
Sesbania—Sesbania exaltata (Raf.) Torr.

Amendments proposed by the American Seed Trade Association:

40. In § 201.22 delete the numeral "5" and insert in lieu thereof the numeral "8."

41. In § 201.31 delete the words "Beans, garden (varieties other than Rival, Topcrop, and Logan)—75" which appear as the 4th item in the list of germination standards, and delete from the 5th item the words "(varieties Rival, Topcrop, and Logan)."

Done at Washington, D. C., this 20th day of May 1955.

[SEAL] EARL L. BUTZ,
Assistant Secretary.

[7 CFR Part 945]

[AO-265]

TOMATOES GROWN IN FLORIDA

NOTICE OF RECOMMENDED DECISION AND OPPORTUNITY TO FILE WRITTEN EXCEPTIONS WITH RESPECT TO PROPOSED MARKETING AGREEMENT NO. 125 AND ORDER NO. 45

Pursuant to the rules of practice and procedure, as amended, governing proceedings to formulate marketing agreements and marketing orders (7 CFR Part 900; 19 F. R. 57), notice is hereby given of the filing with the Hearing Clerk of the recommended decision of the Deputy Administrator, Agricultural Marketing Service, United States Department of Agriculture, with respect to proposed Marketing Agreement No. 125 and Order No. 45, regulating the handling of tomatoes grown in the State of Florida, to be effective pursuant to the provisions of the Agricultural Marketing Agreement Act of 1937, as amended (48 Stat. 31, 7 U. S. C. 601 et seq.; 68 Stat. 906, 1047), hereinafter called the "act." Interested parties may file exceptions to this recommended decision with the Hearing Clerk, Room 112 Administration Building, United States Department of Agriculture, Washington 25, D. C., not later than the close of business on the twentieth day after publication of this recommended decision in the FEDERAL REGISTER. Exceptions should be filed in quadruplicate.

Preliminary statement. The public hearing on the record of which the proposed marketing agreement and marketing order were formulated was held at West Palm Beach, Florida, on March 7–10, 1955, pursuant to notice thereof which was published February 10, 1955, in the FEDERAL REGISTER (20 F. R. 862). Such notice set forth the proposed marketing agreement and order which were sponsored by producers and handlers of tomatoes in the State of Florida, as represented by officials of the Florida Fruit and Vegetable Association.

Material issues. The material issues presented on the record of the hearing are as follows:

(1) The existence of the right to exercise federal jurisdiction;

(2) The need for the proposed regulatory program to effectuate the declared purposes of the act;

(3) The definition of the commodity and determination of the production area to be affected by the marketing agreement and order;

(4) The identity of the persons and transactions to be regulated; and

(5) The specific terms and provisions of the proposed marketing agreement and order including:

(a) Definitions of terms used therein which are necessary and incidental to attain the declared objectives of the act, and including all those set forth in the notice of hearing, among which are those applicable to the following additional terms and provisions;

(b) The establishment, maintenance, composition, powers, duties, and operation of a committee, which shall be the administrative agency for assisting the Secretary in administration of the program;

(c) The authority for the committee to incur expenses and to levy assessments on shipments;

(d) The need for establishment of tomato marketing research and development projects;

(e) The method for limiting the handling of tomatoes grown in the production area;

(f) The methods for establishing minimum standards of quality and maturity;

(g) The methods for authorizing special regulations applicable to the handling of tomatoes for specified purposes or to specified outlets which may be handled under special regulations that are modifications or amendments to grade, size, and quality regulations;

(h) The necessity for inspection and certification of shipments;

(i) The relaxation of regulation in hardship cases and the methods and procedures applicable thereto;

(j) The procedure for establishing reporting requirements upon handlers;

(k) The requirements of compliance with all provisions of the marketing agreement and order and with regulations issued pursuant thereto; and

(l) Additional terms and conditions as set forth in §§ 945.82 through 945.95 and published in the FEDERAL REGISTER (20 F. R. 862) on February 10, 1955, which are common to marketing agreements and orders.

Findings and conclusions. The findings and conclusions on the aforementioned material issues, all of which are based on the evidence introduced at the hearing and the record thereof, are as follows:

(1) The major portion of the tomatoes grown in the Florida production area enter commercial market channels with the great bulk of such movement going to destinations outside Florida. 1954–55 Florida tomato production is estimated at 4,965,000 bushels for the late fall and winter crops. Estimates of early spring production were not available at the time of the hearing. The 1953–54 Florida crop of tomatoes was estimated at 8,718,000 bushels out of which 19,068 carlot equivalents (including trucks), or approximately 7,627,200 bushels, were shipped in interstate or foreign commerce. The distribution of Florida tomatoes for the 1952 and 1953 calendar years was also widespread. Shipments were made in 1952 and 1953 to 34 States, the District of Columbia, the Provinces of Quebec, Ontario, Manitoba, and British Columbia, as well as to points within Florida. The major portion of the market for tomatoes in fresh form lies outside the production area.

Any handling of tomatoes grown in the State of Florida exerts a direct influence upon all other handling of tomatoes. It is a primary objective of tomato handlers, as it is also of all handlers of other commodities, to seek the highest return they can get for the tomatoes or other commodities they have to sell. In assessing the market outlook and in making sales, sellers survey all accessible markets with a view to accepting the most advantageous opportunities and offers to market their tomatoes. Successful handlers are forced by competition to maintain and keep abreast of all possible market information, particularly the level and trend of prices in specific markets both within the State of production and beyond the State border. Markets within the production area provide opportunities for handlers to effect sales the same as markets outside the State. The opportunity for advantageous sales are eagerly sought by handlers and such opportunities are accepted regardless of whether the tomatoes are sold at the shipping point, or at destination, or in consuming markets within the State of Florida, or in Boston, New York, Chicago, Atlanta, or any other market beyond the production area. Both buyers and sellers use the latest and most modern forms of communication not only to keep up with their competitors, but also to maintain the closest possible association with market conditions at every point where there may be a potential sale. Both shipping point handlers and receiving market handlers through close attention and modern communications quote, offer, bargain, buy, and sell tomatoes and thereby create an institution commonly referred to in the trade as "the tomato market." The tomato market is a combination of all the phenomena that relate to the supply of and demand for tomatoes in the producing area, the supply that is available for immediate marketing, the supply for marketing later, the quality of such supply, the supply of tomatoes in competing areas with various ramifications of quality and availability, prices quoted by sellers at shipping point and in receiving markets as well as at sundry points between, and a great variety of additional factors that influence both buyers and sellers in helping them to arrive at a

meeting of minds, a closing of contracts of sale, and a final consummation of contract through exchange of tomatoes and consideration.

These factors are interdependent as between shipping point and receiving markets. A factor or factors which influence the market at shipping point soon are reflected in prices in terminal markets, subject to the effect of location factors, and, in turn, factors influencing prices in receiving markets are soon reflected in the market at shipping point. For example, bad weather at shipping point may slow down the rate of grading and loading to such an extent that buyers will experience difficulty in filling orders and they will bid higher than otherwise for remaining supplies. In turn, the increase in price of tomatoes at shipping point will soon be reflected in the market at receiving points outside the production area. An alternative to the above example may involve a similar set of circumstances at shipping point, with bad weather holding up grading and loading, but if competing supplies in terminal markets take advantage of such situation by increasing the amount available the price of tomatoes in the terminal markets may not increase appreciably, if at all, and in turn prices at shipping point may also fail to rise. It is a well established fact, and well recognized in the tomato market, that a sale of a particular quantity of tomatoes in a market within that portion of the State of Florida comprising the production area exerts a direct influence upon all other sales of such tomatoes, as also does a sale of tomatoes in a market within any other State. The movement and sale of tomatoes grown in Florida, whether to a market within or outside the production area, affects the price structure for all tomatoes grown in Florida.

Changes in the supply of tomatoes being marketed at any particular time and changes in estimates of tomato supplies available for market affect the price of tomatoes. Changes in the supply of tomatoes grown in the Florida production area, or any part thereof, have a direct effect on both terminal market and shipping point prices for all tomatoes. Tomatoes grown in any portion of the production area and marketed at any given season complete with other tomatoes marketed during such season whether such other tomatoes are grown in other portions of or outside of such production area.

Public agencies supply daily information relative to terminal tomato markets such as Boston, New York, Chicago, Atlanta, etc. and, during the active shipping season the same agencies supply similar information relevant to market information at shipping points in Florida, as well as shipping point prices for tomatoes grown in other producing areas. This published market information, and information which handlers receive through private communication, are closely followed by all handlers in an effort to keep up with competition and to maintain particular advantage to themselves so that they may continue to operate successfully.

Few, if any tomatoes grown within the production area, are produced specifically for any outlet other than the fresh market. However, a substantial tonnage of Florida tomatoes is moved to canning plants within the production area. During the 1953–54 season, for example, more than one million bushels or 11.5 percent of total Florida tomato production went for canning. Such tomatoes are those that remain in the fields after the salable fresh market crop has been picked and repicked and consist mostly of fruit considered too ripe for handling in fresh market channels. Sale of tomatoes to canners is a salvage operation by the industry. Such salvage operation is performed by picking crews hired by other than the producers. After the producer has picked all acceptable fresh market fruit, he usually sells the remaining fruit, on the vines, to a cannery or to a huckster on a per acre or other similar bulk basis. Although prices paid by canners are relatively low, such prices have a direct effect on the total returns to tomato producers. When prices of tomatoes moving into fresh market channels reach a point that picking for fresh market is no longer profitable, the reurns to growers for canning tomatoes are extremely small.

It is a common practice for handlers to load tomatoes at shipping points within the State and to ship such tomatoes to markets within the State, particularly Jacksonville or Tampa, and before or upon arrival at such markets to divert the shipments to markets outside the State. Conversely, shipments originally directed to markets outside the State may be diverted to markets within the State for final disposition. This diversion from intended destination outside the State to markets within the State is a common practice, especially among truckers who are able to divert quickly in response to attractions from local prices. It is impossible in many cases at the time tomatoes are sold to a trucker to determine finally whether such tomatoes will be marketed by the trucker within the production area or at a point, or even several points outside the production area. The sale and movement of tomatoes grown within the production area are directly related whether such sale or such movement is within the production area or outside thereof.

The phenomena of sale and movement constitute the market for tomatoes and the interdependence of the markets both within and outside the State directly burdens, obstructs and affects interstate commerce. Phenomena making up the market for tomatoes constitute commerce which is so inextricably intermingled that all sale and movement of such tomatoes are either in the current of interstate or foreign commerce or directly burden, obstruct, or affect such commerce and therefore all such movement and sale of tomatoes grown in the production area should be subject to the authority of the act and of the marketing agreement and order which may be issued pursuant thereto.

(2) Prices for tomatoes grown in Florida have fluctuated rather widely during the past several years, reflecting disorderly marketing conditions that have adversely affected growers' returns. Production and price statistics for Florida tomatoes are reported by the Agricultural Marketing Service, United States Department of Agriculture, on the basis of three seasons within each crop year; namely, late fall, winter, and early spring. During the past 6 crop years, 1948–49 to 1953–54, the average farm price paid for Florida tomatoes has exceeded the Florida parity equivalent price in only one season. The farm price for the 1954–55 late fall season for Florida tomatoes averaged $4.85 per bushel reflecting 95 percent of parity. During the 1953–54 early spring season, the average price paid was $4.40 per bushel or 90 percent of parity. The comparable price reported for the 1953–54 winter crop was $4.55 or 84 percent of parity. Late fall average farm prices for Florida tomatoes have varied from $4.20 to $6.60 per bushel for the past ten seasons, 1945–54. Prices during this 10-season span have reflected returns to farmers ranging from 77 percent to 117 percent of parity. Even greater fluctuation is reported in the season average farm prices paid for Florida winter-season tomatoes. For the last nine seasons, the per bushel price has varied from $3.75 to $7.20 or from 63 to 126 percent of parity. Similar price data for the past nine early spring seasons show average prices ranging from a low of $4.15 per bushel up to $6.00; this reflects parity levels of 77 to 122 percent.

Volume shipments of Florida tomatoes usually begin in November and continue into June of each crop year. During this marketing period, there is a rather wide range in prices with sharp, short time fluctuations in such prices within seasons, from season to season, and among different grades and sizes of tomatoes. 1953–54 season f. o. b. shipping point data in the Fort Pierce section bear out the above. Tomatoes of 70–85 percent or more U. S. No. 1 quality in 60-pound crates, 6 x 6's or larger, brought $14.00–16.00 for the week ending November 27, 1953. During the same week 6 x 7's realized $13.00–15.00; 7 x 7's, $11.00–12.00; and 7 x 8's $8.00–9.00. Comparable prices for the Fort Pierce early spring crop were considerably lower. In May 1954, 6 x 6's were $7.00–8.50; 6 x 7's $5.00–7.50; 7 x 7's, $3.00–5.00; 7 x 8's $2.00–3.50. During the height of the Dade County shipping season (mid-March 1954) the price paid for 6 x 6's of the above mentioned quality was $7.50–8.50; 6 x 7's brought $5.00–6.00; 7 x 7's, $3.00–4.00; and 7 x 8's $1.50–2.25 per 60 pound-crate. For the 1953–54 winter "deal" in the Fort Myers-Immokalee section, 6 x 6's and larger were $7.00–8.00 with 6 x 7's a dollar less. During April 1954 tomatoes from the same section were $8.00–9.00 for 6 x 6's; 6 x 7's were $7.00 to 8.00. During May 1954 in the Manatee-Ruskin Section, 6 x 6's closed out at $8.50 to 9.00 with 6 x 7's a dollar cheaper.

Examination of the records of a growers' cooperative which were submitted at the hearing clearly indicates the advantage accruing to the grower who sells

high quality produce and shows the penalty suffered when such produce is of less acceptable grade and sizes. For example, the records disclosed that, during May 1952, No. 1 6 x 6's in 60-pound wire bound crates netted the grower $4.16, No. 2 6 x 6's realized $2.54, and No. 2 7 x 7's returned only 20 cents. Similar data for the April 30-May 3, 1953, period show a greater spread in such prices with No. 1 6 x 6's bringing $4.56, No. 2 6 x 6's realized only $1.65 while the grower suffered a net loss of 10 cents per package on the No. 2 7 x 7's. Again, during the following season (May 1954), there was a wide price spread ranging from $6.42 for No. 1 6 x 6's to $0.90 for No. 2 7 x 7's. All of these prices reflect net returns paid to growers by the cooperative during a short period in each of the last three seasons.

The quantity of tomatoes available on the market at any given time, either daily or seasonally, has a direct effect upon the price which producers receive for their tomato crops. Florida producers grow a major portion of the domestically grown tomatoes during the late fall, winter, and early spring seasons covering the period November through May. The quantity of tomatoes put on the market by Florida producers or handlers also has a direct effect upon the price of all tomatoes, particularly the price which Florida growers receive for their crop. The price of tomatoes in the market is a direct function not only of the total quantity of tomatoes being marketed, but also of the quality of tomatoes as reflected by the different prices paid by grades and sizes for such tomatoes. Certain grades and sizes of tomatoes return higher prices to producers than other grades and sizes. For example, U. S. No. 1 quality tomatoes normally return a higher price than U. S. No. 2 grade tomatoes, and a considerably higher price than tomatoes which are of lower quality than U. S. No. 2. Such low quality tomatoes are commonly referred to in trade circles as "No. 3's" and sometimes as "culls." Small sized tomatoes, such as 8 x 8's and 7 x 8's, also return less to the grower than the usual preferred sizes; 6 x 7's, 6 x 6's, and larger.

Shipments of immature and over-ripe tomatoes have the same detrimental effect on returns to growers as do poor quality or undesirable sizes of tomatoes.

It is a common and usual practice among the great majority of handlers to eliminate the small size tomatoes, culls, and over-ripe stock, and in many cases the "No. 3's" also, when they are grading tomatoes for market. Such poor quality tomatoes and discounted sizes and undesirable maturity are removed. These handlers have found from experience it pays them to do so because the adulteration of the better packs, which constitute the bulk of their crop, with the poorer grades, maturity, and sizes forces the price down on all of their sales. However, some handlers continue to sell culls and off-sizes because they frequently are able to buy them at exceptionally low prices from the grower and to sell them at a small discount from average prices, thereby giving the handler as much or even a greater margin than they could expect from handling usual good quality and the more desirable sizes of tomatoes. The withholding of poor grades and undesirable maturities and sizes of tomatoes from markets in effect reduces the available market supply of such tomatoes. By reducing the quantity being marketed as well as eliminating discounts from average price, growers' prices for tomatoes are thereby improved.

The sale of cull tomatoes tends, not only to return discounted prices to growers, but also give only limited satisfaction to consumers and such sale operates against repeat sales. It is not in the public interest to sell cull tomatoes under normal conditions because the evidence shows that consumers fail to obtain proper value for their expenditures as compared with purchases of good quality tomatoes, and the returns to growers are adversely affected thereby tending to destroy the value of agricultural assets which support the national credit structure, and these conditions, in turn affect transactions in agricultural commodities with a national public interest.

Prices to Florida tomato producers and total returns of such producers could be augmented by handling only the more preferred grades, sizes, and maturities of such tomatoes. Voluntary efforts have been made and practiced by individual producers and handlers in Florida to eliminate some of the "culls" or "No. 3's", especially when the average price level to Florida tomato producers was low, but such voluntary efforts have not raised producers' prices and returns appreciably when other handlers continue to ship culls and small sizes to the detriment of all other tomato producers and handlers and contrary to the public interest of the Florida tomato industry.

The orderly marketing of tomatoes grown in Florida has been disrupted and the purchasing power of the producers thereof has been impaired by reason of the handling of certain grades, sizes, qualities, and maturities of such tomatoes which have adversely affected prices returned to tomato producers.

A marketing agreement and order is necessary to authorize regulation of the sale and transportation of tomatoes grown in Florida so that more orderly marketing conditions for such tomatoes may be established. The establishment of more orderly marketing conditions as brought about by marketing agreement and order regulations will tend to establish parity prices for tomatoes grown in Florida. A marketing agreement and order authorizing regulation of the handling of tomatoes will assist the Florida industry in establishing and maintaining such minimum standards of quality and maturity and such grading and inspection requirements for tomatoes grown in the production area which will effectuate such orderly marketing of such tomatoes as will be in the public interest. The adoption of a marketing agreement and order program by handlers of Florida tomatoes and the approval of such an order by Florida tomato producers will tend to promote more orderly marketing of such tomatoes and it will be in the public interest. It is hereby found that the marketing agreement and order as hereinafter set forth will promote more orderly marketing of Florida tomatoes and the operation of such a program will tend to establish and maintain such orderly marketing conditions for Florida tomatoes as will establish, as the price to farmers, parity prices for such tomatoes.

(3) The term "tomatoes", as used in the marketing agreement and order, identifies the agricultural commodity referred to therein and distinguishes it from other agricultural commodities. The term "tomatoes" should be defined to mean all varieties of the edible fruit (lycopersicon esculentum) which are commonly referred to as tomatoes in the production area as well as throughout the United States. Tomatoes are one of the principal vegetable crops grown by producers in the production area. Reference to "tomatoes" has a common and specific meaning to all growers and handlers in the production area as well as in other parts of the country. The definition of tomatoes, as set forth in the marketing agreement and order, establishes the identity of the agricultural commodity for which regulation is authorized. This definition establishes the commodity to which the handling activities related thereto are subject to the authority of the marketing agreement and order. The act authorizes marketing agreements and orders applicable to tomatoes, or to any regional or market classification thereof. Tomatoes of all varieties which are grown in the production area constitute a regional classification of tomatoes and regulation of the handling of such tomatoes as authorized by the marketing agreement and order will tend to effectuate the declared policy of the act. Tomatoes therefore should be defined in the marketing agreement and order to mean all varieties of tomatoes grown in the production area.

The term "production area" should be incorporated in the marketing agreement and order as a means of specifying the area within which tomatoes must be produced before the handling thereof is subject to regulation thereunder. Production area is defined to include all territory within the State of Florida south or east of the Suwanee River. The production area thus defined contains all of the tomato producing counties of commercial importance within Florida. No tomato acreage is reported for the 1953–54 crop year in any of the Florida counties outside of the production area. Although tomatoes are not now grown commercially in some of the counties within the production area, especially among some of the northern counties, such counties contain land areas capable of supporting commercial production of tomatoes and, as such, are potential growing areas.

There may be minor variations in practices and methods of production, harvesting, and marketing of tomatoes from growing section to growing section within the production area; perhaps one variety of tomatoes may be preferred for growing in the Fort Pierce section, another in the Immokalee area. Nevertheless, grading and quality standards

for commercial sales are the same throughout the production area. No producing section has a marketing season which is entirely separate and apart from the other sections' marketing seasons as shown by the tabulation of monthly rail and truck shipments for the various Florida tomato producing areas. Each section within the production area has to share and compete in common markets at the same time as one or more other sections. Undesirable grades, sizes, qualities, and maturities of tomatoes have the same effect in a market on the prices paid for Florida tomatoes irrespective of the producing section or sections. To divide the production area as defined would tend to defeat the purpose of a marketing agreement and order in that poor quality tomatoes from a section outside the area would depress the price of the tomatoes regulated and would have a similar effect on price as an illegal shipment from the regulated area.

Natural geographic and political boundaries favor the establishment of the production area as defined. The production area consists largely of the peninsula portion of the State of Florida bounded on the east, south, and west by the Atlantic Ocean and the Gulf of Mexico, on the northwest by the Suwannee River, and on the north by the State of Georgia. The Suwannee River and the State boundary do not bisect a tomato producing area. In addition, enforcement of regulations is favored by the fact that road guard stations, operated by the Citrus and Vegetable Division, Florida State Department of Agriculture, are strategically located at a number of highway outlets leading out of the production area. Also the number of rail outlets from such area is limited. There is no reasonable method or basis of dividing the production area into two or more areas for purposes of separate marketing agreements and orders. All territory included within the boundaries of the production area constitutes the smallest regional production area that is practicable, consistent with carrying out the declared policy of the act, and the production area, therefore, should be defined as hereinafter set forth.

(4) The term "handler" and "shipper" are synonymous and they should be defined to identify those persons who handle tomatoes in the manner described and set forth in the definition of "handle" because such persons are subject to the regulations authorized by the marketing agreement and order. Any person who is engaged in the act or acts of handling or shipping tomatoes, or who causes tomatoes to be handled or shipped, is a handler. Such persons are responsible for the grade, size, quality, and maturity of tomatoes delivered to transportation agencies, or which are transported or sold in the current of interstate or foreign commerce, or so as directly to burden, obstruct, or affect such commerce, and such persons are handlers.

Common or contract carriers transporting tomatoes which are owned by another person are performing a handling function but such handling should not be regulated under the marketing agreement and order because such carriers are not responsible for the grade, size, quality, and maturity of the tomatoes being transported. Neither are they responsible for the introduction of such tomatoes into the stream of interstate commerce. Also the sole interest of common or contract carriers in such tomatoes is to transport them for a service charge to destinations selected by others. The responsibility for the grade, size, quality, and maturity of such tomatoes delivered to a common or contract carrier should be borne solely by the person or persons responsible for delivering such tomatoes to the carriers.

Therefore, the term handler or shipper should be defined to mean any person (except a common or contract carrier of tomatoes owned by another person) who handles tomatoes or causes tomatoes to be handled.

The term "handle" is defined in the marketing agreement and order to determine those transactions by handlers which fall within the authority for regulation under this program. Handle or ship are synonymous. Handle should include the act of shipping and the activities by handlers which are included within these terms. The handling of tomatoes under the marketing agreement and order begins with the movement of such tomatoes from the field where grown and continues to follow such tomatoes until they reach the local retailer or leave the production area. Handle also means the sale of tomatoes grown in the production area at any point between the time that they begin to move from the field until they reach the local retailer or leave the production area.

The growing and harvesting of tomatoes in the production area are producer functions and should be construed as operations of the producer in his capacity as a producer. The picking is a harvesting activity normally performed as a grower function, even though it is an essential preliminary to the marketing of tomatoes.

It is common practice during the harvest season for some tomatoes grown in the production area to move directly from the field to market. However, the great bulk of tomatoes picked are eventually subjected to grading and packing operations prior to movement to market.

The initial handling activities which start with the packing and loading of tomatoes at the time they begin to move from the field should apply to all tomatoes moving into market for fresh consumption except tomatoes being transported, sold, or delivered (i) to registered packing houses within the production area or (ii) to auction markets designated by the committee. In the case of the two exceptions the tomatoes are not being transported to market for immediate consumption and such tomatoes upon sale at auction or upon delivery to packing houses are then subjected to preparation for market, i. e., washing, grading and packing. The auction buyer and the packing house operator are handlers because each is responsible for preparation for market; each determines the grade, size, quality, and maturity of tomatoes entering market channels. No useful purpose would be served by attempting to include within the definition of handle the activities leading up to and including sale of tomatoes at auction markets or to delivery of tomatoes to registered packing houses within the production area because such tomatoes are not in the usual form in which the bulk of the crop is marketed; they have not yet been graded or prepared for market; most sellers and buyers do not consider them as usual or appropriate products for commercial transactions, and as such they have not yet entered the stream of commerce. In order to maintain control of such handling it is necessary that grading be performed within the production area.

Some growers who sell tomtatoes from the field at the "end of the row" are handlers and, as such, should be held responsible for compliance with any rules and regulations issued pursuant to the marketing agreement and order. If, however, such grower should make a sale of tomatoes at the end of the row to a handler registered with the committee such registered handler should be the first handler of tomatoes and the grower would have no obligations under the marketing agreement and order. Such registered handler should assume any regulatory burdens with respect to such items as payment of assessments, inspection and certification, and compliance with grade and size regulations. This registration of handlers may be desirable, because some tomatoes are prepared for market at or near the fields where grown in locations which would impose a problem of enforcement and in the collection of assessments. The committee should have authority to register each handler-applicant who, according to committee determination, is responsible and who will conduct his packing and handling operations in accordance with program requirements. Persons making sales from the field to handlers not registered with the committee have not transferred any regulatory responsibilities but are still liable as handlers for program compliance. Each subsequent handler of such tomatoes should be held responsible for seeing to it that such tomatoes are properly inspected and certified and that they meet the applicable grade and size regulations. It has been common practice to ship tomatoes as they are picked from the field to repacking plants within Florida or occasionally to repacking plants outside the production area. This practice constitutes handling. The picking, packing, loading, hauling, or any other handling or movement of such tomatoes from the spot where grown places them in commerce by virtue of such movement and, in addition, such activities, with the exception of the activities heretofore indicated, cause the tomatoes to become a part of the visible supply of tomatoes which are available for market, and which directly burdens, obstructs, or affects interstate commerce. The sale of such tomatoes at any time during these initial marketing activities continues

such tomatoes in commerce because such sale constructively moves the tomatoes in the stream of commerce from the seller to the buyer or consignee and actual movement of such tomatoes in the stream of commerce pursuant to the instructions to the buyer or consignee constitutes sale or transportation, or both.

All tomatoes grown in the production area, which are produced for fresh market, are graded or prepared for market and such processing activities are handler functions in the marketing of such tomatoes which are included in the definition of handle.

The running of such tomatoes over a mechanical grader, or the preparation of such tomatoes for market by any other means, comes within the definition of handle because such activities determine the various outlets to which tomatoes can go and they have a direct effect upon the price which tomato growers shall receive for their crop. The matter of compliance with regulations which are authorized by the marketing agreement and order can be determined by the handler who is grading or preparing such tomatoes for market. The primary responsibility for the grade, size, and quality of tomatoes in any given unit, or in any given lot rests with the person or persons responsible for the grading operation and for the kind of tomatoes which are put in the crate or the shipping unit.

The act of selling such tomatoes makes the person who effects such sale a handler because such sale directly affects the market for tomatoes. The transportation of tomatoes also has a direct bearing on the market and the movement and sale of tomatoes, regardless of whether such sale or movement is within or outside the production area, is so inextricably intermingled that such activities cause such tomatoes to become a part of the stream of interstate commerce.

With the exception of the processes or activities specifically excluded from the definition of the term handle, all such activities, from the time tomatoes grown in the production area are picked until they are offered for retail sale within the production area by a person in his capacity as a retailer, or they move outside of the production area, are included in the process of handling. The definition of handle in the marketing agreement and order does not include the sale at retail of tomatoes by a person in his capacity as a retailer. The activities of the producer, including the growing and the harvesting of tomatoes, are not included in the definition of handle because such activities are construed as falling within the capacity of a producer as such.

(5) (a) Certain terms applying to specific individuals, agencies, legislation, concepts, or things are used throughout the recommended marketing agreement and order. Those terms should be defined for the purpose of designating specifically their applicability, and establishing approximate limitations of their respective meanings wherever they are used.

The definition of "Secretary" should include not only the Secretary of Agriculture of the United States, the official charged by law with the responsibility for programs of this nature, but also, in order to recognize the fact that it is physically impossible for him to perform personally all functions and duties imposed upon him by law, any other officer or employee of the United States Department of Agriculture who is, or who may hereafter be, authorized to act in his stead.

The definition of "act" provides the correct legal citation for the statute pursuant to which the proposed regulatory program is to be operative, and makes it unnecessary to refer to such citations thereafter.

The definition of "person" follows the definition of that term as set forth in the act, and will ensure that it will have the same meaning as used in the act.

"Producer" should be defined to mean any person who is engaged in a proprietary capacity in the production of tomatoes within the production area and who is producing such tomatoes for market. A definition of the term producer is necessary for appropriate determinations as to eligibility to vote for, and to serve as a member or alternate member of the committee, and for other reasons. The term should be limited to those who have an ownership interest in tomatoes produced in the production area. It should not include laborers or others who perform work for a fee or for hire in producing tomatoes.

Considerable controversy developed during the hearing with respect to the interpretation of the definition of producer. Numerous credit and financial arrangements are currently existent among persons connected with the growing and marketing of tomatoes in the production area which complicates the problem of determining who is a producer and who is not a producer for the purposes of the marketing agreement and order. A producer is any "person" who produces in a proprietary capacity tomatoes for market. "Person" is defined as an individual, partnership, corporation, association, or any other business unit—each of which should be considered a legal entity. Each legal entity, whether an individual, a partnership or "joint venture", or a corporation, so engaged in the production of tomatoes for market should have, for example, one voice in selecting committee members and alternates in one district.

The appropriate test for determining whether or not a person is entitled to be called a producer is whether he has the title to the particular tomatoes. A person who owns and farms land resulting in his ownership of the tomatoes produced on such land should clearly be considered as the producer of such tomatoes. The same is true with respect to a person who rents and farms land resulting in his ownership of all or a portion of the tomatoes produced thereon. Likewise, a person who owns land which he does not farm but, as rental for such land, obtains the ownership of a portion of the tomatoes produced thereon should be regarded as the producer of that portion, and the tenant on such land should be regarded as the producer of the remaining portion produced on such land. In each of the above situations, where the person acquires ownership of all of the particular tomatoes, such person, regardless of whether an individual, partnership, association, corporation, or other business unit, should be considered as one producer and entitled to one vote. However, in cases where the ownership is divided, i. e., where one person obtains ownership of only a portion of the particular production and another person obtains ownership of the other portion of such production, each such person should be considered as a producer and entitled to one vote.

There is considerable variation in the types of partnerships, including the so-called "joint ventures". The most common type appears to be the arrangement whereby one person puts up all or a part of the capital and another contributes machinery and/or skill. Another arrangement provides that one person is responsible for selling the crop, another with growing and harvesting the tomatoes. Capital, machinery, and labor may be contributed in varying degrees by each of the partners. Nevertheless, the partnership is an entity, the producer, and thus should have only one vote, the same as an individual or corporation. Any action with respect to such an organization regarding voting matters depends, therefore, on the partnership agreement and action by the partners pursuant thereto, irrespective of whether the partnership is composed of individuals, corporations, or combinations thereof.

Numerous persons are engaged in tomato growing operations who are paid for their services on a wage or per unit of production basis. As heretofore indicated, if such persons do not have title to any of the tomatoes, they are merely laborers working for a stated fee and as such should not have a producer status under the marketing agreement and order.

"Grading" and "preparation for market" are synonymous and mean the sorting of tomatoes by hand or mechanical means, or both, so that such tomatoes are separated into grade, size, maturity, and pack. Such classifications are determined by the handler who directs, in person or through his agent, how and in what number of classes the particular lot of tomatoes shall be separated. Grading may vary from an operation performed entirely by hand in which certain tomatoes are picked out when they are being loaded at the field to a production line operation whereby tomatoes are carried by mechanical conveyor for washing and waxing thence to a series of moving belts and tables, where sizes are determined and good quality, as represented by grades, sizes, and maturities, or any combination thereof, is separated from bad so that the tomatoes which are to go to preferred price outlets are separated from those going to discounted price outlets. The grading or preparation for market is an operation which applies to all tomatoes grown in the production area, even though the extent to which tomatoes are separated into market classes may vary considerably among the types of ultimate outlets. For example, sales of tomatoes in some fresh market outlets usually result in a lot of tomatoes being carefully graded so that only the preferred qualities and sizes are shipped to such outlets while the off grades and off sizes may go to less discriminating markets or canning plants which do not require such careful separation into market classifications.

Definitions of "grade" and "size" are incorporated in the marketing agreement and order to enable persons affected thereby to determine the basis for application of grade and size limitations to the product they handle. Grade and size, the essential terms in which regulations are issued, should be defined as comprehending the equivalents of the meanings assigned to these terms in (i) the official U. S. Standards for Fresh Tomatoes issued by the United States Department of Agriculture, (ii) the U. S. Consumer Standards for Fresh Tomatoes issued by the United States Department of Agriculture, and (iii) to modifications or amendments of such standards, and to variations of such standards by regulations under the marketing agreement and order. Regulations under the order can then use such terms (grade, size, and maturity) with the constant meaning assigned thereto in such standards, or in such modified or amended standards, or such regulation can vary such terms by prescribing, for example a percentage of grade, as may be required at the time of issuing such regulation. Official inspectors are qualified to certify to the grade, size, and maturity of tomatoes grown in the proposed production area, in terms of any one of the aforesaid standards, or modification, amendment, or variation thereof.

The U. S. Standards for Fresh Tomatoes are generally used for shipments of tomatoes from producing areas. However, it was testified that, in some instances, Florida tomatoes are graded in terms of the consumer standards and latitude for the application of the latter standards should be afforded.

"Pack" should be defined as the basis for distinguishing among the various units in which tomatoes are prepared for market and shipped. The term pack is commonly used throughout the tomato trade and refers to a combination of factors relating to grade, size, and maturity of the tomatoes and to the type of container. For example, 85 percent U. S. No. 1 grade tomatoes, 6 x 6's, when put in 60 pound wirebound crates may be referred to as a specific pack. U. S. No. 2, 6 x 7's, also may be termed a specific pack and with additional differentiation when packed in various types of containers. "Pack" should mean any pack of tomatoes as set forth in the U. S. Standards for Fresh Tomatoes and, in addition, should include any other packs recommended by the committee and approved by the Secretary. Since the trend in merchandising Florida tomatoes is toward the "jumble pack" as opposed to the place-pack, the committee should be permitted, under its rules and regulations, to define and establish such packs in addition to the U. S. Standard Packs as set forth in the official standards.

"Maturity" should be defined as included in the marketing agreement and order. Although the bulk of Florida tomatoes are marketed as "mature green", the so-called "pink deal" and vine ripened tomatoes are assuming a more important place in the market for Florida tomatoes. The application of different maturity stages to any regulations recommended by the committee would permit different regulations for the mature green tomatoes without inequitable regulation of the handling of either. Mature green tomatoes are firmer and less susceptible to bruising, growth cracks, and other injury or defects than are tomatoes shipped as "pinks" or vine ripened. Also local Florida markets, such as Tampa or Miami, prefer, and are better able to handle, more mature tomatoes than are such markets as New York and Boston because such tomatoes moving long distances are subjected to additional handling, which is more liable to cause damage in the case of more mature fruit. The sale of tomatoes with certain stages of maturity, such as the immature or overripe fruit, have price depressing effects on good quality tomatoes the same as do undesirable grades and sizes of tomatoes. Inspectors are qualified to inspect and certify as to maturity levels which may be recommended for handling and shipment by the committee on the same basis as they can for grade and size.

"Container" is defined in the marketing agreement and order as a basis for differentiating among the numerous shipping units in which tomatoes move to market and for the permissive application of different regulation to such different shipping units. Authority for regulation by type of container was enacted by the 83rd Congress as an amendment to the Agricultural Marketing Agreement Act of 1937, as amended. The Florida tomato industry, as represented by growers and shippers at the hearing, indicated that certain undesirable practices in the marketing of tomatoes relating to net weights and to numerous container types and sizes tend toward market disturbances. Use of the authority enacted in the recent container amendment to the act will provide a basis for alleviation of the problems associated with containers.

It is common practice in the production area for tomatoes to be moved from fields where grown to markets, packing houses, auctions, or other outlets in loose form within a truck body, herein termed bulkload. In many instances, such movement would be free of regulation in that the transportation thereof would be to registered handlers or to auction markets designated by the committee. However, in order that the term "bulk load" may be included within the definition of container and to preclude the handling thereof contrary to the purpose of the marketing agreement and order, the committee should have the authority to treat bulkloads as being subject to regulation under the container provisions. It was testified at the hearing that such a way of transportation often caused special damage to the tomatoes, much of which did not become apparent until after they had reached market, and that there should be authority to prohibit the use of such a method. Any such regulation, however, may be effected by confining permissible containers for use in handling to other specified containers of specified sizes and dimensions.

The term "varieties" is included in the marketing agreement and order so that the committee may recognize the real differences in the characteristics of different varieties and the differences in types of regulations which might be considered and recommended therefor. The great bulk of tomatoes now being produced in Florida fall within the general varietal grouping known as the Globe-type. Among the more common names associated with this type are the Jefferson, Homestead, Manalucie, Rutgers, Grothen's Globe and Manasota. Certain of these varieties are preferred and may be more adaptable within particular sections of the production area. In another case, a particular variety may be more satisfactory than others when grown especially for the "pink" deal. Although the inspection service does not now ordinarily certify as to a particular variety but only as to general type, such would be possible should the committee establish a descriptive varietal basis for use by inspectors. The marketing agreement and order should authorize different regulations so that special treatment may be given to particular varieties or no regulation need be issued in the case of newly developed or other specified varieties because of the different marketing characteristics of particular varieties which committee members and others can recognize and distinguish. The means set forth in the definition of varieties is appropriate for determining different varieties of tomatoes grown in the production area.

The definition of "committee" is incorporated in the marketing agreement and order to identify the administrative agency which is responsible for assisting the Secretary in the administration of the program. Such committee is authorized by the act and the definition thereof minimizes the use of words in the marketing agreement and order.

A definition of "fiscal period" is incorporated in the marketing agreement and order to establish the beginning and end for an operating period. The establishment of such period which should comprise a full twelve months, is necessary for business-like administration of the marketing agreement and order and is desirable as a basis for establishing the term of office of committee members and alternates. The date marking the end of one fiscal period and the beginning of the new should fall at a time of little or no activity in the marketing of the tomato crop and should allow sufficient time for the committee to organize and be prepared to function prior to the start of the new marketing season. July 31 is after the end of the spring tomato deals in Florida and August 1 is the beginning of the fall planting season. There are no reported commercial shipments of tomatoes being made from Florida during this between-season time

of year. It is, therefore, appropriate that fiscal period should be defined as set forth in the marketing agreement and order.

"District" should be defined in the marketing agreement and order as referring to each of the geographical sections or divisions of the production area, either as initially established or as later reestablished, in order to provide a basis for the nomination and selection of committee members and for regulatory purposes. The proposed division into districts is adequate and equitable and it provides a practical basis for the purposes for which intended.

"Export" should be defined in the marketing agreement and order to include all shipments of tomatoes beyond the boundaries of the continental United States. Separate treatment for export shipments may be desirable and necessary because the nature of the demand for tomatoes in export markets may differ from the requirements in the domestic markets and, therefore, different or special regulations, or even no regulations, might be justified with respect to such shipments.

Canada is the most important export market for Florida tomatoes. Cuba also provides a market for a relatively minor quantity of tomatoes grown in the production area. Customarily Canadian consumers have preferred smaller sizes of tomatoes than are sold in many domestic markets. Also, in order that handlers of Florida tomatoes may be able to meet competition in export markets, and especially in Canada, sufficient flexibility should be allowed the committee in the regulation of such exports, or to provide that relaxation of or no regulations be applicable to shipments destined to export outlets.

It was testified that territories and possessions of the United States should be included under the term "export" because of the insignificant quantity shipped thereto and the fact that the situation in that connection is analagous to shipments to foreign countries.

(b) The marketing agreement and order should provide for the selection by the Secretary of an administrative committee, called the Florida Tomato Committee composed of 15 producer members. Establishment of this committee is desirable and necessary to aid the Secretary in carrying out the declared policy of the act and such committee is authorized by the act. Inasmuch as most producers within the production area also perform handler functions and are familiar with marketing conditions for tomatoes, no useful purpose would be served by providing for handler representation, as distinct from producer representation, on the committee.

The committee membership of 15 producers would be equitable and practicable. Evidence supports the finding that this plan of representation has received intensive study by the industry and that, after thorough consideration, such division of responsibility among 15 producers is appropriate.

Each producer member of the committee should be a producer, or an officer or employee of a corporate producer, of tomatoes in the district for which selected and each such person should be a resident of the production area. A person with such qualifications should be intimately acquainted with the problems of producing or marketing tomatoes grown in such district and each may be expected to present accurately the problems incident to production or marketing of tomatoes grown in that district. The qualifications for each alternate should be the same as for the respective member for whom he may act. Such qualifications should help to assure that the interests of the group from which each is selected will be adequately represented in committee deliberations.

Each committee member and his respective alternate should serve a one year term of office ending July 31, and for any additional period needed for the selection and qualification of his successor. Such term of office is reasonable and will allow the tomato industry to express its approval or disapproval of the committee's membership at the end of any season and prior to the opening of a new season. Committee members and alternates should be selected for the fiscal period during which they are to serve and until their successors are selected and have qualified.

Districts are established to provide a basis for selection of committee members. The districts as initially established were worked out by a committee of industry spokesmen and they represent the best basis which could be devised at this time for providing a fair, adequate, and equitable representation on the committee.

The districts as set forth in the marketing agreement and order constitute what are generally known and recognized by the tomato trade as separate and distinct production sections. For example, District No. 1 is generally known as The Dade County section; District No. 2 includes the Fort Pierce "deal"; District No. 3 contains the Immokalee-Fort Myers area; District No. 4 is commonly referred to as the Manatee-Ruskin area, and includes also the Plant City-Wauchula section, and District No. 5 is known as North Central Florida, including the Marion and Sumter County "deals".

The provision for redistricting is desirable because it allows the committee to consider from time to time whether the basis for representation could be improved and how such improvements should be made. The guides as set forth in the marketing agreement and order which the committee should keep in mind in considering redistricting are appropriate and desirable points of reference that relate directly to the welfare of tomato producers and handlers.

It is practical and equitable that selection of committee members and alternates should be on the basis of districts as provided for in the marketing agreement and order. This would provide a geographical basis for selection of such members. Such geographical basis should be, and for purpose of initial membership has been, related to the number of producers and the production of tomatoes within the production area so that a practical basis for establishing equity has been reached. Although the preponderance of tomato acreage or production may exist in 2 or 3 districts, other districts may contain a numerical superiority of producers. The evidence at the hearing indicates that, in view of the above, a balanced administrative committee would be selected should each district be initially provided with the same number of committee members. In this manner both small and large producers would receive equitable treatment. The provision that three producers should be initially selected as committee members and three producers should be initially selected as committee alternates from each district is equitable and it meets with the wishes of the industry as shown by the evidence. The provision that there should be three producers selected as alternate committee members provides a practical working basis for having full representation when any member from a district is absent.

A procedure for the election by producers of nominees for membership on the committee should be prescribed in the marketing agreement and order. Such provision is intended to provide for assistance by the tomato industry to the Secretary in his selection of members and alternates on the committee. It is customary in the Florida tomato industry for producers to conduct meetings to establish their preference for positions of trust and responsibility in the tomato industry. The nomination of prospective members and alternates at meetings of producers in the respective districts is a customary and practical method of providing the Secretary with the names of the persons which the industry desires to serve on the committee. In order to obtain an indication of the industry's preference for membership on the initial committee, meetings of producers may be sponsored by the United States Department of Agriculture, or by any agency or group requested to do so by the Department. This provides a practical and an expedient means of initiating movement whereby the industry may express its wishes and preferences with respect to committee membership.

Nomination meetings for the purpose of electing nominees for members or alternates on the committee after the initial committee should be held prior to June 15 of each year. Such meetings, should be held by the committee or by persons or groups requested by such committee to hold such meetings.

At least two nominees should be designated for each position as member and each position as alternate so that the Secretary will have a choice in making his selection. In addition, if a selectee declines to serve, the Secretary would also have the name of another prospective member or alternate from which to make a selection. It is the desire of the industry, and it is appropriate that producers voting at such industry meetings may ballot for nominees to indicate the ranking of their choice for each position to be filled. Nominees lists should be supplied to the Secretary in the form and manner prescribed by him so as to establish administrative uniformity in the handling of such matters. Such nominations for committee members and alternates should be supplied to the Secretary not later than July 15 of each year.

Only producers should participate in nominating members and alternates on the committee because the committee will be composed entirely of producer members.

If a person produces tomatoes in more than one district, such person should select the district in which he wishes to cast his vote for nominees on the committee. Any other procedure would tend to give such person a greater voice than other producers in the nomination of committee members.

Each producer participating in the industry meetings for election of nominees to the committee should be limited to one vote on behalf of himself, his agents, subsidiaries, affiliates, or representatives in designating nominees. Voting on any other basis would not provide for equitable representation because it would give the producers with interest in more than one district a greater voice in election of nominees than producers operating in only one district. The plan of one vote for each producer should be so construed that the person eligible to vote in a nomination meeting shall be allowed to cast one vote for each position which is to be filled in the district with which he affiliates. For example, at meetings for election of nominees to the initial committee each person voting as a producer in a given district would be allowed to cast one vote each for each of the three member nominees and one vote for each of the three alternate member nominees.

In order that there will be an administrative agency in existence at all times to administer the marketing agreement and order, the Secretary should be authorized to select committee members and alternates without regard to nomination if, for any reason, nominations are not submitted to him in conformance with the procedure prescribed therein. Such selection should, of course, be on the basis of the representation provided in the marketing agreement and order so that the composition of the committee will at all times continue as prescribed therein.

Each person selected by the Secretary as a committee member or alternate should qualify by filing with the Secretary a written acceptance of his willingness and intention to serve in such capacity. This requirement is necessary so that the Secretary will know whether or not the position has been filled. Such acceptance should be filed within 10 days after the notification of appointment so that the composition of the committee will not be delayed unduly.

It is also desirable and necessary that the Secretary should be authorized to fill committee vacancies without regard to nominations if the names of nominees to fill any such vacancy are not made available to the Secretary within thirty days after such vacancy occurs. The Secretary should have recourse to such means of filling vacancies in order to maintain continuity of administrative agency operation and to insure that all portions of the production area are adequately represented in the conduct of committee business.

Each alternate should be authorized to act in the place and stead of a member for whom he is an alternate during such member's temporary absence. Continuity of operation of the marketing agreement and order is best assured by such authorization. An alternate should be authorized to act in a member's absence when such absence is due to death, removal, resignation, or disqualification of the member. Alternates acting in the place and stead of members may continue to act in such capacity until a successor for the member has been selected and has qualified.

A quorum of the committee should consist of at least ten members. This would not only insure that two more than a majority of the members must be in attendance at committee meetings but also would require that representation be present from at least four of five districts. Committee decisions should, therefore, reflect an accurate and representative cross section of industry thought and attitudes.

Not less than ten members of the committee should be required to concur in any committee action in order for it to pass. Such a voting requirement, constituting a minimum of two-thirds of the membership, is deemed reasonable and adequate.

The committee should be authorized to vote by telephone, telegraph, or other means of communication when a matter to be considered is so routine that it would be unreasonable to call an assembled meeting or when rapid action is necessary because of an emergency. Any votes cast at other than an assembled meeting should be confirmed promptly in writing to provide a written record of the votes so cast. In case of an assembled meeting, however, all votes should be cast in person.

Committee members and alternates should be reimbursed for necessary expenses incurred in the performance of service to the committee. Expenses for services by committee members should be allowed only for those specifically requested or directed by the committee. Such expenses might include travel, hotel accommodations, and meals. Reimbursement for reasonably necessary expenses is required to offset actual out-of-pocket expense incurred in performing duties in connection with the marketing agreement and order.

The committee should be given those specific powers which are set forth in section 8c (7) (C) of the act, because such powers are authorized to be granted by the enabling statutory authority and they are necessary so that an agency of the character set forth in the marketing agreement and order can function.

The committee's duties, as set forth in the marketing agreement and order, are necessary for the discharge of its responsibilities.

The duties established for the committee are generally similar to those specified for administrative agencies under other programs of this character. It is intended that any activities undertaken by members or alternates of the committee will be necessary for the committee to carry out its responsibilities as prescribed in the marketing agreement and order. It should be recognized that these specified duties are not necessarily all inclusive in that it may develop that there are other duties which are incidental to, and not inconsistent with, the terms and conditions of the marketing and order which the committee may need to perform.

(c) The committee should be authorized to incur such expenses as the Secretary finds are reasonable and likely to be incurred by the committee during each fiscal period for the maintenance and functioning of such committee and for such other purposes as the Secretary may, pursuant to the provisions of the marketing agreement and order, determine to be appropriate. The expenses so incurred should be shared by handlers on the basis of the ratio of each handler's total shipments to the total shipments by all handlers during specified fiscal periods. The basis for determination of the ratio of shipments by individual handlers should be based upon the total shipments by first handlers thereof.

The committee should be required to prepare a budget at the beginning of each fiscal period, and as often as may be necessary thereafter, showing estimates of income and expenditures necessary for the administration of the marketing agreement and order for such period. Each such budget should be presented to the Secretary with an analysis of its components and explanation thereof in the form of a report on such budget. It is desirable that the committee should recommend a rate of assessment to the Secretary which should be designed to bring in during each fiscal period sufficient income to cover expenses incurred by the committee.

The funds to cover the expenses of the committee should be obtained through the levying of assessments on handlers. The act specifically authorizes the Secretary to approve the incurring of such expenses by administrative agencies, such as the Florida Tomato Committee, and the statute also requires that each marketing agreement and order issued pursuant to the act should contain provisions requiring handlers to pay their pro rata shares of the necessary expenses. Moreover, in order to assure continuance of the committee, the payment of assessments by handlers should be permitted to be required irrespective of whether particular provisions of the marketing agreement and order are suspended or become inoperative.

Each handler should pay the committee upon demand his pro rata share of such reasonable expenses which the Secretary finds will be incurred necessarily by the committee during each fiscal period. Such pro rata share of expenses should be equal to the ratio between the total quantity of tomatoes handled by him as the first handler thereof during a specified fiscal period and the total quantity of tomatoes so handled by all handlers during the same fiscal period. It is necessary that responsibility for the payment of the assessment on each lot of tomatoes be fixed and it is logical to

impose such liability on the first handler of such tomatoes. In most instances the first handler and the applicant for inspection are the same person. However, in the event the first handler fails to apply for and obtain inspection, this does not in any way cancel his obligation with respect to the payment of assessments. Except in the case of movements to registered handlers and to designated auction markets, first handling should apply to tomatoes when they have been subjected to grading or preparation for market. Assessment rates should be recommended by the committee and applied by the Secretary to a specific unit of shipment. For example, assessment rates may apply to carlot shipments, or they may be applied on a crate basis, or by any other unit of shipment commonly used in marketing tomatoes grown in the production area. However, such assessments for a fiscal period should be applied on a uniform rate basis.

At any time during or subsequent to a given fiscal period the committee should be authorized to recommend the approval of an amended budget and the fixing of an increased rate of assessment to balance necessary committee expenses and revenues. Upon the basis of such recommendations, or other available information the Secretary should be authorized to approve amended budgets and, if he finds that the then current rate of assessment is insufficient to cover committee administration of the marketing agreement and order he should be authorized to increase the rate of assessment. The marketing agreement and order should authorize the application of such increased rate of assessment to all tomatoes previously handled by first handlers during the specified fiscal period so as to avoid inequities among handlers.

Funds received by the committee pursuant to the levying of assessments should be used solely for the purpose of administration of the marketing agreement and order, including appropriate research and development projects. The committee should be required to maintain books and records clearly reflecting the true up-to-date operations of its affairs so that its administration may be subject to inspection at any time by appropriate parties. Each member and each alternate, as well as employees, agents, or other persons working for or on behalf of the committee should be required to account for all receipts and disbursements, funds, property, or records for which they are responsible and the Secretary should have the authority, at any time, to ask for such accounting. Whenever any person ceases to be a member or alternate of the committee, he should be required to account for all receipts, disbursements, funds, property, books, records, and other committee assets for which he is responsible. Such persons should also be required to execute assignments or such other instruments which may be appropriate to vest in their successor or agency or person designated by the Secretary, the right to all such property and all claims vested in such person.

If the committee should recommend that the operations of the marketing agreement and order should be suspended, or if no regulation should be in effect for a part or all of a marketing season, the committee should be authorized to recommend as a practical measure that one or more of its members, or any other person, should be designated by the Secretary to act as a trustee or trustees during such period. This would provide a practical method whereby the committee's business affairs could be taken care of during periods of relative inactivity with a minimum of difficulty and expense to the industry and to the Secretary. This does not mean, however, that such a procedure would have to be followed in such a situation. If the circumstances would seem to call for such way of handling, the committee and its personnel would continue to operate, possibly in a curtailed fashion, as usual.

The committee should provide periodic reports on its fiscal operations. It is expected that audit reports shall be requested by the Secretary at appropriate times, such as the end of each marketing season, or at such other times as might be necessary to maintain appropriate supervision and control of the committee's affairs. Handlers should be entitled to a proportionate refund of the excess assessments which remain at the end of a fiscal period, or at the end of such other period as may be deemed appropriate by reason of suspension or termination. Such refund should be credited to each such handler against the operations of the following fiscal period, unless he should demand payment thereof, in which event such proportionate refund shall be paid to him.

If and when the committee is required to wind up its affairs upon termination of a marketing agreement and order authorizing such agency, considerable expense is involved in the liquidation process. The affairs of the committee which are to be liquidated usually result from a number of years' operations. It is appropriate, therefore, for the maintenance and functioning of the committee that some of the funds remaining at the end of a fiscal period, which are in excess of those necessary for payment of expenditures during such period, should be carried over into subsequent fiscal periods as a reserve for possible liquidation. Such reserve should be maintained for the purpose of helping to cover the expenses of final liquidation in the event that the marketing agreement and order are terminated. It is not anticipated that any such reserve will be accumulated in an amount in excess of what might be the reasonable costs of such a liquidation action.

Any funds remaining after liquidation has been effected should be refunded to handlers on a pro rata basis. In some cases, however, individual handler's accounts will be of such small amounts as to make impracticable the return thereof. Funds of such insignificant nature should be permitted for use by the committee for purposes of liquidation.

(d) The establishment or provision for the establishment of marketing research and development projects designed to assist, improve, or promote the marketing, distribution, and consumption of tomatoes was authorized by amendments to the act in Public Law 690, known as the Agricultural Act of 1954, enacted by the 83d Congress. Such authorization should be included in the marketing agreement and order.

Through the medium of research investigation, the committee may be able to evaluate in detail grade and size composition of the tomato crop in each of the various producing sections. More complete data in this regard would enable the committee and the Secretary to determine with a greater degree of accuracy the effect of specific regulations on the market.

Projects designed to evaluate preferences among markets and localities in terms of grade, size, quality, maturity, pack, containers, and other factors would be of considerable value in determining what regulations in those regards should be established for such markets and localities. The aid of marketing research and development projects may assist in a determination as to the effect and value of private and industry promotion of Florida tomatoes.

Research into market development, transportation, handling methods, and containers, and studies on the relative merits of different stages of maturity at which tomatoes are marketed are examples of aspects which the committee may at some time consider worthy of investigation.

As the tomato industry and the committee become more aware of the value of and need for marketing research and development, other projects will undoubtedly be initiated, the need for which will not have been foreseen early in committee operations. Therefore, the committee should have the authority to recommend the establishment of such projects which are in the best interest of tomato marketing and which will assist, improve, and promote the marketing, distribution, and consumption of Florida tomatoes. The committee should be empowered to engage in or contract for such projects, to spend funds for such purpose, and to consult and cooperate with other agencies with regard to their establishment. All such projects should receive the prior approval of the Secretary.

(e) The declared policy of the act is to establish and maintain such orderly conditions for tomatoes among other commodities, as will tend to establish parity prices for such tomatoes. The regulation of the handling of tomatoes by grade, size, quality, or maturity as authorized in the marketing agreement and order provides a means of carrying out such policy and is one of the ways authorized by the act (in section 8c (6)) for achieving that objective.

The procedures and methods which are outlined in the marketing agreement and order for the development and institution of marketing policies relating to grade, size, quality, or maturity regulation provides a practical basis for the committee to obtain appropriate and adequate information relating to tomato marketing problems. Also members of the industry, including both growers and handlers, should be provided with the

information regarding the policies and regulations recommended by the committee. The factors set forth in the marketing agreement and order which the committee should take into consideration in developing its marketing policies are the ones commonly and usually taken into account by growers and handlers in their day to day evaluation of the market outlook with respect to tomatoes.

In order that the Secretary may effectively carry out his responsibilities in connection with the marketing agreement and order, the committee should prepare and submit to the Secretary a report on its proposed marketing policy, or amendments thereto, relating to the marketing of tomatoes during each season. The initial marketing policy offered each season by the committee should be prepared and submitted to the Secretary prior to or simultaneous with its initial recommendations for regulations. This will give all interested parties the maximum notice of probable regulations. Reports on marketing policy and regulations recommended should be submitted to the Secretary and presented to the industry by the committee.

The committee ,which has responsibility for recommending grade, size, and quality regulations, as well as modifications, suspensions, amendments thereto, or terminations thereof, should be authorized to consider and recommend any or all methods of regulations which are authorized by the marketing agreement and order for the Secretary to issue thereunder. Evidence shows that authority should be established in the marketing agreement and order to issue regulations with respect to grade, size, quality, or packs in any or all portions of the production area during any period.

The limitation of the handling of poorer grades, off qualities, and less desirable sizes and maturities of tomatoes grown in the production area will tend to increase prices of more desirable grades, qualities, sizes, and maturities and to promote more orderly marketing and increase the returns to producers of such tomatoes. The two standards for fresh tomatoes issued by the U. S. Department of Agriculture would provide a common and acceptable means of determining grade, size, quality and maturity of tomatoes grown in the production area. Such standards are widely used throughout the production area, and both producers and shipping point handlers, as well as buyers, are generally acquainted with such standards and commonly use them in their market transactions. Authority should be provided for limiting the grade and size of tomatoes which may be placed in any given pack or container. The poorer grades and off qualities include not only the unclassified tomatoes as set forth in the Federal standards for tomatoes, which are commonly referred to as culls, but also other tomatoes which show defects as set forth and described in such standards and in any modifications or amendments thereto which may be considered desirable to the Secretary. The limitation of the handling by prohibiting movement of poorer grades, off qualities, and less desirable sizes of tomatoes will help to improve orderly marketing conditions for such tomatoes by enhancing the long run demand for and competitive position of tomatoes grown in the production area.

The orderly marketing of tomatoes grown in the production area, with the objective of increasing returns to producers of such tomatoes, will be promoted by authorizing the regulation of handling of particular grades, sizes, qualities, or packs of tomatoes, differently for different varieties, differently for different stages of maturity, differently for different portions of the production area, differently for different containers, differently for different markets, differently for different purposes to which modification or suspension of regulation may be applied, or differently for any combination of these groups, during any period. Demand for different varieties of tomatoes establishes price preferences for different grades or sizes, or both, of such varieties. For example, evidence establishes a basis for varietal preference at the market place. A lot of Grothen's Globe tomatoes packed in 40-pound containers realized the same or better returns as tomatoes of any other variety packed in 60-pound crates, according to the record, and the Grothen's Globes were of generally poorer quality than most of the other varieties, often failing to make grade only because of shape. Another variety was pointed out as preferred for production in connection with the vine-ripened or pink "deal." Certain varieties are preferable, or perhaps more adaptable, for growing in certain producing sections.

Different regulations in terms of different stages of maturity may provide the committee with additional flexibility of operation. Emergence of the vine-ripened and pink "deal", repacking operations in the production area, and the preference in intrastate markets for more mature fruit than is ordinarily moved to out-of-state outlets would seem to dictate the need for this type of authority in the hands of the committee.

Unusual weather conditions may arise during a crop year in one portion of the production area as compared with other portions of such area. This possibility is particularly true with respect to such things as hail, wind, and violent rain storms. Hazards of these natures are obviously beyond the control or reasonable expectation of the tomato growers in such localities. Because of these circumstances, and to provide equity among producers and handlers insofar as any regulation under the marketing agreement and order are concerned, authority should be provided for the committee to consider such differences, to make appropriate recommendations in that regard to the Secretary, and for the Secretary to issue different regulations to accommodate any such differences in the crop arising out of actions beyond human control. It is contemplated, however, that any such relaxation for a portion of the production area in those circumstances will still require that the tomatoes shipped will be the best quality available. It has been a common practice in the production area for some years to prepare specific packs of tomatoes for market. For example, the standard packs, as specified in the U. S. Standards for Fresh Tomatoes, have been in common usage for years. Since the trend in recent years has been toward the "jumble" packs (a pack without any particular arrangement of individual fruit) which are not spelled out in the standards, the committee may wish to establish and define the packs for which the handling thereof may be permitted. It is presumed that the establishment and definition of such packs, to be set forth in rules and regulations, will spell out the grades and ranges of sizes permitted to be handled in conjunction with specified containers. Certain combinations of grade, size, and containers, which factors constitute packs, should be kept out of specified market channels, at the discretion of the committee with the approval of the Secretary, because such packs contribute to disorderly marketing of tomatoes. For example, it might be desirable to withhold a shipment of pack "A", containing large ripe tomatoes in field crates, from interstate outlets because such pack would reach destination in a condition tending to demoralize the prices of tomatoes of superior packs and condition. The committee should be empowered to recommend both maximum and minimum sizes and minimum grades with respect to the handling of certain packs. The marketing agreement and order should authorize different regulations for different packs so that this part of the marketing program may help to assist the industry in furthering present merchandising approaches if they are found to be sound.

The marketing agreement and order should permit regulations differently for different types of containers. The establishment of such regulation is authorized by virtue of an amendment to the act in Public Law 690, known as the Agricultural Act of 1954, enacted by the 83d Congress. Numerous types and sizes of containers are in current use in the handling of tomatoes within the production area. Types of shipments may range from the bulk load of loose fruit to the 8-pound fibre-board box used in the pink "deal" and may also include individual consumer-size cartons containing three, four, or five tomatoes. Should the use of certain of these containers, when moved into commercial market channels, be deemed by the committee, with approval of the Secretary, as contributing to disorderly marketing of Florida tomatoes, then the Secretary should be empowered to fix the size, weight, capacity, dimensions, or pack of the container or containers which may be used in the packaging, transportation, sale, shipment, or other handling of such tomatoes. For the same reason, the committee should be permitted to recommend different regulation for different containers. For example, the committee may desire to prohibit the sale or shipment of tomatoes in field crates to interstate markets while not prohibiting the movement of such containers within the production area. The committee may make a determination that certain types

of containers are unsuitable for the handling of vine-ripened tomatoes, especially to interstate markets, because their advanced state of maturity, as compared to mature green tomatoes, may subject such fruit to excessive damage. Authority for container regulation should also be provided to permit standardization of containers where deemed feasible and in the best interests of the tomato industry. The permissive use of the authority to fix the size, weight, capacity, dimensions, and pack of containers will allow the committee and the Secretary to reduce and eliminate any deceptive practices which a few members of the tomato industry may be inclined to follow. Such misleading merchandising practices, which have tended to confuse buyers and disrupt orderly marketing of tomatoes grown in the production area, include methods of misrepresenting net weight or contents of containers. The addition of cleats, variation in size of bulge, and other such practices tend to deceive buyers and to disrupt orderly marketing. Therefore, the provisions relating to container regulation should be included in the marketing agreement and order as set forth.

The marketing agreement and order should provide authority for regulation of the handling of Florida tomatoes differently for different markets. Market requirements differ as to grade, size, quality, maturity, and other factors and, therefore, different regulations should be permitted for different markets, e. g., intrastate, interstate, and foreign. For instance, evidence indicates Canadian receivers prefer small tomatoes, and Tampa consumers desire large, ripe fruit. These market preferences should be recognized and flexibility in committee operations should be permitted to give effect to such preferences.

The marketing agreement and order should authorize different regulations during any period so that the committee and the Secretary may take account of different supply and demand conditions as they may arise and become apparent.

No evidence was introduced to substantiate the proposal relating to the prohibition of unfair methods of competition and unfair trade practices in the handling of tomatoes and no further consideration can be given to it in this proceeding. It was testified that after further consideration of this proposal, it was decided that it should be abandoned.

(f) The committee should be authorized to recommend, and the Secretary to establish, such minimum standards of quality and maturity, and such grading and inspection requirements, during any and all periods when tomato prices are above parity as will be in the public interest. Some tomatoes are of such low quality that they do not give consumer satisfaction at any time because of the large amount of waste and the time consumed in preparing them. Consumers do not receive proper value for their expenditures for such low quality tomatoes, as culls, and even when prices are above parity it is not in the public interest, either of the producers, handlers, or of consumers to permit shipments of such poor quality. The shipment of immature or overripe tomatoes also tends to disrupt general market conditions for the commodity and the discounted prices received for such immature or overripe tomatoes adversely affects grower prices. The marketing agreement and order should authorize the establishment of minimum standards of quality and maturity as will be in the public interest. It is also necessary that such authority should include grading and inspection requirements so that such minimum standards of quality and maturity may be determined whenever such regulations are in effect.

It was testified at the hearing that, in many Southern markets (Knoxville, Nashville, Birmingham, Columbia, and San Antonio were given as examples), a few handlers, in order to obtain temporary price advantage, have flooded such markets with poor quality and sizes and undesirable maturities of tomatoes. This practice has permitted such handlers to undercut prices of good quality tomatoes and has forced many other handlers to discontinue purchase of good quality Florida tomatoes and substitute therefore poor quality in order to remain on a competitive basis. In some instances separate lots of good and poor quality tomatoes have been bought at shipping point, transported to various Southern markets, and there have been commingled. The effect of these practices has been to reduce the total quantity of good quality tomatoes consumed in many markets, especially in the South, by the substitution of poor qualities and maturities. Such practices are undesirable under any set of demand and price conditions because (i) the market for good quality Florida tomatoes has been demoralized thereby reducing the total returns to the producers of such tomatoes and (ii) consumers have been denied the opportunity to purchase good edible fruit and, being offered only poor quality tomatoes, they buy none at all.

Most shipments of Florida tomatoes are made in carlots or in trucklots. Although some small shipments are made, they constitute only a minor percentage of total production. Some growers pick small quantities and peddle these to local stores, to tourists, or to other similar outlets. In addition, the sale of a few crates of tomatoes to accommodate friends or to take care of special purposes oftentimes is desirable. Problems of inspecting such small lots, or other problems in complying with regulations on such lots, may make it uneconomical, undesirable, and impracticable to require that such small shipments comply with any or all regulations required of the larger commercial shipments. The administrative difficulties in checking upon such shipments to see that they are inspected, or that they meet grade, size, quality, or maturity restrictions, or that they pay assessments may be such that it would be impracticable for the committee to attempt to do so. It might be necessary to permit the maintenance of one or more regulatory requirements on such minimum quantities while relaxing other regulations applicable to them. It is contemplated, of course, that any such relaxations of regulations will be applied uniformly.

(g) The Secretary, upon the basis of recommendations and information submitted by the committee, or other available information, should be authorized to modify, suspend, or terminate grade, size, or quality regulations with respect to the handling of tomatoes for purposes other than disposition in normal domestic fresh markets. The committee should be well qualified, because of the experience and knowledge of individual members, to recommend such modifications, suspensions, or terminations as will be in the best interests of the Florida tomato industry and which will tend to effectuate the declared policy of the act. Tomatoes moving to or sold in certain outlets, such as those specified in proposed § 945.54 of the marketing agreement and order, are usually handled in a different manner, or such outlets usually accept different grades, sizes, qualities, maturities, packs, containers, or different prices are returned, or combinations of such considerations may apply. The marketing agreement and order should provide authority for the committee and the Secretary to give appropriate consideration to handling of tomatoes for such purposes so that full opportunity may be taken by this program to improve orderly marketing conditions for tomatoes, thereby promoting the tendency to increase total returns to tomato growers in the production area.

Some export markets accept certain grades, and particularly some sizes, which normally are discounted in some domestic markets. It should be provided that modification, suspension, or termination of regulations may be applied to movement to export outlets so that this demand can be met and the sale of tomatoes grown in the production area will continue in such markets.

The marketing agreement and order should provide that special considerations may be given to the handling of tomatoes for relief or for charitable purposes. Such shipments are intended for special outlets and usually the shipments are by way of donation or due to some special consideration between the shippers and the receivers.

The committee and the Secretary should have authority to give special consideration to tomatoes which move to processing outlets. At present such outlets include the canning plants whence tomatoes move as a salvage operation. It is desirable to permit the committee authority to assure that such tomatoes do, in fact, end up in the outlet for which intended.

Shipment of tomatoes, among other vegetables, for the purpose of having such tomatoes processed at canning plants, are specifically exempted from regulation by the act. Any mention of tomatoes for canning or processing herein has particular reference merely to a safeguard, which requirement may cause such shipments to canners to be reported to the committee for the sole purpose of assuring the committee and the tomato industry that such shipments are, in fact, moved to the outlet for which intended. No other regulation or restriction is implied on tomatoes for canning or processing.

For purposes which may develop in the future, the committeee should be empowered to provide special treatment through modification, suspension, or termination of regulation applicable thereto, for other purposes which later may be specified by the committee with the approval of the Secretary.

The requirement that the Secretary shall notify the committee of any regulations or any modifications, suspensions, or terminations of regulations is appropriate and necessary to enable the committee to be informed of such actions. The committee's obligations to give reasonable notice by such means as are deemed adequate to inform producers and handlers of regulatory orders issued by the Secretary is appropriate and necessary for proper and efficient administration of the marketing agreement and order.

The authority for modifying, suspending, or terminating grade, size, quality, assessment, or inspection regulations should be accompanied by the additional administrative authority for the committee to recommend and the Secretary to prescribe adequate safeguards to prevent shipments for such purposes from entering market channels contrary to the provisions of such special regulations. Such safeguards may be recommended by the committee and they should be administered by the committee. The authority for establishment of safeguards should include such limitations or appropriate qualifications on shipments which are necessary and incidental to the proper and efficient administration of the marketing agreement and order. Such safeguards, among others, may include inspection so that the committee may have an accurate record of the grade, size, and quality of tomatoes shipped to special outlets, applications to make such special shipments, requirements for the payment of assessments in connection with such shipments, reports by handlers on the number of such shipments and the amounts of tomatoes shipped, and assurances by purchasers that the tomatoes are to be used for the purpose designated.

In order to maintain appropriate identification of shipments of tomatoes to special outlets, the safeguards authorized herein may provide for the issuance of certificates of privilege to handlers of such tomatoes and, in addition, require that such handlers shall obtain such certificates on all shipments by them to such special outlets. Certificates of privilege may be issued by the committee as an indication of the authority for a handler to make such shipments and as a means of identifying specific shipments. Such certificates of privilege should be issued in accordance with rules and regulations established by the Secretary on the basis of committee recommendations, or other available information, so that the issuance of such certificates may be handled in an orderly and efficient manner which can be made known to all handlers. The committee should be authorized by the marketing agreement and order to deny or rescind certificates of privilege when such action is necessary to prevent abuse of the privileges conferred thereby. The committee should be authorized to exercise the authority necessary and incidental to the proper administration of the marketing agreement and order which should include the authority to rescind or deny certificates upon evidence satisfactory to it that a handler to whom a certificate of privilege has been issued has handled tomatoes contrary to the provisions of the certificate previously issued to him. If the committee rescinds or denies a certificate of privilege to any handler, such action should be in terms of a specified period of time. Handlers affected by the denial of a certificate or the rescinding of such a certificate should have the right of appeal to the committee for a reconsideration.

The Secretary should have the right to modify, change, alter, or rescind any safeguards prescribed or any certificates of privilege issued by the committee in order that the Secretary may retain all rights necessary to carry out the declared policy of the act. The Secretary should give prompt notice to the committee of any action taken by him in connection therewith and the committee should currently notify all persons affected by the indicated action.

The committee should maintain records relevant to safeguards and to certificates of privilege and should submit reports thereon to the Secretary when requested in order to supply pertinent information requisite for him to discharge his duties under the act and the marketing agreement and order.

(h) Inspection of tomatoes grown in the production area by the Federal-State inspection service is a common and usual practice for the purpose of determining officially the grade, size, quality, and maturity of such tomatoes. Federal-State inspection service has operated in the State of Florida for a number of years. The tomato growers and handlers throughout the production area are acquainted with the service and with the inspection which it offers on shipments of tomatoes. Federal-State inspection is available throughout the entire production area and reasonably prompt inspection can be given at all points within the production area at a reasonable time prior to the anticipated shipment of the tomatoes to be inspected.

Provision is made in the marketing agreement and order for inspection by the Federal-State inspection service, or such other inspection service as the Secretary may approve, of the handling of tomatoes grown in the production area during any period in which handling of tomatoes is regulated under the program. Such inspection requirements should apply to all tomatoes handled under regulations issued under the marketing agreement and order, except when any such handling is relieved from inspection requirements pursuant to § 945.53 or § 945.54 of the marketing agreement and order. Provision for inspection of handling subject to regulation establishes a means for providing the handler, the buyer, the committee, the Secretary, and other interested parties with a means of determining whether such handling of tomatoes complies with the requirements of any particular grade, size, quality, and maturity regulation which may be in effect under the marketing agreement and order. Effective regulation of the handling of tomatoes grown in the production area requires that the grade, size, quality, and maturity of each sale or shipment of such tomatoes should be authoritatively established so that the administration of the marketing agreement and order shall be efficient and effective. The provision for inspection and the certificates which are issued pursuant to inspection offer an appropriate and practical means of establishing and identifying the grade, size, quality, and maturity of tomatoes handled pursuant to the terms and conditions of the proposed marketing agreement and order.

Copies of inspection certificates issued pursuant to the requirements of the marketing agreement and order should be supplied to the committee promptly so that such committee may properly discharge its administrative responsibilities under the program.

Provision should be made in the marketing agreement and order for authority to inspect tomatoes not only by personnel of the Federal-State inspection service but also by personnel of such inspection service as the Secretary may designate so that sufficient flexibility for successful operation can be provided through appropriate inspection if Federal-State inspection is not available.

The requirement that no handler shall handle tomatoes unless each lot of tomatoes is inspected by an authorized inspection service approved under the marketing agreement and order is reasonable and it is necessary for the proper administration of the program. Such requirements should apply except to those tomatoes which may be relieved of inspection requirements pursuant to § 945.53 or § 945.54, or both.

Responsibility for obtaining inspection should fall primarily on the handler who first handles such tomatoes after they have been prepared for market because each lot of such tomatoes must be identified and certified with respect to grade, size, quality, and maturity. Such identification and certification is essential to proper administration of the marketing agreement and order so that a determination may be made as to whether such shipment accords with the grade, size, quality, and maturity regulations issued under such order. The handler who so first handles tomatoes is required to obtain inspection and subsequent handlers may not handle tomatoes unless a properly issued inspection certificate valid under the terms of the marketing agreement and order applies to such shipments. Each handler must bear responsibility for determining that each of his shipments is inspected. If a handler should receive tomatoes which have not been inspected, he should be responsible for having them inspected. Such requirement is necessary so that the committee can obtain evidence in the form of inspection certificates which it needs to carry out its appropriate functions in determining if specific shipments have

been inspected and if they otherwise meet requirements of the marketing agreement and order and regulations issued pursuant thereto.

Whenever any shipment of tomatoes subject to the terms and provisions of the markting agreement and order have been inspected at the time of first shipment but such tomatoes are later dumped from the containers in which they were inspected, such tomatoes lose their identity insofar as the original inspection certificate for them is concerned. If any such lot of tomatoes is thereafter repacked, such repacked tomatoes may have a new identity and the subsequent handling of such tomatoes should comply with regulations issued under the marketing agreement and order. Such requirement is necessary to effectuate the declared policy of the act. Therefore, the marketing agreement and order should provide that the committee may require any person who handles Florida tomatoes after they have been repacked, resorted, or regraded shall not ship such tomatoes unless they have been inspected. A reinspection of regraded, resorted, or repacked tomatoes may be necessary, in certain cases, so that the shipper thereof, as well as subsequent handlers, and the committee may determine if such shipments comply with the regulations then in effect and applicable thereto.

The committee, with the approval of the Secretary, should be authorized to determine the length of time the inspection certificate is valid insofar as the requirements of the marketing agreement and order are concerned. Such requirement is appropriate and necessary especially with respect to lot inspections which may be administratively desirable to accommodate handlers and truckers because tomatoes are an extremely perishable commodity.
